SUPPLEMENTARY INFORMATION: On February 6, 2002, the FAA issued Emergency AD (EAD) 2002–02–51, which required checking for a gap between the adhesive bead and the metal bushing on each arm end and, if a gap was found, replacing the STARFLEX. After issuing that EAD, we discovered the inadvertent omission of a STAFFLEX part number (P/N) from the applicability. That omission created an undue economic burden to the owners and operators of a significant percentage of the affected helicopters. That omission could have also created confusion to the personnel checking this flight critical part because there are a number of different STARFLEX configurations installed on the affected model helicopters. This condition, if not corrected, could have resulted in failure of the operators to properly conduct the check, failure to detect a gap between the adhesive bead and the metal bushing on the arm end, severe lateral vibrations, and subsequent loss of control of the helicopter. Therefore, to eliminate any confusion, the FAA issued superseding EAD 2002–03–52 on February 8, 2002, which contains the same requirements as EAD 2002–02–51 but limits the applicability of this AD to those helicopters that have STARFLEX, P/N 350A31–1916–00, installed.

The Direction Generale De L'Aviation Civile (DGAC), the airworthiness authority for France, notified the FAA that an unsafe condition may exist on these helicopter models. The DGAC advises of several occurrences of rapid bonding failure of the metal bushing installed on the arm ends, severe vibrations, and some emergency landings.

ECF has issued Alert Telex Nos. 05.00.38, 05.00.37R1, and 05.A.001R1, dated November 13, 2001 (Telex). The Telex specifies checking for a gap between the adhesive bead and the metal bushing bonded on each arm end. ECF is currently analyzing modifications to this assembly. The DGAC classified this Telex as mandatory and issued AD Nos. 2001–557–086(A) R1, 2001–558–064(A) R1, and 2001–559–002(A) R1, all dated November 28, 2001, to ensure the continued airworthiness of these helicopters in France.

These helicopter models are manufactured in France and are type certificated for operation in the United States under the provisions of 14 CFR 21.29 and the applicable bilateral agreement. Pursuant to the applicable bilateral agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of these type designs that are certificated for operation in the United States.

This unsafe condition is likely to exist or develop on other helicopters of the same type designs registered in the United States. Therefore, the FAA issued Emergency AD 2002–03–52 to require, at specified intervals, checking for a gap between the adhesive bead and the metal bushing bonded on each of the arm ends and, if a gap is found, before further flight, replacing any STARFLEX with an airworthy part.

The short compliance time involved is required because the previously described critical unsafe condition can adversely affect the controllability or structural integrity of the helicopter. Therefore, checking for a gap between the adhesive bead and the metal bushing is required before each start of the engines and thereafter at intervals not to exceed 4 hours time-in-service, and this AD must be issued immediately.

An owner/operator (pilot) may perform the visual check required by paragraph (a) of this AD and must enter compliance with this AD into the helicopter maintenance records in accordance with 14 CFR 43.11 and 91.417(a)(2)(v). This AD allows a pilot to perform this check because it involves only a visual check for a gap between the adhesive bead and the metal bushing on each arm end and can be performed equally well by a pilot or a mechanic.

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD immediately effective by individual letters issued on February 8, 2002, to all known U.S. owners and operators of these helicopters. These conditions still exist, and the AD is hereby published in the **Federal Register** as an amendment to 14 CFR 39.13 to make it effective to all persons.

The FAA estimates that 30 helicopters will be affected by this AD, that it will take approximately 0.1 work hour to inspect the adhesive bead of the metal bushing bonded on each arm end, and that the average labor rate is $60 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $6 per helicopter and $180 for one inspection of the fleet. Assuming 10 additional inspections per week for all helicopters, the fleet cost per year will be $93,600.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their mailed comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 2002–SW–09–AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive to read as follows:

2002–03–52 Eurocopter France: Amendment 39–12681. Docket No. 2002–SW–09–AD. Supersedes Emergency AD 2002–02–51, Docket No. 2002–SW–02–AD.

Applicability: Model AS350B, AS350BA, AS350B1, AS350B2, AS350B3, AS350C, AS350D, AS350D1, AS355E, AS355F, AS355F1, AS355F2, AS355N, and EC130 B4 helicopters, with STARFLEX, part number 350A31–1916–00, installed, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability

VOL

2002
UMI

provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required before each start of the engines and thereafter at intervals not to exceed 4 hours time-in-service.

To detect bonding failure between the metal bushing and each STARFLEX star arm end (arm end), which could result in severe lateral vibrations and subsequent loss of control of the helicopter, accomplish the following:

(a) Check for a gap between the adhesive bead and the metal bushing bonded on each of the three arm ends.

Note 2: Alert Telex Nos. 05.00.38, 05.00.37 R1, and 05.A.001 R1, dated November 13, 2001, pertain to the subject of this AD.

(b) An owner/operator (pilot) may perform the visual check required by paragraph (a) of this AD and must enter compliance with this AD into the helicopter maintenance records in accordance with 14 CFR 43.11 and 91.417(a)(2)(v). This AD allows a pilot to perform this check because it involves only a visual check for a gap between the adhesive bead and the bushing on each arm end and can be performed equally well by a pilot or a mechanic.

(c) If you find a gap between the adhesive bead and the metal bushing, replace the STARFLEX with an airworthy part before further flight.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Regulations Group, Rotorcraft Directorate, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Regulations Group.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Regulations Group.

(e) Special flight permits will not be issued.

(f) This amendment becomes effective on April 4, 2002.

Note 4: The subject of this AD is addressed in Direction Generale De L'Aviation Civile (France) AD Nos. 2001–557–086(A) R1, 2001–558–064(A) R1, and 2001–559–002(A) R1, all dated November 28, 2001.

Issued in Fort Worth, Texas, on March 11, 2002.

David A. Downey,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2001–SW–20–AD; Amendment 39–12680; AD 2002–06–04]

RIN 2120–AA64

Airworthiness Directives; Eurocopter France Model AS350B, AS350B1, AS350B2, AS350B3, AS350BA, AS350C, AS350D, AS350D1, AS355E, AS355F, AS355F1, AS355F2, and AS355N Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) for specified Eurocopter France (ECF) helicopters that requires replacing the tail rotor hub pitch change plate "SNR" bearing (bearing). This amendment is prompted by fatigue cracks found in the bearings. The actions specified by this AD are intended to prevent seizure of the bearing, loss of tail rotor effectiveness, and subsequent loss of control of the helicopter.

DATES: Effective April 24, 2002.

FOR FURTHER INFORMATION CONTACT: Jim Grigg, Aviation Safety Engineer, FAA, Rotorcraft Directorate, Rotorcraft Standards Staff, Fort Worth, Texas 76193–0110, telephone (817) 222–5490, fax (817) 222–5961.

SUPPLEMENTARY INFORMATION: A proposal to amend 14 CFR part 39 to include an AD for ECF Model AS350B, AS350B1, AS350B2, AS350B3, AS350BA, AS350C, AS350D, AS350D1, AS355E, AS355F, AS355F1, AS355F2, and AS355N helicopters was published in the **Federal Register** on November 28, 2001 (66 FR 59375). That action proposed replacing each bearing with an airworthy bearing at specified intervals. Also, that action noted that transferring a bearing from one model to another is permissible by complying with the transfer rules described in the Master Servicing Recommendations Chapter 05.99.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposal or the FAA's determination of the cost to the public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 514 helicopters of U.S. registry will be affected by this AD, that it will take approximately 5 work hours per helicopter to accomplish the required actions, and that the average labor rate is $60 per work hour. Required parts will cost approximately $90 per helicopter. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $200,460.

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive to read as follows:

2002–06–04 Eurocopter France: Amendment 39–12680. Docket No. 2001–SW–20–AD.

Applicability: Model AS350B, AS350B1, AS350B2, AS350B3, AS350BA, AS350C, AS350D, AS350D1, AS355E, AS355F, AS355F1, AS355F2, and AS355N helicopters, with tail rotor hub pitch change plate "SNR" bearing (bearing) part number (P/N) 6010F234M16 (Eurocopter France P/N 704A33–651–190), installed, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent seizure of the bearing, loss of tail rotor effectiveness, and subsequent loss of control of the helicopter, accomplish the following:

(a) For Model AS350B3 and AS355N helicopters, replace each bearing with an airworthy bearing as follows:

(1) Within 30 hours time-in-service (TIS) for each bearing that has 270 or more hours TIS as of the effective date of this AD.

(2) Before reaching 300 hours TIS for each bearing that has less than 270 hours TIS as of the effective date of this AD.

(3) Thereafter, replace each bearing at intervals not to exceed 300 hours TIS.

(b) For all other Model AS350 or AS355 helicopters, replace each bearing with an airworthy bearing as follows:

(1) Within 50 hours TIS for each bearing that has 1150 hours or more TIS as of the effective date of this AD.

(2) Before reaching 1200 hours TIS for each bearing that has less than 1150 hours TIS as of the effective date of this AD.

(3) Thereafter, replace each bearing at intervals not to exceed 1200 hours TIS.

Note 2: Eurocopter France Alert Telex Nos. 01.00.46 and 01.00.48, both dated February 22, 2001, pertain to the subject of this AD.

(c) When transferring a bearing from one model helicopter to another (refer to the equipment log card), adhere to the transfer rules described in the applicable master servicing recommendations. Remove each bearing from service at or before the service life limits given in paragraphs (a)(3) and (b)(3) of this AD.

Note 3: The Master Servicing Recommendations for the affected helicopters, Chapter 05.99, pertain to the subject of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Regulations Group, Rotorcraft Directorate, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Regulations Group.

Note 4: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Regulations Group.

(e) Special flight permits may be issued in accordance with 14 CFR 21.197 and 21.199 to operate the helicopter to a location where the requirements of this AD can be accomplished.

Note 5: The subject of this AD is addressed in Direction Generale De L'Aviation Civile (France) AD Nos. 2001–073–061(A) and 2001–074–081(A), both dated March 21, 2001.

(f) This amendment becomes effective on April 4, 2002.

Issued in Fort Worth, Texas, on March 11, 2002.

David A. Downey,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

Payment of Duties on Certain Steel Products

AGENCY: Customs Service, Department of the Treasury.

ACTION: Temporary rule.

SUMMARY: This is a temporary rule that requires importers of the steel products described in the Presidential Proclamation 7529 of March 5, 2002, To Facilitate Positive Adjustment to Competition From Imports of Certain Steel Products published in the **Federal Register** (67 FR 10553) on March 7, 2002, to defer until April 19, 2002, the deposit of the estimated Customs duties described in the Proclamation on those products entered, or withdrawn from warehouse for consumption in the Customs territory of the United States on or after 12:01 a.m., EST, March 20, 2002 and up to April 4, 2002. This temporary rule implements an instruction of the President regarding the Presidential Proclamation.

EFFECTIVE DATE: This temporary rule is effective at 12:01 a.m. EST, March 20, 2002, and expires on April 20, 2002. This temporary rule applies to those steel products described in Presidential Proclamation 7529 of March 5, 2002, To Facilitate Positive Adjustment to Competition From Imports of Certain Steel Products published in the **Federal Register** (67 FR 10535) on March 7, 2002, that are entered or withdrawn from warehouse for consumption in the Customs territory of the United States on or after 12:01 a.m., EST, March 20, 2002 and up to April 4, 2002.

FOR FURTHER INFORMATION CONTACT: Millie Gleason, Office of Field Operations (202) 927–0625.

SUPPLEMENTARY INFORMATION:

Background

On March 5, 2002, President George W. Bush signed Presidential Proclamation 7529, a proclamation to facilitate positive adjustment to competition from imports of certain steel products. The Proclamation, which was issued under the President's authority under section 203 of the Trade Act of 1974, as amended (19 U.S.C. 2253), established increases in duty and a tariff-rate quota on imports of certain steel products. These safeguard measures were taken by the President to facilitate efforts by the domestic industry to make positive adjustment to import competition and provide greater economic and social benefits than costs. In the Proclamation, the President provides that if he determines within 30 days of the Proclamation that consultations between the United States and other World Trade Organization (WTO) members pursuant to Article 12.3 of the WTO Agreement on Safeguards have revealed a compelling reason to reduce, modify, or terminate a safeguard measure, he shall proclaim a corresponding reduction, modification, or termination of the safeguard measure.

In conjunction with the Proclamation, President Bush also sent a memorandum dated March 5, 2002, to the Secretary of the Treasury, the Secretary of Commerce, and the United States Trade Representative requiring action under section 203 of the Trade Act of 1974 (19 U.S.C. 2253). In that memorandum, the President instructed the Secretary of the Treasury, pursuant to section 505(a) of the Tariff Act of 1930 (19 U.S.C. 1505(a)), to prescribe by regulation a date no later than 45 days after the date of the memorandum at which estimated duties for the steel products described in the Proclamation that are entered or withdrawn from warehouse for consumption on or after 12:01 a.m., EST, March 20, 2002, and up to the 30th day after the signing of the memorandum shall be deposited. The purpose of this deferral of duty is to facilitate consultations between the United States and its foreign trading partners concerning the President's determination in accordance with Article 12.3 of the World Trade Organization Agreement on Safeguards.

The Proclamation and the Memorandum for the Secretary of the Treasury, the Secretary of Commerce, and the United States Trade Representative were published in the **Federal Register** (67 FR 10553, 67 FR 10593) on March 7, 2002. The effective date of the Proclamation is March 20, 2002.

This document sets forth the temporary regulation that the President instructed the Secretary of the Treasury to prescribe. It is noted that, pursuant to the regulation set forth below, only deposit of the duties required pursuant to Presidential Proclamation 7529 is deferred. The deferral of deposit of duties is not applicable to regular duties, including antidumping and countervailing duties, that are owed on the entry of products covered by the Proclamation.

Administrative Procedure Act, Regulatory Flexibility Act and Executive Order 12866

This regulation implements a direction of the President of the United States pursuant to his authority under section 203 of the Trade Act of 1974, as amended (19 U.S.C. 2253) to take all appropriate and feasible action within his power which he determines will facilitate efforts by the domestic industry to make a positive adjustment to import competition and provide greater economic and social benefits than costs. Accordingly, there is good cause that notice and public procedure are contrary to the public interest pursuant to 5 U.S.C. 553(b)(B). For the same reason, and because this temporary rule relieves importers from the obligation to deposit estimated duties, a delayed effective date is not required pursuant to 5 U.S.C. 553(d)(1) and (3). Moreover, because this temporary rule facilitates consultations between the United States and its foreign trading partners concerning the President's determination in accordance with Article 12.3 of the World Trade Organization Agreement on Safeguards, this rule involves a foreign affairs function of the United States that is exempt from notice and public procedure, as well as a delayed effective date, pursuant to 5 U.S.C. 553(a)(1).

Because no notice of proposed rulemaking is required, this temporary rule is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) Nor is this temporary rule a "significant regulatory action" for purposes of E.O. 12866.

Amendment to the Regulations

Part 141, Customs Regulations (19 CFR part 141) is amended as set forth below.

PART 141—ENTRY OF MERCHANDISE

1. The general authority citation for part 141 and the specific authority citation for subpart G continue to read, and a new specific authority for § 141.102(f) is added in appropriate numerical order to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1431, 1433, 1434, 1624; 46 U.S.C. App. 3, 91.

* * * * *

Subpart G also issued under 19 U.S.C. 1505;

* * * * *

Section 141.102(f) also issued under Presidential Proclamation 7529;

* * * * *

2. Section 141.102 is amended by adding a new paragraph (f) to read as follows:

§ 141.102 When deposit of estimated duties, estimated taxes, or both not required.

* * * * *

(f) *Steel products described in Presidential Proclamation 7529 of March 5, 2002, To Facilitate Positive Adjustment to Competition From Imports of Certain Steel Products.* An importer of the steel products described in Presidential Proclamation 7529 of March 5, 2002, To Facilitate Positive Adjustment to Competition From Imports of Certain Steel Products published in the **Federal Register** (67 FR 10553) on March 7, 2002, must defer until April 19, 2002, the deposit of the estimated Customs duties described in the Proclamation on those products entered, or withdrawn from warehouse for consumption in the Customs territory of the United States on or after 12:01 a.m., EST, March 20, 2002, and up to April 4, 2002.

Robert C. Bonner,

Commissioner of Customs.

Approved: March 18, 2002.

Timothy E. Skud,

Acting Deputy Assistant Secretary of the Treasury.

BILLING CODE 4820–02–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 710

[FHWA Docket No. FHWA–2001–8624]

RIN 2125–AE82

Right-of-Way and Real Estate; Program Administration

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: This document amends the right-of-way regulations for federally assisted transportation projects to clarify that financial assistance provided by the FHWA may participate in relocation assistance benefits, provided by State and local agencies pursuant to State law, that are in addition to the relocation benefits prescribed by the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act), as amended.

DATES: This final rule is effective April 19, 2002.

FOR FURTHER INFORMATION CONTACT: Mr. James E. Ware, Office of Real Estate Services, HEPR, (202) 366–2019, or Mr. Reid Alsop, Office of Chief Counsel, HCC–30, (202) 366–1371, FHWA 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Electronic Access

Internet users may access all comments received by the U.S. DOT Dockets, Room PL–401, by using the universal resource locator (URL): *http://dms.dot.gov.* It is available 24 hours each day, 365 days each year. Please follow the instructions online for more information and help.

An electronic copy of this document may be downloaded by using a modem and suitable communications software from the Government Printing Office's Electronic Bulletin Board Service at (202) 512–1661. Internet users may reach the **Federal Register**'s home page at *http://www.nara.gov/fedreg* and the Government Printing Office's database at: *http://www.access.gpo.gov/nara.*

Background

The FHWA provides funds to the States and other organizations to reimburse them for the costs they have incurred in constructing highways and other transportation related projects pursuant to title 23, United States Code. These projects frequently involve the acquisition of real property or the displacement of persons, businesses and farms. The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act), as amended (42 U.S.C. 4601 *et seq.*) ensures the fair and equitable treatment of persons whose real property is acquired or who are displaced as a result of a Federal or federally-assisted project. The FHWA regulations dealing with reimbursement, and the acquisition and management of real property, are contained in 23 CFR part 710.

On May 9, 2001, we published a notice of proposed rulemaking (NPRM) at 66 FR 23636, to propose amending our right-of-way regulations for federally assisted transportation projects to provide clarification. The NPRM described the development of the current regulation, which revised FHWA's policy on participation in costs incurred by States in the acquisition of real property. Basically, the FHWA now participates in any acquisition costs that are required by State law. In the NPRM, we proposed to revise the regulations to clarify that Federal financial assistance, provided by the FHWA pursuant to title 23, U.S.C., may be applied to relocation assistance benefits provided by State and local agencies, pursuant to State law, that are in addition to the relocation benefits prescribed by the Uniform Act.

The FHWA believes that its participation in such relocation payments is permissible based on the FHWA's general authority to participate in the costs of "construction," which is defined in 23 U.S.C. 101(a)(3) to include both costs of right-of-way acquisition and relocation assistance. We believe that the broad language in 23 CFR 710.203(b)(1) allows for this type of assistance; however, we received several inquiries regarding the FHWA's participation in relocation payments made by some States, pursuant to State law, that are in addition to those required by the Uniform Act. Therefore, in the NPRM we proposed amending section 710.203(b)(2) to clarify this matter.

Discussion of Comments

We received two written comments and one oral comment to the docket. The three commenters were from the Oregon, Washington, and Wisconsin State departments of transportation. The Washington DOT supported the proposed revision noting that the current Uniform Act benefits are inadequate for businesses. The Wisconsin DOT provided several technical comments. It noted that the

VOL
67
ISS
54
MR
20
2002
UMI

change would allow Federal participation in some increased payments provided by State law, but was also concerned that more local governments might avail themselves of Federal funds thereby increasing its oversight responsibilities.

The Oregon DOT provided a verbal comment that questioned whether the proposed clarification would allow the FHWA to participate in relocation payments to aliens not lawfully present in the United States (illegal aliens). While the intent of this clarification is to emphasize that States have the flexibility in using the FHWA funds to participate in relocation payments required by State law, in addition to those payments mandated by the Uniform Act, we do not believe that the FHWA should permit the participation of Federal funds in such relocation payments to persons who Congress has specifically excluded from Uniform Act coverage. The Congress stated specifically in section 4605(a) of the Uniform Act that, with limited exceptions, a person not lawfully present in the United States is not eligible to receive relocation assistance under the Uniform Act (42 U.S.C. 4605(a)).

The Congress clearly stated that displaced persons shall not be eligible to receive relocation payments or any other assistance under the Uniform Act if they are not lawfully present in the United States. Consistent with that prohibition we have provided in this final rule that the FHWA will not participate in relocation assistance and payments provided by States to aliens not lawfully present in the United States.

We have adopted the change proposed with a slight modification, as discussed above, to deny Federal participation in relocation assistance and payments provided to illegal aliens. The primary reason for this change remains the same as stated in the NPRM, to make it clear that FHWA participation policies concerning both State acquisition costs and State relocation costs are the same. That is, the FHWA will participate in those acquisition and relocation costs that are required by State law (except for relocation costs to illegal aliens).

This basic participation policy promotes program streamlining. It gives States flexibility in the use of Federal aid funds available to the States. Further, it eliminates administrative burdens that would result if it were necessary to analyze all acquisition and relocation costs and categorize them as either participating or nonparticipating for purposes of Federal assistance.

Finally, if the NRPM were not adopted uncertainty would remain as to whether acquisition costs required by State law and relocation costs required by State law should be treated differently for purposes of Federal participation.

While we are aware of the Wisconsin DOT's concern regarding possible increased oversight, we note that one of the primary purposes of this change is to increase the ability of States to effectively manage their acquisition and relocation programs. In the absence of any further comments, we believe that the promulgation of this final rule is necessary to advance the important program streamlining objectives noted above.

Rulemaking Analyses and Notice

Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

The FHWA has determined that this action is not a significant regulatory action within the meaning of Executive Order 12866, nor is it a significant regulatory policy and procedure. It is anticipated that the economic impact of this rulemaking will be minimal; therefore, a full regulatory evaluation is not required. The FHWA does not consider this action to be a significant regulatory action because this rule clarifies existing requirements relating to FHWA reimbursement for certain expenditures that are required by State law. Neither the individual or cumulative impact of this action is significant because this action would not alter the funding levels available to the states for Federal or federally assisted programs covered by title 23, U.S. Code.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 601–612), the agency has evaluated the effects of this rule on small entities and hereby certifies that this action will not have a significant economic impact on a substantial number of small entities. This action would merely clarify existing procedures.

Environmental Impact

The FHWA has also analyzed this action for the purpose of the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), and has determined that this action would not have any effect on the quality of the human environment.

Executive Order 13132 (Federalism)

The FHWA has analyzed this action in accordance with the principles and criteria contained in Executive Order 13132, and determined that this action does not have sufficient federalism implications to warrant the preparation of a federalism assessment. This rule clarifies that greater flexibility is placed at the State or local level in the use of Federal funds in recognition of State laws. Nothing in this document directly preempts any State law or regulation.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

Unfunded Mandates Reform Act

Under Section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 109 Stat. 48), the FHWA must prepare a budgetary impact statement on any proposal or final rule that includes a Federal mandate that may result in estimated annual costs to State, local or tribal government of $100 million or more. The FHWA has determined that this rule will not result in estimated costs of $100 million or more to State, local, or tribal governments. This action simply clarifies existing requirements. Accordingly no additional costs to State, local or tribal governments are anticipated as a result of this action.

Executive Order 12988 (Civil Justice Reform)

This action meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Executive Order 13045 (Protection of Children)

The FHWA has analyzed this action under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or safety that may disproportionately affect children.

Executive Order 12630 (Taking of Private Property)

This rule will not affect a taking of private or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Paperwork Reduction Act

This proposal contains no new collection of information requirements for purposes of the Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3520.

Regulation Identification Number

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

List of Subjects in 23 CFR Part 710

Grant programs-transportation, Highways and roads, Real property acquisition, Rights-of-way.

Issued on: March 13, 2002.

Mary E. Peters,

Federal Highway Administrator.

In consideration of the foregoing, the FHWA amends title 23, Code of Federal Regulations, Chapter 1, by revising Part 710 as set forth below:

PART 710—[AMENDED]

1. The authority citation for part 710 continues to read as follows:

Authority: 23 U.S.C. 101(a), 107, 108, 111, 114, 133, 142(f), 145, 156, 204, 210, 308, 315, 317, and 323; 42 U.S.C. 2000d *et seq.*, 4633, 4651–4655; 49 CFR 1.48(b) and (cc), 18.31, and parts 21 and 24; 23 CFR 1.32.

2. Revise § 710.203(b)(2) to read as follows:

§ 710.203 Funding and reimbursement.

* * * * *

(b) * * *

(2) *Relocation assistance and payments.* Usual costs and disbursements associated with the following:

(i) Relocation assistance and payments required under 49 CFR part 24, and

(ii) Relocation assistance and payments provided under the laws of the State that may exceed the requirements of 49 CFR part 24, except for relocation assistance and payments provided to aliens not lawfully present in the United States.

* * * * *

§ 710.409 [Amended]

3. Amend § 710.409(a) by revising the reference "§ 710.403(c)" to read "§ 710.403(d)".

[FR Doc. 02–6760 Filed 3–19–02; 8:45 am]

BILLING CODE 4910–22–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[TD 8985]

RIN 1545–AY02

Hedging Transactions

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the character of gain or loss from hedging transactions. The regulations reflect changes to the law made by the Ticket to Work and Work Incentives Improvement Act of 1999. The regulations affect businesses entering into hedging transactions.

DATES: *Effective Date:* These regulations are effective March 20, 2002.

Applicability Dates: For dates of applicability of these regulations, see the discussion in the Dates of Applicability paragraph in the Supplementary Information portion of the preamble.

FOR FURTHER INFORMATION CONTACT: Elizabeth Handler, (202) 622–3930 or Viva Hammer at (202) 622–0869 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collections of information contained in these final regulations have been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) under control number 1545–1480. Some responses to these collections of information are mandatory, and others are required to obtain the benefit of the separate-entity election.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

The estimated annual burden per respondent or recordkeeper varies from .1 to 40 hours, depending on individual circumstances, with an estimated average of 5.9 hours.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be sent to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, W:CAR:MP:FP:S, Washington, DC 20224, and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any Internal Revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document contains amendments to 26 CFR Part 1 under section 1221 of the Internal Revenue Code (Code). Prior to amendment in 1999, section 1221 generally defined a capital asset as property held by the taxpayer other than: (1) Stock in trade or other types of assets includible in inventory; (2) property used in a trade or business that is real property or property subject to depreciation; (3) certain copyrights (or similar property); (4) accounts or notes receivable acquired in the ordinary course of a trade or business; and (5) U.S. government publications.

In 1994, the IRS published in the **Federal Register** (59 FR 36360) final Treasury regulations under section 1221 providing for ordinary character treatment for certain business hedges. The regulations generally apply to transactions that reduce risk with respect to ordinary property, ordinary obligations, and borrowings of the taxpayer and that meet certain identification requirements. (§ 1.1221–2). In 1996, the IRS published in the **Federal Register** (61 FR 517) final regulations on the character and timing of gain or loss from hedging transactions entered into by members of a consolidated group. In this preamble, the final regulations published in 1994 and 1996 are referred to collectively as the Treasury regulations.

On December 17, 1999, section 1221 was amended by section 532 of the Ticket to Work and Work Incentives Improvement Act of 1999 (113 Stat 1860) to provide ordinary gain or loss treatment for hedging transactions and consumable supplies. Section 1221(a)(7) provides ordinary treatment for hedging transactions that are clearly identified as such before the close of the day on which they were acquired, originated, or entered into.

The statute defines a hedging transaction as a transaction entered into by the taxpayer in the normal course of business primarily to manage risk of interest rate, price changes, or currency fluctuations with respect to ordinary property, ordinary obligations, or borrowings of the taxpayer. Sections 1221(b)(2)(A)(i) and (ii). The statutory

definition of hedging transaction also includes transactions to manage such other risks as the Secretary may prescribe in regulations. Section 1221(b)(2)(A)(iii). Further, the statute grants the Secretary the authority to provide regulations to address the treatment of nonidentified or improperly identified hedging transactions, and hedging transactions involving related parties (sections 1221(b)(2)(B) and (b)(3), respectively). The statutory hedging provisions are effective for transactions entered into on or after December 17, 1999. Congress intended that the hedging rules be the exclusive means through which the gains and losses from hedging transactions are treated as ordinary. S. Rep. No. 201, 106th Cong., 1st Sess. 25 (1999).

Section 1221(a)(8) provides that supplies of a type regularly consumed by the taxpayer in the ordinary course of a taxpayer's trade or business are not capital assets. That provision is effective for supplies held or acquired on or after December 17, 1999.

A notice of proposed rulemaking (REG–107047–00, 2001–14 I.R.B. 1002) was published in the **Federal Register** (66 FR 4738) on January 18, 2001. On May 16, 2001, the IRS held a public hearing on the proposed regulations. Written comments responding to the notice of proposed rulemaking were also received. In response to these comments, the proposed regulations were modified and as so modified are adopted as final regulations. The principal changes to the proposed regulations are discussed below.

Explanation of Provisions

Coordination With International Provisions of the Code

The provisions of these regulations generally apply to determine the character of gain or loss from transactions that are also subject to various international provisions of the Code. Paragraph (a)(4) of the regulations, however, provides that the character of gain or loss on section 988 transactions is not determined under these regulations because gain or loss on those transactions is ordinary under section 988(a)(1). In addition, no implication is intended as to what constitutes "risk management" or "managing risk" for purposes of proposed or final regulations under section 482.

Paragraph (a)(4) of the proposed regulations provided that the definition of a hedging transaction under § 1.1221–2(b) of the proposed regulations would apply for purposes of certain other international provisions of the Code only to the extent provided in regulations issued under those provisions. Technical changes have been made in the final regulations to eliminate references to proposed regulations as well as Code sections for which the relevant regulations have not been issued in final form. Subsequent regulations will specify the extent to which the rules relating to hedging transactions that are contained in § 1.1221–2 will be applicable for purposes of those other regulations and related Code sections.

Risk Management Standard

Several commentators noted that the proposed regulations used risk reduction as the operating standard to implement the risk management definition of hedging introduced by section 1221(b)(2)(A). These commentators found that risk reduction is too narrow a standard to encompass the intent of Congress which defined hedges to include transactions that manage risk of interest rate, price changes or currency fluctuations. They urged the IRS and Treasury to adopt a broader definition of hedging to reflect Congress' intent. With one exception, the commentators did not suggest a definition of risk management.

In response to these comments, the final regulations have been restructured to implement the risk management standard. No definition of risk management is provided, but instead, the rules characterize a variety of classes of transactions as hedging transactions because they manage risk. Risk reducing transactions still qualify as one class of hedging transactions, but there are also others. In addition, specific provision is made for the recognition of additional types of qualifying risk management transactions through published guidance or private letter rulings. Under the final regulations, as under the proposed regulations, transactions entered into for speculative purposes will not qualify as hedging transactions. See S. Rep. No. 201, 106th Cong., 1st Sess. 24 (1999).

Application on the Basis of Separate Business Units

The proposed regulations provided that a taxpayer has risk of a particular type only if it is at risk when all of its operations are considered. That is, risk must exist on a "macro" basis. For this purpose, under the proposed regulations, a taxpayer has to show that hedges of particular assets or liabilities, or groups of assets or liabilities, are reasonably expected to reduce the overall risk of the taxpayer's operations.

Commentators pointed out that this entity-based approach to hedging is no longer uniform business practice. Instead, businesses often conduct risk management on a business unit by business unit basis. In response to these comments, the final regulations permit the determination of whether a transaction manages risk to be made on a business unit basis provided that the business unit is within a single entity or consolidated return group that adopts the single-entity approach. An example was added to the final regulations in which for one taxpayer, the determination of whether hedging activities reduce risk is made at the business unit level. In the example, the conduct of risk management activities within separate business units is undertaken as part of a program to reduce the overall risk of the taxpayer's operations.

Fixed-to-Floating Interest Rate Hedges

Paragraph (c)(1) of the proposed regulations recognized that a transaction that economically converts an interest rate or price from a fixed rate or price to a floating rate or price may manage risk. Commentators suggested that the rule in the proposed regulations provides insufficient guidance in that it states only that fixed-to-floating interest rate or price hedges may be hedging transactions. In response to these comments, the regulations have been restructured to separately address interest rate hedges and price hedges.

Commentators suggested that in the case of interest rate conversions, a taxpayer may choose to convert from a floating to a fixed rate to fix the amount payable on the obligation. However, a taxpayer could also elect to convert from a fixed to a floating rate to insure that the value of the liability remained relatively constant. In response to these comments, the final regulations provide that a transaction that converts an interest rate from a fixed rate to a floating rate or from a floating rate to a fixed rate manages risk. With respect to fixed-to-floating price hedges, the final regulations adopt the proposed rules without change.

Transactions Not Entered Into Primarily To Manage Risk

Paragraph (c)(3) of the proposed regulations provided that the purchase or sale of certain assets will not qualify as a hedging transaction if the assets are not acquired primarily to manage risk. This rule was illustrated by the example of a taxpayer that has an interest rate risk from a floating rate borrowing and that acquires debt instruments bearing a comparable floating interest rate.

Although the taxpayer's interest rate risk from the floating rate borrowing may be reduced by the purchase of the floating rate debt instruments, the proposed regulations provided that the acquisition of the debt instruments is not made primarily to reduce risk and, therefore, is not a hedging transaction.

The IRS and Treasury understand that some employers may invest in assets (such as shares of a mutual fund) that are used as a reference investment for purposes of computing their liability to employees under a nonqualified deferred compensation plan. A question may arise whether such an investment may constitute a hedging transaction and, if so, whether income from the investment may be deferred by the employer until payments of deferred compensation are made to employees. See § 1.446–4(b); but compare *Albertson's, Inc.* v. *Commissioner*, 42 F.3d 537 (9th Cir. 1994).

The rule in the proposed regulations is based on § 1.1221–2(c)(1)(vii). The rule has been restated in the final regulations to refer specifically to investments in debt instruments, equity securities, and annuity contracts so as to provide greater certainty in its application. For this purpose certain transactions in instruments that are not themselves debt instruments may include a debt investment. See, *e.g.*, § 1.446–3(g)(4). Further, the final regulations provide that the IRS may identify by future published guidance specified transactions that are determined not to be entered into primarily to manage risk. An example has been added to the final regulations to illustrate that an investment in mutual fund shares in the case described in the preceding paragraph does not qualify as a hedging transaction. A similar example is added with respect to an investment in an annuity contract.

Hedging Risks Other Than Interest Rate or Price Changes, or Currency Fluctuations

Paragraph (c)(8) of the proposed regulations provided that the Commissioner may, by published guidance, provide that hedging transactions include transactions entered into to manage risks other than interest rate or price changes, or currency fluctuations.

The notice of proposed rulemaking solicited comments regarding the expansion of the definition of hedging transactions to include transactions that manage risks other than interest rate or price changes, or currency fluctuations with respect to ordinary property, ordinary obligations or borrowings of the taxpayer. Some comments were received in response to that request. Because the comments described hedging transactions that related to the general operating results of a business (such as gross sales) rather than specific ordinary property, ordinary obligations or borrowings of the taxpayer, the implementation of rules respecting such hedges would present a number of issues not easily dealt with by the rules contained in the final regulations. Thus, the expansion of the scope of operation of the hedging rules is not being proposed at this time, so as not to delay the publication of guidance on the matters that are covered by the final regulations. However, the IRS is continuing to consider whether to expand the definition of hedging transactions to cover hedges of such other risks. The IRS and Treasury invite comments on the types of risks that should be covered, including specific examples of derivative transactions that may be incorporated into future guidance, as well as the appropriate timing of inclusion of gains and losses with respect to such transactions. Send submissions to: CC:ITA:RU (REG–107047–00), room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044.

"Gap" Hedges

The status of so-called gap hedges was not separately addressed in the proposed regulations and is not covered in the final regulations. Insurance companies, for example, sometimes hedge the gap between their liabilities and the assets that fund them. Under the final regulations, a hedge of those assets would not qualify as a hedging transaction if the assets are capital assets. Whether a gap hedge qualifies as a liability hedge is a question of fact and depends on whether it is more closely associated with the liabilities than with the assets.

Identification Requirement

A rule has been added specifying additional information that must be provided for a transaction that counteracts a hedging transaction.

Dates of Applicability

The regulations generally apply to all transactions entered into on or after March 20, 2002. However, the IRS will not challenge any transaction entered into on or after December 17, 1999, and before March 20, 2002, that satisfies the provisions of either § 1.1221–2 of REG–107047–00, published in the **Federal Register** (66 FR 4738) on January 18, 2001, or the provisions of this final regulation.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It is hereby certified that the collection of information in these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based upon the fact that very few small businesses enter into hedging transactions due to their cost and complexity. Further, those small businesses that hedge enter into very few hedging transactions because hedging transactions are costly, complex, and require constant monitoring and a sophisticated understanding of the capital markets. Therefore, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required. Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking preceding these regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of these regulations is Elizabeth Handler, Office of the Associate Chief Counsel (Financial Institutions and Products). However, other personnel from the IRS and Treasury Department participated in their development.

Par. 3. Section 1.1221–2 is revised to read as follows:

§ 1.1221–2 Hedging transactions.

(a) *Treatment of hedging transactions*—(1) *In general.* This section governs the treatment of hedging transactions under section 1221(a)(7). Except as provided in paragraph (g)(2) of this section, the term capital asset does not include property that is part of a hedging transaction (as defined in paragraph (b) of this section).

(2) *Short sales and options.* This section also governs the character of gain or loss from a short sale or option that is part of a hedging transaction. Except as provided in paragraph (g)(2) of this section, gain or loss on a short sale or option that is part of a hedging transaction (as defined in paragraph (b) of this section) is ordinary income or loss.

(3) *Exclusivity.* If a transaction is not a hedging transaction as defined in paragraph (b) of this section, gain or loss from the transaction is not made ordinary on the grounds that property involved in the transaction is a surrogate for a noncapital asset, that the transaction serves as insurance against a business risk, that the transaction serves a hedging function, or that the transaction serves a similar function or purpose.

(4) *Coordination with section 988.* This section does not apply to determine the character of gain or loss realized on a section 988 transaction as defined in section 988(c)(1) or realized with respect to any qualified fund as defined in section 988(c)(1)(E)(iii).

(b) *Hedging transaction defined.* Section 1221(b)(2)(A) provides that a hedging transaction is any transaction that a taxpayer enters into in the normal course of the taxpayer's trade or business primarily—

(1) To manage risk of price changes or currency fluctuations with respect to ordinary property (as defined in paragraph (c)(2) of this section) that is held or to be held by the taxpayer;

(2) To manage risk of interest rate or price changes or currency fluctuations with respect to borrowings made or to be made, or ordinary obligations incurred or to be incurred, by the taxpayer; or

(3) To manage such other risks as the Secretary may prescribe in regulations (see paragraph (d)(6) of this section).

(c) *General rules*—(1) *Normal course.* Solely for purposes of paragraph (b) of this section, if a transaction is entered into in furtherance of a taxpayer's trade or business, the transaction is entered into in the normal course of the taxpayer's trade or business. This rule includes managing risks relating to the expansion of an existing business or the acquisition of a new trade or business.

(2) *Ordinary property and obligations.* Property is ordinary property to a taxpayer only if a sale or exchange of the property by the taxpayer could not produce capital gain or loss under any circumstances. Thus, for example, property used in a trade or business within the meaning of section 1231(b) (determined without regard to the holding period specified in that section) is not ordinary property. An obligation is an ordinary obligation if performance or termination of the obligation by the taxpayer could not produce capital gain or loss. For purposes of this paragraph (c)(2), the term termination has the same meaning as it does in section 1234A.

(3) *Hedging an aggregate risk.* The term hedging transaction includes a transaction that manages an aggregate risk of interest rate changes, price changes, and/or currency fluctuations only if all of the risk, or all but a de minimis amount of the risk, is with respect to ordinary property, ordinary obligations, or borrowings.

(4) *Managing risk*—(i) *In general.* Whether a transaction manages a taxpayer's risk is determined based on all of the facts and circumstances surrounding the taxpayer's business and the transaction. Whether a transaction manages a taxpayer's risk may be determined on a business unit by business unit basis (for example by treating particular groups of activities, including the assets and liabilities attributable to those activities, as separate business units), provided that the business unit is within a single entity or consolidated return group that adopts the single-entity approach. A taxpayer's hedging strategies and policies as reflected in the taxpayer's minutes or other records are evidence of whether particular transactions were entered into primarily to manage the taxpayer's risk.

(ii) *Limitation of risk management transactions to those specifically described.* Except as otherwise determined by published guidance or by private letter ruling, a transaction that is not treated as a hedging transaction under paragraph (d) does not manage risk. Moreover, a transaction undertaken for speculative purposes will not be treated as a hedging transaction.

(d) *Transactions that manage risk*—(1) *Risk reduction transactions*—(i) *In general.* A transaction that is entered into to reduce a taxpayer's risk, manages a taxpayer's risk.

(ii) *Micro and macro hedges*—(A) *In general.* A taxpayer generally has risk of a particular type only if it is at risk when all of its operations are considered. Nonetheless, a hedge of a particular asset or liability generally will be respected as reducing risk if it reduces the risk attributable to the asset or liability and if it is reasonably expected to reduce the overall risk of the taxpayer's operations. If a taxpayer hedges particular assets or liabilities, or groups of assets or liabilities, and the hedges are undertaken as part of a program that, as a whole, is reasonably expected to reduce the overall risk of the taxpayer's operations, the taxpayer generally does not have to demonstrate that each hedge that was entered into pursuant to the program reduces its overall risk.

(B) *Example.* The following example illustrates the rules stated in paragraph (d)(1)(ii)(A) of this section:

Example. Corporation X manages its business operations by treating particular groups of activities, including the assets and liabilities attributable to those assets, as separate business units. A separate set of books and records is maintained with respect to the activities, assets and liabilities of separate business unit *y*. As part of a risk management program that Corporation X reasonably expects to reduce the overall risks of its business operations, Corporation X enters into hedges to reduce the risks of separate business unit *y*. Corporation X may demonstrate that the hedges reduce risk by taking into account only the activities, assets and liabilities of business unit *y*.

(iii) *Written options.* A written option may reduce risk. For example, in appropriate circumstances, a written call option with respect to assets held by a taxpayer or a written put option with respect to assets to be acquired by a taxpayer may be a hedging transaction. See also paragraph (d)(3) of this section.

(iv) *Fixed-to-floating price hedges.* Under the principles of paragraph (d)(1)(ii)(A) of this section, a transaction that economically converts a price from a fixed price to a floating price may reduce risk. For example, a taxpayer with a fixed cost for its inventory may be at risk if the price at which the inventory can be sold varies with a particular factor. Thus, for such a taxpayer a transaction that converts its fixed price to a floating price may be a hedging transaction.

(2) *Interest rate conversions.* A transaction that economically converts an interest rate from a fixed rate to a floating rate or that converts an interest rate from a floating rate to a fixed rate manages risk.

(3) *Transactions that counteract hedging transactions.* If a transaction is entered into primarily to offset all or any part of the risk management effected by one or more hedging transactions, the transaction is a hedging transaction. For example, if a written option is used to reduce or eliminate the risk reduction obtained from another position such as a purchased option, then it may be a hedging transaction.

(4) *Recycling.* A taxpayer may enter into a hedging transaction by using a position that was a hedge of one asset or liability as a hedge of another asset or liability (recycling).

(5) *Transactions not entered into primarily to manage risk*—(i) *Rule.* Except as otherwise determined in published guidance or private letter ruling, the purchase or sale of a debt instrument, an equity security, or an annuity contract is not a hedging transaction even if the transaction limits or reduces the taxpayer's risk with respect to ordinary property, borrowings, or ordinary obligations. In addition, the Commissioner may determine in published guidance that other transactions are not hedging transactions.

(ii) *Examples.* The following examples illustrate the rule stated in paragraph (d)(5)(i) of this section:

Example 1. Taxpayer borrows money and agrees to pay a floating rate of interest. Taxpayer purchases debt instruments that bear a comparable floating rate. Although taxpayer's interest rate risk from the floating rate borrowing may be reduced by the purchase of the debt instruments, the acquisition of the debt instruments is not a hedging transaction, because the transaction is not entered into primarily to manage the taxpayer's risk.

Example 2. Taxpayer undertakes obligations to pay compensation in the future. The amount of the future compensation payments is adjusted as if amounts were invested in a specified mutual fund and were increased or decreased by the earnings, gains and losses that would result from such an investment. Taxpayer invests funds in the shares of the mutual fund. Although the investment in shares of the mutual fund reduces the taxpayer's risk of fluctuation in the amount of its obligation to employees, the investment was not made primarily to manage the taxpayer's risk. Accordingly, the transaction is not a hedging transaction.

Example 3. Taxpayer provides a nonqualified retirement plan for employees that is structured like a defined contribution plan. Based on a schedule that takes into account an employee's monthly salary and years of service with the taxpayer, the taxpayer makes monthly credits to an account for each employee. Each employee may designate that the account will be treated as if it were used to pay premiums on a variable annuity contract issued by the M insurance company with a value that reflects a specified investment option. M offers a number of investment options for its variable annuity contracts. Taxpayer invests funds in M company variable annuity contracts that parallel the investment options selected by the employees. The investment is not made primarily to manage the taxpayer's risk and is not a hedging transaction.

(6) *Hedges of other risks.* The Commissioner may, by published guidance, determine that hedging transactions include transactions entered into to manage risks other than interest rate or price changes, or currency fluctuations.

(7) *Miscellaneous provision*—(i) *Extent of risk management.* A taxpayer may hedge all or any portion of its risk for all or any part of the period during which it is exposed to the risk.

(ii) *Number of transactions.* The fact that a taxpayer frequently enters into and terminates positions (even if done on a daily or more frequent basis) is not relevant to whether these transactions are hedging transactions. Thus, for example, a taxpayer hedging the risk associated with an asset or liability may frequently establish and terminate positions that hedge that risk, depending on the extent the taxpayer wishes to be hedged. Similarly, if a taxpayer maintains its level of risk exposure by entering into and terminating a large number of transactions in a single day, its transactions may nonetheless qualify as hedging transactions.

(e) *Hedging by members of a consolidated group*—(1) *General rule: single-entity approach.* For purposes of this section, the risk of one member of a consolidated group is treated as the risk of the other members as if all of the members of the group were divisions of a single corporation. For example, if any member of a consolidated group hedges the risk of another member of the group by entering into a transaction with a third party, that transaction may potentially qualify as a hedging transaction. Conversely, intercompany transactions are not hedging transactions because, when considered as transactions between divisions of a single corporation, they do not manage the risk of that single corporation.

(2) *Separate-entity election.* In lieu of the single-entity approach specified in paragraph (e)(1) of this section, a consolidated group may elect separate-entity treatment of its hedging transactions. If a group makes this separate-entity election, the following rules apply:

(i) *Risk of one member not risk of other members.* Notwithstanding paragraph (e)(1) of this section, the risk of one member is not treated as the risk of other members.

(ii) *Intercompany transactions.* An intercompany transaction is a hedging transaction (an intercompany hedging transaction) with respect to a member of

a consolidated group if and only if it meets the following requirements—

(A) The position of the member in the intercompany transaction would qualify as a hedging transaction with respect to the member (taking into account paragraph (e)(2)(i) of this section) if the member had entered into the transaction with an unrelated party; and

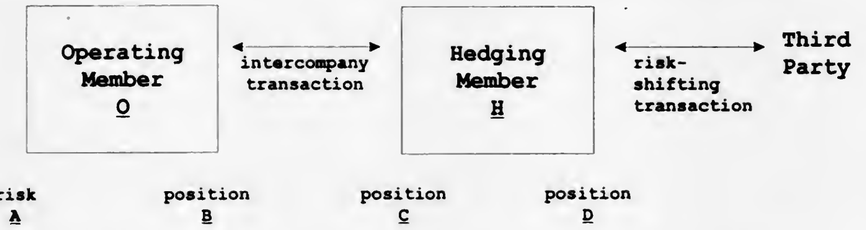
(B) The position of the other member (the marking member) in the transaction is marked to market under the marking member's method of accounting.

(iii) *Treatment of intercompany hedging transactions.* An intercompany hedging transaction (that is, a transaction that meets the requirements of paragraphs (e)(2)(ii)(A) and (B) of this section) is subject to the following rules—

(A) The character and timing rules of § 1.1502–13 do not apply to the income, deduction, gain, or loss from the intercompany hedging transaction; and

(B) Except as provided in paragraph (g)(3) of this section, the character of the marking member's gain or loss from the transaction is ordinary.

(iv) *Making and revoking the election.* Unless the Commissioner otherwise prescribes, the election described in this paragraph (e)(2) must be made in a separate statement saying "[Insert Name and Employer Identification Number of Common Parent] HEREBY ELECTS THE APPLICATION OF SECTION 1.1221–2(e)(2) (THE SEPARATE-ENTITY APPROACH)." The statement must also indicate the date as of which the election is to be effective. The election must be signed by the common parent and filed with the group's Federal income tax return for the taxable year that includes the first date for which the election is to apply. The election applies to all transactions entered into on or after the date so indicated. The election may be revoked only with the consent of the Commissioner.



(3) *Definitions.* For definitions of consolidated group, divisions of a single corporation, group, intercompany transactions, and member, see section 1502 and the regulations thereunder.

(4) *Examples. General Facts.* In these examples, *O* and *H* are members of the same consolidated group. *O*'s business operations give rise to interest rate risk "*A*," which *O* wishes to hedge. *O* enters into an intercompany transaction with *H* that transfers the risk to *H*. *O*'s position in the intercompany transaction is "*B*," and *H*'s position in the transaction is "*C*." *H* enters into position "*D*" with a third party to reduce the interest rate risk it has with respect to its position *C*. *D* would be a hedging transaction with respect to risk *A* if *O*'s risk *A* were *H*'s risk. The following examples illustrate this paragraph (e):

Example 1. Single-entity treatment—(i) General rule. Under paragraph (e)(1) of this section, *O*'s risk *A* is treated as *H*'s risk, and therefore *D* is a hedging transaction with respect to risk *A*. Thus, the character of *D* is determined under the rules of this section, and the income, deduction, gain, or loss from *D* must be accounted for under a method of accounting that satisfies § 1.446–4. The intercompany transaction *B–C* is not a hedging transaction and is taken into account under § 1.1502–13.

(ii) *Identification. D* must be identified as a hedging transaction under paragraph (f)(1) of this section, and *A* must be identified as the hedged item under paragraph (f)(2) of this section. Under paragraph (f)(5) of this section, the identification of *A* as the hedged item can be accomplished by identifying the positions in the intercompany transaction as hedges or hedged items, as appropriate. Thus, substantially contemporaneous with entering into *D*, *H* may identify *C* as the hedged item and *O* may identify *B* as a hedge and *A* as the hedged item.

Example 2. Separate-entity election; counterparty that does not mark to market. In addition to the *General Facts* stated above, assume that the group makes a separate-entity election under paragraph (e)(2) of this section. If *H* does not mark *C* to market under its method of accounting, then *B* is not a hedging transaction, and the *B–C* intercompany transaction is taken into account under the rules of section 1502. *D* is not a hedging transaction with respect to *A*, but *D* may be a hedging transaction with respect to *C* if *C* is ordinary property or an ordinary obligation and if the other requirements of paragraph (b) of this section are met. If *D* is not part of a hedging transaction, then *D* may be part of a straddle for purposes of section 1092.

Example 3. Separate-entity election; counterparty that marks to market. The facts are the same as in *Example 2* above, except that *H* marks *C* to market under its method of accounting. Also assume that *B* would be a hedging transaction with respect to risk *A* if *O* had entered into that transaction with an unrelated party. Thus, for *O*, the *B–C* transaction is an intercompany hedging transaction with respect to *O*'s risk *A*, the character and timing rules of § 1.1502–13 do not apply to the *B–C* transaction, and *H*'s income, deduction, gain, or loss from *C* is ordinary. However, other attributes of the items from the *B–C* transaction are determined under § 1.1502–13. *D* is a hedging transaction with respect to *C* if it meets the requirements of paragraph (b) of this section.

(f) *Identification and recordkeeping—*(1) *Same-day identification of hedging transactions.* Under section 1221(a)(7), a taxpayer that enters into a hedging transaction (including recycling an existing hedging transaction) must clearly identify it as a hedging transaction before the close of the day on which the taxpayer acquired, originated, or entered into the transaction (or recycled the existing hedging transaction).

(2) *Substantially contemporaneous identification of hedged item—*(i) *Content of the identification.* A taxpayer that enters into a hedging transaction must identify the item, items, or aggregate risk being hedged. Identification of an item being hedged generally involves identifying a transaction that creates risk, and the type of risk that the transaction creates. For example, if a taxpayer is hedging the price risk with respect to its June purchases of corn inventory, the transaction being hedged is the June purchase of corn and the risk is price movements in the market where the taxpayer buys its corn. For additional rules concerning the content of this identification, see paragraph (f)(3) of this section.

(ii) *Timing of the identification.* The identification required by this paragraph (f)(2) must be made substantially contemporaneously with entering into the hedging transaction. An identification is not substantially contemporaneous if it is made more than 35 days after entering into the hedging transaction.

(3) *Identification requirements for certain hedging transactions.* In the case of the hedging transactions described in this paragraph (f)(3), the identification under paragraph (f)(2) of this section must include the information specified.

(i) *Anticipatory asset hedges.* If the hedging transaction relates to the anticipated acquisition of assets by the taxpayer, the identification must include the expected date or dates of acquisition and the amounts expected to be acquired.

(ii) *Inventory hedges.* If the hedging transaction relates to the purchase or sale of inventory by the taxpayer, the identification is made by specifying the type or class of inventory to which the transaction relates. If the hedging transaction relates to specific purchases or sales, the identification must also include the expected dates of the purchases or sales and the amounts to be purchased or sold.

(iii) *Hedges of debt of the taxpayer—*(A) *Existing debt.* If the hedging transaction relates to accruals or payments under an issue of existing debt of the taxpayer, the identification must specify the issue and, if the hedge is for less than the full issue price or the full term of the debt, the amount of the issue price and the term covered by the hedge.

(B) *Debt to be issued.* If the hedging transaction relates to the expected issuance of debt by the taxpayer or to accruals or payments under debt that is expected to be issued by the taxpayer, the identification must specify the following information: the expected date of issuance of the debt; the expected maturity or maturities; the total expected issue price; and the expected interest provisions. If the hedge is for less than the entire expected issue price of the debt or the full expected term of the debt, the identification must also include the amount or the term being hedged. The identification may indicate a range of dates, terms, and amounts, rather than specific dates, terms, or amounts. For example, a taxpayer might identify a transaction as hedging the yield on an anticipated issuance of fixed rate debt during the second half of its fiscal year, with the anticipated amount of the debt between $75 million and $125 million, and an anticipated term of approximately 20 to 30 years.

(iv) *Hedges of aggregate risk—*(A) *Required identification.* If a transaction hedges aggregate risk as described in paragraph (c)(3) of this section, the identification under paragraph (f)(2) of this section must include a description of the risk being hedged and of the hedging program under which the hedging transaction was entered. This requirement may be met by placing in the taxpayer's records a description of the hedging program and by establishing a system under which individual transactions can be identified as being entered into pursuant to the program.

(B) *Description of hedging program.* A description of a hedging program must include an identification of the type of risk being hedged, a description of the type of items giving rise to the risk being aggregated, and sufficient additional information to demonstrate that the program is designed to reduce aggregate risk of the type identified. If the program contains controls on speculation (for example, position limits), the description of the hedging program must also explain how the controls are established, communicated, and implemented.

(v) *Transactions that counteract hedging transactions.* If the hedging transaction is described in paragraph (d)(3) of this section, the description of the hedging transaction must include an identification of the risk management transaction that is being offset and the original underlying hedged item.

(4) *Manner of identification and records to be retained—*(i) *Inclusion of identification in tax records.* The identification required by this paragraph (f) must be made on, and retained as part of, the taxpayer's books and records.

(ii) *Presence of identification must be unambiguous.* The presence of an identification for purposes of this paragraph (f) must be unambiguous. The identification of a hedging transaction for financial accounting or regulatory purposes does not satisfy this requirement unless the taxpayer's books and records indicate that the identification is also being made for tax purposes. The taxpayer may indicate that individual hedging transactions, or a class or classes of hedging transactions, that are identified for financial accounting or regulatory purposes are also being identified as hedging transactions for purposes of this section.

(iii) *Manner of identification.* The taxpayer may separately and explicitly make each identification, or, so long as paragraph (f)(4)(ii) of this section is satisfied, the taxpayer may establish a system pursuant to which the identification is indicated by the type of transaction or by the manner in which the transaction is consummated or recorded. An identification under this system is made at the later of the time that the system is established or the time that the transaction satisfies the terms of the system by being entered, or by being consummated or recorded, in the designated fashion.

(iv) *Principles of paragraph (f)(4)(iii) of this section illustrated.* Paragraphs (f)(4)(iv)(A) through (C) of this section illustrate the principles of paragraph (f)(4)(iii) of this section and assume that the other requirements of this paragraph (f) are satisfied.

(A) A taxpayer can make an identification by designating a hedging transaction for (or placing it in) an account that has been identified as containing only hedges of a specified item (or of specified items or specified aggregate risk).

(B) A taxpayer can make an identification by including and retaining in its books and records a statement that designates all future transactions in a specified derivative product as hedges of a specified item, items, or aggregate risk.

(C) A taxpayer can make an identification by designating a certain mark, a certain form, or a certain legend as meaning that a transaction is a hedge of a specified item (or of specified items or a specified aggregate risk). Identification can be made by placing the designated mark on a record of the transaction (for example, trading ticket, purchase order, or trade confirmation) or by using the designated form or a record that contains the designated legend.

(5) *Identification of hedges involving members of the same consolidated group—*(i) *General rule: single-entity approach.* A member of a consolidated group must satisfy the requirements of this paragraph (f) as if all of the members of the group were divisions of a single corporation. Thus, the member entering into the hedging transaction with a third party must identify the hedging transaction under paragraph (f)(1) of this section. Under paragraph (f)(2) of this section, that member must also identify the item, items, or aggregate risk that is being hedged, even if the item, items, or aggregate risk relates primarily or entirely to other members of the group. If the members of a group use intercompany transactions to transfer risk within the group, the requirements of paragraph (f)(2) of this section may be met by identifying the intercompany transactions, and the risks hedged by the intercompany transactions, as

hedges or hedged items, as appropriate. Because identification of the intercompany transaction as a hedge serves solely to identify the hedged item, the identification is timely if made within the period required by paragraph (f)(2) of this section. For example, if a member transfers risk in an intercompany transaction, it may identify under the rules of this paragraph (f) both its position in that transaction and the item, items, or aggregate risk being hedged. The member that hedges the risk outside the group may identify under the rules of this paragraph (f) both its position with the third party and its position in the intercompany transaction. Paragraph (e)(4) *Example 1* of this section illustrates this identification.

(ii) *Rule for consolidated groups making the separate-entity election.* If a consolidated group makes the separate-entity election under paragraph (e)(2) of this section, each member of the group must satisfy the requirements of this paragraph (f) as though it were not a member of a consolidated group.

(6) *Consistency with section 1256(e)(2).* Any identification for purposes of section 1256(e)(2) is also an identification for purposes of paragraph (f)(1) of this section.

(g) *Effect of identification and non-identification*—(1) *Transactions identified*—(i) *In general.* If a taxpayer identifies a transaction as a hedging transaction for purposes of paragraph (f)(1) of this section, the identification is binding with respect to gain, whether or not all of the requirements of paragraph (f) of this section are satisfied. Thus, gain from that transaction is ordinary income. If the transaction is not in fact a hedging transaction described in paragraph (b) of this section, however, paragraphs (a)(1) and (2) of this section do not apply and the character of loss is determined without reference to whether the transaction is a surrogate for a noncapital asset, serves as insurance against a business risk, serves a hedging function, or serves a similar function or purpose. Thus, the taxpayer's identification of the transaction as a hedging transaction does not itself make loss from the transaction ordinary.

(ii) *Inadvertent identification.* Notwithstanding paragraph (g)(1)(i) of this section, if the taxpayer identifies a transaction as a hedging transaction for purposes of paragraph (f) of this section, the character of the gain is determined as if the transaction had not been identified as a hedging transaction if—

(A) The transaction is not a hedging transaction (as defined in paragraph (b) of this section);

(B) The identification of the transaction as a hedging transaction was due to inadvertent error; and

(C) All of the taxpayer's transactions in all open years are being treated on either original or, if necessary, amended returns in a manner consistent with the principles of this section.

(2) *Transactions not identified*—(i) *In general.* Except as provided in paragraphs (g)(2)(ii) and (iii) of this section, the absence of an identification that satisfies the requirements of paragraph (f)(1) of this section is binding and establishes that a transaction is not a hedging transaction. Thus, subject to the exceptions, the rules of paragraphs (a)(1) and (2) of this section do not apply, and the character of gain or loss is determined without reference to whether the transaction is a surrogate for a noncapital asset, serves as insurance against a business risk, serves a hedging function, or serves a similar function or purpose.

(ii) *Inadvertent error.* If a taxpayer does not make an identification that satisfies the requirements of paragraph (f) of this section, the taxpayer may treat gain or loss from the transaction as ordinary income or loss under paragraph (a)(1) or (2) of this section if—

(A) The transaction is a hedging transaction (as defined in paragraph (b) of this section);

(B) The failure to identify the transaction was due to inadvertent error; and

(C) All of the taxpayer's hedging transactions in all open years are being treated on either original or, if necessary, amended returns as provided in paragraphs (a)(1) and (2) of this section.

(iii) *Anti-abuse rule.* If a taxpayer does not make an identification that satisfies all the requirements of paragraph (f) of this section but the taxpayer has no reasonable grounds for treating the transaction as other than a hedging transaction, then gain from the transaction is ordinary. The reasonableness of the taxpayer's failure to identify a transaction is determined by taking into consideration not only the requirements of paragraph (b) of this section but also the taxpayer's treatment of the transaction for financial accounting or other purposes and the taxpayer's identification of similar transactions as hedging transactions.

(3) *Transactions by members of a consolidated group*—(i) *Single-entity approach.* If a consolidated group is under the general rule of paragraph (e)(1) of this section (the single-entity approach), the rules of this paragraph (g) apply only to transactions that are not intercompany transactions.

(ii) *Separate-entity election.* If a consolidated group has made the election under paragraph (e)(2) of this section, then, in addition to the rules of paragraphs (g)(1) and (2) of this section, the following rules apply:

(A) If an intercompany transaction is identified as a hedging transaction but does not meet the requirements of paragraphs (e)(2)(ii)(A) and (B) of this section, then, notwithstanding any contrary provision in § 1.1502–13, each party to the transaction is subject to the rules of paragraph (g)(1) of this section with respect to the transaction as though it had incorrectly identified its position in the transaction as a hedging transaction.

(B) If a transaction meets the requirements of paragraphs (e)(2)(ii) (A) and (B) of this section but the transaction is not identified as a hedging transaction, each party to the transaction is subject to the rules of paragraph (g)(2) of this section. (Because the transaction is an intercompany hedging transaction, the character and timing rules of § 1.1502–13 do not apply. See paragraph (e)(2)(iii)(A) of this section.)

(h) *Effective date.* The rules of this section apply to transactions entered into on or after March 20, 2002.

Par. 4. Section 1.1256(e)–1 is revised to read as follows:

§ 1.1256(e)–1 Identification of hedging transactions.

(a) *Identification and recordkeeping requirements.* Under section 1256(e)(2), a taxpayer that enters into a hedging transaction must identify the transaction as a hedging transaction before the close of the day on which the taxpayer enters into the transaction.

(b) *Requirements for identification.* The identification of a hedging transaction for purposes of section 1256(e)(2) must satisfy the requirements of § 1.1221–2(f)(1). Solely for purposes of section 1256(f)(1), however, an identification that does not satisfy all of the requirements of § 1.1221–2(f)(1) is nevertheless treated as an identification under section 1256(e)(2).

(c) *Consistency with § 1.1221–2.* Any identification for purposes of § 1.1221–2(f)(1) is also an identification for purposes of this section. If a taxpayer satisfies the requirements of § 1.1221–2(f)(1)(ii), the transaction is treated as if it were not identified as a hedging transaction for purposes of section 1256(e)(2).

(d) *Effective date.* The rules of this section apply to transactions entered into on or after March 20, 2002.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 5. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 6. In § 602.101, paragraph (b) is amended by removing the entries for "1.1221–2," "1.1221–2(d)(2)(iv)," "1.1221–2(e)(5)," "1.1221–2(g)(5)(ii)," "1.1221–2(g)(6)(ii)," "1.1221–2(g)(6)(iii)," and "1.1221–2T(c)" and adding an entry in numerical order to the table to read as follows:

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD05–02–003]

RIN 2115–AE46

Special Local Regulations for Marine Events; St. Mary's River, St. Mary's City, MD

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is adopting temporary special local regulations during the St. Mary's Seahawk Sprint, a marine event to be held on the waters of the St. Mary's River, St. Mary's City, Maryland. This action is necessary to provide for the safety of life on navigable waters during the event. This action is intended to restrict vessel traffic in portions of the St. Mary's River during the event.

DATES: This rule is effective from 7 a.m. to 4 p.m. eastern time on April 13, 2002.

ADDRESSES: Documents indicated in this preamble as being available in the docket, are part of docket CGD05–02–003 and are available for inspection or copying at Commander (Aoax), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004, between 9 a.m. and 2 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: S. L. Phillips, Project Manager, Auxiliary and Recreational Boating Safety Section, at (757) 398–6204.

SUPPLEMENTARY INFORMATION:

Regulatory Information

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. In keeping with 5 U.S.C. 553(b)(B) and 553(d)(3), the Coast Guard finds that good cause exists for not publishing a NPRM and for making this rule effective less than 30 days after publication in the **Federal Register**. The event will occur on April 13, 2002, and numerous spectator craft are anticipated. Because of the danger posed to spectators and participants by other vessels transiting through the event area, it is in the public interest to have these regulations in effect during the event. In addition, advance notifications will be made via the Local Notice to Mariners, marine information broadcasts, and area newspapers.

Background and Purpose

St. Mary's College of Maryland will sponsor the St. Mary's Seahawk Sprint on April 13, 2002. The St. Mary's Seahawk Sprint consists of intercollegiate crew rowing teams racing along a 2000-meter course on the waters of the St. Mary's River. A fleet of spectator vessels is expected to gather near the event site to view the competition. To provide for the safety of event participants, spectators and transiting vessels, the Coast Guard will temporarily restrict vessel movement in the event area during the crew races.

Discussion of Rule

The Coast Guard is establishing temporary special local regulations on specified waters of the St. Mary's River. The temporary special local regulations will be in effect from 7 a.m. to 4 p.m. eastern time on April 13, 2002. The effect will be to restrict general navigation in the regulated area during the event. Except for persons or vessels authorized by the Coast Guard Patrol Commander, no person or vessel will be allowed to enter or remain in the regulated area. The Patrol Commander will allow non-participating vessels to transit the regulated area between races, when it is safe to do so. These regulations are needed to control vessel traffic during the event to enhance the safety of participants, spectators and transiting vessels.

Regulatory Evaluation

This rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979).

Although this regulation prevents traffic from transiting a portion of the St. Mary's River during the event, the effect of this regulation will not be significant due to the limited duration that the regulated area will be in effect and the extensive advance notifications that will be made to the maritime community via the Local Notice to Mariners, marine information broadcasts, and area newspapers, so mariners can adjust their plans accordingly. Additionally, the regulated area has been narrowly tailored to impose the least impact on general navigation yet provide the level of safety deemed necessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601—612), we considered whether this rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

This rule will affect the following entities, some of which may be small entities: the owners or operators of vessels intending to transit this section of St. Mary's River during the event.

Although this regulation prevents traffic from transiting a portion of the St. Mary's River during the event, the effect of this regulation will not be significant because of the limited duration that the regulated area will be in effect and the extensive advance notifications that will be made to the maritime community via the Local Notice to Mariners, marine information broadcasts, and area newspapers, so mariners can adjust their plans accordingly.

2002
UMI

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this rule so that they can better evaluate its effects on them and participate in the rulemaking process.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State law or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial and direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We considered the environmental impact of this rule and concluded that, under figure 2–1, paragraphs (34)(h) and (35)(a) of Commandant Instruction M16475.1D, this rule is categorically excluded from further environmental documentation. Special local regulations issued in conjunction with a regatta or marine parade permit for an event not located in, proximate to, or above an area designated as environmentally sensitive by an environmental agency of the Federal, state, or local government, are specifically excluded from further analysis and documentation under those sections. A "Categorical Exclusion Determination" is available in the docket where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR Part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233 through 1236; 49 CFR 1.46; 33 CFR 100.35.

2. Add a temporary section, § 100.35–T05–003 to read as follows:

§ 100.35–T05–003 St. Mary's River, St. Mary's City, Maryland.

(a) *Definitions:*

(1) *Coast Guard Patrol Commander.* The Coast Guard Patrol Commander is a commissioned, warrant, or petty officer of the Coast Guard who has been designated by the Commander, Coast Guard Activities Baltimore.

(2) *Official Patrol.* The Official Patrol is any vessel assigned or approved by Commander, Coast Guard Activities Baltimore with a commissioned, warrant, or petty officer on board and displaying a Coast Guard ensign.

(3) *Regulated Area.* The regulated area includes all waters of the St. Mary's River, from shoreline to shoreline, bounded to the south by a line at latitude 38°10′05″ North, and bounded to the north by a line at latitude 38°12′00″ North. All coordinates reference Datum NAD 1983.

(b) *Special Local Regulations:*

(1) Except for persons or vessels authorized by the Coast Guard Patrol Commander, no person or vessel may enter or remain in the regulated area.

(2) The operator of any vessel in this area shall:

(i) Stop the vessel immediately when directed to do so by any Official Patrol, including any commissioned, warrant, or petty officer on board a vessel displaying a Coast Guard ensign; and

(ii) Proceed as directed by any Official Patrol, including any commissioned, warrant, or petty officer on board a vessel displaying a Coast Guard ensign.

(c) *Effective Dates.* This section is in effect from 7 a.m. to 4 p.m. eastern time on April 13, 2002.

Dated: March 8, 2002.

Thad W. Allen,

Vice Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP Los Angeles-Long Beach 02–003]

RIN 2115–AA97

Safety Zone; Long Beach, CA

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard has established a temporary safety zone in the navigable waters of Long Beach, California, for the National Water Ski Racing Association (NWSRA) Water Ski Race from 8 a.m. to 5 p.m. (PST) on March 23, 2002 and from 8 a.m. to 5 p.m. on March 24, 2002. This safety zone is necessary to provide for the safety of the crew and participants of the race and to protect the participating vessels. Persons and vessels are prohibited from entering into or transiting through this safety zone unless authorized by the Captain of the Port or his or her designated representative.

DATES: This rule is effective from 8 a.m. (PST) on March 23, 2002, to 5 p.m. on March 24, 2002.

ADDRESSES: Documents indicated in this preamble as being available in the docket are part of docket COTP Los Angeles-Long Beach 02–003 and are available for inspection or copying at U.S. Coast Guard Marine Safety Office/ Group Los Angeles-Long Beach, 1001 S. Seaside Avenue, Building 20, San Pedro, California, 90731 between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Boatswain's Mate Second Class Jessica Walsh, Waterways Management Division, at (310) 732–2020.

SUPPLEMENTARY INFORMATION:

Regulatory Information

On February 19, 2002, we published a notice of proposed rulemaking (NPRM) entitled "Safety Zone; Long Beach, CA" in the **Federal Register** (67 FR 7321). We received no letters from the public commenting on the proposed rule. No public hearing was requested, and none was held.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Waiting 30 days after publication would delay the effective date of this safety zone beyond the event date of March 23, 2002, and that would be contrary to the need for public safety during this event.

Background and Purpose

This temporary safety zone provides for the safety of National Water Ski Racing Association (NWSRA) water ski race participants and spectators on March 23 and 24, 2002, from 8 a.m. to 5 p.m. both days. Persons and vessels are prohibited from entering into or transiting through this zone unless authorized by the Captain of the Port or his or her designated representative. By prohibiting persons and vessels from entering the waters surrounding the racecourse, the risk of high-speed collision will be significantly reduced. The U.S. Coast Guard will enforce this safety zone with assistance from the U.S. Coast Guard Auxiliary and event staff.

The following area is safety zone: All waters encompassed by lines connecting the following points, beginning at latitude 33°45′50″ N, longitude 118°10′48″ W; thence to 33°44′00″ N, 118°10′05″ W; thence to 33°44′00″ N, 118°09′26″ W; thence to 33°45′28″ N, 118°09′00″ W, and thence returning to the point of origin (North American Datum of 1983). This area is approximately 3,000 yards wide and 2,500 yards long and is centered near the oil islands off Long Beach, California.

Discussion of Comments and Changes

We received no letters from the public commenting on the proposed rule. We made one editorial change from the proposed rule to clarify that the rule will be enforced during the hours listed in paragraph (b).

Regulatory Evaluation

This rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979) because this safety zone will encompass a small portion of the waterway for limited periods of time and vessel traffic can pass safety around the affected area.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

We expect that this rule will affect the following entities, some of which may be small entities: The owners and operators of private and commercial vessels intending to transit or anchor in a small portion of the port of Long Beach. The impact to these entities would not, however, be significant since this zone will encompass a small portion of the waterway for limited periods of time.

We received no letters from the public commenting on the proposed rule's impact to small entities and no changes to the proposed rule were made.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we offered to assist small entities in understanding the rule so that they could better evaluate its effects on them and participate in the rulemaking process. No requests for assistance to small entities were received.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

VOL 67 ISS 54 MR 20 2002 UMI

We received no letters commenting on the proposed rule implications for federalism and no changes to the proposed rule were made.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

We received no letters commenting on the proposed rule and no changes to the proposed rule were made.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

We received no letters commenting on the proposed rule effecting a taking of private property and no changes to the proposed rule were made.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

We received no letters commenting on the proposed rule complying with Civil Justice Reform and no changes to the proposed rule were made.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

We received no letters commenting on the proposed rule environmental risks to children and no changes to the proposed rule were made.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

We received no letters commenting on the proposed rule implications for tribal governments and no changes to the proposed rule were made.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

We received no letters commenting on the proposed rule effect on energy and no changes to the proposed rule were made.

Environment

We have considered the environmental impact of this rule and concluded that under figure 2–1, paragraph (34)(g), of Commandant Instruction M16475.lD, this rule is categorically excluded from further environmental documentation because it is a safety zone in effect for only 2 days. A "Categorical Exclusion Determination" is not required.

We received no letters commenting on the proposed rule environmental impact and no changes to the proposed rule were made.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; 49 CFR 1.46.

2. From 8 a.m. on March 23, 2002, to 5 p.m. on March 24, 2002, add § 165.T11–063 to read as follows:

§ 165.T11–063 Safety Zone; Long Beach, CA.

(a) Location. The following area is a safety zone: All waters encompassed by lines connecting the following points, beginning at latitude 33°45′50″ N, longitude 118°10′48″ W; thence to 33°44′00″ N, 118°10′05″ W; thence to 33°44′00″ N, 118°09′26″ W; thence to 33°45′28″ N, 118°09′00″ W; and thence returning to the point of origin. (NAD83)

(b) Enforcement period. This section will be enforced from 8 a.m. to 5 p.m. (PST) on March 23, 2002 and from 8 a.m. to 5 p.m. (PST) on March 24, 2002.

(c) Regulations. In accordance with the general regulations in § 165.23 of this part entry into, transit through, or anchoring within the safety zone is prohibited unless authorized by the Coast Guard Captain of the Port, Los Angeles-Long Beach, or his or her designated representative.

Dated: March 6, 2002.

J. M. Holmes,

Captain, U. S. Coast Guard, Captain of the Port, Los Angeles-Long Beach, California.

[FR Doc. 02–6647 Filed 3–19–02 8:45am]

BILLING CODE 4910–15–U

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 82

[FRL–7160–3]

Protection of Stratospheric Ozone: Removal of Restrictions on Certain Fire Suppression Substitutes for Ozone-Depleting Substances; and Listing of Substitutes; Correction

AGENCY: Environmental Protection Agency.

ACTION: Direct final rule, correction.

SUMMARY: The Environmental Protection Agency published in the **Federal Register** of January 29, 2002, a direct final rule related to the Significant New Alternatives Policy (SNAP) program. A couple of typographical errors in chemical formulas were made inadvertently. This document identifies and corrects these errors.

DATES: These corrections are effective on April 1, 2002.

FOR FURTHER INFORMATION CONTACT: Margaret Sheppard by telephone at (202) 564–9163, by fax at (202) 565–2141, by e-mail at *sheppard.margaret@epa.gov*, or by mail at U.S. Environmental Protection Agency, Mail Code 6205J, Washington, DC 20460. Overnight or courier deliveries should be sent to the office location at 501 3rd Street, NW., Washington, DC, 20001. Further information can be found by calling the Stratospheric Protection Hotline at (800) 296–1996, or by viewing EPA's Ozone Depletion World Wide Web site at *www.epa.gov/ozone/title6/snap/*.

SUPPLEMENTARY INFORMATION: The Environmental Protection Agency published in the **Federal Register** of January 29, 2002 (66 FR 4185), a Direct Final Rule related to the Significant New Alternatives Policy (SNAP). In FR Doc. 02–1495, published on January 29, 2002, a couple of typographical errors to chemical formulas were made inadvertently. This document identifies and corrects these errors.

In FR Doc. 02–1495, published on January 29, 2002 (66 FR 4185), make the following corrections:

1. On page 4191 in the last paragraph of the third column, correct the formula "C_4H_{10}" to read "C_4F_{10}."

2. On page 4200 in the third column, amendatory instruction 3a. is corrected to read as follows:

a. Revising the table entitled "Fire Suppression and Explosion Protection—Acceptable Subjects to Use Conditions: Total Flooding Agents" by removing the entries "C_3F_8", "CF_3I" and "Gelled Halocarbon/Dry Chemical Suspension".

Administrative Requirements

Section 553 of the Administrative Procedure Act, 5 U.S.C. 553(b)(B), provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. We have determined that there is good cause for making today's rule final without prior proposal and opportunity for comment because we are merely correcting an incorrect citation in a previous action. Thus, notice and public procedure are unnecessary. We find that this constitutes good cause under 5 U.S.C. 553(b)(B).

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this correction is not a "significant regulatory action" and is therefore not subject to review by the Office of Management and Budget (OMB). Because the EPA has made a "good cause" finding that this correction is not subject to notice and comment requirements under the Administrative Procedure Act or any other statute, it is not subject to the regulatory flexibility provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), or to sections 202 and 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). In addition, this correction does not significantly or uniquely affect small governments or impose a significant intergovernmental mandate, as described in sections 203 and 204 of the UMRA. This correction also does not significantly or uniquely affect the communities of tribal governments, as specified by Executive Order 13175 (65 FR 67249, November 6, 2000). This correction does not have substantial direct effects on the States, or on the relationship between the national government and the States, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This correction also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it is not economically significant. This rule is not a "significant energy action" as defined in Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001)) because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

This correction does not involve technical standards; thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 U.S.C. 272) do not apply. This correction also does not involve special consideration of environmental justice related issues as required by Executive Order 12898 (59 FR 7629, February 16, 1994). This correction does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). The EPA's compliance with these statutes and Executive Orders for the underlying rule is discussed in the rule for the Removal of Restrictions on Certain Fire Suppression Substitutes for Ozone-Depleting Substances; and Listing of Substitutes.

The Congressional Review Act (5 U.S.C. 801 *et seq.*), as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 allows the issuing agency to make a rule effective sooner than otherwise provided by the Congressional Review Act if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary, or contrary to the public interest. This determination must be supported by a brief statement (5 U.S.C. 808(2)). As stated previously, the EPA has made such a good cause finding, including the reasons therefor, and established an effective date of April 1, 2002. The EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the correction in the **Federal Register**. This correction is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 82

Environmental protection, Administrative practice and procedure, Air pollution control, Reporting and recordkeeping requirements.

Dated: February 25, 2002.

Drusilla Hufford,

Director, Global Programs Division.

[FR Doc. 02–6722 Filed 3–19–02; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP–301224; FRL–6828–5]

2070–AB78

Isoxadifen-ethyl; Pesticide Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for combined residues of isoxadifen-ethyl (ethyl 5,5-diphenyl-2-isoxazoline-3-carboxylate, (CAS No. 163520–33–0), and its metabolite: 4,5-dihydro-5,5-diphenyl-3-isoxazolecarboxylic acid, in or on corn commodities. Aventis CropScience requested this tolerance under the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act (FQPA) of 1996.

DATES: This regulation is effective March 20, 2002. Objections and requests for hearings, identified by docket control number OPP–301224, must be received by EPA on or before May 20, 2002.

ADDRESSES: Written objections and hearing requests may be submitted by mail, in person, or by courier. Please follow the detailed instructions for each method as provided in Unit VI. of the **SUPPLEMENTARY INFORMATION**. To ensure proper receipt by EPA, your objections and hearing requests must identify docket control number OPP–301224 in the subject line on the first page of your response.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS Codes	Examples of Potentially Affected Entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/. A frequently updated electronic version of 40 CFR part 180 is available at http://www.access.gpo.gov/nara/cfr/cfrhtml_00/Title_40/40cfr180_00.html, a beta site currently under development.

2. *In person.* The Agency has established an official record for this action under docket control number OPP–301224. The official record consists of the documents specifically referenced in this action, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

II. Background and Statutory Findings

In the **Federal Register** of June 30, 2000 (65 FR 40632) (FRL–6592–6), EPA issued a notice pursuant to section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a as amended by the FQPA of 1996 (Public Law 104–170) announcing the filing of a pesticide petition (PP 0E6162) for a tolerance by Aventis CropScience, P.O. Box 12014, 2 T.W. Alexander Dr., Research Triangle Park, NC 27709. This notice included a summary of the petition prepared by Aventis CropScience, the petitioner. There were no comments received in response to the notice of filing.

The petition requested that 40 CFR 180.570 be amended by establishing a tolerance for the combined residues of the inert ingredient, herbicide safener isoxadifen-ethyl (ethyl 5,5-diphenyl-2-isoxazoline-3-carboxylate, (CAS No. 163520–33–0), and its metabolite: 4,5-dihydro-5,5-diphenyl-3-isoxazolecarboxylic acid, in or on corn, grain at 0.10 part per million (ppm); corn, forage at 0.30 ppm; and corn, stover 0.50 (ppm). The Agency determined that the tolerance levels should be changed (lowered) and that the corn commodities should be expressed as in the Food and Feed Vocabulary; therefore, the tolerance levels are corn, field, grain and corn, field, forage both at 0.10 ppm and corn, field, stover at 0.20 ppm.

Section 408(b)(2)(A)(i) of the FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . ."

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. For further discussion of the regulatory requirements of section 408 and a complete description of the risk assessment process, see the final rule on Bifenthrin Pesticide Tolerances November 26, 1997 (62 FR 62961) (FRL–5754–7).

III. Aggregate Risk Assessment and Determination of Safety

Consistent with section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure, consistent with section 408(b)(2), for a tolerance for combined residues of isoxadifen-ethyl (ethyl 5,5-diphenyl-2-isoxazoline-3-carboxylate, (CAS No. 163520–33–0), and its metabolite: 4,5-dihydro-5,5-diphenyl-3-isoxazolecarboxylic acid, on corn commodities.

EPA's assessment of exposures and risks associated with establishing the above tolerances was published in the **Federal Register** of June 21, 2001 (66 FR 33179) (FRL–6786–1), when the time-limited tolerances (expiring June 21, 2004) for combined residues of isoxadifen-ethyl for rice commodities were established. The assessment that was discussed in the above final rule considered both corn and rice. All risks were less than the Agency's level of concern. The corn tolerances were not established at that time, since the enforcement method for corn had not yet been validated. For a complete description of the toxicological profile and endpoints, the uncertainty factors, the exposure assessment which includes dietary exposure for both food and drinking water, the safety factor for infants and children, and aggregate risk for isoxadifen-ethyl see the final rule of June 21, 2001.

Based on the previous published assessment, EPA concludes that there is a reasonable certainty that no harm will result to the general population, and to infants and children from aggregate exposure to residues of isoxadifen-ethyl (ethyl 5,5-diphenyl-2-isoxazoline-3-carboxylate, (CAS No. 163520–33–0), and its metabolite: 4,5-dihydro-5,5-diphenyl-3-isoxazolecarboxylic acid, on corn, field, grain and corn, field, forage both at 0.10 ppm and corn, field, stover at 0.20 ppm.

IV. Other Considerations

A. Analytical Enforcement Methodology

The petitioner submitted the results of an Independent Laboratory Validation (ILV) for isoxadifen-ethyl and its major metabolites. The method is gas chromotography using ion trap mass selective detection. The ILV reported that overall the method worked well. There is thus a practical method suitable to enforce the tolerance expression. The method may be requested from: Calvin Furlow, PIRIB, IRSD (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 305–5229; e-mail address: furlow.calvin@epa.gov.

B. International Residue Limits

There are no CODEX, Canadian, or Mexican tolerances/MRLs for isoxadifen-ethyl residues.

C. Conditions

The following data gap has been identified for isoxadifen-ethyl in/on corn: storage stability data. Preliminary results only have been submitted as the study is still on-going. The Agency believes that the available data and risk assessment support the determination that there is a reasonable certainty of no harm and the establishment of permanent tolerances for isoxadifen-ethyl in/on corn. The registration of a formulation containing isoxadifen-ethyl will be time-limited and conditional upon submission of this information.

V. Conclusion

Therefore, tolerances are established for residues of isoxadifen-ethyl (ethyl 5,5-diphenyl-2-isoxazoline-3-carboxylate, (CAS No. 163520–33–0), and its metabolite: 4,5-dihydro-5,5-diphenyl-3-isoxazolecarboxylic acid, on corn, field, grain and corn, field, forage both at 0.10 ppm and corn, field, stover at 0.20 ppm.

VI. Objections and Hearing Requests

Under section 408(g) of the FFDCA, as amended by the FQPA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. The EPA procedural regulations which govern the submission of objections and requests for hearings appear in 40 CFR part 178. Although the procedures in those regulations require some modification to reflect the amendments made to the FFDCA by the FQPA of 1996, EPA will continue to use those procedures, with appropriate adjustments, until the necessary modifications can be made. The new section 408(g) provides essentially the same process for persons to "object" to a regulation for an exemption from the requirement of a tolerance issued by EPA under new section 408(d), as was provided in the old FFDCA sections 408 and 409. However, the period for filing objections is now 60 days, rather than 30 days.

A. What Do I Need to Do to File an Objection or Request a Hearing?

You must file your objection or request a hearing on this regulation in accordance with the instructions provided in this unit and in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket control number OPP–301224 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk on or before May 20, 2002.

1. *Filing the request.* Your objection must specify the specific provisions in the regulation that you object to, and the grounds for the objections (40 CFR 178.25). If a hearing is requested, the objections must include a statement of the factual issues(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). Information submitted in connection with an objection or hearing request may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the information that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice.

Mail your written request to: Office of the Hearing Clerk (1900), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. You may also deliver your request to the Office of the Hearing Clerk in Rm. C400, Waterside Mall, 401 M St., SW., Washington, DC 20460. The Office of the Hearing Clerk is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Office of the Hearing Clerk is (202) 260–4865.

2. *Tolerance fee payment.* If you file an objection or request a hearing, you must also pay the fee prescribed by 40 CFR 180.33(i) or request a waiver of that fee pursuant to 40 CFR 180.33(m). You must mail the fee to: EPA Headquarters Accounting Operations Branch, Office of Pesticide Programs, P.O. Box 360277M, Pittsburgh, PA 15251. Please identify the fee submission by labeling it "Tolerance Petition Fees."

EPA is authorized to waive any fee requirement "when in the judgement of the Administrator such a waiver or refund is equitable and not contrary to the purpose of this subsection." For additional information regarding the waiver of these fees, you may contact James Tompkins by phone at (703) 305–5697, by e-mail at tompkins.jim@epa.gov, or by mailing a request for information to Mr. Tompkins at Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

If you would like to request a waiver of the tolerance objection fees, you must mail your request for such a waiver to: James Hollins, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

3. *Copies for the docket.* In addition to filing an objection or hearing request with the Hearing Clerk as described in Unit VI.A., you should also send a copy of your request to the PIRIB for its inclusion in the official record that is described in Unit I.B.2. Mail your copies, identified by docket control number OPP–301224, to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. In person or by courier, bring a copy to the location of the PIRIB described in Unit I.B.2. You may also send an electronic copy of your request via e-mail to: opp-docket@epa.gov. Please use an ASCII file format and avoid the use of special characters and any form of encryption. Copies of electronic objections and hearing requests will also be accepted on disks in WordPerfect 6.1/8.0 or ASCII file format. Do not include any CBI in your electronic copy. You may also submit an electronic copy of your

VOL
67
ISS
54
MR
20
2002
UMI

request at many Federal Depository Libraries.

B. When Will the Agency Grant a Request for a Hearing?

A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issues(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

VII. Regulatory Assessment Requirements

This final rule establishes a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (October 4, 1993 58 FR 51735). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* May 22, 2001 (66 FR 28355). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). Nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* February 16, 1994, (59 FR 7629) or OMB review or any Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note). Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq*) do not apply. In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." This final rule directly regulates growers, food processors, food handlers and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). For these same reasons, the Agency has determined that this rule does not have any "tribal implications" as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes." This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

VIII. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 11, 2002.

Peter Caulkins,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346(a) and 374.

2. Section 180.570 is amended by revising paragraph (a) to read as follows:

§ 180.570 Isoxadifen-ethyl; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of isoxadifen-ethyl (ethyl 5,5-diphenyl-2-isoxazoline-3-carboxylate, (CAS No. 163520–33–0), and its metabolite: 4,5-dihydro-5,5-diphenyl-3-isoxazolecarboxylic acid, when used as an inert ingredient (safener) in or on the following raw agricultural commodities when applied at an annual application rate of 0.08 pound of safener per acre.

Commodity	Parts per million
Corn, field, grain	0.10
Corn, field, forage	0.10
Corn, field, stover	0.20

(2) Tolerances that expire as indicated in the table below are established for residues of isoxadifen-ethyl (ethyl 5,5-diphenyl-2-isoxazoline-3-carboxylate, CAS No. 163520–33–0) and its metabolites: 4,5-dihydro-5,5-diphenyl-3-isoxazolecarboxylic acid and β-hydroxy-β-benezenepropanenitrile when in the commodities listed below. This safener will be used only in conjunction with the active ingredient fenoxaprop-*p*-ethyl, at a rate of 0.17 pound of safener per acre.

Commodity	Parts per million	Expiration/Revocation Date
Rice, bran	0.80	6/21/04
Rice, grain	0.10	6/21/04
Rice, hulls	0.50	6/21/04
Rice, straw	0.25	6/21/04

RIN 2070–AB27

Modification of Significant New Uses of Certain Chemical Substances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Under section 5(a)(2) of the Toxic Substances Control Act (TSCA) and 40 CFR 721.185, EPA is amending three significant new use rules (SNURs) to allow certain uses without requiring a significant new use notice (SNUN). EPA is amending these rules based on review of new toxicity test data on one chemical and review of SNUNs for the other two chemicals. The amended SNURs would continue to require a SNUN for new uses that may involve significant changes in human or environmental exposure.

DATES: This rule is effective May 20, 2002.

FOR FURTHER INFORMATION CONTACT: *For general information contact*: Barbara Cunningham, Acting Director, Environmental Assistance Division, Office of Pollution Prevention and Toxics (7408M), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 554–1404; e-mail address: TSCA-Hotline@epa.gov.

For technical information contact: James Alwood, Chemical Control Division, Office of Pollution Prevention and Toxics (7405M), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 564–8974; e-mail address: alwood.jim@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you manufacture, import, process, or use the chemical substances contained in this rule. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS codes	Examples of potentially affected entities
Chemical manufacturers	325	Manufacturers, importers, processors, and users of chemicals
Petroleum and coal product industries	324	Manufacturers, importers, processors, and users of chemicals

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action applies to certain entities. To determine whether you or your business is affected by this action, you should carefully examine the applicability provisions in title 40 of the Code of Federal Regulations (CFR) at 40 CFR 721.5. If you have any questions regarding the applicability of this action to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/. A frequently updated electronic version of 40 CFR part 721 is available at http://www.access.gpo.gov/nara/cfr/cfrhtml_00/Title_40/40cfr721_00.html, a beta site currently under development.

2. *In person.* The Agency has established an official record for this action under docket control number OPPTS–50644A. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during

VOL
67
ISS
54

2002
UMI

an applicable comment period, is available for inspection in the TSCA Nonconfidential Information Center, North East Mall Rm. B–607, Waterside Mall, 401 M St., SW., Washington, DC. The Center is open from noon to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Center is (202) 260–7099.

II. Background

A. What Action is the Agency Taking?

The Agency proposed the modification of these SNURs in the **Federal Register** of October 30, 2001 (66 FR 54742) (FRL–6798–7). The background and reasons for the modification of each individual SNUR are set forth in the preamble to the proposed SNUR modification. The comment period closed on November 29, 2001. EPA received no comments regarding these SNURS. Therefore, EPA is issuing the modified SNURs.

B. What is the Agency's Authority for Taking this Action?

TSCA section 5(a)(2) and 40 CFR part 721 authorize EPA to determine that a use of a chemical substance is a "significant new use." EPA must make this determination by rule after considering all relevant factors, including those listed in section 5(a)(2) of TSCA. Once EPA promulgates a rule designating "significant new uses" for a given chemical substance, section 5(a)(1)(B) of TSCA requires persons to submit a notice to EPA at least 90 days before they manufacture, import, or process the substance for that use. The mechanism for reporting under this requirement is established under 40 CFR 721.5.

Section 5(a)(1) of TSCA (15 U.S.C. 2604(a)(1)) and its implementing regulations at 40 CFR parts 720 and 721 require that any person intending to manufacture a new chemical substance, or to manufacture or process any chemical substance for a significant new use, must give EPA 90-days advance written notice in the form of a pre-manufacture notice (PMN) or SNUN, respectively.

Upon reviewing those notices, if EPA makes certain determinations regarding potential exposures and risks that may be presented by the activities associated with the chemical, EPA may regulate the chemical by issuing an order under TSCA section 5(e) and/or a SNUR under TSCA section 5(a)(2) and 40 CFR part 721. The TSCA section 5(e) order governs only the entity who submitted the PMN, whereas the section 5(a)(2) SNUR applies to all manufacturers and processors of the same chemical.

EPA may respond to SNUNs by issuing or modifying a TSCA section 5(e) consent order and/or amending the SNUR promulgated under TSCA section 5(a)(2). Amendment of the SNUR will often be necessary to allow companies other than the SNUN submitter to engage in the newly authorized use(s), because even after a manufacturer submits a SNUN and the review period expires, processors of the same substance still must submit a SNUN before engaging in the significant new use. Provisions regarding EPA's authority to modify or revoke SNUR requirements appear at 40 CFR 721.185.

EPA responded to PMN P–95–1411 by issuing a TSCA section 5(e) consent order and TSCA section 5(a)(2) SNUR to address concerns for both human health and the environment. Based on data from a 90-subchronic oral toxicity study in rats, submitted pursuant to the terms of the 5(e) consent order, EPA however, no longer concludes that the PMN substance may present an unreasonable risk to human health. Therefore, EPA has revoked the section 5(e) consent order entirely and, pursuant to TSCA section5(a)(2) and 40 CFR 721.185, is amending the SNUR to remove the human health related notice requirements, leaving only the notification requirements related to environmental releases.

EPA responded to PMNs P–97–520/521 by issuing a TSCA section 5(e) consent order requiring certain testing based on expected substantial human and environmental exposures and promulgating a TSCA section 5(a)(2) SNUR to address concerns for human health. In response to SNUNs S–00–397/398 by the same manufacturer proposing new uses for the same chemicals, EPA modified the section 5(e) consent order to allow certain new uses, but with restrictions to mitigate potential risks to human health. Accordingly, pursuant to TSCA section 5(a)(2) and 40 CFR 721.185, EPA is hereby amending the corresponding SNURs to modify the significant new uses consistent with the terms of the modified section 5(e) consent order and to provide EPA an opportunity to assess the potential for significant changes in human or environmental exposure.

C. Applicability of General Provisions

General provisions for SNURs appear under subpart A of 40 CFR part 721. These provisions describe persons subject to the final rule, recordkeeping requirements, exemptions to reporting requirements, and applicability of the final rule to uses occurring before the effective date of the final rule. Provisions relating to user fees appear at 40 CFR part 700. Persons subject to this SNUR must comply with the same notice requirements and EPA regulatory procedures as submitters of PMNs under section 5(a)(1)(A) of TSCA. In particular, these requirements include the information submission requirements of TSCA section 5(b) and 5(d)(1), the exemptions authorized by TSCA section 5 (h)(1), (h)(2), (h)(3), and (h)(5), and the regulations at 40 CFR part 720. Once EPA receives a SNUR notice, EPA may take regulatory action under TSCA section 5(e), 5(f), 6, or 7 to control the activities on which it has received the SNUR notice. If EPA does not take action, EPA is required under TSCA section 5(g) to explain in the **Federal Register** its reasons for not taking action.

Persons who intend to export a substance identified in a proposed or final SNUR are subject to the export notification provisions of TSCA section 12(b). The regulations that interpret TSCA section 12(b) appear at 40 CFR part 707. Persons who intend to import a chemical substance identified in a final SNUR are subject to the TSCA section 13 import certification requirements, which are codified at 19 CFR 12.118 through 12.127 and 127.28. Such persons must certify that they are in compliance with SNUR requirements. The EPA policy in support of the import certification appears at 40 CFR part 707.

III. Regulatory Assessment Requirements

Under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993), the Office of Management and Budget (OMB) has determined that proposed or final SNURs are not a "significant regulatory action" subject to review by OMB, because they do not meet the criteria in section 3(f) of the Executive Order.

Based on EPA's experience with proposing and finalizing SNURs, State, local, and tribal governments have not been impacted by these rulemakings, and EPA does not have any reasons to believe that any State, local, or tribal government will be impacted by this rulemaking. As such, EPA has determined that this regulatory action does not impose any enforceable duty, contain any unfunded mandate, or otherwise have any affect on small governments subject to the requirements of sections 202, 203, 204, or 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104–4).

This rule does not have tribal implications because it is not expected to have substantial direct effects on Indian Tribes. This rule does not

significantly or uniquely affect the communities of Indian tribal governments, nor does it involve or impose any requirements that affect Indian Tribes. Accordingly, the requirements of section 3(b) of Executive Order 13084, entitled *Consultation and Coordination with Indian Tribal Governments* (63 FR 276755, May 19, 1998), do not apply to this rule. Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000), which took effect on January 6, 2001, revokes Executive Order 13084 as of that date. EPA developed this rulemaking, however, during the period when Executive Order 13084 was in effect; thus, EPA addressed tribal considerations under Executive Order 13084. For the same reasons stated for Executive Order 13084, the requirements of Executive Order 10175 do not apply to this rule either. Nor will this action have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999).

In issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct, as required by section 3 of Executive Order 12988, entitled *Civil Justice Reform* (61 FR 4729, February 7, 1996).

EPA has complied with Executive Order 12630, entitled *Governmental Actions and Interference with Constitutionally Protected Property Rights* (53 FR 8859, March 15, 1988), by examining the takings implications of this rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the Executive Order.

This action does not entail special considerations of environmental justice related issues as delineated by Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994).

This action is not subject to Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997), because this is not an economically significant regulatory action as defined by Executive Order 12866, and this action does not address environmental health or safety risks disproportionately affecting children.

In addition, since this action does not involve any technical standards, section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA) Pub. L. 104–113 section 12(d) (15 U.S.C. 272 note), does not apply to this action.

Pursuant to section 605(b) of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency hereby certifies that promulgation of this SNUR will not have a significant adverse economic impact on a substantial number of small entities. The rationale supporting this conclusion is as follows. A SNUR applies to any person (including small or large entities) who intends to engage in any activity described in the rule as a "significant new use." By definition of the word "new," and based on all information currently available to EPA, it appears that no small or large entities presently engage in such activity. Since a SNUR only requires that any person who intends to engage in such activity in the future must first notify EPA by submitting a SNUN, no economic impact will even occur until someone decides to engage in those activities. Although some small entities may decide to conduct such activities in the future, EPA cannot presently determine how many, if any, there may be. However, EPA's experience to date is that, in response to the promulgation of over 900 SNURs, the Agency has received fewer than 25 SNUNs. Of those SNUNs submitted, none appear to be from small entities in response to any SNUR. In addition, the estimated reporting cost for submission of a SNUN is minimal regardless of the size of the firm. Therefore, EPA believes that the potential economic impact of complying with this SNUR are not expected to be significant or adversely impact a substantial number of small entities. In a SNUR that published on June 2, 1997 (62 FR 29684) (FRL–5597–1), the Agency presented it's general determination that proposed and final SNURs are not expected to have a significant economic impact on a substantial number of small entities, which was provided to the Chief Counsel for Advocacy of the Small Business Administration.

According to the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, an Agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under the PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA's regulations, after initial display in the preamble of the final rule and in addition to its display on any related collection instrument, are listed in 40 CFR part 9.

The information collection requirements related to this action have already been approved by OMB pursuant to the PRA under OMB control number 2070–0012 (EPA ICR No. 574). This action does not impose any burden requiring additional OMB approval. If an entity were to submit a SNUN to the Agency, the annual burden is estimated to average between 30 and 170 hours per response. This burden estimate includes the time needed to review instructions, search existing data sources, gather and maintain the data needed, and complete, review, and submit the required SNUN.

Send any comments about the accuracy of the burden estimate, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques, to the Director, OP Regulatory Information Division (2137), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. Please remember to include the OMB control number in any correspondence, but do not submit any completed forms to this address.

This rule is not subject to Executive Order 13211, "*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*" (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

IV. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the Agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This rule is not a "major rule" as defined by 5 U.S.C. 804(2).

Office Director, Office of Pollution Prevention and Toxics.

Therefore, 40 CFR part 721 is amended as follows:

PART 721—[AMENDED]

1. The authority citation for part 721 continues to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

2. Section 721.4589 is amended as follows:

a. By revising the section heading.

b. By revising paragraphs (a)(1), (a)(2)(i), and (b)(1).

c. By removing and reserving paragraph (a)(2)(ii).

d. By removing paragraphs (a)(2)(iii), (a)(2)(iv), and (b)(3).

§ 721.4589 Propanedioic acid, [(4-methoxyphenyl)methylene]-, bis(1,2,2,6,6-pentamethyl-4-piperdinyl) ester (9CI).

(a) * * * (1) The chemical substance identified as propanedioic acid, [(4-methoxyphenyl)methylene]-, bis(1,2,2,6,6-pentamethyl-4-piperdinyl) ester (9CI) (PMN P–95–1411; CAS No. 147783–69–5) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) * * *

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) * * *

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

* * * * *

3. Section 721.6175 is amended as follows:

a. By revising the section heading.

b. By revising paragraphs (a)(1), (a)(2)(i), and (b)(1).

c. By adding paragraphs (a)(2)(ii), (a)(2)(iii), and (b)(3).

§ 721.6175 2-Piperdinone, 1,3-dimethyl-,.

(a) * * * (1) The chemical substance identified as 2-Piperdinone, 1,3-dimethyl-, (PMN P–97–520 and SNUN 00–397; CAS No. 1690–76–2) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) * * *

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), (a)(3), (b) (concentration set at 1.0 percent), and (c).

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 1.0 percent), (f), (g)(1)(i), (g)(1)(iii), (g)(1)(iv), (g)(1)(ix), (g)(2)(i), (g)(2)(v), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (use or processing other than: in enclosed systems (such as hydrocarbon extraction, polymer synthesis, wire enamel resin); electronic industry cleaning solvent; and other precision industry cleaning (such as automobile manufacturing, aerospace, and optics)), (o), and (q).

(b) * * *

(1) *Recordkeeping.* The recordkeeping requirements specified in § 721.125 (a), (b), (c), (d), (e), (f), (g), (h), and (i) are applicable to manufacturers, importers, and processors of this substance.

* * * * *

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this substance.

4. Section 721.6176 is amended as follows:

a. By revising the section heading.

b. By revising paragraphs (a)(1), (a)(2)(i), and (b)(1).

c. By adding paragraphs (a)(2)(ii), (a)(2)(iii), and (b)(3).

§ 721.6176 2-Piperdinone, 1,5-dimethyl-,.

(a) * * * (1) The chemical substance identified as 2-Piperdinone, 1,5-dimethyl-, (PMN P–97–521 and SNUN 00–398; CAS No. 86917–58–0) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) * * *

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), (a)(3), (b) (concentration set at 1.0 percent), and (c).

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e), (f), (g)(1)(i), (g)(1)(iii), (g)(1)(iv), (g)(1)(ix), (g)(2)(i), (g)(2)(v), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (use or processing other than: in enclosed systems (such as hydrocarbon extraction, polymer synthesis, wire enamel resin); electronic industry cleaning solvent; and other precision industry cleaning (such as automobile manufacturing, aerospace, and optics)), (o), and (q).

(b) * * *

(1) *Recordkeeping.* The recordkeeping requirements specified in § 721.125 (a), (b), (c), (d), (e), (f), (g), (h), and (i) are applicable to manufacturers, importers, and processors of this substance.

* * * * *

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this substance.

[FR Doc. 02–6726 Filed 3–19–02; 8:45 am]

BILLING CODE 6560–50–S

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 721

[OPPTS–50642A; FRL–6819–5]

RIN 2070–AB27

Modification of Significant New Uses of Certain Chemical Substances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Under section 5(a)(2) of the Toxic Substances Control Act (TSCA) and 40 CFR 721.185, EPA is amending two significant new use rules (SNURs) to allow certain uses without requiring a significant new use notice (SNUN). EPA is amending these rules based on review of new toxicity and exposure data. The amended SNURs would continue to require a SNUN for new uses that may involve significant changes in human or environmental exposure

DATES: This final rule is effective on May 20, 2002.

FOR FURTHER INFORMATION CONTACT: *For general information contact*: Barbara Cunningham, Acting Director, Environmental Assistance Division (7408M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 554–1404; e-mail address: TSCA-Hotline@epa.gov.

For technical information contact: James Alwood, Chemical Control Division (7405M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 564–8974; e-mail address: alwood.jim@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you manufacture, import, process, or use the chemical substances contained in this rule. Potentially

affected categories and entities may include, but are not limited to:

Categories	NAICS codes	Examples of potentially affected entities
Chemical manufacturers	325	Manufacturers, importers, processors, and users of chemicals
Petroleum and coal product industries	324	Manufacturers, importers, processors, and users of chemicals

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action applies to certain entities. To determine whether you or your business is affected by this action, you should carefully examine the applicability provisions in title 40 of the Code of Federal Regulations (CFR) at 40 CFR 721.5. If you have any questions regarding the applicability of this action to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document or Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/. A frequently updated electronic version of 40 CFR part 721 is available at http://www.access.gpo.gov/nara/cfr/cfrhtml_00/Title_40/40cfr721_00.html, a beta site currently under development.

2. *In person.* The Agency has established an official record for this action under docket control number OPPTS–50642A. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the TSCA Nonconfidential Information Center, North East Mall Rm. B–607, Waterside Mall, 401 M St., SW., Washington, DC. The Center is open from noon to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Center is (202) 260–7099.

II. Background

A. What Action is the Agency Taking?

The Agency proposed the modification of these SNURs in the **Federal Register** of August 16, 2001 (66 FR 42978) (FRL–6557–8). The background and reasons for the modification of each individual SNUR are set forth in the preamble to the proposed SNUR modification. The comment period closed on September 17, 2001. EPA received no comments regarding the SNUR for P–89–769 codified at 721.9480. Therefore EPA is issuing the modified SNUR.

EPA received one comment from the PMN submitter of P–95–4, who provided particle size data that was the basis for the proposed elimination of reporting requirements for respiratory protection when the particle size of the PMN substance is 250 microns or greater. The commenter stated that when the particle size of the substance is 250 microns or greater, exposed workers are not reasonably likely to be exposed to significant amounts of the PMN substance and that SNUR reporting provisions should not apply. EPA reviewed the available dermal toxicity data and determined that when the particle size of the substance is 250 microns or greater dermal exposures would not result in significant changes in human exposure. This determination was based on the fact that the dermal LD_{50} of the substance is greater than 2,000 milligram/kilogram (mg/kg), the skin irritation study in rabbits for the substance showed no skin irritation and had a Draize irritation score of 0, indicative of a compound with no irritation potential to the skin, the skin sensitization study for the substance showed no reactions, and no dermal absorption of particles greater than 250 microns is expected. Therefore, EPA is issuing a modified final SNUR where no SNUR reporting requirements apply when the particle size of the substance is greater than 250 microns.

B. What is the Agency's Authority for Taking this Action?

Section 5(a)(2) of TSCA (15 U.S.C. 2604(a)(2)) authorizes EPA to determine that a use of a chemical substance is a significant new use. EPA must make this determination by rule after considering all relevant factors, including those listed in section 5(a)(2) of TSCA. Once EPA determines that a use of a chemical substance is a significant new use, section 5(a)(1)(B) of TSCA requires persons to submit a notice to EPA at least 90 days before they manufacture, import, or process the substance for that use. The mechanism for reporting under this requirement is established under 40 CFR 721.5.

During review of the PMNs submitted for the chemical substances that are the subject of this rule, EPA concluded that regulation was warranted based on available information that indicated activities not described in the TSCA section 5(e) consent order might result in significant changes in human or environmental exposure as described in section 5(a)(2) of TSCA. Based on these findings, SNURs were promulgated.

EPA has revoked the TSCA section 5(e) consent order for P–89–769 and has determined that modifying these SNURs would not result in significant changes in human or environmental exposure. The modification of SNUR provisions for these substances designated herein is consistent with the provisions of the TSCA section 5(e) consent order.

C. Applicability of General Provisions

General provisions for SNURs appear under subpart A of 40 CFR part 721. These provisions describe persons subject to the rule, recordkeeping requirements, exemptions to reporting requirements, and applicability of the rule to uses occurring before the effective date of the final rule. Provisions relating to user fees appear at 40 CFR part 700. Persons subject to this SNUR must comply with the same notice requirements and EPA regulatory procedures as submitters of PMNs under section 5(a)(1)(A) of TSCA. In particular, these requirements include the information submission requirements of TSCA section 5(b) and 5(d)(1), the exemptions authorized by TSCA section 5 (h)(1), (h)(2), (h)(3), and (h)(5), and the regulations at 40 CFR part 720. Once EPA receives a SNUR notice, EPA may take regulatory action under TSCA section 5(e), 5(f), 6, or 7 to control the

VOL
67
ISS
54
MR
20
2002
UMI

activities on which it has received the SNUR notice. If EPA does not take action, EPA is required under TSCA section 5(g) to explain in the **Federal Register** its reasons for not taking action.

Persons who intend to export a substance identified in a proposed or final SNUR are subject to the export notification provisions of TSCA section 12(b). The regulations that interpret TSCA section 12(b) appear at 40 CFR part 707. Persons who intend to import a chemical substance identified in a final SNUR are subject to the TSCA section 13 import certification requirements, which are codified at 19 CFR 12.118 through 12.127 and 127.28. Such persons must certify that they are in compliance with SNUR requirements. The EPA policy in support of the import certification appears at 40 CFR part 707.

III. Regulatory Assessment Requirements

Under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993), the Office of Management and Budget (OMB) has determined that proposed or final SNURs are not a "significant regulatory action" subject to review by OMB, because they do not meet the criteria in section 3(f) of the Executive Order.

Based on EPA's experience with proposing and finalizing SNURs, State, local, and tribal governments have not been impacted by these rulemakings, and EPA does not have any reasons to believe that any State, local, or tribal government will be impacted by this rulemaking. As such, EPA has determined that this regulatory action does not impose any enforceable duty, contain any unfunded mandate, or otherwise have any affect on small governments subject to the requirements of sections 202, 203, 204, or 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4).

This rule does not have tribal implications because it is not expected to have substantial direct effects on Indian Tribes. This rule does not significantly or uniquely affect the communities of Indian tribal governments, nor does it involve or impose any requirements that affect Indian Tribes. Accordingly, the requirements of Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000), which took effect on January 6, 2001 do not apply to this rule. Nor will this action have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999).

In issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct, as required by section 3 of Executive Order 12988, entitled *Civil Justice Reform* (61 FR 4729, February 7, 1996).

EPA has complied with Executive Order 12630, entitled *Governmental Actions and Interference with Constitutionally Protected Property Rights* (53 FR 8859, March 15, 1988), by examining the takings implications of this rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the Executive Order.

This action does not entail special considerations of environmental justice related issues as delineated by Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994).

This action is not subject to Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997), because this is not an economically significant regulatory action as defined by Executive Order 12866, and this action does not address environmental health or safety risks disproportionately affecting children.

In addition, since this action does not involve any technical standards, section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note), does not apply to this action.

Pursuant to section 605(b) of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency hereby certifies that promulgation of this SNUR will not have a significant adverse economic impact on a substantial number of small entities. The rationale supporting this conclusion is as follows. A SNUR applies to any person (including small or large entities) who intends to engage in any activity described in the rule as a "significant new use." By definition of the word "new," and based on all information currently available to EPA, it appears that no small or large entities presently engage in such activity. Since a SNUR only requires that any person who intends to engage in such activity in the future must first notify EPA by submitting a SNUN, no economic impact will even occur until someone decides to engage in those activities. Although some small entities may decide to conduct such activities in the future, EPA cannot presently determine how many, if any, there may be. However, EPA's experience to date is that, in response to the promulgation of over 530 SNURs, the Agency has received fewer than 15 SNUNs. Of those SNUNs submitted, none appear to be from small entities in response to any SNUR. In addition, the estimated reporting cost for submission of a SNUN are minimal regardless of the size of the firm. Therefore, EPA believes that the potential economic impact of complying with this SNUR are not expected to be significant or adversely impact a substantial number of small entities. In a SNUR that published on June 2, 1997 (62 FR 29684) (FRL–5597–1), the Agency presented it's general determination that proposed and final SNURs are not expected to have a significant economic impact on a substantial number of small entities, which was provided to the Chief Counsel for Advocacy of the Small Business Administration.

According to the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, an Agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under the PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA's regulations, after initial display in the preamble of the final rule and in addition to its display on any related collection instrument, are listed in 40 CFR part 9.

The information collection requirements related to this action have already been approved by OMB pursuant to the PRA under OMB control number 2070–0012 (EPA ICR No. 574). This action does not impose any burden requiring additional OMB approval. If an entity were to submit a significant new use notice to the Agency, the annual burden is estimated to average between 30 and 170 hours per response. This burden estimate includes the time needed to review instructions, search existing data sources, gather and maintain the data needed, and complete, review and submit the required SNUN.

Send any comments about the accuracy of the burden estimate, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques, to the Director, OP Regulatory Information Division (2137), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. Please remember to include the OMB control number in any correspondence, but do not submit any completed forms to this address.

This rule is not subject to Executive Order 13211, "*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*" (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

IV. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the Agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This rule is a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 721

Environmental protection, Chemicals, Hazardous substances, Reporting and recordkeeping requirements.

Dated: March 1, 2002.

William H. Sanders, III

Office Director, Office of Pollution Prevention and Toxics.

Therefore, 40 CFR part 721 is amended as follows:

PART 721—[AMENDED]

1. The authority citation for part 721 continues to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

2. Section 721.1925 is amended as follows:

a. By revising the section heading.

b. By revising paragraphs (a)(1) and (a)(2)(iii).

c. By removing paragraph (b)(3).

§ 721.1925 Substituted carboheterocyclic butane tetracarboxylate (generic).

(a) * * * (1) The chemical substance identified generically as substituted carboheterocyclic butane tetracarboxylate (PMNs P–90–440 and P–95–4) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply when particle sizes of the chemical substance is greater than 250 microns.

(2) * * *

* * * * * *

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f).

* * * * * *

3. Section 721.9480 is amended as follows:

a. By revising the section heading.

b. By revising paragraphs (a)(1), (a)(2)(i), and (b)(1).

c. By removing and reserving paragraph (a)(2)(ii).

d. By removing paragraphs (a)(2)(iii), (a)(2)(iv), (a)(2)(v), and (b)(3).

§ 721.9480 Resorcinol, formaldehyde substituted carbomonocycle resin (generic).

(a) * * * (1) The chemical substance identified generically as resorcinol, formaldehyde substituted carbomonocycle resin (PMN P–89–769) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) * * *

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) * * *

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

* * * * * *

BILLING CODE 6560–50–S

DEPARTMENT OF THE INTERIOR

Office of the Secretary

43 CFR Part 35

RIN 1090–AA80

Change of Address for Office of Hearings and Appeals; Correction

AGENCY: Office of the Secretary, Interior.

ACTION: Final rule; correction.

SUMMARY: In the January 30, 2002, **Federal Register**, the Department of the Interior published a revision to its regulations governing administrative appeals to reflect a change of address for the Office of Hearings and Appeals (OHA). One of the sections for revision was erroneously cited. This document corrects that citation.

DATES: Effective on March 20, 2002.

FOR FURTHER INFORMATION CONTACT: Charles E. Breece, Principal Deputy Director, Office of Hearings and Appeals, 801 North Quincy Street, Arlington, Virginia 22203, telephone 702–235–3810.

SUPPLEMENTARY INFORMATION: The Department of the Interior published a final rule in the **Federal Register** of January 30, 2002, revising several parts of 43 CFR to reflect a change of address for OHA. 67 FR 4367. One of the sections for revision was erroneously cited as 43 CFR 35.1(g). There is no paragraph (g) in § 35.1. The correct citation is 43 CFR 35.2(g).

In rule FR Doc. 02–2188 published on January 30, 2002 (67 FR 4367), make the following correction: On page 4369, in the first column, change the section heading and instruction 25 to read as follows:

§ 35.2 [Amended]

25. In § 35.2(g), revise "4015 Wilson Boulevard" to read "801 North Quincy Street".

Dated: March 11, 2002.

P. Lynn Scarlett,

Assistant Secretary—Policy, Management and Budget.

[FR Doc. 02–6658 Filed 3–19–02; 8:45 am]

Pacific Halibut Fisheries; Catch Sharing Plans

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary final rule; annual management measures for Pacific halibut fisheries and approval of catch sharing plans.

SUMMARY: The Assistant Administrator for Fisheries, NOAA (AA), on behalf of the International Pacific Halibut Commission (IPHC), publishes annual management measures, promulgated as regulations by the IPHC and approved by the Secretary of State, governing the

VOL

2002
UMI

Pacific halibut fishery. The AA also announces the approval of modifications to the Catch Sharing Plan (CSP) for Area 2A and implementing regulations for 2002. These actions are intended to enhance the conservation of Pacific halibut and further the goals and objectives of the Pacific Fishery Management Council (PFMC) and the North Pacific Fishery Management Council (NPFMC).

DATES: Effective March 18, 2002, through the **Federal Register** publication of the 2003 specification management measures.

ADDRESSES: NMFS Alaska Region, 709 West 9th St., P.O. Box 21668, Juneau, AK 99802–1668 (http://www.fakr.noaa.gov); or NMFS Northwest Region, 7600 Sand Point Way NE, Seattle, WA 98115–0070 (http://www.nwr.noaa.gov).

FOR FURTHER INFORMATION CONTACT: Jay Ginter, 907–586–7228 or Yvonne deReynier, 206–526–6140.

SUPPLEMENTARY INFORMATION:

Background

The IPHC has promulgated regulations governing the Pacific halibut fishery in 2002, under the Convention between the United States and Canada for the Preservation of the Halibut Fishery of the North Pacific Ocean and Bering Sea (Convention), signed at Ottawa, Ontario, on March 2, 1953, as amended by a Protocol Amending the Convention (signed at Washington, D.C., on March 29, 1979). The IPHC regulations have been approved by the Secretary of State of the United States under section 4 of the Northern Pacific Halibut Act (Halibut Act, 16 U.S.C. 773–773k). Pursuant to regulations at 50 CFR 300.62, the approved IPHC regulations setting forth the 2002 IPHC annual management measures are published in the **Federal Register** to provide notice of their effectiveness, and to inform persons subject to the regulations of the restrictions and requirements for harvesting Pacific halibut.

The IPHC held its annual meeting in Seattle, WA, on January 22–25, 2002, and adopted regulations for 2002. The substantive changes to the previous IPHC regulations (66 FR 15801, March 21, 2001) include:

1. New catch limits for all areas;
2. Opening dates for the Area 2A commercial directed halibut fishery;
3. Specification of which commercial fishing regulations apply to the commercial treaty Indian fishery in Area 2A–1;
4. Revision of the definition of illegal possession of halibut such that a person is not required to know that they are in contravention of the IPHC regulations to be in illegal possession of halibut;
5. Allowance of fishing vessels carrying crab pots and operating off Alaska to have halibut heads, skins, bones and entrails on board provided they have documentation of legally acquiring the halibut body parts;
6. Recognition of the customary and traditional use of halibut (i.e. subsistence halibut) in Alaska; and
7. Removal of the expiration date of regulations allowing fishermen using Community Development Quota (CDQ) in Area 4E to retain halibut for personal use that are shorter than the minimum commercial size limit and also extension of this allowance to Area 4D CDQ fishermen.

In addition, this action implements the CSP for regulatory Area 2A. The CSP was developed by the PFMC under authority of the Halibut Act. Section 5 of the Halibut Act (16 U.S.C. 773c) provides the Secretary of Commerce (Secretary) with general responsibility to carry out the Convention and to adopt such regulations as may be necessary to implement the purposes and objectives of the Convention and the Halibut Act. The Secretary's authority has been delegated to the AA. Section 5 of the Halibut Act (16 U.S.C. 773c(c)) also authorizes the Regional Fishery Management Council having authority for the geographic area concerned to develop regulations governing the Pacific halibut catch in United States Convention waters that are in addition to, but not in conflict with, regulations of the IPHC. Pursuant to this authority, NMFS requested the PFMC to allocate halibut catches should such allocation be necessary.

Catch Sharing Plan for Area 2A

The PFMC's Area 2A CSP allocates the halibut catch limit for Area 2A among treaty Indian, non-Indian commercial, and non-Indian sport fisheries in and off Washington, Oregon, and California. Under the CSP, 35 percent of the Area 2A total allowable catch (TAC) is allocated to Washington treaty Indian tribes in Subarea 2A–1, and 65 percent is allocated to non-treaty fisheries in Area 2A. Treaty fisheries are divided into commercial fisheries, and ceremonial and subsistence fisheries. The allocation to non-treaty fisheries is divided into three shares, with the Washington sport fishery (north of the Columbia River) receiving 36.6 percent, the Oregon/California sport fishery receiving 31.7 percent, and the commercial fishery receiving 31.7 percent. The non-treaty commercial allocation is further divided between a directed longline fishery (85 percent) and an incidental catch allowance in the salmon troll fishery (15 percent). The directed commercial fishery in Area 2A is confined to southern Washington (south of 46°53'18" N. lat.), Oregon and California. North of Point Chehalis, WA (46°53'18" N. lat.) halibut may be retained by longline vessels participating in the limited entry, primary sablefish fishery. Under applicable regulations, incidental halibut retention in the primary sablefish fishery is only allowable when the overall Area 2A TAC is above 900,000 lb (408.2 mt,) which it is in 2002. The CSP also divides the sport fisheries into seven geographic areas, each with separate allocations, seasons, and bag limits.

For 2002, PFMC recommended changes to the CSP to modify the Pacific halibut sport fisheries in Area 2A in 2002 and beyond pursuant to recommendations from the Washington Department of Fish and Wildlife and the Oregon Department of Fish and Wildlife. These changes to the CSP will separate the Puget Sound sub-area of the Washington State sport fisheries into two regions with two separate season start dates and will allow Oregon anglers to retain up to two halibut on land.

A complete description of the PFMC recommended changes to the CSP, notice of a draft Environmental Assessment and Regulatory Impact Review (EA/RIR), and proposed sport fishery management measures were published in the **Federal Register** on February 11, 2002 (67 FR 6220) with a request for public comments by February 22, 2002. No public comments were received. Therefore, NMFS has approved the changes to the CSP as proposed, made a finding of no significant impact, and finalized the EA/RIR. Copies of the complete CSP for Area 2A as modified and the final EA/RIR are available from the NMFS Northwest Regional Office (see **ADDRESSES**).

In accordance with the CSP, the Washington Department of Fish and Wildlife (WDFW) and the Oregon Department of Fish and Wildlife (ODFW) held public workshops (after the IPHC set the Area 2A quota) in early February 2002, to develop recommendations on the opening dates and weekly structure of the sport fisheries. The WDFW and ODFW sent letters to NMFS discussing the outcome of the workshops and provided the following recommendations on the opening dates and season structure for the sport fisheries.

WDFW recommended a May 9 to July 12 season for eastern Puget Sound and a May 23 to July 27 season for western Puget Sound, 5 days per week (closed Tuesday and Wednesday). The recommended number of fishing days is based on an analysis of past harvest patterns in this fishery and meets the requirements of the CSP for the overall Puget Sound sport fishery subarea. For the Washington North Coast subarea, WDFW has recommended a season opening May 1 and continuing until the May-June sub-quota is taken, 5 days per week (closed Sunday and Monday), and a second season for July 1–4, with a possibility of re-opening this subarea if sufficient quota remains after July 4. WDFW also recommended extending the southern boundary of the North Coast subarea's closed area by four miles, in accordance with paragraph (f)(1)(ii) of the CSP. This modest increase in the size of the closed area is intended to lengthen the fishing season by reducing access to an area of higher halibut abundance, known as a halibut "hot spot." For the Washington South Coast subarea, WDFW has recommended a season opening May 1 and continuing until the quota is taken, 5 days per week (closed Friday and Saturday) in the offshore area and 7 days per week in the nearshore area. WDFW recommendations for both the North Coast and South Coast Washington subareas meet the requirements of the CSP.

Both WDFW and ODFW have recommended opening the Columbia River subarea on May 1 and continuing the season until the quota has been reached, 7 days per week. This recommended season meets the requirements of the CSP.

ODFW recommended starting the nearshore fishery in the Oregon Central Coast and South Coast subareas on May 1 and continuing the season until the sub-quota for that fishery is taken, 7 days per week. For the all-depth fisheries in those subareas, ODFW recommended a 4–day season of May 10, 11, 17, and 18, based on an analysis of past harvest rates, which indicated an increasing annual trend in this sport fishery. ODFW further recommended a 2 day August all-depth season of August 2 and 3. If the May season does not take the entire May sub-quota for these subareas, ODFW recommended these additional potential opening dates: June 7, 8, 21, 22. If the August season does not take the entire August sub-quota for these subareas, ODFW recommended these additional potential opening dates: August 23, 24, September 20, 21. These recommendations meet the requirements of the CSP for these subareas.

For the southernmost subarea, south of Humbug Mountain, Oregon, ODFW recommended opening this subarea on May 1 and continuing the season until the quota has been reached, 7 days per week. This recommended season meets the requirements of the CSP.

NMFS has implemented sport fishing management measures in Area 2A based on recommendations from the states in accordance with the CSP.

Annual Halibut Management Measures

The annual management measures that follow for the 2002 Pacific halibut fishery are identical to those recommended by the IPHC and approved by the Secretary of State.

2002 Pacific Halibut Fishery Regulations

Regulations Respecting the Convention Between Canada and the United States of America for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea

1. Short Title

These regulations may be cited as the Pacific Halibut Fishery Regulations.

2. Application

(1) These Regulations apply to persons and vessels fishing for halibut in, or possessing halibut taken from the maritime area as defined in Section 3.

(2) Sections 3 to 6 apply generally to all halibut fishing.

(3) Sections 7 to 21 apply to commercial fishing for halibut.

(4) Section 22 applies to the United States treaty Indian fishery in subarea 2A–1.

(5) Section 23 applies to customary and traditional fishing in Alaska.

(6) Section 24 applies to sport fishing for halibut.

(7) These Regulations do not apply to fishing operations authorized or conducted by the Commission for research purposes.

3. Interpretation

(1) In these Regulations,

(a) *Authorized officer* means any State, Federal, or Provincial officer authorized to enforce these regulations including, but not limited to, the National Marine Fisheries Service (NMFS), Canada's Department of Fisheries and Oceans (DFO), Alaska Division of Fish and Wildlife Protection (ADFWP), United States Coast Guard (USCG), Washington Department of Fish and Wildlife (WDFW), and the Oregon State Police (OSP);

(b) *Authorized clearance personnel* means an authorized officer of the United States, a representative of the Commission, or a designated fish processor;

(c) *Charter vessel* means a vessel used for hire in sport fishing for halibut, but not including a vessel without a hired operator;

(d) *Commercial fishing* means fishing, other than treaty Indian ceremonial and subsistence fishing as referred to in section 22, and customary and traditional fishing as referred to in section 23 and defined by and regulated pursuant to National Marine Fisheries Service regulations published at 50 CFR part 300, the resulting catch of which is sold or bartered; or is intended to be sold or bartered;

(e) *Commission* means the International Pacific Halibut Commission;

(f) *Daily bag limit* means the maximum number of halibut a person may take in any calendar day from Convention waters;

(g) *Fishing* means the taking, harvesting, or catching of fish, or any activity that can reasonably be expected to result in the taking, harvesting, or catching of fish, including specifically the deployment of any amount or component part of setline gear anywhere in the maritime area;

(h) *Fishing period limit* means the maximum amount of halibut that may be retained and landed by a vessel during one fishing period;

(i) *Land or Offload with respect to halibut*, means the removal of halibut from the catching vessel;

(j) *License* means a halibut fishing license issued by the Commission pursuant to section 4;

(k) *Maritime area*, in respect of the fisheries jurisdiction of a Contracting Party, includes without distinction areas within and seaward of the territorial sea and internal waters of that Party;

(l) *Operator*, with respect to any vessel, means the owner and/or the master or other individual on board and in charge of that vessel;

(m) *Overall length of a vessel* means the horizontal distance, rounded to the nearest foot, between the foremost part of the stem and the aftermost part of the stern (excluding bowsprits, rudders, outboard motor brackets, and similar fittings or attachments);

(n) *Person* includes an individual, corporation, firm, or association;

(o) *Regulatory area* means an area referred to in section 6;

(p) *Setline gear* means one or more stationary, buoyed, and anchored lines with hooks attached;

(q) *Sport fishing* means all fishing other than commercial fishing, treaty Indian ceremonial and subsistence

VOL
67
ISS
54
MR
20
2002
UMI

fishing as referred to in section 22, and customary and traditional fishing as referred to in section 23 and defined in and regulated pursuant to National Marine fisheries Service regulations published in 50 CFR part 300;

(r) *Tender* means any vessel that buys or obtains fish directly from a catching vessel and transports it to a port of landing or fish processor.

(2) In these Regulations, all bearings are true and all positions are determined by the most recent charts issued by the United States National Ocean Service or the Canadian Hydrographic Service.

(3) In these Regulations all weights shall be computed on the basis that the heads of the fish are off and their entrails removed.

4. Licensing Vessels for Area 2A

(1) No person shall fish for halibut from a vessel, nor possess halibut on board a vessel, used either for commercial fishing or as a charter vessel in Area 2A, unless the Commission has issued a license valid for fishing in Area 2A in respect of that vessel.

(2) A license issued for a vessel operating in Area 2A shall be valid only for operating either as a charter vessel or a commercial vessel, but not both.

(3) A vessel with a valid Area 2A commercial license cannot be used to sport fish for Pacific halibut in Area 2A.

(4) A license issued for a vessel operating in the commercial fishery in Area 2A shall be valid for one of the following, but not both.

(a) The directed commercial fishery during the fishing periods specified in paragraph (2) of section 8 and the incidental commercial fishery during the sablefish fishery specified in paragraph (3) of section 8; or

(b) the incidental catch fishery during the salmon troll fishery specified in paragraph (4) of section 8.

(5) A license issued in respect of a vessel referred to in paragraph (1) of this section must be carried on board that vessel at all times and the vessel operator shall permit its inspection by any authorized officer.

(6) The Commission shall issue a license in respect of a vessel, without fee, from its office in Seattle, Washington, upon receipt of a completed, written, and signed "Application for Vessel License for the Halibut Fishery" form.

(7) A vessel operating in the directed commercial fishery or the incidental commercial fishery during the sablefish fishery in Area 2A must have its "Application for Vessel License for the Halibut Fishery" form postmarked no later than 11:59 p.m. on April 30, or on the first weekday in May if April 30 is a Saturday or Sunday.

(8) A vessel operating in the incidental commercial fishery during the salmon troll season in Area 2A must have its "Application for Vessel License for the Halibut Fishery" form postmarked no later than 11:59 p.m. on March 31, or the first weekday in April if March 31 is a Saturday or Sunday.

(9) Application forms may be obtained from any authorized officer or from the Commission.

(10) Information on "Application for Vessel License for the Halibut Fishery" form must be accurate.

(11) The "Application for Vessel License for the Halibut Fishery" form shall be completed and signed by the vessel owner.

(12) Licenses issued under this section shall be valid only during the year in which they are issued.

(13) A new license is required for a vessel that is sold, transferred, renamed, or redocumented.

(14) The license required under this section is in addition to any license, however designated, that is required under the laws of the United States or any of its States.

(15) The United States may suspend, revoke, or modify any license issued under this section under policies and procedures in Title 15, CFR part 904.

5. In-Season Actions

(1) The Commission is authorized to establish or modify regulations during the season after determining that such action:

(a) Will not result in exceeding the catch limit established preseason for each regulatory area;

(b) Is consistent with the Convention between the United States of America and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea, and applicable domestic law of either Canada or the United States; and

(c) Is consistent, to the maximum extent practicable, with any domestic catch sharing plans or other domestic allocation programs developed by the United States or Canadian governments.

(2) In-season actions may include, but are not limited to, establishment or modification of the following:

(a) Closed areas;
(b) Fishing periods;
(c) Fishing period limits;
(d) Gear restrictions;
(e) Recreational bag limits;
(f) Size limits; or
(g) Vessel clearances.

(3) In-season changes will be effective at the time and date specified by the Commission.

(4) The Commission will announce in-season actions under this section by providing notice to major halibut processors; Federal, State, United States treaty Indian, Provincial fishery officials, and the media.

6. Regulatory Areas

The following areas shall be regulatory areas for the purposes of the Convention (see Figure 1):

(1) Area 2A includes all waters off the states of California, Oregon, and Washington;

(2) Area 2B includes all waters off British Columbia;

(3) Area 2C includes all waters off Alaska that are east of a line running 340° true from Cape Spencer Light (58°11′57″N. lat., 136°38′18″W. long.) and south and east of a line running 205° true from said light;

(4) Area 3A includes all waters between Area 2C and a line extending from the most northerly point on Cape Aklek (57°41′15″ N. lat., 155°35′00″ W. long.) to Cape Ikolik (57°17′17″ N. lat., 154°47′18″ W. long.), then along the Kodiak Island coastline to Cape Trinity (56°44′50″ N. lat., 154°08′44″ W. long.), then 140° true;

(5) Area 3B includes all waters between Area 3A and a line extending 150° true from Cape Lutke (54°29′00″ N. lat., 164°20′00″ W. long.) and south of 54°49′00″ N. lat. in Isanotski Strait;

(6) Area 4A includes all waters in the Gulf of Alaska west of Area 3B and in the Bering Sea west of the closed area defined in section 10 that are east of 172°00′00″ W. long. and south of 56°20′00″ N. lat.;

(7) Area 4B includes all waters in the Bering Sea and the Gulf of Alaska west of Area 4A and south of 56°20′00″N. lat.;

(8) Area 4C includes all waters in the Bering Sea north of Area 4A and north of the closed area defined in section 10 which are east of 171°00′00″ W. long., south of 58°00′00″ N. lat., and west of 168°00′00″ W. long.;

(9) Area 4D includes all waters in the Bering Sea north of Areas 4A and 4B, north and west of Area 4C, and west of 168°00′00″ W. long.;

(10) Area 4E includes all waters in the Bering Sea north and east of the closed area defined in section 10, east of 168°00′00″ W. long., and south of 65°34′00″ N. lat..

7. Fishing in Regulatory Area 4E and 4D

(1) Section 7 applies only to any person fishing, or vessel that is used to fish for, Area 4E Community Development Quota (CDQ) or Area 4D CDQ halibut provided that the total annual halibut catch of that person or vessel is landed at a port within Area 4E or 4D.

(2) A person may retain halibut taken with setline gear in Area 4E CDQ and 4D CDQ fishery that are smaller than the size limit specified in section 13, provided that no person may sell or barter such halibut.

(3) The manager of a CDQ organization that authorizes persons to harvest halibut in the Area 4E or 4D CDQ fisheries must report to the Commission the total number and weight of undersized halibut taken and retained by such persons pursuant to section 7, paragraph (2). This report, which shall include data and methodology used to collect the data, must be received by the Commission prior to December 1 of the year in which such halibut were harvested.

8. Fishing Periods

(1) The fishing periods for each regulatory area apply where the catch limits specified in section 11 have not been taken.

(2) Each fishing period in the Area 2A directed fishery[1] shall begin at 0800 hours and terminate at 1800 hours local time on June 26, July 10, July 24, August 7, August 21, September 4, and September 18 unless the Commission specifies otherwise.

(3) Notwithstanding paragraph (7) of section 11, an incidental catch fishery[2] is authorized during the sablefish seasons in Area 2A in accordance with regulations promulgated by National Marine Fisheries Service (NMFS).

(4) Notwithstanding paragraph (2), and paragraph (7) of section 11, an incidental catch fishery is authorized during salmon troll seasons in Area 2A in accordance with regulations promulgated by the National Marine Fisheries Service (NMFS).

(5) The fishing period in Areas 2B, 2C, 3A, 3B, 4A, 4B, 4C, 4D, and 4E shall begin at 1200 hours local time on March 18 and terminate at 1200 hours local time on November 18, unless the Commission specifies otherwise.

(6) All commercial fishing for halibut in Areas 2A, 2B, 2C, 3A, 3B, 4A, 4B, 4C, 4D, and 4E shall cease at 1200 hours local time on November 18.

9. Closed Periods

(1) No person shall engage in fishing for halibut in any regulatory area other than during the fishing periods set out in section 8 in respect of that area.

(2) No person shall land or otherwise retain halibut caught outside a fishing period applicable to the regulatory area where the halibut was taken.

(3) Subject to paragraphs (7), (8), (9), and (10) of section 19, these Regulations do not prohibit fishing for any species of fish other than halibut during the closed periods.

(4) Notwithstanding paragraph (3), no person shall have halibut in his/her possession while fishing for any other species of fish during the closed periods.

(5) No vessel shall retrieve any halibut fishing gear during a closed period if the vessel has any halibut on board.

(6) A vessel that has no halibut on board may retrieve any halibut fishing gear during the closed period after the operator notifies an authorized officer or representative of the Commission prior to that retrieval.

(7) After retrieval of halibut gear in accordance with paragraph (6), the vessel shall submit to a hold inspection at the discretion of the authorized officer or representative of the Commission.

(8) No person shall retain any halibut caught on gear retrieved referred to in paragraph (6).

(9) No person shall possess halibut aboard a vessel in a regulatory area during a closed period unless that vessel is in continuous transit to or within a port in which that halibut may be lawfully sold.

BILLING CODE 3510-22-S

PACIFIC HALIBUT FISHERY REGULATIONS 2001

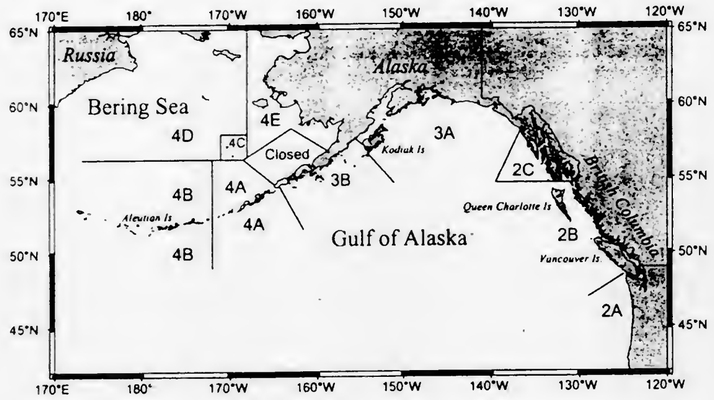

Figure 1. Regulatory areas for the Pacific halibut fishery.

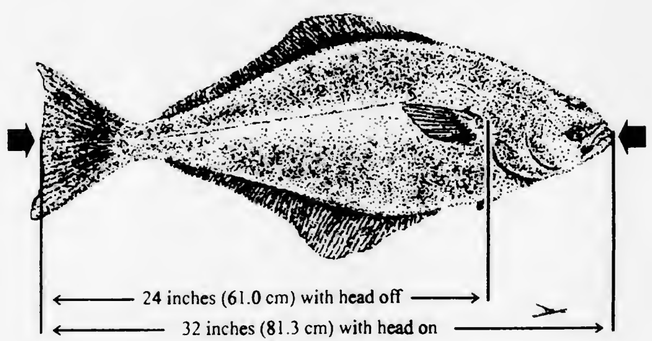

Figure 2. Minimum commercial size

BILLING CODE 3510-22-C

10. Closed Area

All waters in the Bering Sea north of 55°00′00″N. lat. in Isanotski Strait that are enclosed by a line from Cape Sarichef Light (54°36′00″ N. lat., 164°55′42″ W. long.) to a point at 56°20′00″ N. lat., 168°30′00″ W. long.; thence to a point at 58°21′25″ N. lat., 163°00′00″ W. long.; thence to Strogonof Point (56°53′18″ N. lat., 158°50′37″ W. long.); and then along the northern coasts of the Alaska Peninsula and Unimak Island to the point of origin at Cape Sarichef Light are closed to halibut fishing and no person shall fish for halibut therein or have halibut in his/her possession while in those waters except in the course of a continuous transit across those waters. All waters in Isanotski Strait between 55°00′00″N. lat. and 54°49′00″N. lat. are closed to halibut fishing.

11. Catch Limits

(1) The total allowable catch of halibut to be taken during the halibut fishing periods specified in section 8 shall be limited to the weight expressed in pounds or metric tons shown in the following table:

Regulatory Area	Catch Limit in Pounds	Catch Limit in Metric Tons
2A: directed commercial, and incidental commercial during salmon troll fishery	262,000	118.8
2A: incidental commercial during sablefish fishery	88,389	40.1
2B	11,750,000	5,328.8
2C	8,500,000	3,854.9
3A	22,630,000	10,263.0
3B	17,130,000	7,768.7
4A	4,970,000	2,254.0
4B	4,180,000	1,895.7
4C	2,030,000	920.6
4D	2,030,000	920.6
4E	390,000	176.9

(2) Notwithstanding paragraph (1), regulations pertaining to the division of the Area 2A catch limit between the directed commercial fishery and the incidental catch fishery as described in paragraph (4) of section 8 will be promulgated by the National Marine Fisheries Service and published in the **Federal Register**.

(3) The Commission shall determine and announce to the public the date on which the catch limit for Area 2A will be taken.

(4) Notwithstanding paragraph (1), Area 2B will close only when all Individual Vessel Quotas assigned by Canada's Department of Fisheries and Oceans are taken, or November 18, whichever is earlier.

(5) Notwithstanding paragraph (1), Areas 2C, 3A, 3B, 4A, 4B, 4C, 4D, and 4E will each close only when all Individual Fishing Quotas and all Community Development Quotas issued by the National Marine Fisheries Service have been taken, or November 18, whichever is earlier.

(6) If the Commission determines that the catch limit specified for Area 2A in paragraph (1) would be exceeded in an unrestricted 10–hour fishing period as specified in paragraph (2) of section 8, the catch limit for that area shall be considered to have been taken unless fishing period limits are implemented.

(7) When under paragraphs (2), (3), and (6) the Commission has announced a date on which the catch limit for Area 2A will be taken, no person shall fish for halibut in that area after that date for the rest of the year, unless the Commission has announced the reopening of that area for halibut fishing.

12. Fishing Period Limits

(1) It shall be unlawful for any vessel to retain more halibut than authorized by that vessel's license in any fishing period for which the Commission has announced a fishing period limit.

(2) The operator of any vessel that fishes for halibut during a fishing period when fishing period limits are in effect must, upon commencing an offload of halibut to a commercial fish processor, completely offload all halibut on board said vessel to that processor and ensure that all halibut is weighed and reported on State fish tickets.

(3) The operator of any vessel that fishes for halibut during a fishing period when fishing period limits are in effect must, upon commencing an offload of halibut other than to a commercial fish processor, completely offload all halibut on board said vessel and ensure that all halibut are weighed and reported on State fish tickets.

(4) The provisions of paragraph (3) are not intended to prevent retail over-the-side sales to individual purchasers so long as all the halibut on board is ultimately offloaded and reported.

(5) When fishing period limits are in effect, a vessel's maximum retainable catch will be determined by the Commission based on

(a) the vessel's overall length in feet and associated length class;

(b) the average performance of all vessels within that class; and

(c) the remaining catch limit.

(6) Length classes are shown in the following table:

Overall Length	Vessel Class
1–25	A
26–30	B
31–35	C
36–40	D
41–45	E
46–50	F
51–55	G
56+	H

(7) Fishing period limits in Area 2A apply only to the directed halibut fishery referred to in paragraph (2) of section 8.

13. Size Limits

(1) No person shall take or possess any halibut that

(a) with the head on, is less than 32 inches (81.3 cm) as measured in a straight line, passing over the pectoral fin from the tip of the lower jaw with the mouth closed, to the extreme end of the middle of the tail, as illustrated in Figure 2; or

VOL
67
ISS
54
MR
20
2002
UMI

(b) with the head removed, is less than 24 inches (61.0 cm) as measured from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail, as illustrated in Figure 2.

(2) No person shall possess on board a vessel a halibut filleted or a halibut that has been mutilated, or otherwise disfigured in any manner that prevents the determination of whether the halibut complies with the size limits specified in this section, except that this paragraph shall not prohibit the possession on board a vessel:

(a) Of halibut cheeks cut from halibut caught by persons authorized to process the halibut on board in accordance with NMFS regulations published at 50 CFR part 679; and

(b) Of fillets from halibut that have been offloaded in accordance with section 17 may be possessed on board a vessel in the port of landing up to 1800 hours local time on the calendar day following the offload.[3]

(3) No person on board a vessel fishing for, or tendering, halibut caught in Area 2A shall possess any halibut that has had its head removed.

14. Careful Release of Halibut

(1) All halibut that are caught and are not retained shall be immediately released outboard of the roller and returned to the sea with a minimum of injury by

(a) hook straightening;

(b) cutting the gangion near the hook; or

(c) carefully removing the hook by twisting it from the halibut with a gaff.

15. Vessel Clearance in Area

(1) The operator of any vessel that fishes for halibut in Areas 4A, 4B, 4C, or 4D must obtain a vessel clearance before fishing in any of these areas, and before the landing of any halibut caught in any of these areas, unless specifically exempted in paragraphs (10), (13), (14), (15), or (16).

(2) An operator obtaining a vessel clearance required by paragraph (1) must obtain the clearance in person from the authorized clearance personnel and sign the IPHC form documenting that a clearance was obtained, except that when the clearance is obtained via VHF radio referred to in paragraphs 5, 8, and 9, the authorized clearance personnel must sign the IPHC form documenting that the clearance was obtained.

(3) The vessel clearance required under paragraph (1) prior to fishing in Area 4A may be obtained only at Nazan Bay on Atka Island, Dutch Harbor or Akutan, Alaska, from an authorized officer of the United States, a representative of the Commission, or a designated fish processor.

(4) The vessel clearance required under paragraph (1) prior to fishing in Area 4B may only be obtained at Nazan Bay on Atka Island or Adak, Alaska, from an authorized officer of the United States, a representative of the Commission, or a designated fish processor.

(5) The vessel clearance required under paragraph (1) prior to fishing in Area 4C or 4D may be obtained only at St. Paul or St. George, Alaska, from an authorized officer of the United States, a representative of the Commission, or a designated fish processor by VHF radio and allowing the person contacted to confirm visually the identity of the vessel.

(6) The vessel operator shall specify the specific regulatory area in which fishing will take place.

(7) Before unloading any halibut caught in Area 4A, a vessel operator may obtain the clearance required under paragraph (1) only in Dutch Harbor or Akutan, Alaska, by contacting an authorized officer of the United States, a representative of the Commission, or a designated fish processor.

(8) Before unloading any halibut caught in Area 4B, a vessel operator may obtain the clearance required under paragraph (1) only in Nazan Bay on Atka Island or Adak, by contacting an authorized officer of the United States, a representative of the Commission, or a designated fish processor by VHF radio or in person.

(9) Before unloading any halibut caught in Area 4C or 4D, a vessel operator may obtain the clearance required under paragraph (1) only in St. Paul, St. George, Dutch Harbor, or Akutan, Alaska, either in person or by contacting an authorized officer of the United States, a representative of the Commission, or a designated fish processor. The clearances obtained in St. Paul or St. George, Alaska, can be obtained by VHF radio and allowing the person contacted to confirm visually the identity of the vessel.

(10) Any vessel operator who complies with the requirements in section 18 for possessing halibut on board a vessel that was caught in more, than one regulatory area in Area 4 is exempt from the clearance requirements of paragraph (1) of this section, but must comply with the following requirements:

(a) The operator of the vessel must obtain a vessel clearance prior to fishing in Area 4 in either Dutch Harbor, Akutan, St. Paul, St. George, Adak, or Nazan Bay on Atka Island by contacting an authorized officer of the United States, a representative of the Commission, or a designated fish processor. The clearance obtained in St. Paul, St. George, Adak, or Nazan Bay on Atka Island can be obtained by VHF radio and allowing the person contacted to confirm visually the identity of the vessel. This clearance will list the Areas in which the vessel will fish; and

(b) Before unloading any halibut from Area 4, the vessel operator must obtain a vessel clearance from Dutch Harbor, Akutan, St. Paul, St. George, Adak, or Nazan Bay on Atka Island by contacting an authorized officer of the United States, a representative of the Commission, or a designated fish processor. The clearance obtained in St. Paul or St. George can be obtained by VHF radio and allowing the person contacted to confirm visually the identity of the vessel. The clearance obtained in Adak or Nazan Bay on Atka Island can be obtained by VHF radio.

(11) Vessel clearances shall be obtained between 0600 and 1800 hours, local time.

(12) No halibut shall be on board the vessel at the time of the clearances required prior to fishing in Area 4.

(13) Any vessel that is used to fish for halibut only in Area 4A and lands its total annual halibut catch at a port within Area 4A is exempt from the clearance requirements of paragraph (1).

(14) Any vessel that is used to fish for halibut only in Area 4B and lands its total annual halibut catch at a port within Area 4B is exempt from the clearance requirements of paragraph (1).

(15) Any vessel that is used to fish for halibut only in Area 4C and lands its total annual halibut catch at a port within Area 4C is exempt from the clearance requirements of paragraph (1).

(16) Any vessel that is used to fish for halibut only in Areas 4D or 4E and lands its total annual halibut catch at a port within Areas 4D, 4E, or the closed area defined in section 10, is exempt from the clearance requirements of paragraph (1).

16. Logs

(1) The operator of any U.S. vessel fishing for halibut that has an overall length of 26 feet (7.9 meters) or greater shall maintain an accurate log of halibut fishing operations in the Groundfish/Individual Fishing Quota (IFQ) Daily Fishing Longline and Pot Gear Logbook provided by NMFS, or Alaska hook-and-line logbook provided by Petersburg Vessel Owners Association or Alaska Longline Fisherman's Association, or the Alaska Department of Fish and Game (ADF&G) longline-pot logbook, or the logbook provided by IPHC.

(2) The logbook referred to in paragraph (1) must include the following information:

(a) The name of the vessel and the state vessel number (ADF&G) or Washington Department of Fish and Wildlife or Oregon Department of Fish and Wildlife or California Department of Fish and Game vessel number);

(b) The date(s) upon which the fishing gear is set or retrieved;

(c) The latitude and longitude or loran coordinates or a direction and distance from a point of land for each set or day;

(d) The number of skates deployed or retrieved, and number of skates lost; and

(e) The total weight or number of halibut retained for each set or day.

(3) The logbook referred to in paragraph (1) shall be

(a) maintained on board the vessel;

(b) updated not later than 24 hours after midnight local time for each day fished and prior to the offloading or sale of halibut taken during that fishing trip;

(c) retained for a period of two years by the owner or operator of the vessel;

(d) open to inspection by an authorized officer or any authorized representative of the Commission upon demand; and

(e) kept on board the vessel when engaged in halibut fishing, during transits to port of landing, and until the offloading of all halibut is completed.

(4) The log referred to in paragraph (1) does not apply to the incidental halibut fishery during the salmon troll season in Area 2A defined in paragraph (4) of section 8.

(5) The operator of any Canadian vessel fishing for halibut shall maintain an accurate log recorded in the British Columbia Halibut Fishery logbook provide by DFO.

(6) The logbook referred to in paragraph (5) must include the following information:

(a) The name of the vessel and the Department of Fisheries and Ocean's vessel number;

(b) The date(s) upon which the fishing gear is set or retrieved;

(c) The latitude and longitude or loran coordinates or a direction and distance from a point of land for each set or day;

(d) The number of skates deployed or retrieved, and number of skates lost; and

(e) The total weight or number of halibut retained for each set or day.

(7) The logbook referred to in paragraph (5) shall be

(a) maintained on board the vessel;

(b) updated not later than 24 hours after midnight local time for each day fished and prior to the offloading or sale of halibut taken during that fishing trip;

(c) retained for a period of two years by the owner or operator of the vessel;

(d) open to inspection by an authorized officer or any authorized representative of the Commission upon demand;

(e) kept on board the vessel when engaged in halibut fishing, during transits to port of landing, and until the offloading of all halibut is completed;

(f) mailed to the Department of Fisheries and Oceans (white copy) within seven days of offloading; and

(g) mailed to the IPHC (yellow copy) within seven days of the final offload if not collected by an International Pacific Halibut Commission employee.

(8) The poundage of any halibut that is not sold, but is utilized by the vessel operator, his/her crew members, or any other person for personal use, shall be recorded in the vessel's log within 24–hours of offloading.

(9) No person shall make a false entry in a log referred to in this section.

17. Receipt and Possession of Halibut

(1) No person shall receive halibut from a United States vessel that does not have on board the license required by section 4.

(2) No person shall offload halibut from a vessel unless the gills and entrails have been removed prior to offloading.

(3) It shall be the responsibility of a vessel operator who lands halibut to continuously and completely offload at a single offload site all halibut on board the vessel.

(4) A registered buyer (as that term is defined in regulations promulgated by the NMFS and codified at 50 CFR part 679) who receives halibut harvested in Individual Fishing Quota (IFQ) and Community Development Quota (CDQ) fisheries in Areas 2C, 3A, 3B, 4A, 4B, 4C, 4D, and 4E, directly from the vessel operator that harvested such halibut must weigh all the halibut received and record the following information on Federal catch reports: date of offload; name of vessel; vessel number; scale weight obtained at the time of offloading, including the weight (in pounds) of halibut purchased by the registered buyer, the weight (in pounds) of halibut offloaded in excess of the IFQ or CDQ, the weight of halibut (in pounds) retained for personal use or for future sale, and the weight (in pounds) of halibut discarded as unfit for human consumption.

(5) The first recipient, commercial fish processor, or buyer in the United States who purchases or receives halibut directly from the vessel operator that harvested such halibut must weigh and record all halibut received and record the following information on state fish tickets: the date of offload, vessel number, total weight obtained at the time of offload including the weight (in pounds) of halibut purchased, the weight (in pounds) of halibut offloaded in excess of the IFQ, CDQ, or fishing period limits, the weight of halibut (in pounds) retained for personal use or for future sale, and the weight (in pounds) of halibut discarded as unfit for human consumption.

(6) The master or operator of a Canadian vessel that was engaged in halibut fishing must weigh and record all halibut on board said vessel at the time offloading commences and record on Provincial fish tickets or Federal catch reports the date, locality, name of vessel, the name(s) of the person(s) from whom the halibut was purchased; and the scale weight obtained at the time of offloading of all halibut on board the vessel including the pounds purchased; pounds in excess of individual vessel quotas; pounds retained for personal use; and pounds discarded as unfit for human consumption.

(7) No person shall make a false entry on a State or Provincial fish ticket or a Federal catch or landing report referred to in paragraphs (4), (5), and (6) of section 17.

(8) A copy of the fish tickets or catch reports referred to in paragraphs (4), (5), and (6) shall be

(a) retained by the person making them for a period of three years from the date the fish tickets or catch reports are made; and

(b) open to inspection by an authorized officer or any authorized representative of the Commission.

(9) No person shall possess any halibut taken or retained in contravention of these Regulations.

(10) When halibut are delivered to other than a commercial fish processor the records required by paragraph (5) shall be maintained by the operator of the vessel from which that halibut was caught, in compliance with paragraph (8).

(11) It shall be unlawful to enter a Halibut Commission license number on a State fish ticket for any vessel other than the vessel actually used in catching the halibut reported thereon.

18. Fishing Multiple Regulatory Areas

(1) Except as provided in this section, no person shall possess at the same time on board a vessel halibut caught in more than one regulatory area.

(2) Halibut caught in Regulatory Areas 2C, 3A, and 3B may be possessed on board a vessel at the same time providing the operator of the vessel:

[3] DFO has more restrictive regulations therefore section 13(2)b does not apply to fish caught in Area 2B or landed in British Columbia.

VOL
67
ISS
54
MR
20
2002
UMI

(a) Has a NMFS-certified observer on board when required by NMFS regulations[4] published at 50 CFR 679.7(f)(4); and

(b) Can identify the regulatory area in which each halibut on board was caught by separating halibut from different areas in the hold, tagging halibut, or by other means.

(3) Halibut caught in Regulatory Areas 4A, 4B, 4C, and 4D may be possessed on board a vessel at the same time providing the operator of the vessel:

(a) Has a NMFS-certified observer on board the vessel when halibut caught in different regulatory areas are on board; and

(b) Can identify the regulatory area in which each halibut on board was caught by separating halibut from different areas in the hold, tagging halibut, or by other means.

(4) Halibut caught in Regulatory Areas 4A, 4B, 4C, and 4D may be possessed on board a vessel when in compliance with paragraph (3) and if halibut from Area 4 are on board the vessel, the vessel can have halibut caught in Regulatory Areas 2C, 3A, and 3B on board if in compliance with paragraph (2).

19. Fishing Gear

(1) No person shall fish for halibut using any gear other than hook and line gear.

(2) No person shall possess halibut taken with any gear other than hook and line gear.

(3) No person shall possess halibut while on board a vessel carrying any trawl nets or fishing pots capable of catching halibut, except that in Areas 2C, 3A, 3B, 4A, 4B, 4C, 4D, or 4E, halibut heads, skin, entrails, bones or fins for use as bait may be possessed on board a vessel carrying pots capable of catching halibut, provided that a receipt documenting purchase or transfer of these halibut parts is on board the vessel.

(4) All setline or skate marker buoys carried on board or used by any United States vessel used for halibut fishing shall be marked with one of the following:

(a) The vessel's name;

(b) The vessel's state license number; or

(c) The vessel's registration number.

(5) The markings specified in paragraph (4) shall be in characters at least four inches in height and one-half inch in width in a contrasting color visible above the water and shall be maintained in legible condition.

(6) All setline or skate marker buoys carried on board or used by a Canadian vessel used for halibut fishing shall be

(a) floating and visible on the surface of the water; and

(b) legibly marked with the identification plate number of the vessel engaged in commercial fishing from which that setline is being operated.

(7) No person on board a vessel from which setline gear was used to fish for any species of fish anywhere in Area 2A during the 72–hour period immediately before the opening of a halibut fishing period shall catch or possess halibut anywhere in those waters during that halibut fishing period.

(8) No vessel from which setline gear was used to fish for any species of fish anywhere in Area 2A during the 72–hour period immediately before the opening of a halibut fishing period may be used to catch or possess halibut anywhere in those waters during that halibut fishing period.

(9) No person on board a vessel from which setline gear was used to fish for any species of fish anywhere in Areas 2B, 2C, 3A, 3B, 4A, 4B, 4C, 4D, or 4E during the 72–hour period immediately before the opening of the halibut fishing season shall catch or possess halibut anywhere in those areas until the vessel has removed all of its setline gear from the water and has either

(a) made a landing and completely offloaded its entire catch of other fish; or

(b) submitted to a hold inspection by an authorized officer.

(10) No vessel from which setline gear was used to fish for any species of fish anywhere in Areas 2B, 2C, 3A, 3B, 4A, 4B, 4C, 4D, or 4E during the 72–hour period immediately before the opening of the halibut fishing season may be used to catch or possess halibut anywhere in those areas until the vessel has removed all of its setline gear from the water and has either

(a) made a landing and completely offloaded its entire catch of other fish; or

(b) submitted to a hold inspection by an authorized officer.

(11) Notwithstanding any other provision in these regulations, a person may retain and possess, but not sell or barter, halibut taken with trawl gear only as authorized by Prohibited Species Donation regulations of the National Marine Fisheries Service.

20. Retention of Tagged Halibut

(1) Nothing contained in these Regulations prohibits any vessel at any time from retaining and landing a halibut that bears a Commission tag at the time of capture, if the halibut with the tag still attached is reported at the time of landing and made available for examination by a representative of the Commission or by an authorized officer.

(2) After examination and removal of the tag by a representative of the Commission or an authorized officer, the halibut:

(a) May be retained for personal use; or

(b) May be sold if it complies with the provisions of section 13.

21. Supervision of Unloading and Weighing

The unloading and weighing of halibut may be subject to the supervision of authorized officers to assure the fulfillment of the provisions of these Regulations.

22. Fishing by United States Treaty Indian Tribes

(1) Halibut fishing in subarea 2A–1 by members of United States treaty Indian tribes located in the State of Washington shall be regulated under regulations promulgated by the National Marine Fisheries Service and published in the **Federal Register**.

(2) Subarea 2A–1 includes all waters off the coast of Washington that are north of 46°53′18″ N. lat. and east of 125°44′00″ W. long., and all inland marine waters of Washington.

(3) Section 13 (size limits), section 14 (careful release of halibut), section 16 (logs), section 17 (receipt and possession of halibut) and section 19 (fishing gear), except paragraphs 7 and 8 of section 19, apply to commercial fishing for halibut in subarea 2A–1 by the treaty Indian tribes.

(3) Commercial fishing for halibut in subarea 2A–1 is permitted with hook and line gear from March 18 through November 18, or until 467,500 pounds (212.0 metric tons) is taken, whichever occurs first.

(4) Ceremonial and subsistence fishing for halibut in subarea 2A–1 is permitted with hook and line gear from January 1 through December 31, and is estimated to take 16,000 pounds (7.3 metric tons).

23. Customary and Traditional Fishing in Alaska

(1) Customary and traditional fishing for halibut in Regulatory Areas 2C, 3A, 3B, 4A, 4B, 4C, 4D, and 4E shall be governed pursuant to regulations promulgated by the National Marine Fisheries Service and published in 50 CFR part 300.

(2) Customary and traditional fishing is authorized from January 1 through December 31.

(3) Section 23 is in effect only when National Marine Fisheries Service publishes subsistence (customary and traditional use) regulations in 50 CFR part 300.

24. Sport Fishing for Halibut

(1) No person shall engage in sport fishing for halibut using gear other than a single line with no more than two hooks attached; or a spear.

(2) In all waters off Alaska:

(a) The sport fishing season is from February 1 to December 31;

(b) The daily bag limit is two halibut of any size per day per person.

(3) In all waters off British Columbia:

(a) The sport fishing season is from February 1 to December 31;

(b) The daily bag limit is two halibut of any size per day per person.

(4) In all waters off California, Oregon, and Washington:

(a) The total allowable catch of halibut shall be limited to

(1) 214,110 pounds (97.1 mt) in waters off Washington and

(2) 262,001 pounds (118.8 mt) in waters off California and Oregon;

(b) The sport fishing subareas, subquotas, fishing dates, and daily bag limits are as follows, except as modified under the inseason actions in Section 24. All sport fishing in Area 2A (except for fish caught in the North Washington coast area and landed into Neah Bay) is managed on a "port of landing" basis, whereby any halibut landed into a port counts toward the quota for the area in which that port is located, and the regulations governing the area of landing apply, regardless of the specific area of catch.

(i) In Puget Sound and the U.S. waters in the Strait of Juan de Fuca, east of a line extending from 48°17′30″ N. lat., 124°23′70″ W. long. north to 48°24′70″ N. lat., 124°23′10″ W. long., there is no quota. This area is managed by setting a season that is projected to result in a catch of 57,393 lb (26 mt).

(A) The fishing season in eastern Puget Sound (east of 123°49′30″ W. long.) is May 9 through July 12 and the fishing season in western Puget Sound (west of 123°49′30″ W. long.) is May 23 through July 26, 5 days a week (Thursday through Monday).

(B) The daily bag limit is one halibut of any size per day per person.

(ii) In the area off the north Washington coast, west of the line described in paragraph (4)(b)(i) of this section and north of the Queets River (47°31′42″ N. lat.), the quota for landings into ports in this area is 108,030 lb (49 mt). Landings into Neah Bay of halibut caught in this area will be governed by this paragraph.

(A) The fishing seasons are:

(*1*) Commencing May 1 and continuing 5 days a week (Tuesday through Saturday) until 70,030 lb (31.8 mt) are estimated to have been taken and the season is closed by the Commission, or until June 30, whichever occurs first.

(*2*) From July 1 through July 4, and continuing thereafter for 5 days a week (Tuesday through Saturday) until the overall area quota of 108,030 lb (49 mt) is estimated to have been taken and the area is closed by the Commission, or until September 30, whichever occurs first.

(B) The daily bag limit is one halibut of any size per day per person.

(C) A portion of this area about 19 nm (35 km) southwest of Cape Flattery is closed to sport fishing for halibut. The closed area is within a rectangle defined by these four corners: 48°18′00″ N. lat., 125°11′00″ W. long.; 48°18′00″ N. lat., 124°59′00″ W. long.; 48°00′00″ N. lat., 125°11′00″ W. long.; and, 48°00′00″ N. lat., 124°59′00″ W. long.

(iii) In the area between the Queets River, WA, and Leadbetter Point, WA (46°38′10″ N. lat.), the quota for landings into ports in this area is 42,739 lb (19.4 mt).

(A) The fishing season commences on May 1 and continues 5 days a week (Sunday through Thursday) in all waters, and commences on May 1 and continues 7 days a week in the area from Queets River south to 47°00′00 N. lat. and east of 124°40′00″ W. long., until 42,739 lb (19.4 mt) is estimated to have been taken and the season is closed by the Commission, or until September 30, whichever occurs first.

(B) The daily bag limit is one halibut of any size per day per person.

(iv) In the area between Leadbetter Point, WA, and Cape Falcon, OR (45°46′00″ N. lat.), the quota for landings into ports in this area is 11,188 lb (5.1 mt).

(A) The fishing season commences on May 1, and continues every day through September 30, or until 11,188 lb (5.1 mt) are estimated to have been taken and the area is closed by the Commission, whichever occurs first.

(B) The daily bag limit is the first halibut taken, per person, of 32 inches (81.3 cm) or greater in length.

(v) In the area off Oregon between Cape Falcon and the Siuslaw River at the Florence north jetty (44°01′08″ N. lat.), the quota for landings into ports in this area is 230,639 lb (104.6 mt).

(A) The fishing seasons are:

(*1*) The first season commences May 1 and continues every day through September 30, in the area inside the 30–fathom (55 m) curve nearest to the coastline as plotted on National Ocean Service charts numbered 18520, 18580, and 18600, or until the combined subquotas of the north central and south central inside 30–fathom fisheries (19,797 lb (9.0 mt)) or any inseason revised subquota is estimated to have been taken and the season is closed by the Commission, whichever is earlier.

(*2*) The second season is open on May 10, 11, 17, and 18. The projected catch for this season is 156,835 lb (71.1 mt). If sufficient unharvested catch remains for an additional days fishing, the season will reopen. Dependent on the amount of unharvested catch available, the potential season reopening dates will be: June 7, 8, 21, 22. If a decision is made inseason by NMFS to allow fishing on either of these additional dates, notice of the opening will be announced on the NMFS hotline 206–526–6667 or 800–662–9825. No halibut fishing will be allowed on the additional dates unless the opening date is announced on the NMFS hotline.

(*3*)The third season is open on August 2 and/or 3 or until the combined quotas for the all-depth fisheries in the subareas described in paragraphs (v) and (vi) of this section totaling 229,103 lb (103.9 mt) are estimated to have been taken and the area is closed by the Commission, whichever is earlier. An inseason announcement will be made in mid-July as to whether the fishery will be open on August 2 and/or 3. If the harvest during this opening does not achieve the 229,103 lb (103.9 mt) quota, the season will reopen. Dependent on the amount of unharvested catch available, the potential season reopening dates will be: August 23, 24, September 20, 21. If a decision is made inseason to allow fishing on one or more of these dates, notice of the reopening date will be announced on the NMFS hotline 206–526–6667 or 800–662–9825.

(B) The daily bag limit is the first halibut taken, per person, of 32 inches (81.3 cm) or greater in length.

(vi) In the area off Oregon between the Siuslaw River at the Florence north jetty and Humbug Mountain, Oregon (42°40′30″ N. lat.), the quota for landings into ports in this area is 18,261 lb (8.3 mt).

(A) The fishing seasons are:

(*1*) The first season commences May 1 and continues every day through September 30, in the area inside the 30–fathom (55 m) curve nearest to the coastline as plotted on National Ocean Service charts numbered 18520, 18580, and 18600, or until the combined subquotas of the north central and south central inside 30–fathom fisheries (19,797 lb (9.0 mt)) or any inseason revised subquota is estimated to have been taken and the season is closed by the Commission, whichever is earlier.

(*2*) The second season is open on May 10, 11, 17, and 18. The projected catch for this season is 14,609 lb (6.6 mt). If

sufficient unharvested catch remains for an additional days fishing, the season will reopen. Dependent on the amount of unharvested catch available, the potential season reopening dates will be: June 7, 8, 21, 22. If a decision is made inseason by NMFS to allow fishing on either of these additional dates, notice of the opening will be announced on the NMFS hotline 206–526–6667 or 800–662–9825. No halibut fishing will be allowed on the additional dates unless the opening date is announced on the NMFS hotline.

(3) The third season is open on August 2 and/or 3 or until the combined quotas for the all-depth fisheries in the subareas described in paragraphs (v) and (vi) of this section totaling 229,103 lb (103.9 mt) are estimated to have been taken, and the area is closed by the Commission, whichever is earlier. An inseason announcement will be made in mid-July as to whether the fishery will be open on August 2 and/or 3. If the harvest during this opening does not achieve the 229,103 lb (103.9 mt) quota, the season will reopen. Dependent on the amount of unharvested catch available, the potential season reopening dates will be: August 23, 24, September 20, 21. If a decision is made inseason to allow fishing on one or more of these dates, notice of the reopening date will be announced on the NMFS hotline 206–526–6667 or 800–662–9825.

(B) The daily bag limit is the first halibut taken, per person, of 32 inches (81.3 cm) or greater in length.

(vii) In the area south of Humbug Mountain, OR (42°40′30″ N. lat.) and off the California coast, there is no quota. This area is managed on a season that is projected to result in a catch of less than 7,860 lb (3.6 mt).

(A) The fishing season will commence on May 1 and continue every day through September 30.

(B) The daily bag limit is the first halibut taken, per person, of 32 inches (81.3 cm) or greater in length.

(c) The Commission shall determine and announce closing dates to the public for any area in which the subquotas in this Section are estimated to have been taken.

(d) When the Commission has determined that a subquota under paragraph (4)(b) of this section is estimated to have been taken, and has announced a date on which the season will close, no person shall sport fish for halibut in that area after that date for the rest of the year, unless a reopening of that area for sport halibut fishing is scheduled in accordance with the Catch Sharing Plan for Area 2A, or announced by the Commission.

(5) Any minimum overall size limit promulgated under IPHC or NMFS regulations shall be measured in a straight line passing over the pectoral fin from the tip of the lower jaw with the mouth closed, to the extreme end of the middle of the tail.

(6) No person shall fillet, mutilate, or otherwise disfigure a halibut in any manner that prevents the determination of minimum size or the number of fish caught, possessed, or landed.

(7) The possession limit for halibut in the waters off the coast of Alaska is two daily bag limits.

(8) The possession limit for halibut in the waters off the coast of British Columbia is three halibut.

(9) The possession limit for halibut in the waters off Washington, Oregon, and California is the same as the daily bag limit.

(10) The possession limit for halibut on land in Area 2A is two daily bag limits.

(11) Any halibut brought aboard a vessel and not immediately returned to the sea with a minimum of injury will be included in the daily bag limit of the person catching the halibut.

(12) No person shall be in possession of halibut on a vessel while fishing in a closed area.

(13) No halibut caught by sport fishing shall be offered for sale, sold, traded, or bartered.

(14) No halibut caught in sport fishing shall be possessed on board a vessel when other fish or shellfish aboard the said vessel are destined for commercial use, sale, trade, or barter.

(15) The operator of a charter vessel shall be liable for any violations of these regulations committed by a passenger aboard said vessel.

25. Flexible Inseason Management Provisions in Area 2A

(1) The Regional Administrator, NMFS Northwest Region, after consultation with the Chairman of the Pacific Fishery Management Council, the Commission Executive Director, and the Fisheries Director(s) of the affected state(s), is authorized to modify regulations during the season after making the following determinations.

(a) The action is necessary to allow allocation objectives to be met.

(b) The action will not result in exceeding the catch limit for the area.

(c) If any of the sport fishery subareas north of Cape Falcon, OR, are not projected to use their respective quotas by September 30, NMFS may take inseason action to transfer any projected unused quota to a Washington sport subarea projected to have the fewest number of sport fishing days in the calendar year.

(2) Flexible inseason management provisions include, but are not limited to, the following:

(a) Modification of sport fishing periods;

(b) Modification of sport fishing bag limits;

(c) Modification of sport fishing size limits; and

(d) Modification of sport fishing days per calendar week.

(3) Notice procedures.

(a) Actions taken under this section will be published in the **Federal Register**.

(b) Actual notice of inseason management actions will be provided by a telephone hotline administered by the Northwest Region, NMFS, at 206–526–6667 or 800–662–9825 (May through September) and by U.S. Coast Guard broadcasts. These broadcasts are announced on Channel 16 VHF—FM and 2182 kHz at frequent intervals. The announcements designate the channel or frequency over which the notice to mariners will be immediately broadcast. Since provisions of these regulations may be altered by inseason actions, sport fishers should monitor either the telephone hotline or U.S. Coast Guard broadcasts for current information for the area in which they are fishing.

(4) Effective dates.

(a) Any action issued under this section is effective on the date specified in the publication or at the time that the action is filed for public inspection with the Office of the **Federal Register**, whichever is later.

(b) NMFS will invite public comment on any inseason action filed with the Office of the **Federal Register**. If the Regional Administrator determines, for good cause found pursuant to 5 U.S.C. 553(b)(B), that an inseason action must be filed without affording a prior opportunity for public comment, public comments will be received for a period of 15 days after publication of the action in the **Federal Register**.

(c) Any inseason action issued under this section will remain in effect until the stated expiration date or until rescinded, modified, or superseded. However, no inseason action has any effect beyond the end of the calendar year in which it is issued.

(5) Availability of data. The Regional Administrator will compile, in aggregate form, all data and other information relevant to the action being taken and will make them available for public review during normal office hours at the Northwest Regional Office, NMFS, Sustainable Fisheries Division, 7600 Sand Point Way NE, Seattle, WA.

26. Fishery Election in Area 2A

(1) A vessel that fishes in Area 2A may participate in only one of the following three fisheries in Area 2A:

(a) The sport fishery under Section 23;

(b) The commercial directed fishery for halibut during the fishing period(s) established in Section 8 and/or the incidental retention of halibut during the primary sablefish fishery described at 50 CFR 660.323(a)(2); or

(c) The incidental catch fishery during the salmon troll fishery as authorized in Section 8.

(2) No person shall fish for halibut in the sport fishery in Area 2A under Section 23 from a vessel that has been used during the same calendar year for commercial halibut fishing in Area 2A or that has been issued a permit for the same calendar year for the commercial halibut fishery in Area 2A.

(3) No person shall fish for halibut in the directed halibut fishery during the fishing periods established in Section 8 and/or retain halibut incidentally taken in the primary sablefish fishery in Area 2A from a vessel that has been used during the same calendar year for the incidental catch fishery during the salmon troll fishery as authorized in Section 8.

(4) No person shall fish for halibut in the directed commercial halibut fishery and/or retain halibut incidentally taken in the primary sablefish fishery in Area 2A from a vessel that, during the same calendar year, has been used in the sport halibut fishery in Area 2A or that is licensed for the sport charter halibut fishery in Area 2A.

(5) No person shall retain halibut in the salmon troll fishery in Area 2A as authorized under Section 8 taken on a vessel that, during the same calendar year, has been used in the sport halibut fishery in Area 2A, or that is licensed for the sport charter halibut fishery in Area 2A.

(6) No person shall retain halibut in the salmon troll fishery in Area 2A as authorized under Section 8 taken on a vessel that, during the same calendar year, has been used in the directed commercial fishery during the fishing periods established in Section 8 and/or retain halibut incidentally taken in the primary sablefish fishery for Area 2A or that is licensed to participate in these commercial fisheries during the fishing periods established in Section 8 in Area 2A.

27. Previous Regulations Superseded

These regulations shall supersede all previous regulations of the Commission, and these regulations shall be effective each succeeding year until superseded.

Classification

IPHC Regulations

Because approval by the Secretary of State of the IPHC regulations is a foreign affairs function, the notice-and-comment and delay-in-effective date requirements of the Administrative Procedure Act, 5 U.S.C. 553, do not apply to this notice of the effectiveness and content of the IPHC regulations, 5 U.S.C. 553(a)(1). Because prior notice and an opportunity for public comment are not required to be provided for these portions of this rule by 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, are not applicable.

Catch Sharing Plan for Area 2A

An Environmental Assessment/Regulatory Impact Review was prepared on the proposed changes to the CSP. NMFS has determined that the proposed changes to the CSP and the management measures implementing the CSP contained in these regulations will not significantly affect the quality of the human environment, and the preparation of an environmental impact statement on the final action is not required by section 102(2)(C) of the National Environmental Policy Act or its implementing regulations. At the proposed rule stage, the Chief Counsel for Regulation, Department of Commerce, certified to the Chief Counsel for Advocacy of the Small Business Administration that this action will not have a significant economic impact on a substantial number of small entities. No comments were received on this certification. Consequently, no regulatory flexibility analysis has been prepared. The Assistant Administrator for Fisheries, NOAA, finds that it is contrary to the public interest to delay the effective date of this rule for 30 days. This rule must be made effective for the opening of the 2002 Pacific halibut fishing season on March 18, 2002. NOAA's implementation of changes to the CSP could not begin until after January 2002 when the IPHC passed its annual measures setting quotas for 2002.

This action has been determined to be not significant for purposes of E.O. 12866.

Authority: 16 U.S.C. 773–773k.

Dated: March 13, 2002.

Rebecca Lent,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 67, No. 54
Wednesday, March 20, 2002

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 1

Procedures Relating to Awards Under the Equal Access to Justice Act

AGENCY: Office of the Secretary, USDA.

ACTION: Proposed rule.

SUMMARY: The U.S. Department of Agriculture ("USDA") proposes to amend its regulations implementing the Equal Access to Justice Act ("EAJA"). The proposed amendments incorporate modifications enacted in the Small Business Regulatory Enforcement Fairness Act of 1996.

DATES: In order to be considered, comments should be submitted by May 20, 2002.

ADDRESSES: Comments should be directed to Barbara Good, Attorney Advisor, Room 3311 South Building, Office of the General Counsel, U.S. Department of Agriculture, 14th and Independence Avenue, SW., Washington, DC 20250–1400.

FOR FURTHER INFORMATION CONTACT: Barbara S. Good, Attorney Advisor, Room 3311 South Building, Office of the General Counsel, U.S. Department of Agriculture, 14th and Independence Avenue, SW, Washington, DC 20250–1415; telephone (202) 720–8045.

SUPPLEMENTARY INFORMATION: In the Small Business Regulatory Enforcement Fairness Act of 1996 ("SBREFA"), Pub. L. No. 104–121, Title II, Mar. 29, 1996, 100 Stat. 857 to 874, Congress amended EAJA in two significant respects with regard to administrative proceedings.

First, Congress amended 5 U.S.C. 504(a) by adding a new basis for recovery under EAJA. Under prior law, only a "prevailing party" other than the United States in an adversary adjudication before an agency was eligible for recovery of fees and expenses. 5 U.S.C. 504(a)(1). Pursuant to new paragraph (a)(4), a party to an adversary adjudication arising from an agency action to enforce the party's compliance with a statutory or regulatory requirement may be entitled to reimbursement of fees and expenses. In such enforcement cases, where the demand by the agency is "substantially in excess" of the decision of the adjudicative officer and is "unreasonable" when compared with such decision under the facts and circumstances of the case, the agency adjudicative officer is directed to award to an eligible party the fees and other expenses related to defending against the excessive demand. Award is qualified if the party has committed a willful violation of law or otherwise acted in bad faith, or special circumstances make an award unjust.

SBREFA further amended Section 504(b)(1) to add new subparagraph (F), which defines the term "demand" as "the express demand of the agency which led to the adversary adjudication, but does not include a recitation by the agency of the maximum statutory penalty (i) in the administrative complaint, or (ii) elsewhere when accompanied by an express demand for a lesser amount."

SBREFA also added, in 5 U.S.C. 504(b)(1)(B), a new category of applicants eligible for fees based on a claim of excessive demand. In addition to the other categories of eligible applicants, a small entity as defined in 5 U.S.C. 601 will be eligible for reimbursement with respect to a claim of excessive demand in a regulatory or statutory enforcement action.

The second major change, in 5 U.S.C. 504(b)(1)(A), increased from $75 per hour to $125 per hour the maximum rate for fees awardable. The qualifying language "unless the agency determines by regulation that an increase in the cost of living or a special factor, such as the limited availability of qualified attorney or agents for the proceeding involved justifies a higher fee" remains. Departmental rules at 7 CFR 1.186 currently implementing EAJA attorney fees set a cap of $75 per hour. It is appropriate to amend 7 CFR 1.186 to reflect the statutory increase to $125 per hour.

In view of these statutory changes, the Department is proposing conforming amendments to its regulations. In addition, the Department is making minor changes to modify obsolete provisions related to effective dates, and to correct minor errors, and to make minor stylistic changes.

The Department retains its stance concerning the applicability of EAJA to National Appeals Division proceedings as set forth in the preamble to the final rule for National Appeals Division rules of procedure at 64 FR 33367, June 23, 1999.

This proposed rule has been reviewed under Executive Order No. 12866 and has been determined that it is not a "significant regulatory action" since it will not have an annual effect on the economy of $100 million or more or adversely and materially affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, of State, local or tribal governments or communities. This proposed rule will not create any serious inconsistencies, or otherwise materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof, and does not raise novel legal or policy issues arising out of legal mandates, the President's priorities or principles set forth in E.O. 12866. Therefore, this proposed rule has not been reviewed by the Office of Management and Budget.

USDA certifies that this rule will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Pub. L. No. 96–534, as amended (5 U.S.C. 601 *et seq.*).

USDA has determined that the provisions of the Paperwork Reduction Act as amended, 44 U.S.C. chapter 35, do not apply to any collections of information contained in this rule because any such collections of information are made during the conduct of administrative action involving an agency against specific individuals or entities. 5 CFR 1320.4(a)(2).

List of Subjects in 7 CFR Part 1

Administrative practice and procedures.

Accordingly, 7 CFR, Subtitle A, Part 1, Subpart J is proposed to be revised to read as follows:

PART 1—[AMENDED]

Subpart J—Procedures Relating to Awards Under the Equal Access to Justice Act In Proceedings Before the Department

Authority: 5 U.S.C. 504(c)(1).

General Provisions

Sec.
1.180 Definitions.
1.181 Purpose of these rules.
1.182 When EAJA applies.
1.183 Proceedings covered.
1.184 Eligibility of applicants.
1.185 Standards for awards.
1.186 Allowable fees and expenses.
1.187 Rulemaking on maximum rates for attorney fees.
1.188 Awards against other agencies.
1.189 Delegations of authority.

Information Required From Applicants

1.190 Contents of application.
1.191 Net worth exhibit.
1.192 Documentation of fees and expenses.
1.193 Time for filing application.

Procedures for Considering Applications

1.194 Filing and service of documents.
1.195 Answer to application.
1.196 Reply.
1.197 Comments by other parties.
1.198 Settlement.
1.199 Further proceedings.
1.200 Decision.
1.201 Department review.
1.202 Judicial review.
1.203 Payment of award.

General Provisions

§ 1.180 Definitions.

(a) The definitions contained in § 1.132 of this part are incorporated into and made applicable to this subpart.

(b) *Adjudicative Officer* means an administrative law judge, administrative judge, or other person assigned to conduct a proceeding covered by EAJA.

(c) *Agency* means an organizational unit of the Department whose head reports to an official in the Office of the Secretary.

(d) *Agency* counsel means the attorney from the Office of the General Counsel representing the agency of the Department administering the statute involved in the proceeding.

(e) *Days* means calendar days.

(f) *Department* means the United States Department of Agriculture.

§ 1.181 Purpose of these rules.

The Equal Access to Justice Act, 5 U.S.C. 504 (called "EAJA" in this subpart), provides for the award of attorney fees and other expenses to eligible individuals and entities who are parties to certain administrative proceedings (called "adversary adjudications") before the Department. An eligible party may receive an award when it prevails over the Department unless the position of the Department was substantially justified or special circumstances make an award unjust. Alternatively, an eligible party may receive an award in connection with an adversary adjudication arising from an agency action to enforce the party's compliance with a statutory or regulatory requirement where the demand by the agency is substantially in excess of the decision of the adjudicative officer and is unreasonable when compared with such decision under the facts and circumstances of the case. The rules in this subpart describe the parties eligible for awards and the proceedings that are covered. They also explain how to apply for awards, and the procedures and standards that the Department will use to make awards.

§ 1.182 When EAJA applies.

EAJA applies to any adversary adjudication pending or commenced before the Department on or after August 5, 1985, except with respect to a proceeding covered under § 1.183(a)(1)(iii) of this part, which is effective on or after October 21, 1986. In addition, the provisions of § 1.185(b) relating to award for excessive demand apply only to adversary adjudications commenced on or after March 29, 1996. Changes in maximum rates for attorney fees are effective as of [the effective date of the final rule].

§ 1.183 Proceedings covered.

(a)(1) The rules in this subpart apply to adversary adjudications. These are:

(i) Adjudications required by statute to be conducted by the Department under 5 U.S.C. 554 in which the position of the Department or any other agency of the United States, or any component of an agency, is presented by an attorney or other representative who enters an appearance and participates in the proceeding,

(ii) Appeals of decisions of contracting officers made pursuant to section 6 of the Contract Disputes Act of 1978 (41 U.S.C. 605) before the Agriculture Board of Contract Appeals as provided in section 8 of that Act (41 U.S.C. 607), and

(iii) Any hearing conducted under chapter 38 of title 31, United States Code.

(2) Any proceeding in which the Department may prescribe a lawful present or future rate is not covered by EAJA. Proceedings to grant or renew licenses also are excluded, but proceedings to modify, suspend, or revoke licenses are covered if they are otherwise "adversary adjudications."

The proceedings covered include adversary adjudications under the following statutory provisions.

Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 608c(15)(A))
Animal Quarantine Laws (21 U.S.C. 104, 117, 122, 127, 134e, and 135a)
Animal Welfare Act (7 U.S.C. 2149)
Archaeological Resources Protection Act (16 U.S.C. 470ff)
Beef Research and Information Act (7 U.S.C. 2912)
Capper-Volstead Act (7 U.S.C. 292)
Cotton Research and Promotion Act (7 U.S.C. 2111)
Egg Products Inspection Act (21 U.S.C. 1047)
Egg Research and Consumer Information Act (7 U.S.C. 2713, 2714(b))
Endangered Species Act (16 U.S.C. 1540(a))
Federal Land Policy and Management Act (43 U.S.C. 1766)
Federal Meat Inspection Act (21 U.S.C. 604, 606, 607(e), 608, 671)
Federal Seed Act (7 U.S.C. 1599)
Horse Protection Act (15 U.S.C. 1823(c), 1825)
Packers and Stockyards Act (7 U.S.C. 193, 204, 213, 218d, 221)
Perishable Agricultural Commodities Act (7 U.S.C. 499c(c), 499d(d), 499f(c), 499h(a), 499h(b), 499h(c), 499i, 499m(a))
Plant Protection Act (7 U.S.C. 2279e, 7734(b), 7736)
Potato Research and Promotion Act (7 U.S.C. 2620)
Poultry Products Inspection Act (21 U.S.C. 455, 456, 457(d), 467)
Swine Health Protection Act (7 U.S.C. 3804(b), 3805(a))
U.S. Cotton Standards Act (7 U.S.C. 51b, 53)
U.S. Grain Standards Act (7 U.S.C. 79(g)(3), 85, 86)
U.S. Warehouse Act (7 U.S.C. 246, 253)
Virus-Serum-Toxin Act (21 U.S.C. 156)
Wheat and Wheat Foods Research and Nutrition Education Act (7 U.S.C. 3409)

(b) The failure of the Department to identify a type of proceeding as an adversary adjudication shall not preclude the filing of an application by a party who believes the proceeding is covered by EAJA; whether the proceeding is covered will then be an issue for resolution in proceedings on the application.

(c) If a proceeding includes both matters covered by EAJA and matters specifically excluded from coverage, any award made will include only fees and expenses related to covered issues.

§ 1.184 Eligibility of applicants.

(a) To be eligible for an award of attorney fees and other expenses under EAJA, the applicant must meet one of the following conditions:

(1) The applicant must be a prevailing party to the adversary adjudication for which it seeks an award; or

(2) The applicant must be a party to an adversary adjudication arising from an agency action to enforce the party's

VOL

2002
UMI

compliance with a statutory or regulatory requirement in which the demand by the agency was substantially in excess of the decision of the adjudicative officer and the demand is unreasonable when compared with such decision under the facts and circumstances of the case.

(b) In addition to the criteria set out in paragraph (a) of this section, a party seeking an award must be one of the following:

(1) An individual with a net worth of not more than $2 million;

(2) The sole owner of an unincorporated business who has a net worth of not more than $7 million, including both personal and business interests, and not more than 500 employees;

(3) A charitable or other tax-exempt organization described in section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)) with not more than 500 employees;

(4) A cooperative association as defined in section 15(a) of the Agricultural Marketing Act (2 U.S.C. 1141j(a)) with not more than 500 employees;

(5) Any other partnership, corporation, association, unit of local government, or organization with a net worth of not more than $7 million and nor more than 500 employees;

(6) For purposes only of paragraph (a)(2) of this section, a small entity as defined in 5 U.S.C. 601.

(c) For the purpose of eligibility, the net worth and number of employees of an applicant shall be determined as of the date the adversary adjudication was initiated: Provided, that for purposes of eligibility in proceedings covered by § 1.183(a)(1)(ii) of this part, the net worth and number of employees of an applicant shall be determined as of the date the applicant filed its appeal under 41 U.S.C. 606.

(d) In interpreting the criteria set forth in paragraph (b) of this section, the following apply:

(1) An applicant who owns an unincorporated business will be considered as an "individual" rather than a "sole owner of an unincorporated business" if the issues on which the applicant prevails are related primarily to personal interests rather than to business interests.

(2) The employees of an applicant include all persons who regularly perform services for remuneration for the applicant, under the applicant's direction and control. Part-time employees shall be included on a proportional basis.

(3) The net worth and number of employees of the applicant and all of its affiliates shall be aggregated to determine eligibility. Any individual, corporation, or other entity that directly or indirectly controls or owns a majority of the voting shares or other interest of the applicant, or any corporation or other entity of which the applicant directly or indirectly owns or controls a majority of the voting shares or other interest, will be considered an affiliate for purposes of this subpart, unless the adjudicative officer determines such treatment would be unjust and contrary to the purposes of EAJA in light of the actual relationship between the affiliated entities. In addition, the adjudicative officer may determine that financial relationships of the applicant other than those described in this paragraph constitute special circumstances that would make an award unjust.

(4) An applicant that participates in a proceeding primarily on behalf of one or more other person or entity that would be ineligible is not itself eligible for an award.

§ 1.185 Standards for awards.

(a) *Prevailing party.* (1) A prevailing applicant may receive an award for fees and expenses incurred in connection with a proceeding, or in a significant and discrete substantive portion of the proceeding, unless the position of the Department was substantially justified. The position of the Department includes, in addition to the position taken by the Department in the adversary adjudication, the action or failure to act by the Department upon which the adversary adjudication is based. The burden of proof that an award should not be made to an eligible prevailing applicant because the position of the Department was substantially justified is on the agency.

(2) An award to a prevailing applicant will be reduced or denied if the applicant has unduly or unreasonably protracted the proceeding or if special circumstances make the award sought unjust.

(b) *Excessive demand.* (1) If, in an adversary adjudication arising from an agency action to enforce a party's compliance with a statutory or regulatory requirement, the demand by the agency is substantially in excess of the decision of the adjudicative officer and is unreasonable when compared with such decision under the facts and circumstances of the case, the adjudicative officer shall award to the party the fees and other expenses related to defending against the excessive demand, unless the party has committed a willful violation of law or otherwise acted in bad faith, or special circumstances make an award unjust. Fees and expenses awarded under this paragraph shall be paid only as a consequence of appropriations provided in advance.

(2) "Demand" means the express demand of the agency which led to the adversary adjudication, but does not include a recitation by the agency of the maximum statutory penalty:

(i) In the administrative complaint, or

(ii) Elsewhere when accompanied by an express demand for a lesser amount.

§ 1.186 Allowable fees and expenses.

(a) Awards will be based on rates customarily charged by persons engaged in the business of acting as attorneys, agents, and expert witnesses, even if the services were made available without charge or at reduced rate to the applicant.

(b) No award for the fee of an attorney or agent under the rules in this subpart may exceed $125.00 per hour. No award to compensate an expert witness may exceed the highest rate at which the Department pays expert witnesses, which is set out at § 1.150 of this part. However, an award also may include the reasonable expenses of the attorney, agent, or witness as a separate item, if the attorney, agent, or witness ordinarily charges clients separately for such expenses.

(c) In determining the reasonableness of the fee sought for an attorney, agent, or expert witness, the adjudicative officer shall consider the following:

(1) If the attorney, agent or witness is in private practice, his or her customary fee for similar services, or if an employee of the applicant, the fully allocated cost of the services;

(2) The prevailing rate for similar services in the community in which the attorney, agent, or witness ordinarily performs services;

(3) The time actually spent in the representation of the applicant;

(4) The time reasonably spent in light of the difficulty or complexity of the issues in the proceeding; and

(5) Such other factors as may bear on the value of the services provided.

(d) The reasonable cost of any study, analysis, engineering report, test, project or similar matter prepared on behalf of a party may be awarded, to the extent that the charge for the service does not exceed the prevailing rate for similar services, and the study or other matter was necessary for preparation of the applicant's case.

§ 1.187 Rulemaking on maximum rates for attorney fees.

(a) If warranted by an increase in the cost of living or by special

circumstances (such as limited availability of attorneys qualified to handle certain types of proceedings), the Department may adopt regulations providing that attorney fees may be awarded at a rate higher than $125 per hour in some or all of the types of proceedings covered by this part. The Department will conduct any rulemaking proceedings for this purpose under the informal rulemaking procedures of the Administrative Procedure Act.

(b) Any person may file with the Department a petition for rulemaking to increase the maximum rate for attorney fees in accordance with § 1.28 of this part. The petition should identify the rate the petitioner believes the Department should establish and the types of proceedings in which the rate should be used. It also should explain fully the reasons why the higher rate is warranted. The Department will respond to the petition within 60 days after it is filed, by initiating a rulemaking proceeding, denying the petition, or taking other appropriate action.

§ 1.188 Awards against other agencies.

If an applicant is entitled to an award because it prevails over another agency of the United States that participates in a proceeding before the Department and takes a position that is not substantially justified, the award or an appropriate portion of the award shall be made against that agency.

§ 1.189 Delegations of authority.

The Secretary of Agriculture delegates to the Judicial Officer, except as otherwise delegated, authority to take final action on matters pertaining to EAJA in proceedings covered by the rules in this subpart. The Secretary by order or regulation may delegate authority to take final action on matters pertaining to EAJA in particular cases or categories of cases to other subordinate officials or bodies. With respect to proceedings covered under § 1.183(a)(1)(ii) of this part, the Board of Contract Appeals is authorized by statute (41 U.S.C. 607) to take final action.

Information Required From Applicants

§ 1.190 Contents of application.

(a) An application for an award of fees and expenses under EAJA shall identify the applicant and the proceeding for which an award is sought. Unless the applicant is an individual, the application shall state the number of employees of the applicant and describe briefly the type and purpose of its organization or business. The application shall also:

(1) Show that the applicant has prevailed and identify the position of the Department that the applicant alleges was not substantially justified and shall briefly state the basis for such allegation; or

(2) Show that the demand by the Department in the proceeding was substantially in excess of, and was unreasonable when compared with, the decision in the proceeding.

(b) The application also shall, as appropriate, include a declaration that the applicant is a small entity as defined in 5 U.S.C. 601 or a statement that the applicant's net worth does not exceed $2 million (if an individual) or $7 million (for all other applicants, including their affiliates). However, an applicant may omit this statement if:

(1) It attaches a copy of a ruling by the Internal Revenue Service that it qualifies as an organization described in section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)) or, in the case of a tax-exempt organization not required to obtain a ruling from the Internal Revenue Service on its exempt status, a statement that describes the basis for the applicant's belief that it qualifies under such section; or

(2) It states that it is a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 114j(a)).

(c) The application shall state the amount of fees and expenses for which an award is sought.

(d) The application also may include any other matters that the applicant wishes the Department to consider in determining whether, and in what amount, an award should be made.

(e) The application shall be signed by the applicant or an authorized officer or attorney of the applicant. It also shall contain or be accompanied by a written verification under oath or affirmation under penalty of perjury that the information provided in the application and all accompanying material is true and complete to the best of the signer's information and belief.

§ 1.191 Net worth exhibit.

(a) An applicant, except a qualified tax-exempt organization or cooperative association, must provide with its application a detailed exhibit showing the net worth of the applicant and any affiliates (as defined in § 1.184 of this part) when the proceeding was initiated. The exhibit may be in any form convenient to the applicant that provides full disclosure of the applicant's and its affiliates' assets and liabilities and is sufficient to determine whether the applicant qualifies under the standards in this subpart. The adjudicative officer may require an applicant to file additional information to determine its eligibility for an award.

(b) Ordinarily, the net worth exhibit will be included in the public record of the proceeding. However, an applicant that objects to public disclosure of information in any portion of the exhibit and believes there are legal grounds for withholding it from disclosure may submit that portion of the exhibit directly to the adjudicative officer in a sealed envelope labeled "Confidential Financial Information," accompanied by a motion to withhold the information from public disclosure. The motion shall describe the information sought to be withheld and explain, in detail, why it falls within one or more of the specific exemptions from mandatory disclosure under the Freedom of Information Act, 5 U.S.C. 552(b) (1) through (9). The material in question shall be served on counsel representing the agency against which the applicant seeks an award, but need not be served on any other party to the proceeding. If the adjudicative officer finds that the information should not be withheld from disclosure, it shall be placed in the public record of the proceeding. Otherwise, any request to inspect or copy the exhibit shall be disposed of in accordance with the established procedures of the Department under the Freedom of Information Act (§§ 1.1 through 1.23 of this part).

§ 1.192 Documentation of fees and expenses.

(a) The application shall be accompanied by full documentation of the fees and expenses, including the cost of any study, analysis, engineering report, test, project, or similar matter, for which an award is sought.

(b) The documentation shall include an affidavit from any attorney, agent, or expert witness representing or appearing on behalf of the party, stating the actual time expended and the rate at which fees and other expenses were computed and describing the specific services performed.

(1) The affidavit shall state the services performed. In order to establish the hourly rate, the affidavit shall state the hourly rate which is billed and paid by the majority of clients during the relevant time periods.

(2) If no hourly rate is paid by the majority of clients because, for instance, the attorney or agent represents most clients on a contingency basis, the attorney or agent shall provide information about two attorneys or agents with similar experience, who

VOL
67
ISS
54
MR
20
2002
UMI

perform similar work, stating their hourly rate.

(c) The documentation also shall include a description of any expenses for which reimbursement is sought and a statement of the amounts paid and payable by the applicant or by any other person or entity for the services provided.

(d) The adjudicative officer may require the applicant to provide vouchers, receipts, or other substantiation for any fees or expenses claimed, pursuant to § 1.199 of this part.

§ 1.193 Time for filing application.

(a) An application may be filed whenever the applicant has prevailed in the proceeding or in a significant and discrete substantive portion of the proceeding, but in no case later than 30 days after final disposition of the proceeding by the Department.

(b) For the purposes of this subpart, final disposition means the date on which a decision or order disposing of the merits of the proceeding or any other complete resolution of the proceeding, such as a settlement or voluntary dismissal, become final and unappealable, both within the Department and to the courts.

(c) If review or reconsideration is sought or taken of a decision as to which an applicant believes it has prevailed, proceedings for the award of fees shall be stayed pending final disposition of the underlying controversy. When the United States appeals the underlying merits of an adversary adjudication to a court, no decision on an application for fees and other expenses in connection with that adversary adjudication shall be made until a final and unreviewable decision is rendered by the court on the appeal or until the underlying merits of the case have been finally determined pursuant to the appeal.

Procedures for Considering Applications

§ 1.194 Filing and service of documents.

Any application for an award or other pleading or document related to an application shall be filed and served on all parties to the proceeding in the same manner as other pleadings in the proceeding except as provided in § 1.191 of this part for confidential financial information. The provisions relating to filing, service, extensions of time, and computation of time contained in § 1.147 of this part are incorporated into and made applicable to this subpart, except that the statutory 30 day time limit on filing the application as set out in § 1.193 of this part may not be extended.

§ 1.195 Answer to application.

(a) Within 30 days after service of an application, agency counsel may file an answer. If agency counsel fails to timely answer or settle the application, the adjudicative officer, upon a satisfactory showing of entitlement by the applicant, may make an award for the applicant's allowable fees and expenses.

(b) If agency counsel and the applicant believe that the issues in the fee application can be settled, they may jointly file a statement of intent to negotiate a settlement. The filing of this statement shall extend the time for filing an answer for an additional 30 days, and further extensions may be granted by the adjudicative officer upon request by agency counsel and the applicant.

(c) The answer shall explain in detail any objections to the award requested and identify the facts relied on in support of agency counsel's position. If the answer is based on any alleged facts not already in the record of the proceeding, agency counsel shall include with the answer either supporting affidavits or a request for further proceedings under § 1.199 of this part.

§ 1.196 Reply.

Within 15 days after service of an answer, the applicant may file a reply. If the reply is based on any alleged facts not already in the record of the proceeding, the applicant shall include with the reply either supporting affidavits or a request for further proceedings under § 1.199 of this part.

§ 1.197 Comments by other parties.

Any party to a proceeding other than the applicant and agency counsel may file comments on an application within 30 days after it is served or on an answer within 15 days after it is served. A commenting party may not participate further in proceedings on the application, unless the adjudicative officer determines that the public interest requires such participation in order to permit full exploration of matters raised in the comments.

§ 1.198 Settlement.

The applicant and agency counsel may agree on a proposed settlement of the award before final action on the application, either in connection with a settlement of the underlying proceeding, or after the underlying proceeding has been concluded. If a prevailing party and agency counsel agree on a proposed settlement of an award before an application has been filed, the application shall be filed with the proposed settlement.

§ 1.199 Further proceedings.

(a) Ordinarily, the determination of an award will be made on the basis of the written record. However, on request of either the applicant or agency counsel, or on his or her own initiative, the adjudicative officer may order further proceedings, such as an informal conference, oral argument, additional written submissions or, as to issues other than substantial justification (such as the applicant's eligibility or substantiation of fees and expenses), pertinent discovery or an evidentiary hearing. Such further proceedings shall be held only when necessary for full and fair resolution of the issues arising from the application, and shall be conducted as promptly as possible. Whether the position of the Department was substantially justified shall be determined on the basis of the administrative record, as a whole, which is made in the adversary adjudication for which fees and other expenses are sought.

(b) A request that the adjudicative officer order further proceedings under this section shall identify specifically the information sought or the disputed issues, and shall explain specifically why the additional proceedings are necessary to resolve the issues.

(c) In the event that an evidentiary hearing is held, it shall be conducted pursuant to §§ 1.130 through 1.151 of this part, except that any hearing in a proceeding covered by § 1.183(a)(1)(ii) of this part shall be conducted pursuant to Rules 17 through 25 of the Board of Contract Appeals contained in § 24.21 of this title.

§ 1.200 Decision.

The adjudicative officer or Board of Contract Appeals shall issue an initial decision on the application as expeditiously as possible after completion of proceedings on the application. Whenever possible, the decision shall be made by the same administrative judge or panel that decided the contract appeal for which fees are sought. The decision shall include written findings and conclusions on the applicant's eligibility and status as a prevailing party, and an explanation of the reasons for any difference between the amount requested and the amount awarded. This decision also shall include, if at issue, findings on whether the position of the Department was substantially justified, whether the applicant unduly protracted the proceedings, or whether special circumstances make an award unjust. If the applicant has sought an award against more than one agency, the decision shall allocate responsibility for payment of any award made among the agencies, and shall explain the reasons for the allocation made.

§ 1.201 Department review.

(a) Except with respect to a proceeding covered by § 1.183(a)(1)(ii) of this part either the applicant or agency counsel may seek review of the initial decision on the fee application, in accordance with the provisions of §§ 1.145(a) and 1.146(a) of this part or in accordance with any delegation made pursuant to § 1.189 of this part. If neither the applicant nor agency counsel seeks review, the initial decision on the fee application shall become a final decision of the Department 35 days after it is served upon the applicant. If review is taken, it will be in accord with the provisions of §§ 1.145(b) through (i) and 1.146(b) of this part, or

(b) With respect to a proceeding covered by § 1.183(a)(1)(ii) of this part, either party may seek reconsideration of the decision on the fee application in accordance with Rule 29 of the Board of Contract Appeals contained in § 24.21 of this title. In addition, either party may appeal a decision of the Board of Contract Appeals to the Court of Appeals for the Federal Circuit in accordance with 41 U.S.C. 607.

§ 1.202 Judicial review.

Judicial review of final agency decisions on awards may be sought as provided in 5 U.S.C. 504(c)(2).

§ 1.203 Payment of award.

An applicant seeking payment of an award shall submit to the head of the agency administering the statute involved in the proceeding a copy of the final decision of the Department granting the award, accompanied by a statement that the applicant will not seek review of the decision in the United States courts. The agency will pay the amount awarded to the applicant within 60 days, unless judicial review of the award or of the underlying decision of the adversary adjudication has been sought by the applicant or any other party to the proceeding.

Dated: February 25, 2002.

Ann M. Veneman,

Secretary of Agriculture.

[FR Doc. 02–6516 Filed 3–19–02; 8:45 am]

BILLING CODE 3410–14–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. NM211; Notice No. 25–02–03–SC]

Special Conditions: Airbus Industrie, Model A340–500/–600 Airplanes; Ground Loads and Conditions for Center Landing Gear With Four Wheels and Braking Capability

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This action proposes special conditions for Airbus Industrie Model A340–500 and –600 airplanes. These airplanes will have a novel or unusual design feature when compared to the state of technology envisioned in the airworthiness standards for transport category airplanes. This design feature is associated with the landing gear, in the form of a four-wheeled center landing gear, installed under the fuselage, which functions like a main landing gear in all respects, including the ability to brake. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These proposed special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: Comments must be received on or before April 19, 2002.

ADDRESSES: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Transport Airplane Directorate, Attn: Rules Docket (ANM–113), Docket No. NM211, 1601 Lind Avenue SW., Renton, Washington, 98055–4056; or delivered in duplicate to the Transport Airplane Directorate at the above address. Comments must be marked: Docket No. NM211. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: Tim Backman, FAA, ANM–116, Transport Airplane Directorate, Aircraft Certification Service, 1601 Lind Avenue SW., Renton, Washington, 98055–4056; telephone (425) 227–2797; facsimile (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. We ask that you send us two copies of written comments.

We will file in the docket all comments we receive, as well as a report summarizing each substantive public contact with FAA personnel concerning these proposed special conditions. The docket is available for public inspection before and after the comment closing date. If you wish to review the docket in person, go to the address in the **ADDRESSES** section of this preamble between 7:30 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

We will consider all comments we receive on or before the closing date for comments. We will consider comments filed late if it is possible to do so without incurring expense or delay. We may change this proposal for special conditions in light of the comments we receive.

If you want the FAA to acknowledge receipt of your comments on this proposal, include with your comments a pre-addressed, stamped postcard on which the docket number appears. We will stamp the date on the postcard and mail it back to you.

Background

On November 14, 1996, Airbus Industrie applied for an amendment to U.S. type certificate (TC) A43NM to include the new models A340–500 and –600. These models are derivatives of the A340–300, which is approved under the same TC.

The Model A340–500 fuselage is a 6-frame stretch of the Model A340–300 and is powered by 4 Rolls Royce Trent 553 engines, each rated at 53,000 pounds of thrust. The airplane has interior seating arrangements for up to 375 passengers, with a maximum takeoff weight (MTOW) of 820,000 pounds. The Model 340–500 is intended for long-range operations and has additional fuel capacity over that of the model A340–600.

The Model A340–600 fuselage is a 20-frame stretch of the Model A340–300 and is powered by 4 Rolls Royce Trent 556 engines, each rated at 56,000 pounds of thrust. The airplane has interior seating arrangements for up to 440 passengers, with a MTOW of 804,500 pounds.

Type Certification Basis

Under the provisions of 14 CFR 21.101, Airbus Industrie must show that the Model A340–500 and –600 airplanes

VOL
67
ISS
54
MR
20
2002
UMI

meet the applicable provisions of the regulations incorporated by reference in TC A43NM or the applicable regulations in effect on the date of application for the change to the type certificate. The regulations incorporated by reference in the type certificate are commonly referred to as the "original type certification basis." The regulations incorporated by reference in TC A43NM are 14 CFR part 25, effective February 1, 1965, including Amendments 25–1 through 25–63, and Amendments 25–64, 25–65, 25–66, and 25–77, with certain exceptions that are not relevant to these proposed special conditions.

In addition, if the regulations incorporated by reference do not provide adequate standards with respect to the change, the applicant must comply with certain regulations in effect on the date of application for the change. The FAA has determined that the Model A340–500 and –600 airplanes must be shown to comply with Amendments 25–1 through 25–91 to part 25, with certain FAA-allowed reversions for specific part 25 regulations to the part 25 amendment levels of the original type certification basis.

Airbus has also chosen to comply with part 25 as amended by Amendments 25–92, –93, –94, –95, –97, –98, and –104.

If the Administrator finds that the applicable airworthiness regulations (i.e., part 25 as amended) do not contain adequate or appropriate safety standards for the Airbus Industrie Model A340–500 and –600 because of a novel or unusual design feature, special conditions are prescribed under the provisions of 14 CFR 21.16.

In addition to the applicable airworthiness regulations and special conditions, the Airbus Industrie Model A340–500 and –600 must comply with the fuel vent and exhaust emission requirements of 14 CFR part 34 and the noise certification requirements of 14 CFR part 36.

Special conditions, as defined in 14 CFR 11.19, are issued in accordance with § 11.38 and become part of the type certification basis in accordance with § 21.101(b)(2).

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, the special conditions would also apply to the other model under the provisions of § 21.101(a)(1).

Novel or Unusual Design Features

The Airbus Models A340–500 and –600 will incorporate the following novel or unusual design feature: a four-wheel center landing gear with braking ability.

Discussion

The basic A340 included a two-wheel center landing gear which did not have brakes. The purpose of the center landing gear was to assist the main landing gear during ground handling conditions for heavy airplane weights. This center landing gear was not intended for energy absorption during landing, even if it could participate in the impact under certain conditions. Therefore, to provide additional taxi, takeoff, and landing criteria for this arrangement, Special Conditions 25–ANM–69 was issued.

The Model A340–500 and –600 airplanes have a four-wheel center landing gear which functions in all respects like a main landing gear, including braking capabilities. Because the speeds and weights of the Models A340–500 and –600 are greater than that of the basic A340, redesign of the center landing gear was necessary. As a result, the current rules, applying to the original two-wheel center landing gear, are inadequate.

Applicability

As discussed above, these special conditions are applicable to the Airbus Models A340–500 and –600. Should Airbus Industries apply at a later date for a change to the type certificate to include another model incorporating the same novel or unusual design feature, the special conditions would apply to that model as well under the provisions of § 21.101(a)(1).

Conclusion

This action affects only certain novel or unusual design features of the center landing gear on the Model A340–500 and A340–600 airplanes. It is not a rule of general applicability, and it affects only the applicant who applied to the FAA for approval of these features on the airplane.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701, 44702, 44704.

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as part of the type certification basis for Airbus Model A340–500 and A340–600 airplanes.

The following special conditions are proposed in lieu of the previously issued special conditions, "Ground Load Conditions for Center Landing Gear," recorded as item 10 of Special Conditions: Airbus Industrie Model A340 Series Airplanes [Docket No. NM–75, Special Conditions No. 25–ANM–69]:

1. *Ground Load Conditions for Center Landing Gear.* Notwithstanding § 25.477, the requirements of § 25.473 and §§ 25.479 through 25.485 apply, except as noted:

(a) In addition to the requirements of § 25.473, "Landing load conditions and assumptions," and § 25.479, "Level landing conditions," landing should be considered on a level runway and on a runway having a convex upward shape that may be approximated by a slope of 1.5 percent at main landing gear stations. The maximum loads determined from these two conditions must be applied to each main landing gear and to the center landing gear.

(b) In addition to the requirements of § 25.483, "One gear landing conditions," the condition represented by Figure 1 also applies:

BILLING CODE 4910–13–P

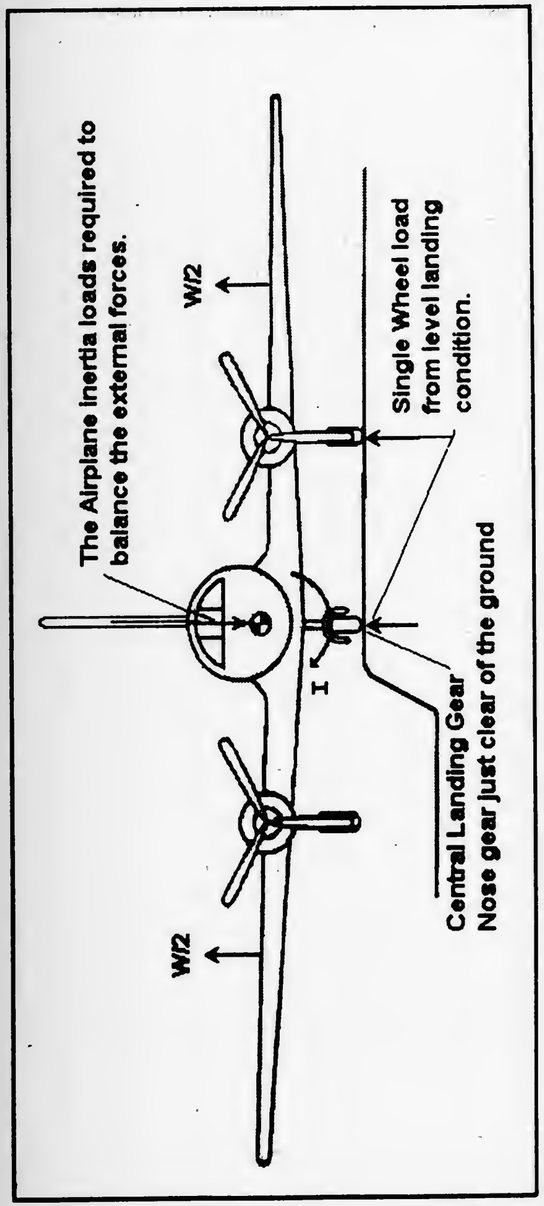

Figure 1. Center gear landing Condition

BILLING CODE 4910–13–P

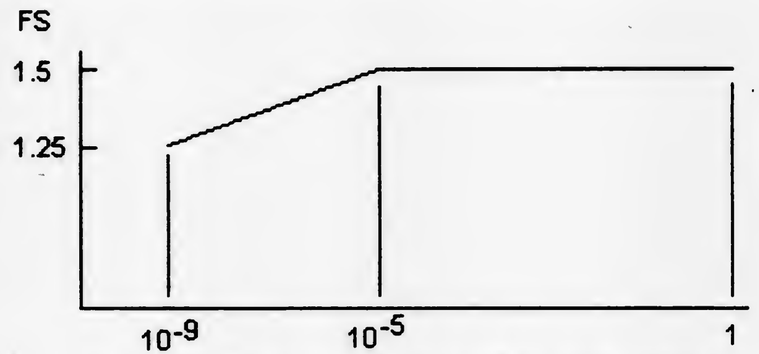
VOL
67
ISS
54
MR
20
2002
UMI

(c) In lieu of the requirements of § 25.485, "Side load conditions," the following apply:

(1) The airplane is considered to be in the level attitude with only the main and center wheels contacting the ground.

(2) Vertical reactions of one-half of the maximum vertical reaction obtained at each main and center gear in the level landing conditions should be considered. The vertical loads must be combined with side loads as follows: for the main gear, 0.8 of the vertical reaction (on one side) acting inward and 0.6 of the vertical reaction (on the other side) acting outward; for the center gear, 0.7 of the vertical reaction acting in the same direction as main gear side loads. These loads are assumed to be applied at the ground contact point and to be resisted by the inertia of the airplane. The drag loads may be assumed to be zero.

(d) In addition to § 25.489, "Ground handling conditions," the airplane should be considered to be on a level runway and on a runway having a convex upward shape that may be approximated by a slope of 1.5 percent at main landing gear stations. The ground reactions must be distributed to the individual landing gear units in a rational or conservative manner.



(e) In addition to the requirements of § 25.493(d), "Braked roll conditions," the sudden application of maximum braking effort must be defined taking into account the behavior of the braking system. Failure conditions of the braking system not shown to be extremely improbable must be analyzed in accordance with the following criteria:

(1) At the time of occurrence. A realistic scenario, including pilot corrective actions, must be established to determine the loads occurring at the time of failure and immediately after failure.

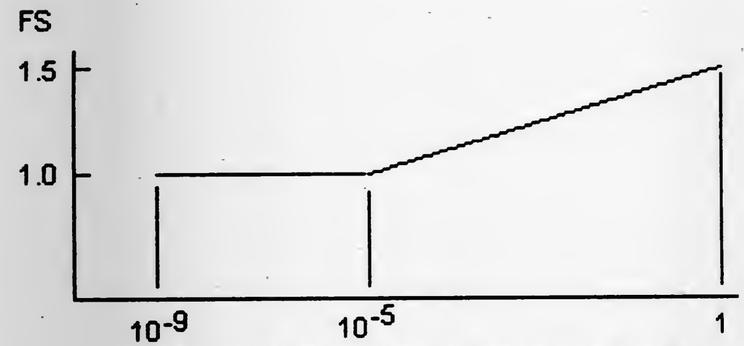
(i) For static strength substantiation, these loads multiplied by an appropriate factor of safety that is related to the probability of occurrence of the failure are ultimate loads to be considered for design. The factor of safety (F.S.) is defined in Figure 2.

Figure 2

Factor of safety at the time of occurrence

(ii) For residual strength substantiation, the airplane must be able to withstand two thirds of the ultimate loads defined in paragraph (e)(1)(i).

(iii) Failures of the system that result in forced structural vibrations (oscillatory failures) must not produce loads that could result in detrimental deformation of primary structure.



(2) Consideration of certain failure conditions may be required by other sections of part 25, regardless of calculated system reliability. Where analysis shows the probability of these failure conditions to be less than 10^{-9}, criteria other than those specified in this paragraph may be used for structural substantiation to show continued safe flight and landing.

(3) Warning considerations. For system failure detection and warning, the system must be checked for failure conditions, not extremely improbable, that degrade the structural capability below the level required by part 25 or significantly reduce the reliability of the remaining system. The flightcrew must be made aware of these failures before flight. Certain elements of the control system, such as mechanical and hydraulic components, may use special periodic inspections, and electronic components may use daily checks, in lieu of warning systems to achieve the objective of this requirement. These certification maintenance requirements must be limited to components that are not readily detectable by normal warning systems and where service history shows that inspections will provide an adequate level of safety.

(4) Dispatch with known failure conditions. If the airplane is to be dispatched in a known system failure condition that affects structural performance, or affects the reliability of the remaining system to maintain structural performance, then the provisions of these special conditions must be met for the dispatched condition and for subsequent failures. Flight limitations and expected operational limitations may be taken into account in establishing Qj as the combined probability of being in the dispatched failure condition and the subsequent failure condition for the safety margins in Figure 3. These limitations must be such that the probability of being in this combined failure state and then subsequently encountering limit load conditions is extremely improbable. No reduction in these safety margins is allowed if the subsequent system failure rate is greater than 10^{-3} per hour."

Figure 3

Factor of safety for continuation of flight

$Q_j = (T_j)(P_j)$ where:

T_j = Average time spent in failure condition j (in hours).

P_j = Probability of occurrence of failure mode j (per hour).

(f) In lieu of the requirements of § 25.495, "Turning," the following apply:

(1) The airplane is assumed to execute a steady turn by nose gear steering, or by application of sufficient differential power, so that the limit load factors applied at the center of gravity are 1.0 vertically and 0.5 laterally.

(2) The airplane must be designed for the condition prescribed in paragraph (f)(1), taking into account:

(i) The effects of tire characteristics on the sharing of lateral loads on each tire of the landing gear system, and

(ii) The effect of airframe and landing gear flexibility on the sharing of loads on the different legs of the landing gear system.

(g) In lieu of the requirements of § 25.503, "Pivoting," the following apply:

(1) The main and center gear units and supporting structure must be designed for the scrubbing or torsion loads, or both, induced by pivoting during ground maneuvers produced by:

(i) Towing at the nose gear, no brakes applied, and

(ii) Application of symmetrical or unsymmetrical forward thrust to aid pivoting and with or without braking by pilot action on the pedals.

(2) The airplane is assumed to be in static equilibrium, with the loads being applied at the ground contact points.

(3) The limit vertical load factor must be 1.0, and:

(i) For wheels with locked brakes applied by pilot action on the pedals, the coefficient of friction must be 0.8.

(ii) For wheels with brakes not applied, the ground tire reactions must be based on reliable tire data.

(4) The failure conditions must be analyzed in accordance with paragraph (e) of these Special Conditions.

(h) In lieu of paragraph (b) of § 25.723 "Shock absorption tests," the center landing gear should not fail in a test demonstrating its reserve energy absorption capacity at design landing weight, assuming airplane lift no greater than the airplane weight acting during a 12-feet-per-second airplane landing impact, taking into account both main and center gear acting during the impact. Landing should be considered on a level runway or a runway having a convex upward shape that may be approximated by a slope of 1.5 percent with the horizontal at main landing gear stations, whichever is the most critical.

Issued in Renton, Washington, on February 28, 2002.

Vi L. Lipski,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 2000–NM–307–AD]

RIN 2120–AA64

Airworthiness Directives; Bombardier Model DHC–8–100, –200, and –300 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Bombardier Model DHC–8–100, –200, and –300 series airplanes. This proposal would require various modifications of the airstair (main passenger) door. This action is necessary to prevent failure of the airstair door to open after a landing, which could result in a blocked escape route during an emergency evacuation. This action is intended to address the identified unsafe condition.

DATES: Comments must be received by April 19, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2000–NM–307–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-nprmcomment@faa.gov*. Comments sent via fax or the Internet must contain "Docket No. 2000–NM–307–AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in the proposed rule may be obtained from Bombardier, Inc., Bombardier Regional Aircraft Division, 123 Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, New York Aircraft Certification Office, 10 Fifth Street, Third Floor, Valley Stream, New York.

FOR FURTHER INFORMATION CONTACT: Dan Parrillo, Aerospace Engineer, Systems and Flight Test Branch, ANE–172, FAA, New York Aircraft Certification Office, 10 Fifth Street, Third Floor, Valley Stream, New York 11581; telephone (516) 256–7505; fax (516) 568–2716.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the proposed AD is being requested.
- Include justification (*e.g.*, reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket 2000–NM–307–AD." The postcard will be date-stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket 2000–NM–307–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

Transport Canada Civil Aviation (TCCA), which is the airworthiness authority for Canada, notified the FAA that an unsafe condition may exist on certain Bombardier Model DHC–8–100, –200, and –300 series airplanes. TCCA has received numerous reports of malfunctioning airstair (main passenger) doors on affected airplanes. During these malfunctions, crewmembers had difficulty opening or closing the door, or were completely unable to open the door from inside or outside. The airstair door is a "Type I" exit, which is essential for evacuation during an emergency. Causes of a failed airstair door include a malfunctioning inflation valve used for the door seal, bending of the gas springs (gas struts), and jamming and/or breaking of the door balance cable. Failure of the airstair door to open after a landing, if not corrected, could result in a blocked escape route during an emergency evacuation.

Explanation of Relevant Service Information

Bombardier has issued the service bulletins described in the following table:

Procedures for—	Are described in Service Bulletin—	Revision level—	Dated—
Replacing the inflation valve with a new valve of an improved design..	8–52–46	Original	September 30, 1998.
Reworking the airstair door cable balance assembly	8–52–38	Original	October 10, 1995.
		'A'	September 19, 1997.
Modifying the cable guard system by replacing the upper cable guards with new, improved cable guards.	8–52–57	Original	February 23, 2000.
		'A'	July 28, 2000.
		'B'	November 14, 2000.

Procedures for—	Are described in Service Bulletin—	Revision level—	Dated—
Modifying the airstair balance system by manufacturing and installing a support bracket assembly.	8–52–56	'C'	March 10, 2000.
		'D'	May 18, 2000.
		'E'	July 20, 2000.
		'F'	August 29, 2000.
		'G'	November 7, 2000.
Replacing the airstair door gas springs with new gas springs.	8–52–59	Original	September 18, 2000.
		'A'	January 3, 2001.

Accomplishment of the actions specified in the service bulletins is intended to adequately address the identified unsafe condition. TCCA classified Service Bulletins 8–52–46, 8–52–38, and 8–52–57 as mandatory; mandated accomplishment of either Service Bulletin 8–52–56 or 8–52–59 (and allowed accomplishment of both); and issued Canadian airworthiness directive CF–2000–19R1, dated January 22, 2001, to ensure the continued airworthiness of these airplanes in Canada.

FAA's Conclusions

These airplane models are manufactured in Canada and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, TCCA has kept the FAA informed of the situation described above. The FAA has examined the findings of TCCA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the service bulletins described previously.

Cost Impact

The FAA provides the following cost estimates for the actions specified by this proposed AD:

Action per Service Bulletin	Workhours per airplane	Labor rate per hour	Parts cost per airplane	Number of U.S. airplanes affected	Per-airplane cost	Fleet cost
8–52–46	3	$60	$297	194	$477	$92,538
8–52–38	4	60	1,930	130	2,170	282,100
8–52–57	1	60	0	194	60	11,640
8–52–56	4	60	0	194	240	46,560
8–52–59	3	60	0	194	180	34,920

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this proposed AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Bombardier, Inc. (Formerly de Havilland, Inc.): Docket 2000–NM–307–AD.

Applicability: Model DHC–8–100, –200, and –300 series airplanes; certificated in any category; serial numbers 003 through 550 inclusive.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been

VOL
67
ISS
54
MR
20
2002
UMI

modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the airstair door to open after a landing, which could result in a blocked escape route during an emergency evacuation, accomplish the following:

Modifications

(a) Modify the airplane as specified by the following table:

TABLE—MODIFICATION REQUIREMENTS

For Model—	Modify the airstair door by—	Within—	In accordance with the Accomplishment Instructions of Bombardier Service Bulletin—
(1) DHC–8–102, –103, –106, –201, 202, 301, –311, and –315 series airplanes; serial numbers 003 through 522 inclusive.	Replacing the inflation valve with a new valve of an improved design (Modsum 8Q100185).	6 months after the effective date of this AD.	8–52–46, dated September 30, 1998.
(2) DHC–8–102, –103, –106, –301, –311, and –315 series airplanes; serial numbers 003 through 400 inclusive.	Reworking the airstair door cable balance assembly (Modsum 8/2205).	6 months after the effective date of this AD.	8–52–38, dated October 10, 1995; or 8–52–38, Revision 'A,' dated September 19, 1997.
(3) DHC–8–102, –103, –106, –201, –202, –301, 311, and –315 series airplanes; serial numbers 003 through 550 inclusive.	Replacing the upper cable guards on the airstair door with new, improved cable guards (Modsum 8Q101093).	6 months after the effective date of this AD, but after the modification required by paragraph (a)(2) of this AD.	8–52–57, dated February 23, 2000; or 8–52–58, Revision 'A,' dated July 28, 2000; or 8–52–57, Revision 'B,' dated November 14, 2000.
(4) DHC–8–102, 103, 106, 201, 202, 301, 311, and 315 series airplanes; serial numbers 003 through 550 inclusive.	(i) Manufacturing and installing a support bracket assembly (Modsum 8Q101086); and/or.	6 months after the effective date of this AD.	8–52–56, Revision 'C,' dated March 10, 2000; or 8–52–56, Revision 'D,' dated May 18, 2000; or 8–52–56, Revision 'E,' dated July 20, 2000; or 8–52–56, Revision 'F,' dated August 29, 2000; or 8–52–56, Revision 'G,' dated November 7, 2000.
	(ii) Replacing the airstair door gas springs with new gas springs (Modsum 8Q101074).	6 months after the effective date of this AD.	8–52–59; dated September 18, 2000; or 8–52–59; Revision 'A,' dated January 3, 2001.

Note 2: Modsum 8Q101093 (paragraph (a)(3) of this AD) cannot be accomplished before Modification 8/2205 (paragraph (a)(2) of this AD), because Modsum 8Q101093 introduces a redesigned cable guard that replaces a cable guard that is part of Modification 8/2205.

Note 3: Modification as specified by either paragraph (a)(4)(i) or (a)(4)(ii)—or both—of this AD is acceptable for compliance with the requirements of paragraph (a)(4) of this AD.

Alternative Methods of Compliance

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, New York ACO.

Note 4: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

Special Flight Permits

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 5: The subject of this AD is addressed in Canadian airworthiness directive CF–2000–19R1, dated January 22, 2001.

Issued in Renton, Washington, on March 13, 2002.

Ali Bahrami,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 2000–CE–14–AD]

RIN 2120–AA64

Airworthiness Directives; Rockwell Collins, Inc. ADC–85, ADC–85A, ADC–850D, and ADC–850F Air Data Computers

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking (NPRM); Reopening of the comment period.

SUMMARY: This document proposes to revise an earlier proposed airworthiness directive (AD) that would apply to certain Rockwell Collins, Inc. (Rockwell) ADC–85, ADC–85A, ADC–850C, and ADC–850F air data computers that are installed on airplanes. The earlier NPRM would have required you to replace any affected air data computer (ADC) with one that has a reprogrammed and tested central processing unit (CPU) circuit card and circuit card assemblies. The earlier NPRM resulted from a flight test that showed that these ADCs could display an unwarranted ADC flag in response to the airplane's "Normal/Alternate Air" static source selection capability. Revised service information revealed the need to change the applicability of the affected ADC units that are installed on airplanes. In addition, evaluation of the public comments on the NPRM reveals the need to change the number and models of airplanes that could have the affected ADC units installed. Since these actions impose an additional burden over that proposed in the NPRM, we are reopening the comment period to allow the public the chance to comment on these additional actions.

DATES: The Federal Aviation Administration (FAA) must receive any comments on this proposed rule on or before May 17, 2002.

ADDRESSES: Submit comments to FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 2000–CE–14–AD, 901 Locust, Room 506, Kansas City, Missouri 64106. You may view any comments at this location between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays. You may also send comments electronically to the following address: *9–ACE–7–Docket@faa.gov.* Comments sent electronically must contain "Docket No. 2000–CE–76–AD" in the subject line. If you send comments electronically as attached electronic files, the files must be formatted in Microsoft Word 97 for Windows or ASCII text.

You may get service information that applies to this proposed AD from Rockwell Collins, Business and Regional Systems, 400 Collins Road Northeast,Cedar Rapids, Iowa 52498; telephone: (319) 295–2512; facsimile: (319) 295–5064. You may also view this information at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Roger A. Souter, FAA, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Rm 100, Wichita, Kansas 67209; telephone: (316) 946–4134; facsimile: (316) 946–4407; e-mail address: *Roger.Souter@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

How Do I Comment on This Proposed AD?

The FAA invites comments on this proposed rule. You may submit whatever written data, views, or arguments you choose. You need to include the rule's docket number and submit your comments to the address specified under the caption **ADDRESSES.** We will consider all comments received on or before the closing date. We may amend this proposed rule in light of comments received. Factual information that supports your ideas and suggestions is extremely helpful in evaluating the effectiveness of this proposed AD action and determining whether we need to take additional rulemaking action.

Are There Any Specific Portions of This Proposed AD I Should Pay Attention to?

The FAA specifically invites comments on the overall regulatory, economic, environmental, and energy aspects of this proposed rule that might suggest a need to modify the rule. You may view all comments we receive before and after the closing date of the rule in the Rules Docket. We will file a report in the Rules Docket that summarizes each contact we have with the public that concerns the substantive parts of this proposed AD.

How Can I Be Sure FAA Receives My Comment?

If you want FAA to acknowledge the receipt of your mailed comments, you must include a self-addressed, stamped postcard. On the postcard, write "Comments to Docket No. 2000–CE–14–AD." We will date stamp and mail the postcard back to you.

Discussion

What Events Have Caused This Proposed AD?

The air data computer (ADC), as part of its monitoring process, tests for errant sensor behavior such as unreasonable jumps in altitude and unreasonably high vertical speed. When the ADC detects an errant sensor behavior, the ADC displays a flag for 5.5 seconds plus the time it takes for the sensor to settle within the limits for another 5.5-second period. This results in a minimum ADC flag display of 11 seconds.

Testing of certain Rockwell Collins ADCs reveals the ADC could display unwarranted flags on aircraft where you can select the "Normal/Alternate Air" static source. When there is a significant difference between normal and alternate/revisionary static air sources, you can exceed the ADC monitor thresholds and the ADC would display flags.

If the flight crew used the undesirable ADC flag displays to deselect the alternate static air source before the initial 11-second display period, a valid air source may have been deselected. Confusion could result when the previously unflagged normal static air source is reselected. This may also result in the ADC displaying a flag for the first 11 seconds. The affected ADCs include:

Unit	Part No.	Applicable to serial No.
ADC–85 (Incorporating Rockwell Collins Service Bulletin No. 58)	622–8051–002 622–8051–003	All units.
ADC–85A (Incorporating Rockwell Collins Service Bulletin No. 58)	822–0370–113 822–0370–123 822–0370–139 822–0370–404 822–0370–408	All units.
ADC–850D (Incorporating Rockwell Collins Service Bulletin No. 58)	822–0389–133	All up to and including 3DGW (except for 1P6D, 22RC–22RF, and 23WK–3DGP).
ADC–850F	822–1036–406 822–1036–418	All Units.

What Are the Consequences If the Condition Is Not Corrected?

If these situations were to occur while the flight crew were making critical flight decisions, this unwarranted ADC flag could distract the crew, and the lack of attention to the critical actions could result in an unsafe operating condition.

Is There Service Information That Applies to This Subject?

Rockwell has issued Service Bulletin No. 62 (ADC–85/85A/850C/850D/850E/

VOL 67 ISS 54 MR 20 2002 UMI

850F–34–62), Revision 2, dated March 7, 2000, and Service Bulletin No. 62 (ADC–85/85A/850C/850F–34–62), dated October 25, 1999. Service Bulletin 62, Revision 2, reflects the addition of ADC–850D to the list of affected units and the removal of ADC–850C from the list of affected units.

What Are the Provisions of This Service Information?

These service bulletins contain procedures for replacing or reprogramming applicable parts or circuit card assemblies on central processing unit (CPU) circuit cards in the ADC and testing the modified ADC.

Has FAA Taken Any Action to This Point?

We issued a proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an AD that would apply to certain Rockwell Collins, Inc. (Rockwell) ADC–85, ADC–85A, ADC–850C, and ADC–850F air data computers that are installed on airplanes. This proposal was published in the **Federal Register** as a notice of proposed rulemaking (NPRM) on October 2, 2000 (65 FR 58678). The NPRM proposed to require you to:

—Remove the ADC from the airplane;
—Replace or reprogram applicable parts or Circuit Card Assemblies on the CPU Circuit Card;
—Test the modified ADC; and
—Install the modified ADC in the airplane.

You would have to accomplish the proposed actions in accordance with Rockwell Service Bulletin No. 62 (ADC–85/85A/850C/850F–34–62), dated October 25, 1999.

Was the Public Invited To Comment?

The FAA encouraged interested persons to participate in the making of this amendment. The following presents the comments received on the proposal and FAA's response to each comment:

Comment Issue No. 1: Remove Dassault Aviation Model F2000 From the Applicable Airplane Model List

What Is the Commenter's Concern?

A commenter states that, even though fitted with the subject ADC, the Dassault Aviation Model F2000 airplane is not designed with the ability to use alternate static sources.

What Is FAA's Response to the Concern?

We concur that the airplane is not designed with the ability to use alternate static sources. Therefore, we are removing the Dassault Aviation Model F2000 from the applicable airplane model list.

Comment Issue No. 2: Modify the Estimate of the Number of Airplanes Affected on the U.S. Registry

What Is the Commenter's Concern?

A commenter states that more aircraft are affected than the 245 listed in the NPRM. The commenter notes that the ADC is installed in additional aircraft and is installed on at least 329 airplanes.

What Is FAA's Response to the Concern?

The number of airplanes affected by this AD could exceed 245. We have no way of determining the exact number that have the affected ADCs installed. Our best estimate in the NPRM was 245 airplanes. Further research indicates that at least 329 airplanes could have the ADC installed. Therefore, we will change the cost impact to represent an estimate of 329 airplanes instead of 245 airplanes.

Comment Issue No. 3: Modify the List of Applicable Raytheon Airplanes

What Is the Commenter's Concern?

A commenter states that the list of affected airplanes is incorrect for Raytheon airplane models. The list incorrectly identifies two of the Raytheon airplane models as 250 and 350. The commenter states that these are marketing designators and not part of FAA's model identity. For the ADC–85/ADC–85A units, the commenter states that the correct models are Raytheon B200, B300, and 1900D, and that the Model C90A airplanes should be added to the list.

What Is FAA's Response to the Concern?

We concur with these comments and are changing this proposed rule accordingly.

Comment Issue No. 4: Add a Placard for Temporary Information Regarding the Unsafe Condition

What Is the Commenter's Concern?

A commenter states that the pilot should have some kind of indication of the problem if the actions specified in the service bulletin are not yet incorporated on the airplane (*e.g.*, during the 12 calendar month time before mandatory compliance). This commenter suggests that FAA should require the operators to install a placard until the modification is incorporated.

What Is FAA's Response to the Concern?

The FAA does not concur. We evaluated the nature of the unsafe condition against the time proposed for compliance when preparing the NPRM. Rockwell Collins did issue Operator Bulletin 99–7, dated August 1999, which provides information on such a placard. Although it is a good idea to incorporate the actions of this operator bulletin, we have determined that the modification as proposed, including the compliance time, addresses the unsafe condition.

We will include a note in the proposed AD recommending compliance with Rockwell Collins Operator Bulletin 99–7, dated August 1999.

Comment Issue No. 5: Recommend the Effective Date of the AD to Accommodate Production Aircraft

What Is the Commenter's Concern?

A commenter recommends that FAA establish the effective date of the AD to accommodate incorporation of the AD into production aircraft. The commenter suggests May 1, 2001, or later, as the effective date of the AD.

What Is FAA's Response to the Concern?

The FAA will take this into consideration when establishing the effective date.

Comment Issue No. 6: Make Reference to a Later Service Bulletin for a More Complete List of Affected Units

What Is the Commenter's Concern?

A commenter states that Rockwell Collins Service Bulletin No. 62 (ADC–85/85A/850C/850D/850E/850F–34–62), Revision 2, dated March 7, 2000, contains a more complete list of affected units. The commenter recommends the incorporation of this service bulletin into the AD.

What Is FAA's Response to the Concern?

The FAA concurs that Revision 2 of the service bulletin contains a more complete list of affected ADC units. Revision 2 reflects the removal of ADC–850C from the affected list and adds ADC–850D to the affected list. However, Service Bulletin No. 62, dated October 25, 1999, is acceptable for ADC–85/85A/850F units. Service Bulletin No. 62, Revision 2, dated March 7, 2000, is acceptable for ADC–85/85A/850D/850F units. We will incorporate this bulletin into the proposed AD and change the proposed AD applicability accordingly.

The FAA's Determination

What Has FAA Decided?

After examining the circumstances and reviewing all available information related to the incidents described above, we have determined that:

—The unsafe condition exists or could develop on airplanes equipped with all ADC units identified in the E. Compliance section of Rockwell Collins Service Bulletin No. 62, Revision 2, dated March 7, 2000.
—The NPRM should be expanded to include these additional units; and
—AD action should be taken in order to correct this unsafe condition.

The Supplemental NPRM

How Will the Changes to the NPRM Impact the Public?

Proposing that the NPRM apply to certain ADC–850D air data computers that are installed on airplanes presents actions that go beyond the scope of what was already proposed. Therefore, we are issuing a supplemental NPRM and reopening the comment period to allow the public additional time to comment on the proposed AD.

What Are the Provisions of the Supplemental NPRM?

This proposed AD would require you to replace any affected ADC with one that has a reprogrammed and tested CPU circuit card and circuit card assemblies

Cost Impact

How Many Airplanes Would This Proposed AD Impact?

We estimate that this proposed AD affects more than 329 airplanes in the U.S. registry.

What Would Be the Cost Impact of This Proposed AD on Owners/Operators of the Affected Airplanes?

We estimate the following costs to accomplish the proposed removal, installation, reprogramming, and testing of the ADC in each airplane:

Labor cost	Parts cost	Total cost per airplane	Total cost on U.S. operators
6 workhours × $60 per hour = $360	$680	$1040	$342,160

For units that are still under warranty, Rockwell will provide the parts and labor at no charge.

Regulatory Impact

Would This Proposed AD Impact Various Entities?

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposed rule would not have federalism implications under Executive Order 13132.

Would This Proposed AD Involve a Significant Rule or Regulatory Action?

For the reasons discussed above, I certify that this proposed action (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. FAA amends § 39.13 by adding a new airworthiness directive (AD) to read as follows:

Rockwell Collins, Inc.: Docket No. 2000–CE–14–AD.

(a) *What airplanes are affected by this AD?* This AD affects the following Rockwell Collins air data computers (ADC) that are installed in, but not limited to the airplanes that are listed below:

(1) Affected ADCs:

Unit	Collins part No. (CPN)	Applicable to serial No.
ADC–85 (Incorporating Rockwell Collins Service Bulletin No. 58)	622–8051–002 622–8051–003	All units.
ADC–85A (Incorporating Rockwell Collins Service Bulletin No. 58)	822–0370–113 822–0370–123 822–0370–139 822–0370–404 822–0370–408	All units.
ADC–850D (Incorporating Rockwell Collins Service Bulletin No. 58)	822–0389–133	All up to and including 3DGW (except for 1P6D, 22RC–22RF, and 23WK–3DGP).
ADC–850F	822–1036–406 822–1036–418	All units.

VOL
67
ISS
54
MR
20
2002
UMI

(2) List of airplanes where the affected ADC could be installed. This is not a comprehensive list and airplanes not on this list that have the ADC installed through field approval or other methods are still affected by this AD:

Unit	Airplane model
ADC–85/ADC–85A	Astra AIA. Chinese Y7 and Y8. Czech LET–610. DC–8. Falcon 20F. Piaggio P–180. Raytheon B200, B300, C90A and 1900D. Saab 340.
ADC–850D	Lear 60.
ADC–850F	Falcon 20, 50, and 50EX.

(b) *Who must comply with this AD?* Anyone who wishes to operate any airplane that uses one of the above referenced Rockwell Collins air data computers must comply with this AD.

(c) *What problem does this AD address?* The actions specified by this AD are intended to prevent an unwarranted display of the ADC flag when switching static air sources. This could cause the flight crew to react to this incorrect flight information and possibly result in an unsafe operating condition.

(d) *What actions must I accomplish to address this problem?* To address this problem, you must accomplish the following:

Actions	Compliance	Procedures
(1) Perform the following, unless already accomplished:. (i) Remove any affected ADC from the airplanes (ii) As applicable, replace or reprogram parts or circuit card assemblies on central processing unit (CPU) circuit cards (iii) Test the ADC (iv) Install the modified ADC in the airplanes	Within the next 12 calendar months after the effective date of this AD.	In accordance with Rockwell Collins Service Bulletin No. 62 (ADC–85/85A/850C/850D/850E/850F–34–62), Revision 2, dated March 7, 2000, or Service Bulletin No. 62, dated October 25, 1999, as applicable, the applicable Collins Computer Component Maintenance Manual, and Collins Avionics Standard Shop Practices Instruction Manual.
(2) Do not install on any airplane one of the affected ADCs unless the modification and test required by paragraphs (d)(ii) and (d)(iii) of this AD are accomplished.	As of the effective date of this AD	In accordance with Rockwell Collins Service Bulletin No. 62 (ADC–85/85A/850C/850D/850E/850F–34–62), Revision 2, dated March 7, 2000, or Service Bulletin No. 62, dated October 25, 1999, as applicable.

Note 1: Rockwell Collins Operator Bulletin 99–7, dated August 1999, contains information about an operational placard to install until accomplishment of the actions of this AD. While not necessary to address the unsafe condition in this AD, FAA highly recommends that you incorporate this placard.

(e) *Can I comply with this AD in any other way?* You may use an alternative method of compliance or adjust the compliance time if:

(1) Your alternative method of compliance provides an equivalent level of safety; and

(2) The Manager, Wichita Aircraft Certification Office (ACO), approves your alternative. Send your request through an FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Wichita ACO.

Note 2: This AD applies to each airplane identified in paragraph (a) of this AD, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if you have not eliminated the unsafe condition, specific actions you propose to address it.

(f) *Where can I get information about any already-approved alternative methods of compliance?* Contact Roger A. Souter, FAA, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Room 100, Wichita, Kansas 67209; telephone: (316) 946–4134; facsimile: (316) 946–4407, e-mail: *Roger.Souter@faa.gov.*

(g) *What if I need to fly the airplane to another location to comply with this AD?* The FAA can issue a special flight permit under sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate your airplane to a location where you can accomplish the requirements of this AD.

(h) *How do I get copies of the documents referenced in this AD?* You may get copies of the documents referenced in this AD from Rockwell Collins, Business and Regional Systems, 400 Collins Road Northeast, Cedar Rapids, Iowa 52498. You may view these documents at FAA, Central Region, Office of the Regional Counsel, 901 Locust, Room 506, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on March 12, 2002.

Dorenda D. Baker,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 2000–CE–76–AD]

RIN 2120–AA64

Airworthiness Directives; Air Tractor, Inc. Model AT–802 and AT–802A Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to certain Air Tractor, Inc. (Air Tractor) Model AT–802 and AT–802A airplanes. This proposed AD would require you to replace the rudder control cables and fairleads with parts of improved design. This proposed AD is the result of a report that a rudder control cable broke because of wear at the aft fairlead. The actions specified by this proposed AD are intended to prevent wear of the rudder control cables at the fairlead, which could cause the rudder control cable to break and result in loss of rudder control.

DATES: The Federal Aviation Administration (FAA) must receive any comments on this rule on or before May 17, 2002.

ADDRESSES: Submit comments to FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 2000–CE–76–AD, 901 Locust, Room 506, Kansas City, Missouri 64106. You may view any comments at this location between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays. You may also send comments electronically to the following address: *9-ACE-7-Docket@faa.gov.* Comments sent electronically must contain "Docket No. 2000–CE–76–AD" in the subject line. If you send comments electronically as attached electronic files, the files must be formatted in Microsoft Word 97 for Windows or ASCII text.

You may get service information that applies to this proposed AD from Air Tractor, Incorporated, P.O. Box 485, Olney, Texas 76374. You may also view this information at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Garry D. Sills, Aerospace Engineer, FAA, Fort Worth Airplane Certification Office, 2601 Meacham Boulevard, Fort Worth, Texas 76193–0150; telephone: (817) 222–5154; facsimile: (817) 222–5960.

SUPPLEMENTARY INFORMATION:

Comments Invited

How Do I Comment on This Proposed AD?

The FAA invites comments on this proposed rule. You may submit whatever written data, views, or arguments you choose. You need to include the rule's docket number and submit your comments to the address specified under the caption **ADDRESSES.** We will consider all comments received on or before the closing date. We may amend this proposed rule in light of comments received. Factual information that supports your ideas and suggestions is extremely helpful in evaluating the effectiveness of this proposed AD action and determining whether we need to take additional rulemaking action.

Are There Any Specific Portions of This Proposed AD I Should Pay Attention to?

The FAA specifically invites comments on the overall regulatory, economic, environmental, and energy aspects of this proposed rule that might suggest a need to modify the rule. You may view all comments we receive before and after the closing date of the rule in the Rules Docket. We will file a report in the Rules Docket that summarizes each contact we have with the public that concerns the substantive parts of this proposed AD.

How Can I Be Sure FAA Receives My Comment?

If you want FAA to acknowledge the receipt of your mailed comments, you must include a self-addressed, stamped postcard. On the postcard, write "Comments to Docket No. 2000–CE–76–AD." We will date stamp and mail the postcard back to you.

Discussion

What Events Have Caused This Proposed AD?

The FAA received reports of the rudder control cables wearing at the aft fairlead area on Air Tractor Model AT–802 and AT–802A airplanes. In one instance the rudder cable broke on a Model AT–802 airplane.

The manufacturer has designed a new cable that incorporates a stainless steel sleeve that is crimped to the cable in the fairlead area. The stainless steel sleeve is intended to prevent wear of the new cable in that area.

What Are the Consequences if the Condition Is Not Corrected?

If this condition is not corrected, rudder control cables may wear and break at the fairlead area. Broken rudder control cables could result in loss of rudder control.

Is There Service Information That Applies to This Subject?

Air Tractor has issued Snow Engineering Company Service Letter # 199, dated May 30, 2000.

What Are the Provisions of This Service Bulletin?

The service bulletin includes procedures for installing the improved design rudder control cables and fairleads.

The FAA's Determination and an Explanation of the Provisions of this Proposed AD

What Has FAA Decided?

After examining the circumstances and reviewing all available information related to the incidents described above, we have determined that:

—the unsafe condition referenced in this document exists or could develop on other Air Tractor Model AT–802 and AT–802A airplanes of the same type design;

—the actions specified in the previously-referenced service information should be accomplished on the affected airplanes; and

—AD action should be taken in order to correct this unsafe condition.

What Would This Proposed AD Require?

This proposed AD would require you to install the improved design rudder control cables and fairleads.

Cost Impact

How Many Airplanes Would This Proposed AD Impact?

We estimate that this proposed AD affects 81 airplanes in the U.S. registry.

What Would Be the Cost Impact of This Proposed AD on Owners/Operators of the Affected Airplanes?

We estimate the following costs to accomplish the proposed modification:

Labor cost	Parts cost	Total cost per airplane	Total cost on U.S. operators
2 workhours × $60 per hour = $120	$300	$420	$34,020

Regulatory Impact

Would This Proposed AD Impact Various Entities?

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposed rule would not have federalism implications under Executive Order 13132.

Would This Proposed AD Involve a Significant Rule or Regulatory Action?

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. FAA amends § 39.13 by adding a new airworthiness directive (AD) to read as follows:

Air Tractor, Inc.: Docket No. 2000–CE–76–AD.

(a) *What airplanes are affected by this AD?* This AD affects Model AT–802 and AT–802A airplanes, serial numbers 802–0001 through 802–0081, that are certificated in any category.

(b) *Who must comply with this AD?* Anyone who wishes to operate any of the airplanes identified in paragraph (a) of this AD must comply with this AD.

(c) *What problem does this AD address?* The actions specified by this AD are intended to prevent wear of the rudder control cables at the fairlead, which could cause the rudder control cable to break and result in loss of rudder control.

(d) *What actions must I accomplish to address this problem?* To address this problem, you must accomplish the following:

Actions	Compliance	Procedures
(1) Replace the rudder control cables and fairlead with part numbers 70524–10–500 or 70524–6–500, and 70122–1, as specified in the service letter.	Within the next 500 hours time-in-service (TIS) after the effective date of this AD, unless already accomplished.	Accomplish the replacements in accordance with Snow Engineering Company Service Letter # 199, dated May 30, 2000, and applicable drawing number 70523 of the replacement kit, as specified in the service letter.
(2) Do not install any rudder control cable that does not have a stainless steel sleeve crimped to the cable in the fairlead area.	Not Applicable	Not Applicable.

(e) *Can I comply with this AD in any other way?* You may use an alternative method of compliance or adjust the compliance time if:

(1) Your alternative method of compliance provides an equivalent level of safety; and

(2) The Manager, Fort Worth Airplane Certification Office (ACO), approves your alternative. Submit your request through an FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Fort Worth ACO.

Note: This AD applies to each airplane identified in paragraph (a) of this AD, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if you have not eliminated the unsafe condition, specific actions you propose to address it.

(f) *Where can I get information about any already-approved alternative methods of compliance?* Contact Garry D. Sills, Aerospace Engineer, FAA, Fort Worth Airplane Certification Office, 2601 Meacham Boulevard, Fort Worth, Texas 76193–0150; telephone: (817) 222–5154; facsimile: (817) 222–5960.

(g) *What if I need to fly the airplane to another location to comply with this AD?* The FAA can issue a special flight permit under sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate your airplane to a location where you can accomplish the requirements of this AD.

(h) *How do I get copies of the documents referenced in this AD?* You may get copies of the documents referenced in this AD from Air Tractor, Incorporated, P.O. Box 485, Olney, Texas 76374. You may view these documents at FAA, Central Region, Office of the Regional Counsel, 901 Locust, Room 506, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on March 12, 2002.

Dorenda D. Baker,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 02–6628 Filed 3–19–02; 8:45 am]

BILLING CODE 4910–13–P

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Chapter II

Regulatory Options for Addressing Upholstered Furniture Flammability; Public Meeting

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of public meeting and request for comments.

SUMMARY: The Consumer Product Safety Commission (CPSC or Commission) will conduct a public meeting June 18–19, 2002 to discuss options for addressing upholstered furniture flammability. The meeting is not a Commission hearing. The focus of the discussions will be the supporting information and draft upholstered furniture flammability standard developed by CPSC staff included in the October 30, 2001 briefing package entitled "Upholstered Furniture Flammability: Regulatory Options," the progress of outside groups in addressing the same problem, and recent developments in related flammability issues.[1] The Commission invites written comments and oral presentations from individuals, associations, firms, and government agencies with information or comments related to the briefing package. The Commission will evaluate these submissions in its deliberations on the flammability hazards associated with upholstered furniture.

DATES: The meeting will begin at 10:00 a.m. on June 18, 2002, and continue on June 19, 2002. Requests to make oral presentations, and 10 copies of the text of the presentation, must be received by the CPSC Office of the Secretary no later than May 20, 2002. Persons making presentations at the meeting should provide an additional 50 copies for dissemination on the date of the meeting. Written submissions that are in place of, or in addition to oral presentations, must be received by the Office of the Secretary no later than July 18, 2002. Ten copies should be provided.

Presentation texts and other written submissions should identify the author's affiliation with, or employment or sponsorship by, any entity with an interest in the upholstered furniture proceeding. Any data, analyses or studies should include substantiation and citations. The Commission reserves the right to limit the number of persons who make presentations and the duration of their presentations.

ADDRESSES: The meeting will be in room 420 of the East-West Towers Building, 4330 East-West Highway, Bethesda, MD. Written comments, requests to make oral presentations, and texts of oral presentations should be captioned "Upholstered Furniture Flammability Proceeding" and mailed to the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207, or delivered to that office, room 502, 4330 East-West Highway, Bethesda, Maryland 20814. Comments, requests, and texts of oral presentations may also be filed by facsimile to (301) 504–0127 or by e-mail to *cpsc-os@cpsc.gov.*

FOR FURTHER INFORMATION CONTACT: For information about the purpose or subject matter of this meeting contact Dale R. Ray, Project Manager, Directorate for Economic Analysis, U.S. Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 504–0962, extension 1323; fax (301) 504–0109; e-mail *dray@cpsc.gov.* For information about the schedule for submission of written comments, requests to make oral presentations, and submission of texts of oral presentations, contact Rockelle Hammond, Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 504–0800, extension 1232; fax (301) 504–0127; e-mail *rhammond@cpsc.gov.*

SUPPLEMENTARY INFORMATION:

A. Background

In 1994, the Commission initiated a regulatory proceeding to address the hazard of small open flame ignitions of upholstered furniture by publication of an advance notice of proposed rulemaking (ANPR). 59 FR 30735 (June 15, 1994). Small open flame sources include, for example, cigarette lighters, matches, and candles. The CPSC staff work indicates that a small open flame performance standard for upholstered furniture could reduce the risk of death, injury, and property loss.

Following issuance of the ANPR, CPSC staff developed a draft performance standard and a test method to evaluate the small open flame performance of upholstered furniture. In October 1997, the staff forwarded a briefing package to the Commission concluding that a small open flame standard was feasible and could effectively reduce the risks to consumers, including risks from both small open flame and cigarette ignitions. Since 1997, the staff has continued to develop the small open flame standard.

The standard that the staff has drafted contains performance requirements for small open flame ignition resistance of seating areas and dust covers of upholstered furniture. It also includes an optional seating barrier test that would allow the use of fire-retardant barriers, or interliners, instead of FR cover fabrics. The seating barrier test is intended to preserve consumer choice among many existing upholstery fabrics. CPSC staff believes that this would give manufacturers flexibility in achieving compliance, and would reduce the potential economic burden of the performance standard, especially for small businesses.

In the 1997 briefing package, the staff recommended that the CPSC gather additional scientific information to ensure that flame retardant (FR) upholstery fabric treatments that manufacturers might use would not result in adverse health effects. In 1998, the Commission held a public hearing on FR chemical issues. Representatives of government, industry, fire safety organizations, and other interested parties testified at the May 5–6, 1998 public hearing, or submitted information about FR chemicals following the hearing. The staff incorporated the information submitted pursuant to the public hearing and all other available scientific data into the FR chemical risk assessment in the October 30, 2001 briefing package. That assessment concluded that four of the eight FR chemicals selected for risk assessment would clearly not be considered hazardous to consumers under the Federal Hazardous Substances Act (FHSA). The assessment also identified one chemical as unlikely to be hazardous, one as hazardous, and two for which additional data were needed.

In the CPSC Fiscal Year 1998 appropriation bill, Congress directed the Commission to sponsor an independent study by the National Academy of Sciences (NAS) of potential health risks from FR chemicals that might be used to meet a flammability standard. The final NAS report was published in July 2000. The NAS study concluded that 8 of the 16 FR chemicals reviewed would present a minimal risk, even under "worst case" exposure assumptions. The NAS recommended further study for the remaining 8 chemicals.

B. The Public Meeting

The purpose of the public meeting is to provide a forum for dialog between Commission staff and interested parties on the work performed to date by the staff in developing a draft small open flame ignition standard for upholstered furniture, the related information developed during that effort, the progress of efforts by outside organizations to address the risk, and recent developments in related flammability issues. The meeting is not a Commission hearing.

Participation in the meeting is open. The CPSC staff will notify specific representatives of identified interest groups such as industry sectors (furniture, fabrics, foam, chemicals), fire safety and government (national, state/local, international), and consumer interests of the meeting. The meeting will be conducted in an open discussion format. Participants may be organized into panels to address specific topics. See the **DATES** section of this notice for information on making requests to give oral presentations at the meeting and on making written submissions.

[1] Briefing memorandum from Dale R. Ray, Project Manager, Directorate for Economic Analysis, to the Commission, "Upholstered Furniture Flammability: Regulatory Options," October 30, 2001. The document may be obtained from the CPSC web site at www.cpsc.gov or from the CPSC Office of the Secretary. The document is also available for inspection at the Commission's Public Reading Room, 4330 East-West Highway, room 419, Bethesda, Maryland 20814. For further information call the Office of the Secretary at (301) 504–0800.

C. Meeting Topics

To assist interested parties in deciding on whether and how to participate in the public meeting, or to submit written comments on the staff briefing package, the Commission is providing the following list of topics.

- Fire data & analysis
- Standards development & laboratory testing
- The CPSC staff's draft small open flame standard
- FR chemical testing, analysis & risk assessment
- Economic analysis
- Other standards/harmonization
  - —California TB–117
  - —United Kingdom regulations
  - —Voluntary standards activities
- Industry efforts to develop safer products & materials
- Regulatory alternatives

As indications of interest in making presentations and otherwise participating in the meeting are received, the Commission will revise and update the list of topics.

Dated: March 14, 2002.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

[FR Doc. 02–6633 Filed 3–19–02; 8:45 am]

BILLING CODE 6355–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 101

[Docket No. 01N–0458]

RIN 0910–AA19

Food Labeling; Guidelines for Voluntary Nutrition Labeling of Raw Fruits, Vegetables, and Fish; Identification of the 20 Most Frequently Consumed Raw Fruits, Vegetables, and Fish

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to amend the voluntary nutrition labeling regulations by updating the names and the nutrition labeling values for the 20 most frequently consumed raw fruits, vegetables, and fish in the United States. We are taking this action because current regulations require the agency to publish proposed updates (or a notice that the data sets have not changed from the previous publication) at least every 4 years. We also propose to revise the guidelines for the voluntary nutrition labeling of raw fruits, vegetables, and fish to make necessary changes resulting from the updated nutrition information and to provide further clarification of the guidelines. Availability of the updated nutrition labeling values in retail stores and on individually packaged raw produce and fish will enable consumers to make better purchasing decisions to meet their dietary needs.

DATES: Submit written or electronic comments on this proposal by June 3, 2002. See section IX of this document for the proposed effective date of a final rule based on this document.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit electronic comments to http://www.fda.gov/dockets/ecomments.

FOR FURTHER INFORMATION CONTACT: Lori LeGault, Center for Food Safety and Applied Nutrition (HFS–840), Food and Drug Administration, 5100 Paint Branch Pkwy., College Park, MD 20740, 301–436–1791, or e-mail: LLegault@cfsan.fda.gov.

SUPPLEMENTARY INFORMATION:

I. Background

In response to requirements of the Nutrition Labeling and Education Act of 1990 (the 1990 amendments) (Public Law 101–135), which amended the Federal Food, Drug, and Cosmetic Act (the act), we published final regulations in the **Federal Register** of November 27, 1991 (56 FR 60880) (the 1991 final rule), and corrections in the **Federal Registers** of March 6, 1992 (57 FR 8174), and March 26, 1992 (57 FR 10522) that: (1) Identified the 20 most frequently consumed raw fruits, vegetables, and fish in the United States, which are those varieties purchased raw but not necessarily consumed raw; (2) established guidelines for the voluntary nutrition labeling of these foods; and (3) set the criteria for food retailers to meet substantial compliance with these guidelines. The 1991 final rule also required us to publish proposed updates of the nutrition labeling data for the 20 most frequently consumed raw fruits, vegetables, and fish (or a notice that the data sets have not changed) at least every 2 years (56 FR 60880 at 60888 and 60891).

Next, we published a proposed rule on the voluntary nutrition labeling program in the **Federal Register** of July 18, 1994 (59 FR 36379) (the 1994 proposed rule), and a correction in the **Federal Register** of July 21, 1994 (59 FR 37190). The 1994 proposed rule proposed to: (1) Update the nutrition labeling values for the 20 most frequently consumed raw fruits, vegetables, and fish in the United States; and (2) revise the guidelines for the voluntary nutrition labeling of these foods to reflect the 1993 mandatory nutrition labeling final rules.

Finally, in the **Federal Register** of August 16, 1996 (61 FR 42742), we published a final rule entitled "Food Labeling; Guidelines for Voluntary Nutrition Labeling of Raw Fruits, Vegetables, and Fish; Identification of the 20 Most Frequently Consumed; and Policy for Data Base Review for Voluntary and Mandatory Nutrition Labeling" (the 1996 final rule). In the 1996 final rule, among other actions, we revised: (1) The nutrition labeling values for the 20 most frequently consumed raw fruits, vegetables, and fish in the United States, and (2) the guidelines for the voluntary nutrition labeling of these foods. We also modified the guidelines in § 101.45(b) (21 CFR 101.45(b)), in response to comments, to state that we would publish every 4 years (rather than 2 years) proposed updates of the nutrition data or a notice that the data sets have not changed from the previous publication (comment 12, 61 FR 42742 at 42746 and 42760).

We are now proposing to update the listing of the 20 most frequently consumed raw fruits, vegetables, and fish and their nutrition labeling values based on new data submitted or made available to the agency. This will enable consumers to have more accurate and up-to-date nutrition information for these foods.

II. Guidelines for Presentation of the Nutrition Labeling Values

A. Background and Proposed Revisions

To provide clarity and consistency in the voluntary nutrition labeling of raw fruits, vegetables, and fish, we propose to: (1) Divide current § 101.45(a)(3)(iii) into two parts (i.e., into §§ 101.45(a)(3)(iii) and 101.45(a)(3)(iv)) so that § 101.45(a)(3)(iii) pertains only to raw fruits and vegetables and § 101.45(a)(3)(iv) pertains only to raw fish, and (2) revise the wording for consistency and increased readability. In § 101.45(a)(3)(iii), we also propose to change the portion of the footnote about the saturated fat content of avocados from "* * * avocados provide 1 gram (g) of saturated fat per ounce (oz)" to "* * * avocados provide 0.5 g of saturated fat per oz." This decrease in saturated fat content is based on the most recent nutrient data provided by the California Avocado Commission (Ref. 1), which is discussed in section IV.B.1 of this document.

In the 1996 final rule, we modified the language in § 101.45(a)(3)(iii) for raw fruits and vegetables but, inadvertently, failed to do the same for raw fish. In order to provide parallel provisions for raw fish, we are now proposing: (1) To remove that portion of § 101.45(a)(3)(iii) which currently states "* * * When the nutrition labeling information for raw fish is provided on a chart, the listings for dietary fiber and sugars may be omitted if the following footnote is used 'Fish provide negligible amounts of dietary fiber and sugars'" and (2) to add new § 101.45(a)(3)(iv) to read as follows: "When retailers provide nutrition labeling information for more than one raw fish on signs or posters or in brochures, notebooks, or leaflets, the listings for dietary fiber and sugars may be omitted from the charts or individual nutrition labels if the following footnote is used 'Fish provide negligible amounts of dietary fiber and sugars'."

Currently, appendices C and D to part 101 (21 CFR part 101) provide the nutrition labeling values in a chart format with horizontal and vertical columns. Due to space constraints, we are presenting the nutrition labeling values in a chart format (proposed appendices C and D); however, we encourage retailers to display quantitative nutrition information for raw produce and raw fish as a compilation of nutrition labels in the Nutrition Facts format, with allowance for the shortened footnote shown in figure 1 at the bottom of the sign, poster, brochure, notebook, or leaflet. We are continuing to include the optional nutrient, potassium, in proposed appendices C and D because many raw fruits, vegetables, and fish are good sources of this nutrient. The nutrition label for raw apple shown in figure 1 displays the preferred format. However, as § 101.45(a)(4) indicates, when nutrition labeling is provided for individual raw fruits, vegetables, or fish on packages or in brochures, notebooks, or leaflets (i.e., other than on signs and posters), the full footnote required in § 101.9(d)(9) should be presented within the Nutrition Facts box.

B. Impact of the Trans Fatty Acids Proposed Rule

FDA has issued a proposed rule for *trans* fatty acids (also called "*trans* fat") in nutrition labeling (64 FR 62746, November 17, 1999) which, if finalized, will apply to the voluntary nutrition labeling program as well. *Trans* fatty acids are unsaturated fatty acids that have hydrogen atoms attached on opposite sides of a double bond ("*trans*" means "across" in Latin). This

VOL
67
ISS
54
MR
20
2002
UMI

configuration is primarily the result of the hydrogenation process used to harden oils, although *trans* fatty acids are found naturally in some animal products. Thus, *trans* fatty acids would not be expected to be present in raw produce. Accordingly, if the November 17, 1999, proposed rule is finalized to require mandatory labeling of *trans* fat, the agency tentatively concludes that the footnote required in proposed § 101.45(a)(3)(iii) for raw fruits and vegetables should be revised to state: "Most fruits and vegetables provide negligible amounts of saturated fat, *trans* fat, and cholesterol; avocados provide 0.5 g of saturated fat per oz." We invite comments that provide data on the trans fat content of raw fish (or cooked fish without the addition of any ingredients, e.g., fat, breading, or seasoning).

III. Identification of the 20 Most Frequently Consumed Raw Fruits, Vegetables, and Fish in the United States

A. Fruits and Vegetables

FDA is not proposing any changes in the list of the 20 most frequently consumed raw fruits and vegetables in § 101.44 because we are not aware of any new information suggesting that the listing be modified. Nevertheless, for ease of use and to be consistent with the food names in appendix C to part 101, we are proposing to revise § 101.44(a) and (b) by listing the items in alphabetical order and by using the plural form of the food name when the serving size is more than one unit. Thus, we are proposing to revise § 101.44(a) to read as follows: "The 20 most frequently consumed raw fruits are: Apple, avocado (California), banana, cantaloupe, grapefruit, grapes, honeydew melon, kiwifruit, lemon, lime, nectarine, orange, peach, pear, pineapple, plums, strawberries, sweet cherries, tangerine, and watermelon." We are proposing to revise § 101.44(b) to read as follows: "The 20 most frequently consumed raw vegetables are: Asparagus, bell pepper, broccoli, carrot, cauliflower, celery, cucumber, green (snap) beans, green cabbage, green onion, iceberg lettuce, leaf lettuce, mushrooms, onion, potato, radishes, summer squash, sweet corn, sweet potato, and tomato."

B. Fish

FDA is proposing to make three changes to the listing of the 20 most frequently consumed raw fish. In the previous voluntary nutrition labeling rules, we used information provided by the National Fisheries Institute (NFI) to identify the most frequently consumed species of fish in the United States (59 FR 36379 at 36384 and 61 FR 42742 at 42743). However, we have obtained more recent information from various industry and government sources indicating that mackerel is sold in the United States primarily as bait and catfood rather than as fresh fish for human consumption (Ref. 2). Furthermore, NFI has reported to us that the consumption of fresh tuna and tilapia in the United States has surpassed the consumption of mackerel and whiting (Refs. 3 and 4). Thus, we are proposing to remove mackerel and whiting from the listing of the 20 most frequently consumed raw fish and to add tuna and tilapia to the list.

Next, we are proposing to collapse the three subspecies of salmon into two subspecies based on similar nutrient profiles (Refs. 5 and 7). In current appendix D to part 101, salmon is divided into three subspecies: Atlantic/coho, chum/pink, and sockeye. This was due primarily to differences in total fat content (i.e., 6 to 7 grams (g) of fat in Atlantic and coho, 4 g of fat in chum and pink, and 9 g of fat in sockeye) (59 FR 36379 at 36383). For this proposed rule, however, we have used updated data from the U.S. Department of Agriculture (USDA), National Nutrient Data Bank (NNDB) (Ref. 6), which is described in section IV.A.2 of this document, and determined that the nutrient profiles for Atlantic, coho, and sockeye salmon are very similar. Specifically, the data show a total fat content of 10 g for Atlantic and sockeye salmon and 9 g for coho salmon. Therefore, we are proposing to combine Atlantic, coho, and sockeye into one subgroup of salmon. Because the data show that chum and pink salmon maintain similar nutrient profiles, we are proposing to keep chum/pink as a second subgroup of salmon.

We are proposing to revise § 101.44(c) based on the changes discussed above and by listing the fish in alphabetical order to read as follows: "The 20 most frequently consumed raw fish are: Blue crab, catfish, clams, cod, flounder/sole, haddock, halibut, lobster, ocean perch, orange roughy, oysters, pollock, rainbow trout, rockfish, salmon (Atlantic/coho/sockeye, chum/pink), scallops, shrimp, swordfish, tilapia, and tuna."

IV. Updating the Nutrition Labeling Values for the 20 Most Frequently Consumed Raw Fruits, Vegetables, and Fish

We are proposing to revise the nutrition labeling values for the 20 most frequently consumed raw fruits, vegetables, and fish (proposed appendices C and D to part 101) to reflect newer or additional data for these foods that have been submitted or made available to the agency. FDA has considered whether this updated nutrition labeling information, as proposed, could be used on an interim basis prior to completion of the rulemaking. Because the agency believes that the proposed nutrition labeling values would not be misleading, we do not object to firms using these values prior to issuance of a final rule, provided that the nutrition information is presented in a manner consistent with this proposal. However, firms should be aware that a final rule on this issue may differ from this proposed rule.

Reference 7 provides complete documentation of the derivation of each nutrition labeling value for the fruits, vegetables, and fish covered in this proposal. The following sections (IV.A through IV.C) explain the specific proposed updates.

A. FDA Analysis of the Data

FDA considered the data from all of the sources identified in sections IV.B and IV.C of this document and used these data as the basis for deriving the proposed nutrition labeling values. To the extent possible (i.e., for those nutrients where sufficient data were available), we used the statistical methodology recommended in the "FDA Nutrition Labeling Manual—A Guide for Developing and Using Data Bases" (Ref. 8) to produce the nutrition labeling values. The recommended statistical method uses compliance calculations that take into account the variation of nutrients in foods. The nutrient content of foods varies according to inherent, environmental, and processing factors, and some nutrients are more variable than others. The FDA compliance calculations are based on one-sided 95 percent prediction intervals. Thus, the resulting nutrient values are less likely than mean values to overestimate class II nutrients (naturally occurring vitamins, minerals, protein, total carbohydrate, dietary fiber, unsaturated fat, and potassium) (§ 101.9(g)(4)(ii)), or to underestimate third group nutrients (calories, sugars, total fat, saturated fat, cholesterol, and sodium) (§ 101.9(g)(5)). In other words, the calculated values provide with 95 percent probability that the levels of class II nutrients will be at least 80 percent of the label value and that the levels of third group nutrients will not be more than 120 percent of the label value, as required by the compliance criteria in § 101.9(g)(4)(ii) and (g)(5).

Nevertheless, we frequently found in our analyses of the data that the mean nutrient value and the value derived from compliance calculations rounded to the same nutrition labeling value. We also found, however, that when the sample size was small (e.g., three or fewer analytical data points), the values derived from compliance calculations sometimes resulted in a minimal amount or a complete absence of a nutrient in the food. In these cases, the mean value is more likely to represent the nutrient level. Thus, when it was more appropriate, we propose to use the mean nutrient value rather than the value derived by applying 95 percent prediction intervals, which is noted in the documentation (Ref. 7).

1. Nutrients Not Present in Particular Foods

No analytical data were available for some nutrients due to several well-known principles of food composition. As stated in the 1996 final rule (61 FR 42742 at 42756) and in the 1993 mandatory nutrition labeling final rules (58 FR 2079 at 2109, January 6, 1993), analysis is not needed for nutrients where reliable databases or scientific knowledge establish that a nutrient is not present in the product. Thus, for this proposal, as in the previous voluntary nutrition labeling rules (59 FR 36379 at 36383), we have assumed a zero value for the following nutrients: (1) Cholesterol in fruits and vegetables because cholesterol is found only in animal tissues, (2) saturated fat in all fruits and vegetables that have a zero total fat content because saturated fat is a component included in total fat, (3) dietary fiber in fish because dietary fiber is found only in plant materials, and (4) sugars in fish because sugars are not found (or are very low) in fish.

2. Data From USDA

When using USDA data to update the nutrition labeling values for this proposal, we obtained data directly from the NNDB, where possible (Ref. 6). The NNDB provides raw data that include a collection of statistical parameters representing either a single measurement or multiple measurements for nutrients in foods. USDA has compiled these data from various sources (e.g., government, academic, industry, and private laboratories). From these data, we can identify the number of samples, mean nutrient values, and estimates of variance that are necessary to complete compliance calculations in deriving the nutrition labeling values.

However, every food item in the NNDB does not always have a complete nutrient profile. When the NNDB did not have adequate data for nutrients needed for updating the nutrition labeling values, we used the values in the USDA Nutrient Database for Standard Reference (SR) (Ref. 9). The SR provides aggregated mean values for nutrients, which are primarily derived from data in the NNDB. For some foods, the SR presents a mean value for a nutrient, but the sample size is zero. In these cases, USDA has imputed the nutrient value from other sources, such as, from data for foods with a similar nutrient profile. For fish, when we were not able to obtain new or adequate data for a specific nutrient (e.g., vitamin A and vitamin C), either on the cooked or raw basis, we used the value from the SR for the appropriate cooked fish. The SR includes all the food composition data published in the 21 volumes of Agriculture Handbook No. 8 (USDA, 1976–1988) and its 4 supplements (USDA, 1990–1993). Since 1992, USDA has been publishing updated SR data electronically, which became accessible on the Internet for searching or downloading in 1996. However, the printed Agriculture Handbook No. 8 sections provide more extensive details on specific foods. For example, we have used information on the cooking procedure and yields of cooked fish contained in the 1991 supplement to Agriculture Handbook No. 8–15, "Composition of Foods: Finfish and Shellfish Products; Raw, Processed, Prepared" (Ref. 10), which is discussed in section IV.C.1 of this document.

3. Outlier Screening

For this proposed rule, we have completed outlier screening of the data using the Grubb's outlier screening method (Ref. 11). Outliers are unusually extreme data points in a distribution of data that are much lower or higher than the majority of the other data points. They are called "influential observations" because an outlier or outliers in a data set will skew the distribution of data so that the mean will be lower (with low outlier values) or higher (with high outlier values) than it would be for the majority of the data. In addition, the range (as a measure of distance) may give a very distorted picture of the variability of the data if outliers are included. Although some outlying observations may be legitimate values that are extreme, an outlier may be the result of imprecise measurement or an error in data entry. In developing our proposed nutrient values, we have taken a conservative approach to outliers and deleted those data points identified through outlier screening.

4. Calories, Calories From Fat, Sugars, and Total Carbohydrate

In developing our proposed nutrient values, we calculated calories and calories from fat based on the Atwater system for determining energy values for individual foods or food groups (i.e., specific factors) rather than using the general factors of 4, 4, and 9 calories per g for protein, total carbohydrate, and total fat, respectively. The Atwater energy factors are outlined in USDA Handbook No. 74, "Energy Value of Foods—Basis and Derivation" (Ref. 12). These specific factors take into account the physiological availability of energy for the basic food, and therefore, are more accurate. This is the method referred to in § 101.9(c)(1)(i)(A) for calculating the caloric content of foods. It is the same method used in the previous voluntary nutrition labeling rules (Ref. 5 to the 1996 final rule, 61 FR 42742) except that we are correcting a slight error in the food factors used for green onion and in the carbohydrate factor used for potato. The specific Atwater factors used for calculating calories and calories from fat for the fruits, vegetables, and fish in this proposal are as follows:

Food	Calories per gram		
	Protein	Carbohydrate	Fat
All fruits (except lemon, lime)	3.36	3.60	8.37
Lemon, lime	3.36	2.48	8.37
Mushroom	2.62	3.48	8.37
Potato, sweet potato	2.78	4.03	8.37
Carrot, onion, radish	2.78	3.84	8.37
Other vegetables	2.44	3.57	8.37
Finfish	4.27	NA	9.02
Shellfish	4.27	4.11	9.02

(Ref. 12)

VOL
67
ISS
54
MR
20
2002
UMI

After publication of the 1996 final rule, industry expressed to us that the calorie values for some of the fruits and vegetables appeared to be inconsistent with the label values for total fat, total carbohydrate, and protein. Upon review, we found slight errors in the sugars, total carbohydrate, calories, and calories from fat values in a few fruits and vegetables (as explained below) that are reflected in current appendix C to part 101.

First, we derived most of the sugars values for the fruits and vegetables in current appendix C to part 101 from the USDA Home Economics Research (HER) Report No. 48, "Sugar Content of Selected Foods: Individual and Total Sugars" (Ref. 13) because no other sugars data were available to us. While reviewing the values for this proposed update, we discovered an error in the total sugars value for cantaloupe, sweet cherries, tangerine, and celery in current appendix C to part 101. This error was due to an apparent miscalculation in converting the sugars per 100 g of product (as in HER Report No. 48) to the sugars per gram weight of the serving size for the product (as in current appendix C to part 101). Therefore, based on the corrected conversions, we are proposing to change the sugars value for cantaloupe from 11 g to 12 g, for sweet cherries from 19 g to 20 g, for tangerine from 12 g to 8 g, and for celery from 0 g to 1 g.

Second, after correcting the sugars value for cantaloupe and sweet cherries, we found that the sugars value was high compared with the total carbohydrate and dietary fiber values (i.e., the sugars value when added to dietary fiber exceeded total carbohydrate). Because sugars and dietary fiber are components of total carbohydrate, the value for total carbohydrate must be greater than or equal to the sum of the values for sugars and dietary fiber. The apparent discrepancies are because the values for total carbohydrate and dietary fiber were derived from different analytical samples than those used to derive the value for sugars. Therefore, we are proposing to adjust the total carbohydrate value for cantaloupe (from 12 g to 13 g) and sweet cherries (from 22 g to 23 g) to reflect the sum of the values for sugars and dietary fiber (Ref. 7). We consider this adjustment to be appropriate because the values for sugars and dietary fiber are determined by laboratory analysis, and therefore, are more accurate than the value for total carbohydrate, which is determined "by difference" (i.e., the weight remaining after subtracting the sum of the protein, fat, moisture, and ash from the total weight of the food (§ 101.9(c)(6))).

Third, the total carbohydrate value for tangerine, reflected in the current regulation, was based on the sum of the values for sugars (12 g) and dietary fiber (3 g), i.e., the total carbohydrate value was adjusted from 13 g (the original value, rounded) to 15 g (the sum of the values for sugars and dietary fiber) (Ref. 5 to the 1996 final rule, 61 FR 42742). However, because the sugars value for tangerine should have been 8 g (as explained previously in this section), the total carbohydrate value should not have been adjusted. Thus, we are proposing to change the total carbohydrate value for tangerine to the original value of 13 g (rounded) based on data submitted to the agency in 1992 by the Produce Marketing Association (Ref. 12 to the 1996 final rule, 61 FR 42742).

Fourth, we previously stated the following in the 1996 final rule:

> In order to have calories from fat consistent for a given total fat value, FDA derived calories from fat for fruits and vegetables from the rounded, rather than unrounded, total fat label value. The caloric equivalent for fat is 8.37 calories per g for fruits and vegetables. Thus, 0.5 g of fat is equivalent to 4.19 calories, and according to § 101.9(c)(1)(ii), "* * * amounts less than 5 calories may be expressed as zero." As a result, Appendix C consistently lists 0 calories for 0.5 g of total fat. (61 FR 42742 at 42750).

However, in our current review of the calorie values, we found that this action (i.e., calculating calories from the rounded total fat label value) conflicts with § 101.9(c)(1)(i), which states,

> * * * Where either specific or general food factors are used, the factors shall be applied to the actual amount (i.e., before rounding) of food components (e.g., fat, carbohydrate, protein, or ingredients with specific food factors) present per serving.

Therefore, in addition to calculating calories on the unrounded basis for the foods for which we obtained new data (as described in sections IV.B and C of this document), we recalculated calorie values for all the remaining foods covered by this proposal based on the unrounded values for total fat, total carbohydrate, and protein (Ref. 7). As a result of these recalculations, we are proposing changes to the calorie or calories from fat values for orange, strawberries, tangerine, watermelon, asparagus, green (snap) beans, and tomato as shown in table 1 in section IV.B.9 of this document.

Reference 7 contains the complete documentation of the nutrition labeling values for each of the fruits, vegetables, and fish covered in this proposal. The documentation includes the actual (unrounded) values for total fat, total carbohydrate, and protein used to calculate calories and calories from fat for each food. For some foods in proposed appendices C and D, the label value for total fat may be the same quantitative amount, yet the value for calories from fat may differ (e.g., for a total fat label value of 0.5 g, the value for calories from fat may be 0 or 5). The reason for the discrepancy, as explained above in this section, is that we calculated calories from fat based on the unrounded amount of total fat, as required by § 101.9(c)(1)(i), rather than on the rounded label value for total fat.

B. Proposed Updates to the Nutrition Labeling of Raw Fruits and Vegetables

1. Avocado

The nutrition labeling values for avocado provided in the current regulations are based on 1989-1990 data from the Produce Marketing Association and 1993–1994 data for potassium, protein, and vitamin C from the California Avocado Commission (CAC). In proposed appendix C to part 101, we have used new data on the composition of avocados that the CAC compiled from 1993 to 1997 and submitted to the agency. These data are the most current available to the agency and the sampling design is the same for each of the 5 years, whereas it differs in the other data collections. Thus, we are proposing to update the nutrition labeling values for avocado by using the 1993–1997 CAC data, which we have subjected to FDA compliance calculations based on 95 percent prediction intervals (Ref. 1). Table 1 of this document shows the proposed changes in the nutrient values for avocado compared with those in the current regulations.

2. Grapefruit

In the 1994 proposed rule, we declared the serving size for grapefruit as "1/2 medium (154 g/ 5.5 oz)" (59 FR 36379 at 36391). We adopted the same serving size in the 1996 final rule; however, the oz equivalent was incorrectly printed as 5.3 oz (61 FR 42742 at 42761). Also, current appendix C to part 101 contains this misprint. Thus, we are proposing to correct this error and declare the serving size for grapefruit as "1/2 medium (154 g/5.5 oz)."

3. Grapes

The nutrition labeling values for grapes that we originally provided in the 1991 final rule were based on data from the NNDB for "American-type" grapes. However, after publication of the 1991 final rule, USDA informed us that the grapes described as "American-type" include varieties, such as concord, that are not generally consumed without processing and that the grapes described as "European-type" are the most common types of raw grapes consumed in the United States (59 FR 36379 at 36381). USDA stated further that it would be more appropriate for FDA to use data for "European-type" grapes as the type most frequently consumed. Therefore, in the 1996 final rule, we derived the nutrition labeling values based on data in the NNDB for "European-type" grapes, which we had subjected to FDA compliance calculations based on 95 percent prediction intervals.

Then in 1998, industry raised questions about the published serving size for raw grapes (i.e., 1 1/2 cups (138 g/4.9 oz)) and the corresponding nutrient values. Industry noted that a 138 g serving size for European grapes would fall between 3/4 cup and 1 cup, rather than equate to 1 1/2 cups. When FDA investigated these inquiries, we found that the nutrient data for European grapes were correctly used to calculate the nutrition labeling values, but we had inadvertently used the weight for American grapes to derive the serving size. According to the SR, the density of European grapes is 160 g per cup and the density of American grapes is 92 g per cup (Ref. 9). Based on these densities, the 1 1/2 cup-serving size is equivalent to 240 g for European grapes and 138 g for American grapes. Thus, the current regulatory serving size, which is supposed to reflect the weight of European grapes, is incorrect.

In proposed appendix C to part 101, we have used 1998 data on the composition of grapes that Fleishman-Hilliard, Inc., submitted to the agency on behalf of the California Table Grape Commission (CTGC) (Ref.14). Because the CTGC submission provides newer data, the serving size that we are proposing for grapes is based on the average g weight of the 12 samples in this submission (i.e., 168.2 g per cup), rather than on the density of 160 g per cup provided in the SR. Following the principles in § 101.9(b)(2)(iii) regarding bulk products, the serving size must be the amount in a household measure that most closely approximates the reference amount for the appropriate product category in § 101.12(b). Grapes fit in the product category "All other fruits (except those listed as separate categories), fresh, canned, or frozen" with a reference amount of 140 g. Based on the data for the 12 samples, the average weight of 1 cup is 168.2 g and the average weight of 3/4 cup is 126.15 g (Ref. 14). Because 126.15 g (3/4 cup) is closer than 168.2 g (1 cup) to the 140-g reference amount, we are proposing a new serving size of 3/4 cup (126 g/4.5 oz) for grapes. We have subjected the CTGC data to FDA compliance calculations based on 95 percent prediction intervals and used these data in deriving the proposed nutrition labeling values (Ref. 14). Table 1 of this document shows the proposed changes to the serving size and nutrient values for grapes compared with those in the current regulations.

4. Nectarine, Peach, and Plums

In the 1996 final rule, we derived the nutrition labeling values for nectarine, peach, and plums from data in the NNDB, which we had subjected to FDA compliance calculations based on 95 percent prediction intervals. In proposed appendix C to part 101, we have used 1998 data on the composition of nectarines, peaches, and plums that Fleishman-Hilliard, Inc., submitted to the agency on behalf of the California Tree Fruit Agreement (CTFA). The CTFA data were comprised of three composite samples for peaches, three composite samples for plums, and four composite samples for nectarines. However, each of the composite samples represents between 2 and 14 different varieties and a different share of the market for that particular fruit. Due to the small number of composite samples, the varying number of varieties in each composite sample, and the differences in how the samples represent the market, we chose to analyze the data for each of the three types of fruit by weighting the samples according to their market share and to use the resulting mean nutrient values (Ref. 15).

CTFA also provided information on the edible portion weights of peaches and plums that represent the majority of the market (Ref. 16). Based on this information, we are proposing to change the serving size for peach from "1 medium (98 g/3.5 oz)" to "1 medium (147 g/5.3 oz)" and for plums from "2 medium (132 g/4.7 oz)" to "2 medium (151 g/5.4 oz)." We are not proposing any change to the serving size for nectarine (i.e., "1 medium (140 g/5.0 oz)") because the CTFA data supported the current serving size.

Table 1 of this document shows the proposed changes in the nutrient values for these fruits and the proposed changes to the serving size for peach and plums compared with those in the current regulations.

5. Sweet Cherries

The nutrition labeling values for sweet cherries provided in the current regulations are based on 1990 data from PMA. In proposed appendix C to part 101, we have used 1996 data on the fat composition of raw sweet cherries that Technical Assessment Systems, Inc. (TAS), submitted to the agency on behalf of the California Cherry Advisory Board. Based on these newer data, which included 12 analytical samples that measured the total fat content of sweet cherries, TAS requested that the nutrition labeling value for total fat be changed from 0.5 g to 0 g. We reviewed the TAS data, confirmed that the suggested label value was derived correctly by using compliance calculations based on 95 percent prediction intervals, and used the TAS data in determining the proposed label value of 0 g for total fat (Ref. 17). We also propose to revise the total carbohydrate and sugars values as explained in section IV.A.4 of this document. Table 1 shows the proposed changes to the nutrient values for sweet cherries compared with those in the current regulations.

6. Carrot

In current appendix C to part 101, the serving size for carrot is declared as "7" long, 1 1/4" diameter (78 g/2.8 oz)." To be consistent with § 101.9(b)(2)(i) for products in discrete units and consistent with § 101.9(b)(5)(iv) in describing the individual unit, we are proposing to include "1 carrot" as part of the serving size statement, i.e., "1 carrot, 7" long, 1 1/4" diameter (78 g/2.8 oz)."

7. Green Onion, Sweet Corn, and Sweet Potato

In the 1996 final rule, we derived the nutrition labeling values for raw green onion, sweet corn, and sweet potato by using the NNDB data available at that time. In proposed appendix C to part 101, we have used updated nutrient data from the NNDB for these raw vegetables to derive the proposed nutrition labeling values using compliance calculations based on 95 percent prediction intervals (Ref. 18). Table 1 of this document shows the proposed changes in the nutrient values for green onion, sweet corn, and sweet potato compared with those in the current regulations.

We also are proposing a correction to the serving size for sweet potato. In current appendix C to part 101, the serving size for sweet potato is declared as "medium, 5" long, 2" diameter (130 g/4.6 oz)." Consistent with § 101.9(b)(2)(i) for products in discrete units, we are proposing to include the number of units in the serving size statement for sweet potato (i.e., "1 medium, 5" long, 2" diameter (130 g/4.6 oz).")

8. Potato

The nutrition labeling values for potato that we provided in the 1996 final rule were based on 1983-1984 data from PMA. In proposed appendix C to part 101, we have used 2000 market basket data on the composition of potatoes that Ketchum submitted to the agency on behalf of the National Potato Promotion Board (NPPB). The NPPB nutrient data were comprised of three composite samples for each variety of red, russet, and white potatoes. However, according to the NPPB, each of these potato varieties represents a different proportion of the market (i.e., 12 percent for red, 70 percent for russet, and 18 percent for white (Ref. 19). Thus, NPPB requested and we agreed that the data should be weighted by the market share in deriving the nutrient values. After weighting the data, we subjected the values to FDA compliance calculations based on 95 percent prediction intervals to determine the proposed nutrition labeling values (Ref. 19). Table 1 of the document shows the proposed changes in the nutrient values for potato compared with those in the current regulations.

9. Summary of Proposed Changes for Fruits and Vegetables

Table 1 of this document shows a summary of the proposed changes to the nutrition labeling values for 19 raw fruits and vegetables and to the serving size for grapefruit, grapes, peach, plums, carrot, and sweet potato, as compared with those in the current regulations. We are not proposing any changes to the other values in current appendix C to part 101.

C. Proposed Updates to the Nutrition Labeling of Raw Fish

For this proposal, we obtained new data for cooked Atlantic salmon and rainbow trout and for the following raw fish: Catfish (only on fat content), flounder/sole, orange roughy, coho and sockeye salmon, shrimp, swordfish, tilapia, and tuna. We also obtained new information on the cooking yield for mollusks, discovered a slight error in the raw weight used to calculate the nutrient values for finfish and crustaceans, and obtained new data on nutrient retention factors (described below). Therefore, in addition to updating the nutrient values based on new data, we reanalyzed the data for the remaining fish, when we used data for raw fish, and adjusted the nutrient values accordingly (Ref. 7).

1. Corrections for Cooking

a. Cooking yield for raw fish. The nutrition labeling values for fish provided in current appendix D to part 101 are based on the cooked edible portion (i.e., 84 g/3 oz) in accordance with § 101.45(a)(2). However, most of the nutrient data used to derive the nutrient values were available only for raw fish. When using data for raw fish, we first had to determine the raw fish weight that would yield 84 g (3 oz) of cooked fish. This adjusted raw fish weight would provide the basis upon which to derive the nutrient values. We calculated the raw weight by dividing the cooked weight (3 oz) by the appropriate cooking yield (i.e., a 75 percent cooking yield for finfish (based on dry heat cooking) and crustaceans (based on moist heat cooking) and a 60 percent cooking yield for mollusks (based on dry heat cooking)) (Refs. 10 and 20).

Therefore, we used data for 4 oz of raw finfish and crustaceans (3 oz ÷ 0.75) and 5 oz of raw mollusks (3 oz ÷ 0.60) to derive the nutrient values for 3 oz of cooked fish (59 FR 36379 at 36382 and 36383).

Since publication of the 1996 final rule, NFI has informed us that oysters are cooked predominately by dry heat while clams and scallops are cooked predominantly by moist heat (Ref. 21). Therefore, based on the cooking procedure and yields of cooked fish provided in Agriculture Handbook No. 8–15 (Ref. 10) for mollusks, we used a 50 percent cooking yield for clams and scallops (moist heat cooking) to determine the correct raw weights on which to base the nutrient data for this proposed rule. We continued to use a 60 percent cooking yield for oysters (dry heat cooking).

We also discovered in the previous data analyses for finfish and crustaceans that instead of using the precise raw weight of 112 g (84 g cooked weight ÷ 0.75 cooking yield) to calculate the nutrient values, we used an approximate raw weight of 110 g. We have corrected this error in proposed appendix D to part 101. Thus, when we used nutrient data for raw fish, we used 4 oz (112 g) of raw finfish and raw crustaceans (blue crab and shrimp), 5 oz (140 g) of raw oysters, and 6 oz (168 g) of raw clams and scallops to obtain nutrition labeling values for 3 oz (84 g) of cooked fish (Refs. 5 and 7).

b. *Nutrient retention factors.* In 1998, USDA issued an updated table of nutrient retention factors that is a major source of nutrient retention data for U.S. food composition databases (Ref. 22). The nutrient retention factors for the type of fish and corresponding cooking procedure are as follows:

Cooking Procedure/ Type of Fish	Nutrient Retention Factors			
	Potassium	Vitamin A	Vitamin C	Iron
Dry Heat:				
Finfish:				
Less than 5% fat	100%	90%	80%	100%
More than 5% fat	100%	85%	80%	100%
Shellfish:				
Oysters	100%	95%	85%	100%
Moist Heat:				
Shellfish (except oysters)	90%	90%	80%	90%

The NNDB and SR provide data for both cooked and raw varieties of fish, but for most varieties, vitamins A and C have very little data (0 to 3 analytical samples). Rather than apply nutrient retention factors to such small samples of data for raw fish, we have used vitamin A and vitamin C values from the SR, adjusted to the appropriate serving size, for cooked finfish (except catfish and tilapia) and cooked shellfish (except scallops) in proposed appendix D to part 101. Because we are using the vitamin A and vitamin C values for these cooked fish, the nutrient retention factors do not need to be applied. For catfish, application of the nutrient retention factors to vitamins A and C does not change the current value of 0 percent DV. For tilapia, we used data obtained from industry on the raw fish and applied the appropriate nutrient retention factors (Ref. 23). The only SR data that were available for cooked scallops were for breaded and fried, a cooking method that greatly affects the nutrient profile of the fish. Thus, we used data for raw scallops and applied the appropriate nutrient retention factors for potassium, vitamin A, vitamin C, and iron. For blue crab, clams, and shrimp, we used data for the raw fish and applied the appropriate nutrient retention factors for potassium and iron.

2. Catfish

In proposed appendix D to part 101, we have used 1997 data on the fat composition of raw farm-raised catfish that ABC Research Corp. submitted to the agency on behalf of NFI. The nutrition labeling values that we provided for farm-raised catfish in the 1996 final rule were based on values derived from information published in "Nutrients and Chemical Residues in One-to-Two Pound Mississippi Farm-Raised Channel Catfish," by Joyce Nettleton et al. (61 FR 42742 at 42753). For this proposal, we reviewed the newer NFI data consisting of 30 analytical samples that measured the total fat content of farm-raised catfish. We completed compliance calculations based on 95 percent prediction intervals and used these data in determining the proposed label value of 6 g for total fat (Ref. 24). We also have recalculated the values for calories (130) and calories from fat (60) based on the newer data for total fat. Table 2 of this document shows the proposed changes in the nutrient values for catfish compared with those in the current regulations.

3. Flounder/Sole, Rainbow Trout, Orange Roughy, Oysters, Salmon (Atlantic/Coho/Sockeye), Shrimp, and Swordfish

In proposed appendix D to part 101, we have used updated nutrient data from the NNDB for the following fish: Flounder/sole (raw); rainbow trout (cooked, dry heat, farmed); orange roughy (raw); oysters (raw); Atlantic salmon (cooked, farmed); coho salmon (raw, farmed); sockeye salmon (raw); shrimp (raw); and swordfish (raw). We subjected the data to FDA compliance calculations using 95 percent prediction intervals and used these data in deriving the proposed nutrition labeling values for these fish (Ref. 5).

4. Tilapia

In proposed appendix D to part 101, we have used 1999 data on the nutrient composition of raw tilapia that Southern Testing & Research Laboratories, Inc., submitted to the agency on behalf of the American Tilapia Association. The results of analytical testing done by Southern Testing & Research Laboratories, Inc., provided all the required nutrients but not potassium, which may be declared voluntarily. We completed compliance calculations based on 95 percent prediction intervals and determined that the mean values better represent the nutrient levels because of the small number of samples (n=3) analyzed (Ref. 23). To be consistent with our decision to include the optional nutrient, potassium, we have used data published in the journal article entitled "Comparison of Processing Yield and Nutrient Composition of Cultured Nile Tilapia (Oreochromis niloticus) and Channel Catfish (Ictalurus punctatus)" by Clement and Lovell to derive the potassium content of tilapia (Ref. 25).

5. Tuna

In proposed appendix D to part 101, we have used data from the NNDB and SR (Refs. 6 and 9) for yellowfin tuna. We selected yellowfin because the Tuna Research Foundation informed us that the species of tuna most commonly eaten fresh is yellowfin (Ref. 26). We subjected the data to FDA compliance calculations using 95 percent prediction intervals and used these data in deriving the proposed nutrition labeling values for tuna (Ref. 5).

6. Summary of Proposed Changes for Fish

Table 2 of this document shows the proposed changes in the nutrition labeling values for fish compared with those in the current regulations. As explained in section III.B of this document, the proposed changes include removal of mackerel and whiting and the addition of tilapia and tuna.

V. Environmental Impact

We have determined under 21 CFR 25.30(k) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VI. Preliminary Regulatory Impact Analysis

FDA has examined the economic implications of these proposed guidelines as required by Executive Order 12866. Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). Executive Order 12866 classifies a rule as significant if it meets any one of a number of specified conditions, including: Having an annual effect on the economy of $100 million, adversely affecting a sector of the economy in a material way, adversely affecting competition, or adversely affecting jobs. A regulation also is considered a significant regulatory action if it raises novel legal or policy issues. FDA has determined that these proposed guidelines are not a significant regulatory action as defined by Executive Order 12866.

Title II of the Unfunded Mandates Reform Act of 1995 (Public Law 104–4) requires cost-benefit and other analyses before any rulemaking if the rule would include a "Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year." The current inflation-adjusted statutory threshold is $115 million. FDA has determined that this proposed rule containing nutrition labeling guidelines does not constitute a significant rule under the Unfunded Mandates Reform Act.

A. Costs of These Guidelines

The costs of a labeling regulation are the incremental administrative, analytical, redesign, and label inventory disposal costs associated with the regulatory action. Because FDA is providing nutrition values that retailers must use, we expect no analytical or other information costs. The typical sign, the most common means of labeling raw products, has an expected useful life of 6 months. This is well within the compliance period, so we also expect little to no inventory disposal costs.

Administrative and redesign costs depend on retail store behavior. The 1996 final rule had a 1-year compliance period. These guidelines propose compliance at the next applicable uniform compliance date (UCD), which is no sooner than 1 year after the final rule is published in the **Federal Register**. The redesign cost due to this proposed guidance depends crucially on the length of the compliance period: FDA assumes that, all other things equal, the longer the compliance period the lower the cost of implementing the proposed guidelines. Retail stores periodically redesign signs and displays. FDA has information that a normal redesign cycle of a product label is 2 years. This cycle may not apply to retail level signs, but it provides a basis on which to estimate the lifecycle of a display. We assume that some of the retail stores would have redesigned their displays before the effective date of compliance, lowering the redesign cost attributed to these proposed guidelines. FDA invites comments on the normal length of redesign time and cost associated with retail level signs or posters.

The most likely timeline of these guidelines is that they will be published during 2002. Therefore, the effective compliance date of these guidelines would be the next UCD of January 1, 2004, or between 1 and 2 years after the publication of the final guidelines. FDA will modify this analysis if the actual publication date differs from the one described here.

If the final compliance period is 18 months and companies redesign normal labels every 2 years, then 75 percent of companies could be expected to normally redesign their labels during the compliance period. FDA assumes that an informational display will be redesigned with less frequency than a product label since it has a smaller potential impact on the profitability of the food product. We assume a median display redesign cycle of 3 years, which implies that 50 percent of retailers would have redesigned their store displays between their publication and when the new guidelines take effect. A normal redesign still will incur cost associated with verifying that the design conforms to the new guidelines. FDA estimates an average cost of a complete redesign of $100 per store, and estimates that the partial redesign cost allocated to changing the values on the informational signs will be $50 per store, allocated evenly among the years 2002 and 2003.

Approximately 83,000 grocery stores fall under these compliance guidelines. This estimate is based on a Dunn and Bradstreet database search, where the total of 197,000 grocery stores was decreased by the 110,000 stores exempted by Congress since they have annual sales of less than $500,000. Seven thousand six hundred of the remaining stores did not have sales data available. Since 42 percent of the stores that have sales data had sales over $500,000, we assign 42 percent of the stores without sales data to the population subject to compliance. According to the last (1996) compliance survey, approximately 72 percent of stores (73.0 percent for raw fruits and vegetables and 71.2 percent for raw fish) adequately displayed acceptable signs. Although slightly down from the previous (1994) survey, compliance is still well over the 60 percent threshold that would trigger a mandatory rule proposal. FDA assumes that 72 percent or 59,923 stores—the same percentage as the most recent compliance survey—will continue to choose to follow the guidelines.

Table 3 of this document presents the total cost estimates based on the number of stores and the effect of the compliance date. The present value (as of January 2002) cost of complying with the guidelines (the sum of the values in row e in table 3) would be $4,066,000. Firms incur this cost every 4 years (if the nutrient values are revised). If the rate of increase in the cost of redesigning a sign is equal to the 7 percent discount rate used in this analysis, then the present value cost of each redesign would be the same. Because of the uncertainty in nutrition science, the effect of the UCD, the percent of stores following the guidelines, and the rate of cost increase, FDA does not estimate the cost of future guideline updates.

TABLE 3.—COMPLIANCE SCHEDULE AND COST

(a) Adoption Year	2002	2003	2004
(b) Number of Stores	14,980	14,980	29,962
(c) Cost ($) per Store	$50	$50	$100
(d) Total Cost ($) [b x c]	$749,025	$749,025	$2,996,200
(e) Present (Year 2002) Value, 7% discount rate	$749,025	$700,023	$2,616,997

B. Benefits of These Guidelines

In the Regulatory Impact Analysis (RIA) of the Proposed Rules to Amend the Food Labeling Regulations (56 FR 60856, November 27, 1991), FDA stated that the benefit of labeling of raw fruits, vegetables, and fish is a change in purchase behavior that would happen if the information presented was new to some consumers and was important to their consumption decisions. Since a majority of retail stores have displayed this type of information for several years, any incremental change from a single update of the list of foods affected or nutritional values is likely to be small and unmeasurable.

However, these guidelines as amended in the proposed rule would be voluntary; grocery stores would probably not choose to display signs with the updated nutrition information if they felt the information would have no impact. In addition, informational signs must be truthful, and without periodic updates the incremental errors that would build up might eventually erode the ability of these signs to help consumers choose products. This guidance is designed not to create an effective label, but to preserve the effectiveness of existing nutrition labels.

Truthful signs and placards can have an impact on consumer behavior. One of the studies used to estimate the impact of product information on consumer choice for the 1991 RIA was the Special Diet Alert study, or SDA. The SDA is relevant to this analysis because the mode of disseminating truthful and accurate nutrition information in the study, based in retail grocery stores in Baltimore and Washington, DC, was a store display similar to the ones recommended in these guidelines. According to SDA, the presence of a sign displaying nutrition information caused a modest switch by consumers to products with relatively large positive attributes (vitamins and minerals) and a modest switch away from products with relatively large negative attributes (fat and cholesterol). If these guidelines are not periodically revised in light of the best available nutrient data, FDA believes the modest beneficial effect they have on consumer behavior may steadily diminish.

VII. Initial Regulatory Flexibility Analysis

FDA has examined the economic implications of these proposed guidelines as required by the Regulatory Flexibility Act (5 U.S.C. 601–612). If a rule has a significant economic impact on a substantial number of small entities, the Regulatory Flexibility Act requires agencies to analyze regulatory options that would lessen the economic effect of the rule on small entities. FDA finds that these proposed guidelines would not have a significant economic impact on a substantial number of small entities.

The Small Business Administration (SBA) defines a grocery store as small if its annual sales are under $20 million. In the Dunn and Bradstreet search of grocery stores, 98 percent of stores with sales data available meet this definition. Not all stores must follow the guidelines: Stores with sales of $500,000 or less are exempt. Very small non-exempt stores (those of annual sales between $500,000 and $2,000,000) are not in compliance as a group in any of the compliance surveys. However, the percentage of very small non-exempt stores in compliance jumped over 5 percent for fruits and vegetables and just over 1 percent for fish in the latest (1996) survey.

Table 4 of this document presents the store-count percentage levels for stores of varying size. The 1996 compliance survey was not designed to discriminate between stores with sales over $20 million annually and stores with sales between $2 million and $20 million. However, the percentages in the second row are probably very good estimates for the compliance rate of stores considered small by the SBA standard, since so few stores have annual sales over $20 million.

The cost per store in the final column of table 4 of this document takes into account the percent compliance in each category and the varying date of compliance. For all categories, the average cost for a store that complies with the guidelines is $67.85, which is

VOL
67
ISS
54
MR
20
2002
UMI

the present value weighted average of the three different possible time periods and the either $50 or $100 in compliance costs. The average of the two compliance rates is 49.6 percent for stores in the smallest category (table 4, row 1), so the average cost per store for this group is $33.65 (.496 x 67.85). The equivalent average cost per store for table 4, row 2 is $51.70 (.762 x 67.85).

TABLE 4.—COMPLIANCE PERCENTAGES BY STORE SIZE AND COST PER STORE

Annual Sales ($)	Fruit and Vegetable Percent	Raw Fish Percent	Cost per Store
$500,000–$2 million	48.6%	50.5%	$33.65
Greater than $2 million	78.5%	73.9%	$51.70

In addition, the maximum cost for any one firm is $87.34, which is $100 discounted back 2 years at 7 percent for stores which wait until the latest possible date to comply with the guidelines. The smallest firm that could incur this cost is a single location store with sales of $500,000.01. The maximum cost per firm of this guidance is therefore, at most, 0.017 percent of annual revenue.

Both the per store averages and the maximum possible cost of the guidance for a single firm are very small, and will not impose a significant cost on even the smallest non-exempt grocery stores. FDA, therefore, certifies that these guidelines would not have a significant impact on a substantial number of small entities.

VIII. Paperwork Reduction Act of 1995

FDA tentatively concludes that the labeling requirements proposed in this document are not subject to review by the Office of Management and Budget because they do not constitute a "collection of information" under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). Rather, the proposed nutrition labeling would be a "public disclosure of information originally supplied by the Federal government to the recipient for the purpose of disclosure to the public" (5 CFR 1320.3(c)(2)).

IX. Effective Date

FDA periodically establishes, by final rule in the **Federal Register**, uniform effective dates for compliance with food labeling regulations (see, e.g., the **Federal Register** of December 23, 1998 (63 FR 71015)). We are proposing that any final rule that may issue based on this proposal become effective in accordance with the uniform effective date for compliance with food labeling requirements, which is not sooner than 1 year following publication of the final rule. However, FDA will not object to voluntary compliance immediately upon publication of the final rule.

X. Comments

Interested persons may submit to the Dockets Management Branch (address above) written comments regarding this proposal by June 3, 2002. Two copies of any comments are to be submitted, except that individuals may submit one copy. Submit electronic comments to http://www.fda.gov/dockets/ecomments. Identify all comments with the docket number found in brackets in the heading of this document. You may review public dockets containing comments to this proposal in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

XI. References

List of Subjects in 21 CFR Part 101

Food labeling, Nutrition, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under the authority delegated to the Commissioner of Food and Drugs, FDA proposes to amend 21 CFR part 101 as follows:

PART 101—FOOD LABELING

1. The authority citation for 21 CFR part 101 continues to read as follows:

Authority: 15 U.S.C. 1453, 1454, 1455; 21 U.S.C. 321, 331, 342, 343, 348, 371; 42 U.S.C. 243, 264, 271.

2. Section 101.44 is revised to read as follows:

§ 101.44 What are the 20 most frequently consumed raw fruits, vegetables, and fish in the United States?

(a) The 20 most frequently consumed raw fruits are: Apple, avocado (California), banana, cantaloupe, grapefruit, grapes, honeydew melon, kiwifruit, lemon, lime, nectarine, orange, peach, pear, pineapple, plums, strawberries, sweet cherries, tangerine, and watermelon.

(b) The 20 most frequently consumed raw vegetables are: Asparagus, bell pepper, broccoli, carrot, cauliflower, celery, cucumber, green (snap) beans, green cabbage, green onion, iceberg lettuce, leaf lettuce, mushrooms, onion, potato, radishes, summer squash, sweet corn, sweet potato, and tomato.

(c) The 20 most frequently consumed raw fish are: Blue crab, catfish, clams, cod, flounder/sole, haddock, halibut, lobster, ocean perch, orange roughy, oysters, pollock, rainbow trout, rockfish, salmon (Atlantic/coho/sockeye, chum/pink), scallops, shrimp, swordfish, tilapia, and tuna.

3. Amend § 101.45 by revising the section heading and paragraph (a)(3)(iii) and by adding paragraph (a)(3)(iv) to read as follows:

§ 101.45 What are the guidelines for the voluntary nutrition labeling of raw fruits, vegetables, and fish?

(a) * * *

(3) * * *

(iii) When retailers provide nutrition labeling information for more than one raw fruit or vegetable on signs or posters or in brochures, notebooks, or leaflets, the listings for saturated fat and cholesterol may be omitted from the charts or individual nutrition labels if a footnote states that most fruits and vegetables provide negligible amounts of these nutrients, but that avocados contain 0.5 gram (g) of fat per ounce (e.g., "Most fruits and vegetables provide negligible amounts of saturated fat and cholesterol; avocados provide 0.5 g of saturated fat per ounce"). The footnote also may contain information about the polyunsaturated and monounsaturated fat content of avocados.

(iv) When retailers provide nutrition labeling information for more than one raw fish on signs or posters or in brochures, notebooks, or leaflets, the listings for dietary fiber and sugars may be omitted from the charts or individual nutrition labels if the following footnote is used, "Fish provide negligible amounts of dietary fiber and sugars."

* * * * *

4. Appendixes C and D to part 101 are revised to read as follows:

* * * * *

BILLING CODE 4160–01–C

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 179

Development of a Munitions Response Site Prioritization Protocol

AGENCY: Office of the Deputy Under Secretary of Defense (Installations & Environment), DoD.

ACTION: Advanced notice of proposed rulemaking.

SUMMARY: In response to Section 311 of the Fiscal Year 2002 National Defense Authorization Act, the Office of the Deputy Under Secretary of Defense (Installations & Environment), U.S. Department of Defense (DoD), announces its intention to develop a proposed site prioritization protocol for assigning to each defense site (hereinafter, munitions response site) a relative priority for response activities related to unexploded ordnance, discarded military munitions, and munitions constituents. Section 311 lists specific factors to be included in the protocol. DoD is requesting input from interested parties on: These factors; any additional factors to consider in developing a site prioritization protocol; how the proposed protocol should incorporate such factors as they relate to safety and environmental hazards; and recommendations on any existing prioritization methods, models, or tools that should be evaluated. DoD will also request comments on the proposed site prioritization protocol when it is available for review later this year.

DATES: Suggestions are requested through May 20, 2002.

ADDRESSES: Written suggestions on factors to consider in the development of the site prioritization protocol should be sent to: United States Department of Defense, Office of the Deputy Under Secretary of Defense (I&E)/CL, ATTN: Proposed Site Prioritization Protocol, 3400 Defense Pentagon, Room 3C765, Washington, DC 20301–3400.

This address must be used when submitting input by U.S. Postal Service Express Mail. Input will also be accepted via electronic e-mail at *https://www.denix.osd.mil/MMRP.*

FOR FURTHER INFORMATION CONTACT: Patricia Ferrebe, 703–695–6107.

Information regarding the schedule for developing the proposed site prioritization protocol, along with relevant background information, is available on the DENIX web site at *https://www.denix.osd.mil./MMRP.*

SUPPLEMENTARY INFORMATION: Section 311 of the Fiscal Year 2002 National Defense Authorization Act requires the DoD to develop, in consultation with representatives of the States and Indian Tribes, a proposed and final protocol for assigning to each defense site (munitions response site) a relative priority for response activities based on the overall conditions at each site. Section 311 provides for public notice and comment on the proposed protocol; requires that the proposed protocol be available for public comment on or before November 30, 2002; and directs DoD to issue a final protocol to be applied to defense sites listed in the Department's munitions response site inventory. As an initial step in developing the protocol, DoD seeks public input early in the development process prior to the public's opportunity to review and comment on the proposed protocol in November. DoD will also seek input from State, Tribal, EPA, and Federal Land Managers. DoD will consider this input during development of the proposed protocol.

Based on the requirements above, DoD intends to accomplish the following overall objectives with respect to development of a site prioritization protocol for munitions response sites:

- Prepare, in consultation with the States, and Indian Tribes, a proposed and final protocol per the requirements in Section 311 of the Fiscal Year 2002 National Defense Authorization Act.
- Publish the proposed protocol and provide a formal 60-day public comment period.
- Apply the final protocol to munitions response sites listed on its inventory.

Section 311 lists specific factors that may be considered when assigning a relative priority to munitions response sites. These factors may include:

- Whether there are known, versus suspected, unexploded ordnance, discarded military munitions, or munitions constituents on all or any portion of the defense site and the types of unexploded ordnance, discarded military munitions, or munitions constituents preset or suspected to be present.
- Whether public access to the defense site is controlled, and the effectiveness of these controls.
- The potential for direct human contact with exploded ordnance, discarded military munitions, or munitions constituents at the defense site and evidence of people entering the site.
- Whether a response action has been or is being undertaken at the defense site under the Formerly Used Defense Sites program or other program.
- The planned or mandated dates for transfer of the defense site from military control.
- The extent of any documented incidents involving unexploded ordnance, discarded military munitions, or munitions constituents at or from the defense site, including incidents involving explosions, discoveries, injuries, reports, and investigations.
- The potential for drinking water contamination or the release for munitions constituents into the air.
- The potential for destruction of sensitive echo systems and damage to natural resources. To better understand public concerns with regard to munitions response sites, DoD is soliciting early public input on:
- Additional factors to be considered.
- Existing prioritization methods.
- Other comments for developing the prioritization protocol.

Background

To ensure their readiness to protect and defend our nation, our Military forces conduct live-fire training and testing with weapon systems at ranges throughout the United States. As a result, some properties that DoD has historically used to meet its live-fire training and testing requirements have been found or are suspected to contain unexploded ordnance, discarded military munitions, or munitions constituents. This is the situation on many properties where DoD no longer plans to use military munitions.

DoD's challenge on these munitions response sites is to: (1) Protect human health and the environment; (2) identify where and how much of this material is present at munitions response sites; (3) set priorities for conducting response actions at these sites; and (4) conduct necessary response actions for these sites. To address these and other challenges, DoD is developing a comprehensive program to address munitions—response sites.

Relevant Definitions

Section 311 defines key term that delineate DoD's program to address munitions response sites. These terms are:

"Defense site" applies to locations that are or were owned by, leased to, or otherwise possessed or used by the Department of Defense. The term does

VOL
67
ISS
54
MR
20
2002
UMI

not include any operational range, operating storage or manufacturing facility, or facility that is used for or was permitted for the treatment or disposal of military munitions.

"Discarded military munitions" includes military munitions that have been abandoned without proper disposal or removed from storage in a military magazine or other storage area for the purpose of disposal. The term does not include unexploded ordnance, military munitions that are being held for future use or planned disposal, or military munitions that have been properly disposed of, consistent with applicable environmental laws and regulations.

"Military munitions" consists of all ammunition products and components produced for or used by the armed forces for national defense and security, including ammunition products or components under the control of Department of Defense, the Coast Guard, the Department of Energy, and the National Guard. The term includes confined gaseous, liquid, and solid propellants, explosives, pyrotechnics, chemical and riot control agents, smokes, and incendiaries, including bulk explosive and chemical warfare agents, chemical munitions, rockets, guided and ballistic missiles, bombs, warheads, mortar rounds, artillery ammunition, small arms ammunition, grenades, mines, torpedoes, depth charges, cluster munitions and dispensers, demolition charges, and devices and components thereof. The term does not include wholly inert items, improvised explosive devices, and nuclear weapons, nuclear devices, and nuclear components, except that the term does include nonnuclear components of nuclear devices that are managed under the nuclear weapons program of the Department of Energy after all required sanitization operations under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) have been completed.

"Munitions constituents" means any materials originating from unexploded ordnance, discarded military munitions, or other military munitions, including explosive and nonexplosive materials, and emission, degradation, or breakdown elements of such ordnance or munitions.

"Munitions response sites" means defense sites that contain unexploded ordnance, discarded military munitions, and munitions constituents.

"Unexploded ordnance" includes military munitions that—

- Have been primed, fused, armed, or otherwise prepared for action;
- Have been fired, dropped, launched, projected, or placed in such a manner as to constitute a hazard to operations, installations, personnel, or material; and
- Remain unexploded either by malfunction, design, or any other cause.

Dated: March 12, 2002.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Parts 110 and 165

[COTP Honolulu 02–001]

RIN 2115–AA97, 2115–AA98

Anchorages and Security Zones; Oahu, Maui, Hawaii, and Kauai, HI

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish security zones in designated waters adjacent to the islands of Oahu, Maui, Hawaii, and Kauai, HI for a period of six months. These security zones and a related amendment to regulations for anchorage grounds in Mamala Bay are necessary to protect personnel, vessels, and facilities from acts of sabotage or other subversive acts, accidents, or other causes of a similar nature and will extend from the surface of the water to the ocean floor. This proposed rule is similar to a previous rule published January 31, 2002, creating security zones in these areas until April 19, 2002. Entry into the proposed zones would be prohibited unless authorized by the Coast Guard Captain of the Port Honolulu, HI.

DATES: Comments and related material must reach the Coast Guard on or before April 15, 2002.

ADDRESSES: You may mail comments and related material to Commanding Officer, U.S. Coast Guard Marine Safety Office Honolulu, 433 Ala Moana Blvd., Honolulu, Hawaii 96813. Marine Safety Office Honolulu maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at Marine Safety Office Honolulu between 7 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: LTJG E. G. Cantwell, U. S. Coast Guard Marine Safety Office Honolulu, Hawaii at (808) 522–8260.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking (COTP Honolulu 02–001), indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know your submission reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

The deadline to submit comments is less than sixty days from the publication of the notice of proposed rules (NPRM) in the **Federal Register**. This short comment period will permit the Coast Guard to publish a temporary final rule before the expiration of the existing temporary security zone, and thus help ensure public safety and security. To provide additional notice, we will place a notice of our proposed rule in the local notice to mariners. You may request a copy of this notice via facsimile by calling (808) 522–8260.

In our final rule, we will include a concise general statement of comments received and identify any changes from the proposed rule based on the comments. If, as we expect, we will make the final rule effective in less than 30 days after publication in the **Federal Register**, we will explain our good cause for doing so as required by 5 U.S.C. 553(d)(3).

Public Meeting

We do not now plan to hold a public meeting. But you may submit a request for a meeting by writing to Marine Safety Office Honolulu at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a separate notice in the **Federal Register**.

Background and Purpose

Recent terrorist incidents in New York and Washington, D.C. have called for the implementation of additional measures to protect national security.

National security and intelligence officials warn that future terrorist attacks against civilian targets may be anticipated. This proposed rule is similar to a rule published January 31, 2002 (67 FR 4656), creating security zones in these areas until April 19, 2002.

Discussion of Proposed Rule

The Coast Guard proposes designated security zones in the waters adjacent to the islands of Oahu, Maui, Hawaii, and Kauai, HI for a period of six-months. These security zones are necessary to protect personnel, vessels, and facilities from acts of sabotage or other subversive acts, accidents, or other causes of a similar nature. In addition to creating security zones, this proposed rule would also amend an anchorage grounds regulation by adding the requirement that permission of the Captain of the Port be obtained before entering anchorage grounds in Mamala Bay.

These proposed security zones extend from the surface of the water to the ocean floor.

Entry into these zones is prohibited unless authorized by the Coast Guard Captain of the Port Honolulu, HI. Representatives of the Captain of the Port Honolulu will enforce these security zones. The Captain of the Port may be assisted by other federal or state agencies. Periodically, by Broadcast Notice to Mariners, the Coast Guard will announce the existence or status of the temporary security zones in this proposed rule.

These temporary proposed security zones are intended to provide for the safety and security of the public, maritime commerce, and transportation, by creating security zones in designated harbors, anchorages, facilities, and adjacent navigable waters of the United States.

Regulatory Evaluation

This proposed rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT)(44 FR 11040, February 26, 1979).

The Coast Guard expects the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. This expectation is based on the short duration of the zone and the limited geographic zone affected by it.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. No small business impacts are anticipated due to the small size of the zones and the short duration of the security zones in any one area.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Because we did not anticipate any small business impacts, we did not offer assistance to small entities in understanding the rule.

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not affect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. We invite your comments on how this proposed rule might impact tribal governments, even if that impact may not constitute a "tribal implication" under the Order.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it

VOL
67
ISS
54
MR
20
2002
UMI

does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We have considered the environmental impact of this proposed rule and concluded that, under figure 2–1, paragraph (34)(g), of Commandant Instruction M16475.lD, this rule is categorically excluded from further environmental documentation. A "Categorical Exclusion Determination" is available in the docket where indicated under **ADDRESSES.**

List of Subjects

33 CFR Part 110

Anchorage grounds.

33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reports and recordkeeping requirements, Security measures, Waterways.

For the reasons set out in the preamble, the Coast Guard amends 33 CFR parts 110 and 165 as follows:

PART 110—ANCHORAGE REGULATIONS

1. The authority citation for part 110 continues to read as follows:

Authority: 33 U.S.C. 471, 1221 through 1236, 2030, 2035, 2071; 49 CFR 1.46 and 33 CFR 1.05–1(g).

2. From 6 a.m. April 19, 2002, until 4 p.m. October 19, 2002, in § 110.235 add a new paragraph (c) to read as follows:

§ 110.235 Pacific Ocean (Mamala Bay), Honolulu Harbor, Hawaii (Datum: NAD 83).

* * * * *

(c) Before entering in the anchorage grounds in this section you must first obtain permission from the Captain of the Port Honolulu.

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

3. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; 49 CFR 1.46.

4. A new § 165.T14–069 is temporarily added to read as follows:

§ 165.T14–069 Security Zones; Oahu, Maui, Hawaii, and Kauai, HI.

(a) *Location.* The following areas are security zones:

(1) All waters of Honolulu Harbor and entrance channel, Keehi Lagoon, and General Anchorages A, B, C, and D as defined in 33 CFR 110.235 that are shoreward of the following coordinates: The shoreline at 21°17.68′ N, 157°52.0′ W; thence due south to 21°16.0′ N, 157°52.0′ W, thence due west to 21°16.0′ N, 157°55.58′ W, thence due north to Honolulu International Airport Reef Runway at 21°18.25′ N, 157°55.58′ W.

(2) The waters around the Tesoro Single Point Mooring extending 1,000 yards in all directions from position 21°16.2′ N, 158°05.3′ W.

(3) The waters extending 1,000 yards in all directions around vessels moored at the Chevron Conventional Buoy Mooring at approximate position 21°16.7′ N, 158°04.2′ W.

(4) The Kahului Harbor and Entrance Channel, Maui, HI consisting of all waters shoreward of the COLREGS DEMARCATION line. (See 33 CFR 80.1460).

(5) All waters within the Nawiliwili Harbor, Kauai, HI shoreward of the COLREGS DEMARCATION line (See 33 CFR 80.1450).

(6) All waters of Port Allen Harbor, Kauai, HI shoreward of the COLREGS DEMARCATION line (See 33 CFR 80.1440).

(7) Hilo Harbor and Entrance Channel, Hawaii, HI consisting of all waters shoreward of the COLREGS DEMARCATION line (See 33 CFR 80.1480).

(8) The waters extending out 500 yards in all directions from cruise ship vessels anchored within 3 miles of:

(i) Lahaina Small Boat Harbor, Maui, between Makila Point and Puunoa Point.

(ii) Kailua-Kona Small Boat Harbor, Hawaii, between Keahulolu Point and Puapuaa Point.

(9) All waters contained within the Barbers Point Harbor, Oahu, enclosed by a line drawn between Harbor Entrance Channel Light 6 and the jetty point day beacon at 21°19.5 N, 158°07.3 W.

(b) *Designated representative.* A designated representative of the Captain of the Port is any Coast Guard commissioned officer, warrant or petty officer that has been authorized by the Captain of the Port Honolulu to act on his behalf. The following officers have or will be designated by the Captain of the Port Honolulu: The senior Coast Guard boarding officer on each vessel enforcing the security zone.

(c) *Regulations.* (1) In accordance with § 165.33, entry into these zones is prohibited unless authorized by the Coast Guard Captain of the Port, Honolulu or his designated representatives. Section 165.33 also contains other general requirements.

(2) The existence or status of the temporary security zones in this section will be announced periodically by Broadcast Notice to Mariners.

(3) Persons desiring to transit the areas of the security zones may contact the Captain of the Port at command center telephone number (808) 541–2477 or on VHF channel 16 (156.8 Mhz) to seek permission to transit the area. If permission is granted, all persons and vessels shall comply with the instructions of the Captain of the Port or his designated representatives.

(d) *Authority.* In addition to 33 U.S.C. 1231, the authority for this section is 33 U.S.C. 1226; 49 CFR 1.46.

(e) *Effective dates.* This section is effective from 6 a.m. HST April 19, 2002, until 4 p.m. HST October 19, 2002.

Dated: March 12, 2002.

T.L. Rice,

Captain, U.S. Coast Guard, Commander, Fourteenth Coast Guard District, Acting.

33 CFR Part 165

[PAC AREA–02–001]

RIN 2115–AG23

Protection of Naval Vessels

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes regulations for the safety and security of U.S. naval vessels in the navigable waters of the United States. Naval Vessel Protection Zones will provide for the regulation of vessel traffic in the vicinity of many U.S. naval vessels in the navigable waters of the United States.

DATES: Comments and related material must reach the Coast Guard on or before May 6, 2002.

ADDRESSES: You may mail comments and related material to Commander (Pmt), Coast Guard Pacific Area, Coast Guard Island, Bldg. 50–6, Alameda, CA 94501–5100. Commander (Pmt) maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, are part of docket [PAC AREA 02–001] and are available for inspection or copying at Commander (Pmt), at the address listed above between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Commander Steve Danscuk,

Commander (Pmt), Coast Guard Island, Bldg. 50–6, Alameda, CA 94501–5100; telephone number (510) 437–2943.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking [PAC AREA 02–001], indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know they reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not now plan to hold a public meeting. But you may submit a request for a meeting by writing to Commander (Pmt), Coast Guard Pacific Area, at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

These zones are necessary to provide for the safety and security of United States naval vessels in the navigable waters of the United States. The regulations are issued under the authority contained in 14 U.S.C. 91. On September 21, 2001, the Coast Guard published temporary final rules entitled "Protection of Naval Vessels" in the **Federal Register** (66 FR 48779). Prior to issuing this temporary final rule, no regulation existed implementing 14 U.S.C. 91. The temporary final rule is in effect until June 15, 2002. No public hearing has been requested, and none has been held.

On February 21, 2002, Commander (Amr), Coast Guard Atlantic Area published a Notice of Proposed Rulemaking in the **Federal Register** (67 FR 7992) proposing to establish a permanent Subpart G to 33 CFR part 165 and setting out general provisions pertaining to that subpart. The general provisions of proposed Subpart G are discussed in the preamble to the Atlantic Area proposed rule and would apply to Pacific Area NVPZs. Our proposed rule would only add a new § 165.2030 to parallel Atlantic Area's proposed § 165.2025.

We have determined that a continuing need exists for the protection of naval vessels. Therefore, we are proposing a permanent rule that will replace the temporary rule by June 15, 2002. Based on our experience with the temporary final rule, we have made some changes that are detailed at length in the "Discussion" section of this preamble.

Discussion of Proposed Rule

This proposed rule, for safety and security concerns, controls vessel movement in a regulated area surrounding many U.S. naval vessels. All vessels within 500 yards of such a U.S. naval vessel shall operate at the minimum speed necessary to maintain a safe course, unless required by the Navigation Rules to maintain speed, and shall always proceed as directed by the Coast Guard, the senior naval officer present in command, or the official patrol. No vessel or person is allowed within 100 yards of a U.S. naval vessel greater than 100 feet in length unless authorized by the Coast Guard, the senior naval officer present in command, or the official patrol.

Only larger U.S. naval vessels are surrounded by a naval vessel protection zone to minimize this rule's effect on the public. Only U.S. naval vessels over 100 feet in length overall would be "large U.S. naval vessels."

The proposed rule contains several additional provisions to limit public impact. Vessels that need to pass within 100 yards of a large U.S. naval vessel may contact the Coast Guard, the senior naval officer present in command, or the official patrol on VHF–FM channel 16 to obtain the necessary permission.

Additionally, the Coast Guard, senior naval officer present in command, or the official patrol should permit vessels constrained by their navigational draft or restricted in their ability to maneuver to pass within 100 yards of a large U.S. naval vessel in order to ensure a safe passage in accordance with the Navigation Rules.

Similarly, commercial vessels anchored in a designated anchorage area should be permitted to remain at anchor within 100 yards of a passing large U.S. naval vessel when consistent with security requirements. As illustrated by the attack on the U.S.S. Cole, all vessels are potentially a security threat; therefore, vessels may, at times, be required to move. From a pure security perspective, all anchored vessels should be required to move. We believe, however, that security must be balanced with the burden on mariners and encourage enforcement officials to limit the impact on larger vessels, which are the most expensive and difficult to move.

In the proposed rule, we added language to address the situation where a naval vessel protection zone around a moored or anchored U.S. naval vessel effectively shuts down a narrow waterway. This situation could arise when a U.S. naval vessel makes a temporary port visit away from its normal homeport. In this situation, the Coast Guard, senior naval officer present in command, or the official patrol should permit transiting vessels to pass within 100 yards of the moored U.S. naval vessel with the minimal delay consistent with security requirements. This proposed rule does not intend to block narrow waterways from public use for extended periods of time. Mariners should anticipate some delay due to security needs. However, by including this new language in the regulation text, we want to make it clear that the Coast Guard, senior naval officer present in command, or the official patrol should, when appropriate, allow transiting vessels within the 100-yard exclusionary zone as needed to safely pass through a navigable channel or waterway. While maintaining security is paramount, avoiding extended delays in normal traffic is also very important.

We also added language that the Coast Guard, senior naval officer present in command, or the official patrol should give advance notice on VHF–FM channel 16 of all movements by large U.S. naval vessels once security concerns permit publicizing the movement. The goal is to give as much advance notice as possible. In most cases, however, this notice will probably be no more than an hour or two. These notifications should, to some extent, help mariners adjust their navigation plans accordingly or obtain early permission to enter into a naval vessel protection zone.

Violations of these regulations are punishable as a class D felony (imprisonment for not more than 6 years and a fine of not more than $250,000), a civil penalty, and may result in rem liability against the vessel.

Regulatory Evaluation

This proposed rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory

VOL
67
ISS
54
MR
20
2002
UMI

policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979).

We expect the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

Although this proposed regulation restricts access to the regulated area, the effect of this proposed regulation will not be significant because: (i) Individual naval vessel protection zones are limited in size; (ii) the Coast Guard, senior naval officer present in command, or official patrol may authorize access to the naval vessel protection zone; (iii) the naval vessel protection zone for any given transiting naval vessel will only effect a given geographical location for a limited time; and (iv) when conditions permit, the Coast Guard, senior naval officer present in command, or the official patrol should give advance notice of all naval vessel movements on VHF–FM channel 16 so mariners can adjust their plans accordingly. Further, the Coast Guard received no comments related to economic impact following implementation of the temporary final rule.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule will not have a significant economic impact on a substantial number of small entities.

This proposed rule will affect the following entities, some of which may be small entities: The owners or operators of vessels intending to operate near or anchor in the vicinity of U.S. naval vessels in the navigable waters of the United States.

This proposed regulation will not have a significant economic impact on a substantial number of small entities for the following reasons: (i) Individual naval vessel protection zones are limited in size; (ii) the official patrol may authorize access to the naval vessel protection zone; (iii) the naval vessel protection zone for any given transiting naval vessel will only affect a given geographic location for a limited time; and (iv) when conditions permit, the Coast Guard, senior naval officer present in command, or the official patrol should give advance notice of all naval vessel movements on VHF–FM channel 16 so mariners can adjust their plans accordingly. Further, the Coast Guard received no comments related to small entity impact following implementation of the temporary final rule.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (*see* **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the address listed under **ADDRESSES**.

Collection of Information

This proposed rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This proposed rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

To help the Coast Guard establish regular and meaningful consultation and collaboration with Indian and Alaskan Native tribes, we published a notice in the **Federal Register** (66 FR 36361, July 11, 2001) requesting comments on how to best carry out the Order. We invite your comments on how this proposed rule might impact tribal governments, even if that impact may not constitute a "tribal implication" under the Order.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We have considered the environmental impact of this proposed rule and concluded that, under figure 2–1, paragraph (34)(g), of Commandant Instruction M16475.lD, this rule is categorically excluded from further environmental documentation. A "Categorical Exclusion Determination" is available in the docket where indicated under **ADDRESSES**. Further, the Coast Guard received no comments related to environmental impact following implementation of the temporary final rule.

List of Subjects in 33 CFR part 165

Harbors, Marine safety, Navigation (water), Protection of naval vessels, Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

SUBPART G—PROTECTION OF NAVAL VESSELS

1. The authority citation for part 165 subpart G continues to read as follows:

Authority: 14 U.S.C 91 and 633; 49 CFR 1.45.

2. Add § 165.2030 to read as follows:

§ 165.2030 Pacific Area.

(a) This section applies to any vessel or person in the navigable waters of the United States within the boundaries of the U.S. Coast Guard Pacific Area, which includes the Eleventh, Thirteenth, Fourteenth, and Seventeenth U.S. Coast Guard Districts.

Note to paragraph (a): The boundaries of the U.S. Coast Guard Pacific Area and the Eleventh, Thirteenth, Fourteenth, and Seventeenth U.S. Coast Guard Districts are set out in 33 CFR part 3.

(b) A naval vessel protection zone exists around U.S. naval vessels greater than 100 feet in length overall at all times in the navigable waters of the United States, whether the large U.S. naval vessel is underway, anchored, moored, or within a floating drydock, except when the large naval vessel is moored or anchored within a restricted area or within a naval defensive sea area.

(c) The Navigation Rules shall apply at all times within a naval vessel protection zone.

(d) When within a naval vessel protection zone, all vessels shall operate at the minimum speed necessary to maintain a safe course, unless required to maintain speed by the Navigation Rules, and shall proceed as directed by the Coast Guard, the senior naval officer present in command, or the official patrol. When within a naval vessel protection zone, no vessel or person is allowed within 100 yards of a large U.S. naval vessel unless authorized by the Coast Guard, the senior naval officer present in command, or official patrol.

(e) To request authorization to operate within 100 yards of a large U.S. naval vessel, contact the Coast Guard, the senior naval officer present in command, or the official patrol on VHF–FM channel 16.

(f) When conditions permit, the Coast Guard, senior naval officer present in command, or the official patrol should:

(1) give advance notice on VHF–FM channel 16 of all large U.S. naval vessel movements; and

(2) permit vessels constrained by their navigational draft or restricted in their ability to maneuver to pass within 100 yards of a large U.S. naval vessel in order to ensure a safe passage in accordance with the Navigation Rules; and

(3) permit commercial vessels anchored in a designated anchorage area to remain at anchor when within 100 yards of passing large U.S. naval vessels; and

(4) permit vessels that must transit via a navigable channel or waterway to pass within 100 yards of a moored or anchored large U.S. naval vessel with minimal delay consistent with security.

Note to paragraph (f): The listed actions are discretionary and do not create any additional right to appeal or otherwise dispute a decision of the Coast Guard, the senior naval officer present in command, or the official patrol.

Dated: March 12, 2002.

E.R. Riutta,

Vice Admiral, U.S. Coast Guard, Commander, Eleventh Coast Guard District.

RIN 2115–AA97

Safety Zone; Mystic Places Offshore Grand Prix, New London, CT

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish a temporary safety zone for the Mystic Places Offshore Grand Prix, off Ocean Beach, New London, CT. This action is necessary to provide for the safety of life on navigable waters during this May 3-to-5, 2002 event. This action is intended to restrict vessel traffic in a portion of Long Island Sound in the vicinity of Ocean Beach, New London, CT.

DATES: Comments and related material must reach the Coast Guard on or before April 19, 2002.

ADDRESSES: You may mail comments and related material to Marine Events, Coast Guard Group/Marine Safety Office Long Island Sound, Command Center, 120 Woodward Ave., New Haven, CT 06512. Coast Guard Group/Marine Safety Office Long Island Sound maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at Group/MSO Long Island Sound, New Haven, CT, between 7:30 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Boatswain's Mate Second Class (BM2) Ryan Peebles, Group Operations Petty Officer, Coast Guard Group/MSO Long Island Sound (203) 468–4408.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking (CGD01–02–006), indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know they reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not now plan to hold a public meeting, but you may submit a request for a meeting by writing to Coast Guard Group/MSO Long Island Sound at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

The Coast Guard proposes to establish a temporary safety zone for the Mystic Places Offshore Grand Prix off Ocean Beach in Long Island Sound. The proposed safety zone prevents vessels from transiting a portion of Long Island

VOL
67
ISS
54
MR
20
2002
UMI

Sound. It is needed to protect boaters from the hazards associated with power boat races being conducted within the boundaries of the safety zone.

The comment period was abbreviated in order to allow for the promulgation of a temporary rule in advance of the scheduled power boat races. The proposed rule is unlikely to engender public controversy. The safety zone encompasses a modest area and is of limited duration. Our previous rulemaking experience in cases of a similar nature suggests that we are unlikely to receive any adverse comments.

Discussion of Proposed Rule

The proposed safety zone encompasses all waters of Long Island Sound within the boundaries of a line beginning at 41°18′00″ N, 072°05′58″ W; then to 41°18′20″ N, 072°05′40″ W; then to 41°18′20″ N, 072°04′58″ W; then to 41°18′00″ N, 072°04′58″ W (NAD 1983); and then returning to the point of origin. The proposed safety zone will be enforced from 1 p.m. until 3 p.m. each day from May 3, 2002 through May 5, 2002. Only race officials and participants will be allowed inside the boundaries of the proposed zone during these periods. All other marine traffic will be allowed to transit around the safety zone at all times. Vessels will not be precluded from mooring at or getting underway from recreational or commercial piers in the vicinity of the zone. No vessel may enter the safety zone without permission from the Captain of the Port, Long Island Sound.

Regulatory Evaluation

This proposed rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory planning and review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979).

We expect the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. This proposed safety zone would temporarily close a portion of Long Island Sound to vessel traffic. However, the impact of this regulation is expected to be minimal for the following reasons: the event is of limited duration; vessels are not precluded from getting underway, or mooring at, public or private facilities in the vicinity of the event; advance advisories will be made to the maritime community; and marine traffic may still transit around the zone during the event.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. This proposed rule would affect the following entities, some of which might be small entities: the owners or operators of vessels intending to transit or anchor in a portion of Long Island Sound during the time this zone is activated. This safety zone would not have a significant economic impact on a substantial number of small entities for the following reasons: the event is of limited duration; vessels are not precluded from getting underway, or mooring at, public or private facilities in the vicinity of the event; advance advisories will be made to the maritime community; and marine traffic may still transit around the zone during the event.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (*see* **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact BM2 Ryan Peebles, Operations Petty Officer, Coast Guard Group/MSO Long Island Sound (203) 468–4408.

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

To help the Coast Guard establish regular and meaningful consultation and collaboration with Indian and Alaskan Native tribes, we published a notice in the **Federal Register** (66 FR 36361, July 11, 2001) requesting comments on how to best carry out the Order. We invite your comments on how this proposed rule might impact tribal governments, even if that impact may not constitute a "tribal implication" under the Order.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We considered the environmental impact of this proposed rule and concluded that, under figure 2–1, paragraph 34(g), of Commandant Instruction M16475.1C, this proposed rule is categorically excluded from further environmental documentation. This proposed rule fits paragraph 34(g) as it establishes a safety zone. A "Categorical Exclusion Determination" is available in the docket where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 165

Harbors, Marine Safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; 49 CFR 1.46.

2. From 1 p.m. on May 3, 2002 through 3 p.m. on May 5, 2002, add temporary § 165.T01–006 to read as follows:

§ 165.T01–006 Safety Zone: Mystic Places Offshore Grand Prix, New London, CT.

(a) Location. The following area is a safety zone: All waters off Ocean Beach in Long Island Sound, within the boundaries of a line beginning at 41°18′00″N, 072°05′58″W; then to 41°18′20″N, 072°05′40″W; then to 41°18′20″N, 072°04′58″W; then to 41°18′00″N, 072°04′58″W (NAD 1983); and then returning to the point of origin.

(b) Enforcement period. This section will be enforced from 1 p.m. until 3 p.m. each day from May 3, 2002 through May 5, 2002.

(c) Regulations. (1) Vessels not participating in the event, swimmers and personal watercraft of any nature are prohibited from entering or moving within the safety zone unless authorized by the Captain of the Port. (2) All persons and vessels shall comply with the instructions of the Coast Guard Captain of the Port or the designated on-scene patrol personnel. These personnel comprise commissioned, warrant, and petty officers of the Coast Guard. Upon being hailed by a U. S. Coast Guard vessel by siren, radio, flashing light, or other means, the operator of a vessel shall proceed as directed.

Dated: February 27, 2002.

J.J. Coccia,

Captain, U.S. Coast Guard, Captain of the Port, Long Island Sound.

Safety Zone; Lynn Fourth of July Celebration, Nahant Bay, Lynn, MA

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish a temporary safety zone for the Lynn Fourth of July Celebration on July 3, 2002, in Lynn, MA. The safety zone would temporarily close all waters of Nahant Bay within a 500-yard radius of the launch platform located in approximate position 42°27′48″ N, 70°55′38″ W. The safety zone would prohibit entry into or movement within this portion Nahant Bay during the fireworks display.

DATES: Comments and related material must reach the Coast Guard on or before May 1, 2002.

ADDRESSES: You may mail comments and related material to Marine Safety Office Boston, 455 Commercial Street, Boston, MA. Marine Safety Office Boston maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of the docket and will be available for inspection or copying at Marine Safety Office Boston between 8 A.M. and 3 P.M., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Chief Petty Officer Michael Popovich, Marine Safety Office Boston, Waterways Safety and Response Division, at (617) 223–3000.

SUPPLEMENTARY INFORMATION:

Request for Information

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking (CGD01–02–026), indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know your comments reached us, please enclose a stamped, self addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not now plan to hold a public meeting. However, you may submit a request for a meeting by writing to Marine Safety Office Boston at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that a public meeting would aid this rulemaking, we will hold one at a time and place announced by a separate notice in the **Federal Register**.

Background and Purpose

We propose to establish a safety zone within a 500-yard radius of the fireworks barge located at position 42°27′48″ N, 070°55′38″ W. The safety zone would be in effect from 5 p.m. until 10:30 p.m. on Monday, July 3, 2002.

The zone would restrict movement within this portion of Nahant Bay for

VOL 67 ISS 54 MR 20 2002 UMI

the fireworks display and is needed to protect the maritime public from the dangers posed by a fireworks display. Marine traffic may transit safely outside of the safety zone during the effective periods. The Captain of the Port does not anticipate any negative impact on vessel traffic due to this event. Public notifications will be made prior to the effective period via safety marine information broadcasts and local notice to mariners.

Regulatory Evaluation

This proposed rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979).

The Coast Guard expects the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

Although this proposed regulation will prevent traffic from transiting a portion of Nahant Bay during the effective period, the effects of this regulation will not be significant for several reasons: the minimal time that vessels will be restricted from the area, vessels may safely transit outside of the safety zone, and advance notifications will be made to the local maritime community by safety marine information broadcasts and local notice to mariners.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), the Coast Guard considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule will affect the following entities, some of which may be small entities: the owners or operators of vessels intending to transit or anchor in a portion of Nahant Bay between 5 p.m. and 10:30 p.m. on July 3, 2002. This safety zone will not have a significant economic impact on a substantial number of small entities for the following reasons: vessel traffic can safely pass outside of the safety zone during the effective period, the safety zone is limited in duration, and advance notifications which will be made to the local maritime community by safety marine information broadcasts and local notice to mariners.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pubic Law 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact Chief Petty Officer Michael Popovich at the address listed under **ADDRESSES.**

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

The Coast Guard analyzed this proposed rule under Executive Order 13132 and has determined that this rule does not have implications for federalism under that Order.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) governs the issuance of Federal regulations that require unfunded mandates. An unfunded mandate is a regulation that requires a State, local, or tribal government or the private sector to incur direct costs without the Federal Government's having first provided the funds to pay those costs. This proposed rule would not impose an unfunded mandate.

Taking of Private Property

This proposed rule would not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

The Coast Guard analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not pose an environmental risk to health or risk to safety that may disproportionately affect children.

Environment

The Coast Guard considered the environmental impact of this proposed rule and concluded that, under figure 2–1, (34)(g), of Commandant Instruction M16475.lC, this proposed rule is categorically excluded from further environmental documentation. A "Categorical Exclusion Determination" is available in the docket where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; 49 CFR 1.46.

2. Add temporary § 165.T01–026 to read as follows:

§ 165.T01–026 Safety Zone: Lynn Fourth of July Celebration, Lynn, Massachusetts.

(a) *Location.* The following area is a safety zone:

All waters of Nahant Bay within a 500-yard radius of the fireworks launch platform located in approximate position 42°27′48″ N, 070°55′38″ W.

(b) *Effective date.* This section will be effective from 5 p.m. until 10:30 p.m. on July 3, 2002.

(c) *Regulations.* (1) In accordance with the general regulations in § 165.23, entry into or movement within this zone will be prohibited unless authorized by the Captain of the Port Boston.

(2) All vessel operators shall comply with the instructions of the COTP or the designated on-scene U.S. Coast Guard patrol personnel. On-scene Coast Guard patrol personnel include commissioned, warrant, and petty officers of the Coast Guard on board Coast Guard, Coast Guard Auxiliary, local, state, and federal law enforcement vessels.

Dated: March 1, 2002.

B.M. Salerno,

Captain, U.S. Coast Guard, Captain of the Port, Boston, Massachusetts.

Coast Guard

33 CFR Part 165

[COTP Baltimore 02–002]

RIN 2115–AA97

Security Zone; Potomac River, Washington Channel, Washington, DC

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes establishing a temporary security zone in the waters of Washington Channel on the Potomac River off Fort Lesley J. McNair, Washington, DC, during the May 30, 2002, U.S. Coast Guard Commandant's Change of Command ceremony. The security zone is necessary to provide for the security and safety of life and property of event participants, spectators and mariners on U.S. navigable waters during the event. Entry into this zone is prohibited unless authorized by the Captain of the Port, Baltimore, Maryland, or designated representative.

DATES: Comments and related material must reach the Coast Guard on or before April 19, 2002.

ADDRESSES: You may mail comments and related material to the Port Safety, Security and Waterways Management Branch, at Commander, U.S. Coast Guard Activities Baltimore, 2401 Hawkins Point Road, Baltimore, Maryland, 21226–1791. U.S. Coast Guard Activities Baltimore, Port Safety, Security and Waterways Management Branch maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at U.S. Coast Guard Activities Baltimore, Port Safety, Security and Waterways Management Branch between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Ronald L. Houck, Port Safety, Security and Waterways Management Branch, at telephone number (410) 576–2674.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking (COTP Baltimore–02–002), indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know your submission reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not now plan to hold a public meeting. But you may submit a request for a meeting by writing to Commander, U.S. Coast Guard Activities Baltimore at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a separate notice in the **Federal Register**.

Background and Purpose

The Coast Guard will conduct a Change of Command ceremony along the Potomac River at Washington, DC. A security zone is needed to protect dignitaries taking part in the high-level military ceremony from potential threats posed by waterborne acts of sabotage or other subversive acts. The purpose of the proposed regulation is to promote maritime safety and protect participants and spectators during the event. These regulations will impact the movement of all vessels operating in the specified area on the Washington Channel at Washington, DC.

Discussion of Proposed Rule

The U.S. Coast Guard Commandant's Change of Command ceremony will be held at Fort Lesley J. McNair, Washington, DC, on May 30, 2002. The event will consist of a background comprised of three U.S. Coast Guard vessels anchored adjacent to Fort McNair on the confined waters of the Washington Channel, on the Potomac River. A security zone is needed from 11 a.m. to 4 p.m. on May 30, 2002 to safeguard event participants and spectators. U.S. Coast Guard patrol vessels will be provided to prevent the movement of persons and vessels in an area approximately 200 yards wide and 450 yards long within Washington Channel. Entry into this zone is prohibited unless authorized by the Captain of the Port or his or her designated representative. The Captain of the Port will notify the public of changes in the status of the zone by a Marine Safety Radio Broadcast.

Regulatory Evaluation

This proposed rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT)(44 FR 11040, February 26, 1979).

We expect the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. This temporary rule affects a limited area for approximately five hours, and will not completely close the navigable channel. Therefore, the Coast Guard expects the economic impact of this proposal to be so minimal that a full Regulatory Evaluation under paragraph 10(e) of the regulatory policies and procedures of DOT is unnecessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. Because this proposal will only be in effect for a limited amount of time, and extensive advisories will be made to

VOL
67
ISS
54
MR
20
2002
UMI

the affected maritime community so that they may adjust their schedules accordingly, the Coast Guard expects the impact of this proposal to be minimal.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact Ronald L. Houck, Port Safety, Security and Waterways Management Branch, at telephone number (410) 576–2674.

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. We invite your comments on how this proposed rule might impact tribal governments, even if that impact may not constitute a "tribal implication" under the Order.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We have considered the environmental impact of this proposed rule and concluded that, under figure 2–1, paragraph (34)(g), of Commandant Instruction M16475.lD, this rule is categorically excluded from further environmental documentation because of the limited duration and scope of the regulation. A "Categorical Exclusion Determination" is available in the docket where indicted under **ADDRESSES.**

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; 49 CFR 1.46.

2. Add § 165.T05–006 to read as follows:

§ 165.T05–006 Security Zone; Potomac River, Washington Channel, Washington, D.C.

(a) *Location.* The following area is a security zone: all waters of the Washington Channel, from surface to bottom, encompassed by lines connecting the following points, beginning at 38°52′03″ N, 077°01′07″ W, thence to 38°52′03″ N, 077°01′14″ W, thence to 38°51′50″ N, 077°01′16″ W, thence to 38°51′50″ N, 077°01′07″ W, thence to 38°52′03″ N, 077°01′07″ W. These coordinates are based upon NAD 1983.

(b) *Regulations.* (1) In accordance with § 165.33, entry into this zone is prohibited unless authorized by the Coast Guard Captain of the Port, Baltimore, Maryland, or his or her designated representative. Section 165.33 also contains other general requirements.

(2) Persons desiring to transit the area of the security zone may contact the Captain of the Port at telephone number (410) 576–2693 or on VHF channel 16 (156.8 MHz) or VHF channel 22 (157.1 MHz) to seek permission to transit the area. If permission is granted, all persons and vessels shall comply with the instructions of the Captain of the Port or his or her designated representative.

(c) *Authority.* In addition to 33 U.S.C. 1231 and 50 U.S.C. 191, the authority for this section includes 33 U.S.C. 1226.

(d) *Effective period.* This section will be effective from 11 a.m. through 4 p.m. on May 30, 2002.

Dated: March 4, 2002.

R.B. Peoples,

Captain, U.S. Coast Guard, Captain of the Port, Baltimore, Maryland.

Approval And Promulgation of Implementation Plans; Texas; Revisions to General Rules and Regulations for Control of Air Pollution by Permits for New Sources and Modifications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; reopening of public comment period.

SUMMARY: The EPA is reopening the public comment period for a proposed approval of revisions to the Texas State Implementation Plan (SIP) published in the **Federal Register** on September 24, 2001.

DATES: Written comments must be received by EPA on or before April 19, 2002.

ADDRESSES: Written comments on this action should be addressed to Mr. David W. Neleigh, Chief, Air Permits Section (6PD–R), at the EPA Region 6 Office listed below. Copies of documents relevant to this action are available for public inspection during normal business hours at the following locations. Anyone wanting to examine these documents should make an appointment with the appropriate office at least two working days in advance.

Environmental Protection Agency, Region 6, Air Permits Section (6PD–R), 1445 Ross Avenue, Dallas, Texas 75202–2733.

Waste Characterization Program Documents Applicable to Transuranic Radioactive Waste From the Idaho National Engineering and Environmental Laboratory for Disposal at the Waste Isolation Pilot Plant

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability; opening of public comment period.

SUMMARY: The Environmental Protection Agency (EPA) is announcing the availability of, and soliciting public comments for 30 days on, Department of Energy (DOE) documents applicable to characterization of transuranic (TRU) radioactive waste at the Idaho National Engineering and Environmental Laboratory (INEEL) proposed for disposal at the Waste Isolation Pilot Plant (WIPP). The documents (Item II–A2–38, Docket A–98–49) are available for review in the public dockets listed in **ADDRESSES.** EPA will conduct an inspection of waste streams, characterization systems and processes at INEEL to verify that the site can characterize transuranic waste in accordance with EPA's WIPP compliance criteria. EPA will perform this inspection the week of April 8, 2002. This notice of the inspection and comment period accords with 40 CFR 194.8.

DATES: EPA is requesting public comment on the documents. Comments must be received by EPA's official Air Docket on or before April 19, 2002.

ADDRESSES: Comments should be submitted to: Docket No. A–98–49, Air Docket, Room M–1500, U.S. Environmental Protection Agency, 401 M Street, SW, Mail Code 6102, Washington, DC 20460. The DOE documents are available for review in the official EPA Air Docket in Washington, DC, Docket No. A–98–49, Category II–A2, and at the following three EPA WIPP informational docket locations in New Mexico: in Carlsbad at the Municipal Library, Hours: Monday–Thursday, 10 a.m.–9 p.m., Friday–Saturday, 10 a.m.–6 p.m., and Sunday 1 p.m.–5 p.m.; in Albuquerque at the Government Publications Department, Zimmerman Library, University of New Mexico, Hours: vary by semester; and in Santa Fe at the New Mexico State Library, Hours: Monday–Friday, 9 a.m.–5 p.m..

As provided in EPA's regulations at 40 CFR part 2, and in accordance with normal EPA docket procedures, if copies of any docket materials are requested, a reasonable fee may be charged for photocopying. Air Docket A–98–49 in Washington, DC, accepts comments sent electronically or by fax (fax: 202–260–4400; e–mail: *a-and-r-docket@epa.gov*).

FOR FURTHER INFORMATION CONTACT: Ed Feltcorn, Office of Radiation and Indoor Air, (202) 564–9422. You can also call EPA's toll-free WIPP Information Line, 1–800–331–WIPP or visit our website at *http://www.epa/gov/radiation/wipp.*

SUPPLEMENTARY INFORMATION:

Background

DOE is developing the WIPP near Carlsbad in southeastern New Mexico as a deep geologic repository for disposal of TRU radioactive waste. As defined by the WIPP Land Withdrawal Act (LWA) of 1992 (Public Law 102–579), as amended (Public Law 104–201), TRU waste consists of materials containing elements having atomic numbers greater than 92 (with half-lives greater than twenty years), in concentrations greater than 100 nanocuries of alpha-emitting TRU isotopes per gram of waste. Much of the existing TRU waste consists of items contaminated during the production of nuclear weapons, such as rags, equipment, tools, and sludges.

VOL
67
ISS
54
MR
20
2002
UMI

On May 13, 1998, EPA announced its final compliance certification decision to the Secretary of Energy (published May 18, 1998, 63 FR 27354). This decision stated that the WIPP will comply with EPA's radioactive waste disposal regulations at 40 CFR part 191, subparts B and C.

The final WIPP certification decision includes conditions that (1) prohibit shipment of TRU waste for disposal at WIPP from any site other than the Los Alamos National Laboratories (LANL) until the EPA determines that the site has established and executed a quality assurance program, in accordance with §§ 194.22(a)(2)(i), 194.24(c)(3), and 194.24(c)(5) for waste characterization activities and assumptions (Condition 2 of appendix A to 40 CFR part 194); and (2) (with the exception of specific, limited waste streams and equipment at LANL) prohibit shipment of TRU waste for disposal at WIPP (from LANL or any other site) until EPA has approved the procedures developed to comply with the waste characterization requirements of § 194.22(c)(4) (Condition 3 of appendix A to 40 CFR part 194). The EPA's approval process for waste generator sites is described in § 194.8. As part of EPA's decision-making process, the DOE is required to submit to EPA appropriate documentation of quality assurance and waste characterization programs at each DOE waste generator site seeking approval for shipment of TRU radioactive waste to WIPP. In accordance with § 194.8, EPA will place such documentation in the official Air Docket in Washington, DC, and informational dockets in the State of New Mexico for public review and comment.

EPA will perform an inspection of INEEL's waste characterization systems and processes for TRU waste in accordance with Conditions 2 and 3 of the WIPP certification. Specifically, we will inspect the performance of new equipment " the Waste Assay Gamma Spectrometer (WAGS) system, SWEPP Gamma Ray Spectrometer (SGRS) system, and Data Review Expert System (DXRS) for NDA validation. In addition, solidified organic waste streams at INEEL will be examined for NDA characterization and certification. The inspection is scheduled to take place the week of April 8, 2002.

EPA has placed a number of documents pertinent to the inspection in the public docket described in **ADDRESSES.** The documents are listed as Item II–A2–38 in Docket A–98–49. In accordance with 40 CFR 194.8, as amended by the final certification decision, EPA is providing the public 30 days to comment on these documents.

If EPA determines as a result of the inspection that the proposed waste streams, processes, systems, and equipment at INEEL adequately control the characterization of transuranic waste, we will notify DOE by letter and place the letter in the official Air Docket in Washington, DC, as well as in the informational docket locations in New Mexico. A letter of approval will allow DOE to ship TRU waste to WIPP using the approved characterization processes. The EPA will not make a determination of compliance prior to the inspection or before the 30-day comment period has closed.

Information on the certification decision is filed in the official EPA Air Docket, Docket No. A–93–02 and is available for review in Washington, DC, and at three EPA WIPP informational docket locations in New Mexico. The dockets in New Mexico contain only major items from the official Air Docket in Washington, DC, plus those documents added to the official Air Docket since the October 1992 enactment of the WIPP LWA.

Dated: March 13, 2002.

Robert Brenner,

Acting Assistant Administrator for Air and Radiation.

[FR Doc. 02–6844 Filed 3–19–02; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 721

[OPPTS–50646; FRL–6820–7]

RIN 2070–AB27

Proposed Revocation of Significant New Uses of Certain Chemical Substances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to revoke significant new use rules (SNURs) for eight substances promulgated under section 5(a)(2) of the Toxic Substances Control Act (TSCA) based on new data. Based on the new data the Agency no longer finds that activities not described in the corresponding TSCA section 5(e) consent orders for these chemical substances may result in significant changes in human or environmental exposure.

DATES: Comments, identified by docket control number OPPTS–50646 must be received on or before April 19, 2002.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I.C. of the **SUPPLEMENTARY INFORMATION.** To ensure proper receipt by EPA, it is imperative that you identify docket control number OPPTS–50646 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: *For general information contact*: Barbara Cunningham, Acting Director, Environmental Assistance Division, Office of Pollution Prevention and Toxics (7408M), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 554–1404; e-mail address: TSCA-Hotline@epa.gov.

For technical information contact: James Alwood, Chemical Control Division, Office of Pollution Prevention and Toxics (7405M), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 564–8974; e-mail address: alwood.jim@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you manufacture, import, process, or use the chemical substances contained in this proposed revocation. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS codes	Examples of potentially affected entities
Chemical manufacturers	325	Manufacturers, importers, processors, and users of chemicals
Petroleum and coal product industries	324	Manufacturers, importers, processors, and users of chemicals

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action applies to certain entities. To determine whether you or your business is affected by this action, you should carefully examine the applicability provisions in title 40 of the Code of Federal Regulations (CFR) at 40 CFR 721.5. If you have any questions regarding the applicability of this action to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/. A frequently updated electronic version of 40 CFR part 721 is available at http://www.access.gpo.gov/nara/cfr/cfrhtml_00/Title_40/40cfr721_00.html, a beta site currently under development.

2. *In person.* The Agency has established an official record for this action under docket control number OPPTS–50646. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the TSCA Nonconfidential Information Center, North East Mall Rm. B–607, Waterside Mall, 401 M St., SW., Washington, DC. The Center is open from noon to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Center is (202) 260–7099.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPPTS–50646 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Document Control Office (7407), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: OPPT Document Control Office (DCO) in EPA East Building Rm. 6428, 1201 Constitution Ave. NW., Washington, DC. The DCO is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the DCO is (202) 564–8930.

3. *Electronically.* You may submit your comments electronically by e-mail to: oppt.ncic@epa.gov, or mail your computer disk to the address identified above. Do not submit any information electronically that you consider to be CBI. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments will also be accepted on standard disks in WordPerfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number OPPTS–50646. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the technical person listed under **FOR FURTHER INFORMATION CONTACT.**

E. What Should I Consider as I Prepare My Comments for EPA?

We invite you to provide your views on the various options we propose, new approaches we haven't considered, the potential impacts of the various options (including possible unintended consequences), and any data or information that you would like the Agency to consider during the development of the final action. You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Provide specific examples to illustrate your concerns.

6. Offer alternative ways to improve the proposed revocation.

7. Make sure to submit your comments by the deadline in this document.

8. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. Background

A. What Action is the Agency Taking?

In the **Federal Register** referenced for each substance, OPPTS–50601, September 23, 1992 (57 FR 44068), OPPTS–50620, March 1, 1995 (60 FR 11044) (FRL–4868–4), and OPPTS–50623, December 2, 1996 (61 FR 63737) (FRL–4964–3), establishing significant new uses for the substances, EPA issued a SNUR. Because of additional data EPA has received for these substances, EPA is proposing to revoke the significant new use and recordkeeping requirements for the following chemical substances under 40 CFR part 721, subpart E. In this unit, EPA provides a brief description for each substance, including its premanufacture notice (PMN) number, chemical name (generic name if the specific name is claimed as CBI), CAS number (if assigned), basis for the revocation of the TSCA section 5(e) consent order for the substance, and the CFR citation. Further background information for the substances is contained in Unit I.B.2 of this document.

PMN Number P–89–764

Chemical name: Neodecaneperoxoic acid, 1,1,3,3-tetramethylbutyl ester.

CAS number: 51240–95–0.

Federal Register *publication date and reference:* September 23, 1992 (57 FR 44068).

Docket number: OPPTS–50601.

Basis for revocation of SNUR: EPA issued a TSCA section 5(e) consent order between EPA and the PMN submitter for this substance based on a potential unreasonable risk of cancer by analogy to structurally similar peroxides. Based on the results of test data developed by an industry consortium to address potential toxicity of peroxides, EPA has concluded that available information does not support identification of peroxides as potential carcinogens. Therefore, EPA determined that it could no longer conclude that the manufacturing, processing, and use of P–89–764 may present an unreasonable risk under section 5(e) of TSCA and has, therefore, revoked the consent order for P–89–764. EPA can no longer make the finding that activities not described in the TSCA section 5(e) consent order may result in significant changes in human exposure.

CFR citation: 40 CFR 721.8170.

PMN Numbers P–94–1634/1635/1636/1637/1638/1639

Chemical name: Fatty acids, C(14-18)-unsaturated, branched and linear, methyl and butyl esters.

CAS number: Not available.

Federal Register *publication date and reference:* December 2, 1996 (61 FR 63737).

Docket number: OPPTS–50623.

Basis for revocation of SNUR: EPA issued a consent order between EPA and the PMN submitter requiring submission to EPA of certain human health toxicity testing before manufacturing a specified amount of the PMN substances based on the fact that the PMN substances would be produced in substantial quantities, and that there might be significant or substantial human exposure to the PMN substances. Based on the results of these studies, potential exposures, and the toxicity of the compounds the PMN substance will replace, EPA determined that it could no longer conclude that the manufacturing, processing, and use of P–93–193 may present an unreasonable risk under section 5(e) of TSCA and has, therefore, revoked the consent order for P–93–193. EPA can no longer make the finding that activities not described in the TSCA section 5(e) consent order may result in significant changes in human exposure.

CFR citation: 40 CFR 721.5300.

PMN Number P–93–193

Chemical name: Propanol, [2-(1,1-dimethylethoxy)methylethoxy]-.

CAS number: 132739–31–2.

Federal Register *publication date and reference:* March 1, 1995 (60 FR 11044).

Docket number: OPPTS–50620.

Basis for revocation of SNUR: EPA issued a consent order between EPA and the PMN submitter requiring submission to EPA of certain human health and environmental toxicity testing before manufacturing a specified amount of the PMN substance based on the fact that the PMN substance would be produced in substantial quantities, and that there might be significant or substantial human exposure to the PMN substance. Based on the results of these studies, potential exposures, and the toxicity of the compounds the PMN substance will replace, EPA determined that it could no longer conclude that the manufacturing, processing, and use of P–93–193 may present an unreasonable risk under section 5(e) of TSCA and has, therefore, revoked the consent order for P–93–193. EPA can no longer make the finding that activities not described in the TSCA section 5(e) consent order may result in significant changes in human exposure.

CFR citation: 40 CFR 721.8170.

PMN Numbers P–94–1634/1635/1636/1637/1638/1639

Chemical name: Fatty acids, C(14-18)-unsaturated, branched and linear, methyl and butyl esters.

CAS number: Not available.

Federal Register *publication date and reference:* December 2, 1996 (61 FR 63737).

Docket number: OPPTS–50623.

Basis for revocation of SNUR: EPA issued a consent order between EPA and the PMN submitter requiring submission to EPA of certain human health toxicity testing before manufacturing a specified amount of the PMN substances based on the fact that the PMN substances would be produced in substantial quantities, and that there might be significant or substantial human exposure to the PMN substances. EPA revoked the consent order based on the PMN submitter's commitment to sponsor the substances under EPA's High Production Volume (HPV) Challenge Program and the expectation that the information and/or test data developed by the company pursuant to its HPV commitment will satisfy EPA's information needs for the PMN substances. EPA can no longer make the finding that activities not described in the TSCA section 5(e) consent order may result in significant changes in human exposure.

CFR citation: 40 CFR 721.3628.

B. What is the Agency's Authority for Taking this Action?

Section 5(a)(2) of TSCA (15 U.S.C. 2604(a)(2)) authorizes EPA to determine that a use of a chemical substance is a "significant new use." EPA must make this determination by rule after considering all relevant factors, including those listed in section 5(a)(2) of TSCA. Once EPA determines that a use of a chemical substance is a significant new use, section 5(a)(1)(B) of TSCA requires persons to submit a notice to EPA at least 90 days before they manufacture, import, or process the substance for that use. The mechanism for reporting under this requirement is established under 40 CFR 721.5.

During review of the PMNs submitted for the chemical substances that are the subject of this proposed revocation, EPA concluded that regulation was warranted based on available information that indicated activities not described in the TSCA section 5(e) consent order might result in significant changes in human or environmental exposure as described in section 5(a)(2) of TSCA. Based on these findings, SNURs were promulgated.

EPA has revoked the TSCA section 5(e) consent orders that are the basis for these SNURs and no longer finds that activities other than those described in the TSCA section 5(e) consent orders may result in significant changes in human or environmental exposure. The revocation of SNUR provisions for these substances is consistent with the findings set forth in the preamble to the proposed revocation of each individual SNUR.

Therefore, EPA is proposing to revoke the SNUR provisions for these chemical substances. When this revocation becomes final, EPA will no longer require notice of intent to manufacture, import, or process these substances. In addition, export notification under section 12(b) of TSCA will no longer be required.

III. Regulatory Assessment Requirements

This proposed rule revokes or eliminates an existing regulatory requirement and does not contain any new or amended requirements. As such, the Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled "*Regulatory Planning and Review*" (58 FR 51735, October 4, 1993).

Since this proposed rule does not impose any requirements, it does not contain any information collections subject to approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or require any other action under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104–4).

Nor does it require any prior consultation as specified by Executive Order 12875, entitled "*Enhancing the Intergovernmental Partnership*" (58 FR 58093, October 28, 1993), or special considerations as required by Executive Order 12898, entitled "*Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations*" (59 FR 7629, February 16, 1994) or require OMB review in accordance with Executive Order 13045, entitled "*Protection of Children from Environmental Health Risks and Safety Risks*" (62 FR 19885, April 23, 1997).

On August 4, 1999, President Clinton issued a new executive order on "*Federalism*," Executive Order 13132 (64 FR 43255, August 10, 1999). This proposed rule will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132.

In addition, pursuant to section 605(b) of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency has determined that SNUR revocations, which eliminate requirements without imposing any new ones, have no adverse economic impacts.

This proposed rule is not subject to Executive Order 13211, "*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*" (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

List of Subjects in 40 CFR Part 721

Environmental protection, Chemicals, Hazardous substances, Reporting and recordkeeping requirements.

Dated: March 1, 2002.

William H. Sanders, III,

Office Director, Office of Pollution Prevention and Toxics.

Therefore, it is proposed that 40 CFR part 721 be amended as follows:

PART 721—[AMENDED]

1. The authority citation for part 721 would continue to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

§§ 721.3628, 721.5300, and 721.8170 [Removed]

2. By removing §§ 721.3628, 721.5300, and 721.8170.

[FR Doc. 02–6724 Filed 3–19–02; 8:45 am]

DEPARTMENT OF TRANSPORTATION

Transportation Security Administration

49 CFR Part 1511

[Docket No. TSA–2002–11334]

RIN 2110–AA02

Aviation Security Infrastructure Fees

AGENCY: Transportation Security Administration, DOT.

ACTION: Extension of comment period.

SUMMARY: This document announces the extension of the comment period on the Transportation Security Administration's (TSA) Aviation Security Infrastructure Fee interim final rule. TSA has decided to grant, in part, a request for an extension of the comment period and will extend the comment period for fifteen (15) days. The comment period will now end on April 2, 2002.

DATES: The comment period is being extended from March 18, 2002, to April 2, 2002.

ADDRESSES: Submit written, signed comments to TSA Docket No. 2002–11334 , the Docket Clerk, U.S. DOT Dockets, Room PL–401, 400 Seventh Street, SW., Washington, DC 20590–0001. All comments received will be available for examination at the above address between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped envelope or postcard on which the following statement is made: "Comments to Docket No. TSA–2002–11334." The post card will be date stamped and mailed to the sender. Comments also may be sent electronically to the Dockets Management System (DMS) at: *http://dms.dot.gov* at any time. Those who wish to file comments electronically should follow the instructions on the DMS web site.

FOR FURTHER INFORMATION CONTACT: For guidance involving technical matters: Randall Fiertz, Deputy Director, Cost and Performance Management, Federal Aviation Administration, c/o Department of Transportation (DOT), Office of the Secretary, Office of the Assistant Secretary for Budget and Programs, 400 Seventh St., SW., Room 10101, Washington, DC 20590; telephone (202) 366–9192. For other matters: Rita M. Maristch, Department of Transportation, Office of the General Counsel, Office of Environmental, Civil Rights and General Law, 400 Seventh St., SW., Room 10102, Washington, DC 20590; telephone (202) 366–9161. Office hours are from 9:00 a.m. to 5:30 p.m., e.t. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Availability of the Interim Final Rule and Comments Received

An electronic copy of this document and the interim final rule may be downloaded using a modem and suitable communications software from the Government Printing Office's Electronic Bulletin Boards Service at (202) 512–1661. Internet users may reach the **Federal Register**'s home page at: *http://www.nara.gov/fedreg* and the Government Printing Office's database at: *http://www.access.gpo.gov*.

Internet users can access this document and all other documents and comments received by TSA through DOT's docket management system web site, *http://dms.dot.gov*. It is available 24 hours each day, 365 days each year. Please follow the instructions online for more information and help.

Comment Period Extension

On March 11, 2002, the Air Carrier Association of America (ACAA), the Cargo Airline Association (CAA), the National Air Carrier Association (NACA) and the Regional Airline Association (RAA), filed a petition for a thirty (30) day extension of the comment period on TSA's Aviation Security Infrastructure Fee interim final rule (see 67 FR 7926, February 20, 2002). Although TSA believes that the comment period is adequate, TSA has decided to grant, in part, the petitioners' request for an extension and will extend the comment period for fifteen (15) days. The comment period will now end on April 2, 2002. This extension will allow the commercial airline industry and other interested entities or individuals additional time to complete their comments on the interim final rule.

Issued in Washington, DC, on March 18, 2002.

John W. Magaw,

Under Secretary of Transportation for Security.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Draft Program Comment Regarding the Management of Wherry and Capehart Era Army Family Housing

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice of intent to issue program comment on Capehart and Wherry Era army family housing.

SUMMARY: The Army is formulating its plan on how to manage its inventory of Capehart and Wherry Era housing. In order to better meet its Federal historic preservation responsibilities in managing these properties, the Army has requested the Advisory Council on Historic Preservation to comment on the overall management of such properties, as opposed to submitting each individual undertaking under such management to a separate review. The Council has drafted such a comment. It now seeks public input on that draft.

DATES: Submit comments on or before April 19, 2002.

ADDRESSES: Address all comments concerning this proposed program comment to Dave Berwick, Army Affairs Coordinator, Office of Federal Agency Programs, Advisory Council on Historic Preservation, 1100 Pennsylvania Avenue, NW., Suite 809, Washington, DC 20004. Fax (202) 606–8672. You may submit electronic comments to: *dberwick@achp. gov.*

FOR FURTHER INFORMATION CONTACT: Dave Berwick, (202) 606–8505.

SUPPLEMENTARY INFORMATION: Section 106 of the National Historic Preservation Act requires Federal agencies to consider the effects of their undertakings on historic properties and provide the Advisory Council on Historic Preservation ("Council") a reasonable opportunity to comment with regard to such undertakings. The Council has issued the regulations that set forth the process through which Federal Agencies comply with these duties. Those regulations are codified under 36 CFR part 800 ("Section 106 regulations").

Under § 800.14(e) of those regulations, agencies can request the Council to provide a "Program Comment" on a particular category of undertakings in lieu of conducting individual reviews of each individual undertaking under such category, as set forth in 36 CFR 800.4 through 800.6. An agency can then meet its Section 106 responsibilities for those undertakings by taking into account the Council's Program Comment and by following the steps set forth in those comments.

The Army has requested such a Program Comment to cover management of its Capehart and Wherry Era housing. A copy of the draft Program Comment can be found at the end of this notice. Once the public input resulting from this notice is considered, the Council will decide whether to issue a final Program Comment to the Army.

Background on the Capehart and Wherry Army Family Housing Program

Military housing constructed during the 1949–1962 period is commonly called Capehart and Wherry Era housing after the two United States Senators who sponsored national military housing construction programs to address inadequate and substandard military family housing at military installations across the nation. Senator Wherry's program, implemented 1949–1955, allowed developers to construct, own, and maintain military housing on Department of Defense ("DoD") (in this case Army) lands with FHA-insured mortgages. DoD guaranteed occupancy, agreed to long-term leases, and discounted utility rates in exchange for the developer's agreement to established set rental rates and preferential leases for military families. Senator Capehart's program, implemented 1955–1962, called for DoD to purchase the new housing constructed by developers, and to purchase the developer-owned housing previously constructed under the Wherry housing program. DoD remained responsible for operation, maintenance and repair of this housing. Approximately 19,036 buildings constructed during the Capehart-Wherry Era remain in the Army's inventory of family housing.

Approximately 52% of the Army's entire military family housing stock remain from those built during the Capehart and Wherry military family housing construction program between 1949 and 1962. Structures associated with this family housing include detached garages, carports and storage buildings, and the landscape features (including but not limited to the overall design and layout of the Capehart and Wherry Era communities, including road patterns, plantings and landscaping, open spaces, playgrounds, parking areas, signage, site furnishings, views into and out of the community, lighting, sidewalks, setbacks and all other associated cultural landscape features). A small percentage of buildings and structures constructed during this time period were not constructed with funds provided through the Capehart and Wherry funding programs, but are similar in all other respects, and are therefore included as part of this action.

Capehart and Wherry Era buildings were largely constructed from off-the-shelf commercially available plans and specifications and range from single-family detached houses, to multi-unit row houses, duplexes, four-plexes, and multi-story apartment buildings. Brick, frame, cement block, and stucco were typical building materials. While architectural styles were largely consistent, there was some variation including elements of International style and Colonial Revival style. Developers, consistent with principles guiding civilian neighborhood design at the onset of the "baby boom," paid attention to comprehensive neighborhood planning and design. Overall, the Army's Capehart and Wherry Era housing, associated structures, and landscape features reflect the ubiquitous, nation-wide suburban subdivision construction trends of this period.

The Army anticipates that all of it's Capehart-Wherry Era family housing, associated structures and landscape features will be subject to the following categories of undertakings: Maintenance and repair, rehabilitation, renovation, layaway and mothballing, demolition and replacement, and transfer, sale or lease out of government control. The Army is requesting that the Council provide a Program Comment on these categories of undertakings for Army

Capehart Wherry Era family housing, associated structures and landscape features.

The Army is requesting a Program Comment as an Army-wide Section 106 compliance action related to management of Capehart and Wherry era housing, associated structures and landscape features. This programmatic approach will facilitate management actions for privatization and transfer out of federal agency ownership, substantial alteration through renovation, and demolition and replacement of Capehart and Wherry Era housing, associated structures and landscape features that are listed or eligible for listing on the National Register of Historic Places. Therefore, there is the potential for adverse effects to historic properties.

The following is the full text of the draft Program Comment:

Program Comment for Capehart and Wherry Era Army Family Housing

I. Introduction

This Program Comment provides the Department of the Army (Army) with an alternate way to comply with its responsibilities under Section 106 of the National Historic Preservation Act with regard to the following actions in the management of the Capehart and Wherry Era Army family housing: privatization and transfer out of federal agency ownership, substantial alteration through renovation, and demolition and replacement of Capehart and Wherry Era housing, associated structures and landscape features that may be eligible for listing on the National Register of Historic Places.

II. Treatment of Capehart and Wherry Properties

a. Eligibility

The Army has conducted a historic context of its Capehart and Wherry properties. It is documented in a report entitled *For Want of a Home: A Historic Context for Wherry and Capehart Military Family Housing.* On May 22, 2001, the Army sponsored a symposium on Capehart and Wherry Era housing management as it relates to historic preservation. The symposium was attended by preservation experts, including the National Trust for Historic Preservation (Trust), the National Conference of State Historic Preservation Officers (NCSHPO), the Advisory Council on Historic Preservation, and nationally recognized experts in the field of historic preservation from academia and industry. Symposium participants recommended a programmatic approach to complying with Section 106, which is presented in the treatment section outlined below. The Army considers its inventory of Capehart and Wherry properties, including any associated structures and landscape features, to be eligible for the National Register of Historic Places for the purposes of Section 106 compliance.

b. Treatment

The Army has requested a Program Comment as an Army-wide Section 106 compliance action related to management of Capehart and Wherry Era housing, associated structures and landscape features. This programmatic approach will facilitate management actions for privatization and transfer out of Federal agency ownership, substantial alteration through renovation, and demolition and replacement of Capehart and Wherry Era housing, associated structures and landscape features. Such actions present a potential for adverse effects to historic properties.

Based on recommendations coming out of the symposium and follow-up meetings between the Council, the Trust and NCSHPO, the Army has proposed the following three step approach to the treatment of its Capehart and Wherry properties:

(i) The Army will expand and revise the existing historic context, *For Want of a Home: A Historic Context for Wherry and Capehart Military Family Housing.* Consistent with issues identified during the symposium on Capehart and Wherry Housing held by the Army in May 2001, and public review, the historic context will be expanded to address a number of important issues. It will explore changing Army family demographics following the end of the World War II and their impact on housing needs and responsive programs. The context will also focus on post-World War II suburbanization, housing trends and affordable housing programs in the civilian sector. In addition, the context will be expanded to consider the importance of historically important builders, developers and architects that may have been associated with design and construction of Capehart and Wherry Era housing developments at specific Army installations. In addition to addressing the housing units, the context will discuss associated structures, and landscape features. Finally, the context will describe the inventory of Capehart and Wherry Era Housing, providing information on the various types of buildings and architectural styles and the quantity of each.

(ii) The Army will develop Capehart and Wherry Era Neighborhood Design Guidelines. The scoping process identified landscape features as an important attribute of Capehart and Wherry Era land-use planning and development. Neighborhood Design Guidelines would address this issue and be distributed Army-wide. In this manner, Capehart and Wherry Era landscape features would be considered as the Army manages military family housing.

(iii) The Army will document Capehart and Wherry Era housing, associated structures and landscape features through preparation of a video. The video will document representative structural types and landscape features at three installations, and explain the relationship of this housing construction program to topics researched for the expanded historic context. The video will be distributed for educational purposes, and archived by the Army.

The Council believes that this three step approach will ensure that the Army takes into account the effects of management of its Capehart and Wherry Era housing.

III. Applicability

This Program Comment does not apply to the following properties that are listed, or eligible for listing, on the National Register of Historic Places: (a) Archeological sites, (b) properties of traditional religious and cultural significance to federally recognized Indian tribes or Native Hawaiian organizations, or (c) historic properties other than Army Capehart and Wherry Era housing, associated structures and landscape features.

IV. Effect of Program Comment

By following this comment and outlined three step approach, the Army will have met its responsibilities for compliance under Section 106 regarding management of its Capehart and Wherry Era housing. Accordingly, installations will not have to follow the case-by-case Section 106 review process for each individual management action.

The Army may carry out management actions prior to the completion of all of the three treatment steps outlined above, so long as such management actions do not preclude the eventual successful completion of those three steps.

If the Council determines that the consideration of Capehart and Wherry properties is not being carried out in a manner consistent with this Program Comment, the Council may withdraw this comment. Following such

VOL
67
ISS
54
MR
20
2002
UMI

withdrawal, the Army would comply with the requirements of 36 CFR §§ 800.3 through 800.7 for each individual management action.

Authority: 36 CFR 800.14(e).

Dated: March 15, 2002.

John M. Fowler,

Executive Director.

[FR Doc. 02–6706 Filed 3–19–02; 8:45 am]

BILLING CODE 4310–10–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Docket Number FV–02–335]

United States Standards for Grades of Apple Juice from Concentrate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Reopening and extension of the comment period.

SUMMARY: Notice is hereby given that the comment period on the proposed notice to create a new United States Standard for Grades of Apple Juice from Concentrate is reopened and extended.

DATES: Comments may be submitted on or before April 19, 2002.

ADDRESSES: Written comments may be submitted to: Lydia E. Berry, Processed Products Branch, Fruit and Vegetable Programs, Agricultural Marketing Service, U.S. Department of Agriculture, STOP 0247, 1400 Independence Avenue, SW., Washington, DC 20250–0247; fax (202) 690–1087; or e-mail *lydia.berry@usda.gov*. Comments should reference the date and page of this issue of the **Federal Register**. All comments received will be made available for public inspection at the address listed above during regular business hours and on the Internet.

The draft of the United States Standards for Grades of Apple Juice from Concentrate is available either through the address cited above or by accessing the AMS Home Page on the Internet at: *www.ams.usda.gov/fv/ppb.html*. Any comments received, regarding this proposed standard will also be posted on that site.

FOR FURTHER INFORMATION CONTACT: Lydia E. Berry at (202) 720–5021 or e-mail at lydia.berry@usda.gov.

SUPPLEMENTARY INFORMATION: A notice was published in the **Federal Register** (66 FR 58430 to 58431; November 21, 2001) requesting comments on a proposal to create a United States Standard for Grades of Apple Juice From Concentrate. The action would create grade standards for apple juice from concentrate that will include a description of the product, style, grades, ascertaining the grade by sample, and ascertaining the grade by lot. The proposed standard would provide a common language for trade, a means of measuring value in the marketing of apple juice from concentrate, and provide guidance in the effective utilization of apple juice from concentrate.

Congressional representatives representing a major apple producing area requested that additional time be provided for interested persons to comment on the proposed standard. The Congressmen believe that extending the comment period will enable the many growers and processors in their districts that have voiced their concern to their offices to respond to our solicitation for comments.

After reviewing the request, the Department is reopening and extending the common period in order to allow sufficient time for all interested persons to file comments.

This notice provides for a 30 day comment period for interested parties to comment on changes to the standards.

Dated: March 14, 2002.

A.J. Yates,

Administrator, Agricultural Marketing Services.

[FR Doc. 02–6691 Filed 3–19–02; 8:45 am]

BILLING CODE 3410–02–M

DEPARTMENT OF AGRICULTURE

Forest Service

Lost Cabin Mine, Medicine Bow-Routt National Forests, Carbon County, WY

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an Environmental Impact Statement (EIS) to assess and disclose the environmental effects of lode and placer exploration at the Lost Cabin Mine. The Lost Cabin Mine is located in Township 14 North, Range 86 West, Sections 1 and 12 in Carbon County, Wyoming. Mining operations would include repairing three existing shafts and obtaining ore samples from four un-patented lode claims. A small loader and track-hoe would be used to obtain the samples, and samples would be crushed on-site and transported from the area using four-wheel and six-wheel all terrain vehicles (ATV's). Approximately 1.6 miles of an existing, closed road (Way 4170) that historically accessed the mine area would need to be widened and repaired to allow access to the site. Roughly ⅛ mile of road would also need to be constructed to link the four un-patented lode claim sites.

An historical search of Government Land Office plats indicate that a "wood road" accessed the mine site as early as 1899. By 1901, an "improved road" that accessed Vulcan Mountain from Saratoga, Wyoming was in place. This road also provided a direct link with the Southern Wyoming Tramway which carried mined ore to a smelter in Encampment, Wyoming. It further provided access to other major mining communities in the near vicinity. Although the road is depicted on Forest Service maps through 1956, more recent maps do not indicate that it is still a part of the Forest Transportation System.

The Lost Cabin Mine is located in the Mowry Peak inventoried roadless area, as described in Appendix G to the Final EIS for the Medicine Bow National Forest Land and Resource Management Plan. If the project is approved as proposed, the proponent would be allowed to widen and repair two miles of an existing, closed road and construct roughly ⅛ mile of road within the roadless area boundary. The EIS will comply with the requirements of the National Environmental Policy Act (42 U.S.C. sections 4321–4370a), the National Forest Management Act (16 U.S.C. 1600–1614), and the U.S. Mining Laws (30 U.S.C. 21–54), and their implementing regulations.

PROJECT PURPOSE: The purpose of the Lost Cabin Mine analysis is to determine how the surface use connected with operations authorized by the United States mining laws (30 U.S.C. 21–54), which grant a statutory right to enter upon public lands to search for mineral deposits, shall be conducted to minimize adverse environmental impacts on National Forest System surface resources. It is not the purpose of the analysis to determine management of mineral resources. The responsibility for that determination lies with the Secretary of the Interior.

DATES: Comments concerning the proposal and the scope of the analysis will be accepted and considered at any time after publication of this notice in the **Federal Register** and prior to a decision being made. All comments and suggestions are welcome.

ADDRESSES: Send written comments to Melissa Martin, Medicine Bow-Routt National Forest Supervisor's Office, 2468 Jackson Street, Wyoming 82070. Electronic mail (e-mail) may be sent to *mmmartin@fs.fed.us* and FAX may be sent to (307) 745–1398. Telephone: (307) 745–2371.

FOR FURTHER INFORMATION CONTACT: Tom Florich, Recreation and Lands Program Manager, Medicine Bow-Routt National Forests, 2468 Jackson Street, Laramie, Wyoming, 82070. Telephone: (307) 745–2435.

SUPPLEMENTARY INFORMATION:

Decision To Be Made

The Responsible Official will consider the results of the analysis and its findings and then document the final decision in a Record of Decision (ROD). The decision will include a determination as to where and under what terms and conditions the proponent may access the Lost Cabin Mine while also protecting the surface natural resources in the area and providing for public safety.

Responsible Official

Rick Cables, Regional Forester, USDA Forest Service, Rocky Mountain Region, 740 Simms Street, Golden, Colorado 80401 is the official responsible for making the decision on this action. He will document his decision and rationale in a Record of Decision.

Preliminary Issues

Proposed construction/reconstruction of access roads to the lode sites could alter the character of the Mowry Peak roadless area.

Public Involvement

Public scoping describing the Plan of Operations associated with the Lost Cabin Mine was initiated on January 7, 2002, and 17 comment letters were received. All comments received from the January 7, 2002 scoping effort will be combined with comments received as a result of this Notice of Intent. Comments from both scoping efforts will be reviewed to identify potential issues for this analysis. Since the previously received comments will be incorporated into this analysis, individuals who responded to the January 7, 2002 scoping request need to provide comments at this time only if they wish to provide additional information to what they previously submitted. While comments are welcome at any time, comments received within 30 days of the publication of this notice in the **Federal Register** will be most useful for the identification of issues and the analysis of alternatives. As previously mentioned, comments may be sent by electronic mail (e-mail) to *mmmartin@fs.fed.us*. Written comments may be mailed to the Medicine Bow-Routt National Forests, 2468 Jackson Street, Laramie, Wyoming 82070, attention: Melissa Martin. Please reference the *Lost Cabin Mine EIS* on the subject line. The name and mailing address of the commenter should be provided with their comments so that future documents pertaining to this environmental analysis and the decision can be provided to interested parties.

Estimated Dates for Filing

The draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and available for public review during July, 2002. At that time, the EPA will publish a Notice of Availability (NOA) of the draft EIS in the **Federal Register**. The comment period on the draft EIS will be for a period of not less than 45 days from the date the EPA publishes the NOA in the **Federal Register**. It is important that those interested in the management of this area to comment at that time. The final EIS is expected to be available in October 2002. In the final EIS, the Forest Service will respond to any comments received during the public comment period that pertain to the environmental analysis. Those comments and the Forest Service responses will be disclosed and discussed in the final EIS and will be considered when the final decision about this proposal is made.

Release of Names

Comments received in response to this solicitation, including names and addresses of those who comment, will be considered part of the public record on this Proposed Action and will be available for public inspection. Comments submitted anonymously will be accepted and considered; however, those who submit anonymous comments will not have standing to appeal the subsequent decision under 36 CFR parts 215 or 217. Additionally, pursuant to 7 CFR 1.27 (d), any person may request the agency to withhold a submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality. Persons requesting such confidentiality should be aware that, under the FOIA, confidentiality may be granted in only very limited circumstances, such as to protect trade secrets. The Forest Service will inform the requester of the agency's decision regarding the request for confidentiality, and where the request is denied, the agency will return the submission and notify the requester that the comments may be resubmitted with or without name and address within ten (10) days.

The Public's Obligation To Comment

The Forest Service believes it is important to give reviewers an early notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised during the draft EIS stage, but are not raised until after completion of the final EIS, may be waived or dismissed by the courts. *City of Angoon* v. *Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). As a result of these previous court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final EIS. To assist the Forest Service in identifying and considering issues and concerns related to the proposed action, comments on this draft EIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft document. Comments may also address the adequacy of the Draft Environmental Impact Statement or the merits of the alternatives displayed in the document. Reviewers should refer to the Council on Environmental Quality Regulations at 40 CFR 1503.3 for implementing the procedural provisions of the National Environmental Policy Act for addressing these points. Please note that any comments that are submitted in relation to this draft EIS will be considered public information.

Dated: March 12, 2002.

Rick Cables,

Regional Forester.

Forest Service

Revised Land and Resource Management Plan for the Shawnee National Forest (Alexander, Gallatin, Hardin, Jackson, Johnson, Massac, Pope, Saline, Williamson, and Union Counties, IL)

AGENCY: Forest Service, USDA.

ACTION: Notice of Intent to prepare Environmental Impact Statement (EIS).

SUMMARY: The USDA Forest Service intends to prepare an EIS for revising the Shawnee National Forest Land and Resource Management Plan (Forest Plan) pursuant to 16 U.S.C. 1604(f)(5) and USDA Forest Service National Forest System Land and Resource Management Planning regulations. The revised Forest Plan will supersede the Forest Plan, which the Regional Forester approved November 24, 1986, and the significant amendment approved May 14, 1992. This Notice describes the focus areas of change, the estimated dates for filing the EIS, the information concerning public participation, and the names and addresses of the responsible agency official and the individual who can provide additional information.

DATES: We need to receive your comments on this Notice of Intent (NOI) in writing within 60 days after this notice is published in the **Federal Register**. The Draft EIS should be available for public review by December 2003. The Final EIS and revised Forest Plan should be completed by September 2004.

ADDRESSES: Send written comments to: NOI–FP Revision, Shawnee National Forest, 50 Hwy. 145 South, Harrisburg, IL 62946. Or direct electronic mail to *mlross@fs.fed.us* Attn: Forest Plan Revision.

FOR FURTHER INFORMATION CONTACT: Forest Planner, at 618–253–7114. TDY 618–253–1070, or direct electronic mail to: *mlross@fs.fed.us* or access the Forest web page at *www.fs.fed.us/r9/shawnee*.

RESPONSIBLE OFFICIAL: Regional Forester, Eastern Region, 310 W. Wisconsin Ave, Milwaukee, Wisconsin 53203.

SUPPLEMENTARY INFORMATION: The Regional Forester for the Eastern Region gives notice of the agency's intent to prepare an EIS to revise the Shawnee National Forest Plan. The Regional Forester approved the original Shawnee National Forest Plan in November 1986. In May 1992, the Regional Forester approved a significant amendment that substantially replaced the 1986 Forest Plan. This plan guides the overall management of the Shawnee National Forest. We make six primary decisions in the Forest Plan:

1. Forest-wide multiple-use goals and objectives;
2. Forest-wide management requirement;
3. Management area direction;
4. Lands suited and not suited for resource use and production (timber management, etc.);
5. Monitoring and evaluation requirements; and
6. Recommendations to Congress (such as wilderness), if any.

By the requirements of the National Forest Management Act, national forests must revise the Forest Plan every 10–15 years (U.S.C. 1604(f)(5)). At this time, there are three reasons to revise the 1986 and 1992 Amended Forest Plans: (1) The National Forest Management Act of 1976 requires that such plans be revised every 10–15 years (the Regional Forester approved the original Shawnee National Forest Plan in November 1986 and approved the Amended Shawnee National Forest Plan in May 1992); (2) Court direction for additional analysis of certain portions of the 1992 Amended Forest Plan; and (3) agency goals and objectives, along with other national guidance for strategic plans and programs, have changed; The agency Government Performance and Results Act Strategic Plan (2000) has shifted the course of agency program emphasis to sustainability.

In many southern Illinois communities, people value the opportunities public forests provide for enjoying recreation, solitude, nature study, and scenic beauty. People also expect important products from managed forests, such as game species for hunting, commercial recreation events, wood products, and minerals. The Shawnee National Forest is integral to the sense of place for communities across southern Illinois. When making decisions in the revised plan, we would examine economic and social impacts to local communities and at a broader regional level, as well as biological impacts.

We propose to focus our analysis on topics identified as being most critically in need of change. These were identified through public comment and monitoring and evaluation.

Plan Opportunities, Goals and Objectives: We propose changing the Forest Plan's opportunities, goals and objectives by changing the timber resource management goal to a goal for promoting forest ecosystem health and sustainability. This would also result in changes to Forest Plan objectives and standards and guidelines related to timber resource management.

Revision Topics:

1. Watershed Resources,
2. Biological Diversity and Wildlife/Aquatic Habitat;
3. Recreation Management;
4. Forest Ecosystem Health and Sustainability;
5. Mineral Resources;
6. Wilderness, Roadless Areas, Wild and Scenic Rivers; and
7. Land Ownership Adjustment.

Additional detail on the revision topics is available on request, in the form of the document titled "Need for Change, Description of Proposal for Revising the Forest Plan of the Shawnee National Forest". You are encouraged to review this additional document before commenting on the NOI. You may request the additional information by calling the phone number listed above, by writing or e-mailing to the addresses listed in this notice, or by accessing the Forest web page at *www.fs.fed.us/r9/shawnee*.

We propose the following direction or actions for each topic:

1. Watershed Resources:
- Develop a management prescription 6.2 and standards and guidelines for Inahgeh lands and other lands on the historic Mississippi River floodplain;
- Develop a management prescription 6.1 for priority watersheds that provide local drinking water supplies;
- Establish criteria for prioritizing watershed protection and restoration; and
- Review and update the riparian area filterstrip standards and guidelines (6.3 management prescription).

2. Biological Diversity, Wildlife and Aquatic Habitat:
- Refine management direction for forest interior birds;
- Create a 6.7 management prescription for large openland habitat;
- Review Forest-wide standards and guidelines for wildlife opening management;
- Revise standards and guidelines for threatened and endangered species and other species of concern;
- Identify and protect ecosystems at risk of loss or degradation;
- Develop criteria for control of invasive species that are presently degrading native ecosystems;
- Modify current list of Management Indicator Species to represent all communities;
- Develop management area prescriptions and standards and guidelines for habitat restoration in Inahgeh lands;
- Adjust the boundary of the 1.3 management area at Oakwood Bottoms Greentree Reservoir to include recently acquired adjacent forested lands;
- Revise the standards and guidelines pertaining to pesticide use for fish and wildlife management purposes; and
- Review list of species of recreation interest.

3. Recreation Management:
- Expand recreation management goal to include providing a comprehensive system of designated trails that are marked, mapped, designed, and maintained for all season use;
- Restrict equestrian use to system trails and to roads open to vehicular travel;
- Eliminate the Amended Forest Plan map pertaining to ATV/OHM travelways and hiker/equestrian trail corridors;
- Allow ATV/OHM use for access to National Forest land on selected Forest System roads (primarily lower standard local system roads) and close those roads to use by vehicles over 50 inches wide;
- The ATV Access Permit for people with disabilities will be discontinued because all users will be allowed to access the Forest using ATV/OHM's on certain roads;
- Allow mountain bike use on open roads and on designated trails, and provide for links to the rails-to-trails system, where available;
- Revise recreation goal statement to include both developed and dispersed recreation management, emphasizing increased benefits to the public and cost-effective operation. Provide direction to evaluate continued operation of low use or high unit cost recreation areas, and provide direction for new recreation developments; and
- Convert visual management direction from the Visual Management System to the new national Scenery Management System.

4. Forest Ecosystem Health and Sustainability:
- Replace the timber resource management goal with a goal to provide for and enhance forest ecosystem health and sustainability;
- The land base suitable for timber production and the associated allowable sale quantity will be re-evaluated;
- Revise timber management objectives and standards and guidelines;
- Maintain a dominance of oak-hickory in management areas 1.3, 2.1, and 6.6. Add an oak-hickory objective for other management areas based on historic occurrence and ecological landtypes;
- Drop objective for range management except for research purposes;
- Subdivide the 2.1 and 6.6 management areas to reflect differences along ecological boundaries;
- Change management area designation of Fountain Bluff and Iron Mountain from 8.3 to 6.6, to allow for active vegetation management, while providing for protection of heritage resources;
- Revise the standards and guidelines pertaining to pesticide use; and
- Address the control of invasive species and noxious weeds through Forest-wide standards and guidelines.

5. Mineral Resources:
- Decide on suitability and availability regarding oil and gas leasing. No decision will be made on consent to lease at the Forest Plan level; and
- With regard to other direction on oil, gas, and other minerals, no change will be made in the Amended Plan.

6. Wilderness, Roadless Areas, Wild and Scenic Rivers:
- Based on the results of a Forest-wide roadless area analysis, recommendations to Congress for wilderness may be developed;
- Develop appropriate management prescriptions for the Camp Hutchins area and the inventoried roadless area known as Burke Branch and other roadless areas if they are not recommended for wilderness designation;
- Modify standards and guidelines for 5.1 management prescription based on the physical and social issues regarding wilderness, as identified during the Forest Plan revision process;
- Delete 5.2 management area designations;
- Increase the allowable system trail densities in wilderness to a maximum of 2 miles of trail per square mile.
- Formulate management area standards and guidelines for cemetery access and maintenance in wilderness; and
- Complete the classification process of the six streams eligible for study as part of the Wild and Scenic River System, and revise the 9.2 management prescription standards and guidelines to reflect the results of the classification process. If any additional rivers are identified for potential wild and scenic river designation, we will determine their eligibility and highest potential classification.

7. Land Adjustment:
- Revise prioritization list standard and guideline for surface ownership to include the 6.6 management prescription, remove the 5.2 management prescription, and incorporate other management prescriptions that may be identified;
- Recommend a boundary adjustment that incorporates portions of the Mississippi River floodplain into the proclamation boundary and eliminates portions of the proclamation boundary where additional acquistion is not likely;
- Eliminate the Forest Consolidation Map;
- Emphasize acquisition of all available property rights in each land adjustment case; and
- Provide recommendation for statutory boundary adjustment.

New Planning Regulations: The Department of Agriculture published new planning regulations in November of 2000. Concerns regarding the ability to implement these regulations prompted a review with probable revision of these regulations. On May 10, 2001 USDA Secretary Veneman signed an interim final rule extending for one year the May 9, 2001 date by which all land and resource management plan amendments and revisions will be subject to the requirements of the new planning rule adopted November 9, 2000. The interim rule provides that May 9, 2002 a responsible official may elect to continue or to initiate new plan amendments or revisions under the 1982 planning regulations or that the responsible official may initiate amendments or revisions under the new planning rule. The Shawnee National Forest will proceed under the 1982 planning regulations.

Range of Alternatives: We will consider a range of alternatives when revising the Forest Plan. The alternatives will address different options to resolve issues over the focus areas of change listed above and to fulfill the purpose and need. A "no-action alternative" is required, meaning that management would continue under the existing Forest Plan. Alternatives will provide different ways to address and respond to issues identified during the scoping process.

The alternatives will display different mixes of recreation opportunities and experiences. Alternatives will display different mixes of wildlife habitats across the forest. The mix will vary by the objectives of the particular alternative, though each alternative will strive to provide habitat necessary to maintain viable populations of plant and animal species. We will analyze alternatives that examine different levels of vegetation management, including more and less timber harvest. Management of roadless areas will vary by the objectives of any particular alternative, physical criteria for

evaluating each individual roadless area, and public input.

We may make other minor changes, particularly in the guidance chapter of the Forest Plan, to reflect changes made when addressing the above revision topics.

Inviting Public Participation: We are now soliciting comments and suggestions from federal agencies, state and local governments, individuals, and organizations on the scope of the analysis to be included in the DEIS for the revised Forest Plan (40 CFR 1501.7). Comments should focus on: (1) The proposal for revising the Forest Plan; (2) possible alternatives for addressing issues associated with the proposal; and (3) identify any possible impacts associated with the proposal based on an individual's civil rights (race, color, national origin, age, religion, gender, disability, political beliefs, sexual orientation, marital or family status). We will encourage public participation in the environmental analysis and decision-making process.

In spring 2002 we are releasing our NOI and proposal. We will have many types of public involvement including 60-day formal comment period, public meetings, written comments, website, and e-mail.

Following publication of this NOI, the Forest Service will host a series of public meetings to (1) Establish multiple opportunities for the public to generate ideas, concerns, and alternatives, (2) present and clarify proposed changes to the Forest Plan; (3) describe ways that individuals can respond to this NOI; and (4) accept comments from the public on this proposal for revising the Forest Plan.

In the year 2002 we will work on alternative development and issue validation. We will have many types of public involvement including: public workshops, collaborative meetings, written comments, website, and e-mail.

In the year 2003 we will release our proposed revised Forest Plan and DEIS. We will have many types of public involvement including 90-day formal comment period, public meetings, and written comments.

During 2004 we will release the decision, final revised Forest Plan, EIS, and Record of Decision. We will have informational meetings to explain the decisions on the final Forest Plan.

We will provide the public with general notice on opportunities to participate through mailings, news releases, public meetings, and website (www.fs.fed.us/r9/shawnee). In addition to formal opportunities for public comment, we will consider comments received at any time throughout the revision process.

The Shawnee National Forest will host five open house meetings to (1) answer specific questions relative to the NOI and (2) provide information on how to comment on the NOI and to accept written comments from the public. All information shared by the Forest Service will be identical at each meeting. Following is a schedule of the meetings.

April 2, 2002: 2:00–7:00 p.m	Eddyville Community Center, Eddyville, IL 62928.
April 3, 2002: 2:00–7:00 p.m	Ralph Metcalf Federal Building, 77 West Jackson Blvd., Chicago, IL 60404.
April 4, 2002: 2:00–7:00 p.m	Fisher's Hotel and Conference Center, 2100 West Main St., Belleville, IL 62226.
April 10, 2002: 2:00–7:00 p.m	Executive Inn Evansville, 600 Walnut St., Evansville, IN 47708.
April 11, 2002: 2:00–7:00 p.m	Travelodge & Convention Center, 2600 West DeYoung, Marion, IL 62959.

Availability of Public Comment

Comments received in response to this solicitation, including names and addresses of those who comment, will be considered part of the public record for this proposed action and will be available for public inspection. Comments submitted anonymously will be accepted and considered. However, those who submit anonymous comments will not have standing to appeal the subsequent decisions under 36 CFR parts 215 or 217.

Additionally, pursuant to 7 CFR 1.27(d), any person may request the agency to withhold a submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality. Persons requesting such confidentiality should be aware that under FOIA, confidentiality may be granted in only very limited circumstances, such as to protect trade secrets.

The Forest Service will inform the requester of the agency's decision regarding the request for confidentiality and when the requester is denied, the agency will return the submission and notify the requester that the comments may be resubmitted with or without name and address within 90 days.

Release and Review of the DEIS

The DEIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public comment in 2003. At that time, the EPA will publish a Notice of Availability in the **Federal Register.** The comment period on the DEIS will be 90 days from the date the EPA publishes the Notice of Availability in the **Federal Register.**

The Forest Service believes it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of DEIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to reviewer's position and contentions [*Vermont Yankee Nuclear Poser Corp.* v. *NRDS, 435 U.S. 519, 553 (1978)*]. Also, environmental objections that could be raised at the DEIS stage but that are not raised until after completion of the final EIS may be waived or dismissed by the courts (City of Angoon v. Hodel, 803 F.2d 1016, 1022 (9th cir. 1986) and Wisconsin Heritages, Inc. v. Harris, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings it is very important that those interested in this proposed action participate by the close of the 90-day comment period so substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final EIS.

To assist the Federal Service in identifying and considering issues and concerns on the proposed action, comments on the DEIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the DEIS. Comments may also address the adequacy of the DEIS or the merits of the alternatives formulated and discussed in the statement. Reviews may wish to refer to the Council of Environmental Quality Regulations (*http://ceq.eh.doe.gov/nepa/nepanet.htm*) for implementing the procedural provision of he National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Dated: March 12, 2002.

Donald L. Meyer,

Acting Regional Forester.

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Forest Service

West Bear Vegetation Management Project; Wasatch-Cache National Forest, Summit County, UT

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare environmental impact statement.

SUMMARY: The Forest Supervisor of the Wasatch-Cache National Forest gives notice of the agency's intent to prepare an environmental impact statement on a proposal to manage forest vegetation in the Bear River drainage. The headwaters of this drainage are located on the west end of the Evanston Ranger District and are located in Utah about 35 miles south of Evanston, Wyoming in the Uinta Mountain Range. The portion of this drainage this is National Forest land and is being considered for treatment contains approximately 13,000 acres, primarily in the West Fork of the Bear River drainage.

The proposed action was developed to address some of the opportunities identified in the West Fork Bear River Assessment. It includes silvicultural treatments to restore forest age class diversity, species composition, and forest stand structure. These proposed treatments included the use of prescribed fire as well as timber harvest. New roads would be constructed to provide access for timber harvest in portions of the area. The volume of timber and amount of new road construction will likely vary among alternatives. The proposal also includes reconstruction or relocation of some poorly located existing roads and improvement or rehabilitation of some existing dispersed recreation sites in the area.

The purpose of and need for this proposal includes the following:

1. To restore forest age class diversity, species composition, and forest stand structure that were likely to have occurred historically in this drainage. Fire suppression and past timber harvesting have resulted in prevalence of mature and old forest in portions of the area, forest succession from seral species to subalpine fir, and dense forest stand conditions not consistent with the historic range of conditions. These conditions have adverse effects on habitat for some wildlife species as well increasing the risk of forest insect epidemics. The project would restore balance to forest conditions reducing the effects of past human activities on some species of wildlife and maintain or rector properly functioning conditions to forest lands in the area.

2. To reduce adverse environmental effects of the existing road system. Many of the roads in this drainage constructed or developed prior to the 1970's are poorly located and designed. Portions need to be relocated or redesigned to reduce sediment delivery to stream channels.

3. To provide timber for harvest from suitable lands contributing opportunities for industry and communities in Utah and Wyoming that are dependent on national forest timber for a portion of their supply and economy.

4. To improve and maintain or/rehabilitate existing dispersed campsites. Some of the dispersed campsites that have developed over the years are on poor locations with poor access roads. There is a need to harden or redesign some sites and to close and rehabilitate other sites and decommission improperly located access roads to reduce damage to soils, vegetation, and streams.

The Forest Service invites comments and suggestions on the scope of the analysis to be included in the draft environmental impact statement (DEIS). In addition, the Forest Service gives notice that it is beginning a full environmental analysis and decision-making process for this proposal so that interested or affected people may know how they can participate in the environmental analysis and contribute to the final decision. The first public "scoping" open house is scheduled for March 28, 2002, in Evanston, Wyoming, at the Historic Railroad Depot on front Street in Evanston, Wyoming, from 4:00 to 7:00 P.M. The purpose of this open house is to learn what issues members of the public or interested agencies believe are involved in the proposal. Knowledge of the issues will help establish the scope of the Forest Service environmental analysis and define the kind and range of alternatives to be considered. Forest Service officials wild describe and explain the proposed actions and the process of environmental analysis and disclosure to be followed in evaluating this proposal. The Forest Service welcomes any public comments on the proposal.

DATES: Comments concerning the scope of the analysis should be received in writing by April 19, 2002.

ADDRESSES: Send written comments to Stephen Ryberg, District Ranger, Evanston, WY 82930.

FOR FURTHER INFORMATION CONTACT: Larry Johnson, Environmental Planner, (307) 789–3194, or Kent O'Dell, Timber Management Coordinator, (307) 782–6555.

SUPPLEMENTARY INFORMATION: The proposal to manage forest vegetation in the Bear River drainage includes timber harvesting, prescribed burning, construction and reconstruction of roads, and hardening, rehabilitating or relocating dispersed campsites and their access roads. There are a variety of forest cover types in this drainage, including spruce/fir, mixed conifer, lodgepole pine, mixed conifer and aspen, and pure aspen. Proposed silvicultural prescriptions include selective management in the spruce/fir and mixed conifer, thinning and small patch cuts in the lodgepole pine, and conifer removal combined with prescribed fire in the mixed conifer/aspen and pure aspen forest cover types.

Proposed new road construction would be limited to that needed for access for management activities. Most of these roads would be closed or decommissioned following management activities. Several of these roads may be opened for public use to replace existing roads that would be decommissioned. There is no proposed road construction in inventoried roadless areas.

Proposed reconstruction or relocation of existing roads would emphasize improving design of the roads near stream crossings and relocating or improving drainage where the roads are near stream channels.

Proposed hardening, redesign, or relocation of dispersed campsites and their access roads would be emphasized where these sites or their access roads are resulting in soil erosion, especially near water bodies.

The decision to be made is whether to implement the proposed activities listed above.

The Wasatch-Cache National Forest Land and Resource Management Plan provides standards and guides for forest and road management. This direction is located in Chapter IV under the Whitney Management Area and under Forest-wide Standards and Guides. The proposed action is consistent with the Forest Plan.

A U.S. Army Corps of Engineers "404 Permit" for dredging and filling waters

2002
UMI

and/or wetlands will be required for any road work in stream channels or riparian areas. A determination of effects on Canada lynx will be required from the U.S. Fish and Wildlife Service. The Forest Service will request the U.S. Army Corps and U.S. Fish and Wildlife Service to cooperate in the environmental analysis, and may request cooperation from other State or Federal agencies.

The Deciding Official will be Tom Tidwell, Forest Supervisor, Wasatch-Cache National Forest, 8236 Federal Building, 125 South State Street, Salt Lake City, UT 84138.

A draft environmental impact statement is expected to be published in 2002, with public comment on the draft material requested for a period of 45 days, and completion of a final environmental impact statement later in 2002.

The 45 day public comment period on the draft environmental impact statement will commence on the day the Environmental Protection Agency publishes a "Notice of Availability" in the **Federal Register**.

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposed so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC, 435 U.S. 519, 553 (1978).* Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon* v. *Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.) Please note that comments you make on the draft environmental impact statement will be regarded as public information.

Dated: March 14, 2002.

Tom Tidwell,

Forest Supervisor.

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Opal Creek Scenic Recreation Area (SRA) Advisory Council; Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: An Opal Creek Scenic Recreation Area Advisory Council meeting will convene in Stayton, Oregon on Monday, April 1, 2002. The meeting is scheduled to begin at 6 p.m., and will conclude at approximately 8:30 p.m. The meeting will be held in the South Room of the Stayton Community Center located on 400 West Virginia Street in Stayton, Oregon.

The Opal Creek Wilderness and Opal Creek Scenic Recreation Area Act of 1996 (Opal Creek Act) (Pub. L. 104–208) directed the Secretary of Agriculture to establish the Opal Creek Scenic Recreation Area Advisory Council. The Advisory Council is comprised of thirteen members representing state, county and city governments, and representatives of various organizations, which include mining industry, environmental organizations, inholders in Opal Creek Scenic Recreation Area, economic development, Indian tribes, adjacent landowners and recreation interests. The council provides advice to the Secretary of Agriculture on preparation of a comprehensive Opal Creek Management Plan for the SRA, and consults on a periodic and regular basis on the management of the area. Tentative agenda items include the following topics:

Discussion of the decision for the Opal Creek SRA Environmental Analysis;
Transition of the Council membership in accordance with provisions of the Council Charter;
Creating a to-do list of future topics the Council will deal with;

A direct public comment period is tentatively scheduled to begin at 8 p.m. Time allotted for individual presentations will be limited to 3 minutes. Written comments are encouraged, particularly if the material cannot be presented within the time limits of the comment period. Written comments may be submitted prior to the April 1 meeting by sending them to Designated Federal Official Stephanie Phillips at the address given below.

FOR FURTHER INFORMATION CONTACT: For more information regarding this meeting, contact Designated Federal Official Stephanie Phillips; Willamette National Forest, Detroit Ranger District, HC 73 Box 320, Mill City, OR 97360; (503) 854–3366.

Dated: March 14, 2002.

Y. Robert Iwamoto,

Acting Forest Supervisor.

Oregon Coast Provincial Advisory Committee Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Oregon Coast provincial Advisory Committee (PAC) will meet on April 11, 2002. The meeting will begin at 9 a.m., in the Cape Perpetua Visitor's Center, 2400 Highway 101, Yachats, Oregon. Agenda items, with a theme of "aquatic issues," will include: FS/BLM process to establish priority watersheds; locations of priority watersheds; restoration results on the BLM Nestucca and FS Knowles Creek projects; pre-commercial thinning obstacles; barriers to upland restoration; local jobs created through thinning; and round robin information sharing. A fifteen-minute public comment period is scheduled at approximately 1:45 p.m. The committee welcomes the publics' written comments on committee business at any time. The meeting should end around 3 p.m. Interested citizens are encouraged to attend. Lunch will be provided.

FOR FURTHER INFORMATION CONTACT: Joni Quarnstrom, Public Affairs Specialist, Siuslaw National Forest, 541/750–7075 or write to Forest Supervisor, Siuslaw National Forest, P.O. Box 1148, Corvallis, OR 97339.

Dated: March 14, 2002.

Southwest Washington Provincial Advisory Committee Meeting Notice

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Southwest Washington Provincial Advisory Committee will meet on Wednesday, March 27, at the Gifford Pinchot National Forest Headquarters, located at 10600 NE 51st Circle, Vancouver, Washington. The meeting will begin at 9 a.m. and continue until 4 p.m. The purpose of the meeting is to learn about: (1) The possibilities of meth labs in the forest, (2) how special interest groups interpret mature and old growth protection and forest restoration, (3) an overview of the strategy for protection of the Columbia River and basin-wide habitat recovery, (4) the water quality restoration plan for the Wind and Upper Cispus Rivers, and (5) provide for a Public Open Forum. All Southwest Washington Provincial Advisory Committee meetings are open to the public. Interested citizens are encouraged to attend. The "open forum" provides opportunity for the public to bring issues, concerns, and discussion topics to the Advisory Committee. The "open forum" is scheduled as part of agenda item (3) for this meeting. Interested speakers will need to register prior to the open forum period. The committee welcomes the public's written comments on committee business at any time.

FOR FURTHER INFORMATION CONTACT: Direct questions regarding this meeting to Linda Turner, Public Affairs Specialist, at (360) 891–5195, or write Forest Headquarters Office, Gifford Pinchot National Forest, 10600 NE 51st Circle, Vancouver, WA 98682.

Dated: March 14, 2002.

Claire Lavendel,

Forest Supervisor.

Circular Welded Non-Alloy Steel Pipe from Mexico: Rescission of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Rescission of Antidumping Duty Administrative Review.

SUMMARY: On December 19, 2001, in response to a request made by Hysla, S.A. de C.V. ("Hylsa"), the Department of Commerce ("the Department") published in the Federal Register (66 FR 65470) a notice announcing the initiation of an administrative review of the antidumping duty order on circular welded non–alloy steel pipe from Mexico. The review period is November 1, 2000 to October 31, 2001. This review has now been rescinded because Hylsa has withdrawn its request for review.

EFFECTIVE DATE: March 20, 2002.

FOR FURTHER INFORMATION CONTACT: John Drury, Enforcement Group III, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Room 7866, Washington, D.C. 20230; telephone (202) 482–0195.

SUPPLEMENTARY INFORMATION:

The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act) are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are references to the provisions codified at 19 CFR Part 351 (2001).

Scope of the Review

The products covered by these orders are circular welded non–alloy steel pipes and tubes, of circular cross–section, not more than 406.4 millimeters (16 inches) in outside diameter, regardless of wall thickness, surface finish (black, galvanized, or painted), or end finish (plain end, beveled end, threaded, or threaded and coupled). These pipes and tubes are generally known as standard pipes and tubes and are intended for the low pressure conveyance of water, steam, natural gas, and other liquids and gases in plumbing and heating systems, air conditioning units, automatic sprinkler systems, and other related uses, and generally meet ASTM A–53 specifications. Standard pipe may also be used for light load–bearing applications, such as for fence tubing, and as structural pipe tubing used for framing and support members for reconstruction or load–bearing purposes in the construction, shipbuilding, trucking, farm equipment, and related industries. Unfinished conduit pipe is also included in these orders. All carbon steel pipes and tubes within the physical description outlined above are included within the scope of these orders, except line pipe, oil country tubular goods, boiler tubing, mechanical tubing, pipe and tube hollows for redraws, finished scaffolding, and finished conduit. Standard pipe that is dual or triple certified/stenciled that enters the United States as line pipe of a kind used for oil or gas pipelines is also not included in these orders.

Imports of the products covered by this order are currently classifiable under the following Harmonized Tariff Schedule (HTS) subheadings: 7306.30.10.00, 7306.30.50.25, 7306.30.50.32, 7306.30.50.40, 7306.30.50.55, 7306.30.50.85, and 7306.30.50.90. Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of these proceedings is dispositive.

Background

On November 30, 2001, Hylsa (a producer and exporter of subject merchandise) requested an administrative review of the antidumping duty order on circular welded non–alloy steel pipe from Mexico published in the Federal Register on November 2, 1992 (57 FR 49453). On December 17, 2001, hylsa withdrew its request for review. On December 19, 2001, the Department published in the Federal Register (66 FR 65470) a notice of "Initiation of Antidumping and Countervailing Duty Administrative Reviews" initiating the administrative review. The applicable regulation, 19 CFR 351.213(d)(1), states that if a party that requested an administrative review withdraws the request within 90 days of the publication of the notice of initiation of the requested review, the Secretary will rescind the review. Given that Hylsa was the only party to request the administrative review, and the withdrawal request is timely, we find it reasonable to accept the withdrawal request. Therefore, we are rescinding

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–875]

Notice of Initiation of Antidumping Duty Investigation: Non–Malleable Cast Iron Pipe Fittings from the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Initiation of Antidumping Duty Investigation.

EFFECTIVE DATE: March 20, 2002.

FOR FURTHER INFORMATION CONTACT: Ron Trentham or Paige Rivas at (202) 482–6320 and (202) 482–0651, respectively; Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230.

Initiation of Investigation

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930, as amended (the Act), by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations are references to the provisions codified at 19 CFR Part 351 (2001).

The Petition

On February 21, 2002, the Department received a petition filed in proper form by Anvil International, Inc., and Ward Manufacturing Inc. (collectively, the petitioners). The Department received information supplementing the petition on March 5, 2002 and March 11, 2002.

In accordance with section 732(b) of the Act, the petitioners allege that imports of non–malleable cast iron pipe fittings and ductile cast iron pipe fittings that have the same physical characteristics as non–malleable cast iron pipe fittings (pipe fittings) from the People's Republic of China (PRC) are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act, and that such imports are materially injuring, or are threatening to materially injure, an industry in the United States.

The Department finds that the petitioners filed this petition on behalf of the domestic industry because they are interested parties as defined in sections 771(9)(C) of the Act and have demonstrated sufficient industry support with respect to the antidumping investigation that they are requesting the Department to initiate (*see* the *Determination of Industry Support for the Petition* section below).

Scope of Investigation

For purposes of this investigation, the products covered are finished and unfinished non–malleable cast iron pipe fittings with an inside diameter ranging from 1/4 inch to 6 inches, whether threaded or un–threaded, regardless of industry or proprietary specifications. The subject fittings include elbows, ells, tees, crosses, and reducers as well as flanged fittings. These pipe fittings are also known as cast iron pipe fittings or gray iron pipe fittings. These cast iron pipe fittings are normally produced to ASTM A–126 and ASME B.16.4 specifications and are threaded to ASME B1.20.1 specifications. Most building codes require that these products are Underwriters Laboratories (UL) certified. The scope does not include cast iron soil pipe fittings or grooved fittings or grooved couplings.

Fittings that are made out of ductile iron that have the same physical characteristics as the gray or cast iron fittings subject to the scope above or which have the same physical characteristics and are produced to ASME B.16.3, ASME B.16.4, or ASTM A–395 specifications, threaded to ASME B1.20.1 specifications and UL certified, regardless of metallurgical differences between gray and ductile iron, are also included in the scope of this petition. These ductile fittings do not include grooved fittings or grooved couplings. Ductile cast iron fittings with mechanical joint ends (MJ), or Push On ends (PO), or flanged ends and produced to the American Water Works Association (AWWA) specifications–AWWA C110 or AWWA C153 are not included.

Imports of covered merchandise are classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers 7307.11.00.30, 7307.11.00.60, 7307.19.30.60 and 7307.19.30.85. HTSUS subheadings are provided for convenience and Customs purposes. The written description of the scope of this proceeding is dispositive.

During our review of the petition, we discussed the scope with the petitioners to ensure that it accurately reflects the product for which the domestic industry is seeking relief. Moreover, as discussed in the preamble to the Department's regulations, we are setting aside a period for parties to raise issues regarding product coverage. *See, Antidumping Duties; Countervailing Duties; Final Rule*, 62 FR 27295, 27323 (May 19, 1997). The Department encourages all parties to submit such comments within 20 days from the publication of this notice. Comments should be addressed to Import Administration's Central Records Unit at Room 1870, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. The scope comment period is intended to provide the Department with ample opportunity to consider all comments and consult with parties prior to the issuance of the preliminary determination.

Determination of Industry Support for the Petition

Section 771(4)(A) of the Act defines the "industry" as the producers of a domestic like product. Thus, to determine whether the petition has the requisite industry support, the statute directs the Department to look to producers and workers who produce the domestic like product. The United States International Trade Commission (ITC), which is responsible for determining whether "the domestic industry" has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both the Department and the ITC must apply the same statutory definition regarding domestic like product (see section 771(10) of the Act), they do so for different purposes and pursuant to their separate and distinct authority. In addition, the Department's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to the law.[1]

[1] See Algoma Steel Corp. Ltd., v. United States, 688 F. Supp. 639, 642–44 (CIT 1988); High Information Content Flat Panel Displays and

Section 771(10) of the Act defines the domestic like product as "a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title." Thus, the reference point from which the domestic like product analysis begins is "the article subject to an investigation," *i.e.*, the class or kind of merchandise to be investigated, which normally will be the scope as defined in the petition.

In this petition, the petitioners do not offer a definition of domestic like product distinct from the scope of these investigations. Thus, based on our analysis of the information presented to the Department by the petitioners, and the information obtained and received independently by the Department, we have determined that there is a single domestic like product, which is defined in the *Scope of Investigation* section above, and have analyzed industry support in terms of this domestic like product.

Section 732(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 732(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (1) at least 25 percent of the total production of the domestic like product; and (2) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Information contained in the petition demonstrates that the domestic producers or workers who support the petition account for over 50 percent of total production of the domestic like product. *See, Petition for Imposition of Antidumping Duties: Non–Malleable Cast Iron Pipe Fittings from the People's Republic of China (Pipe Fittings Petition)*, dated February 21, 2002, at page 3. Therefore, the domestic producers or workers who support the petitions account for at least 25 percent of the total production of the domestic like product, and the requirements of section 732(c)(4)(A)(i) are met. *See, Import Administration AD Investigation Checklist*, dated March 13, 2002 (*Initiation Checklist*) (public version on file in the Central Records Unit of the Department of Commerce, Room B–099). Furthermore, because the Department received no opposition to the petition, the domestic producers or workers who support the petition account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for or opposition to the petition. *See, Initiation Checklist.* Thus, the requirements of section 732(c)(4)(A)(ii) are met.

Accordingly, the Department determines that the petition was filed on behalf of the domestic industry within the meaning of section 732(b)(1) of the Act. *See, Initiation Checklist.*

Export Price and Normal Value

The following is a description of the allegation of sales at less than fair value upon which the Department has based its decision to initiate this investigation. The sources of data for the deductions and adjustments relating to U.S. price and factors of production (FOP) are detailed in the *Initiation Checklist.*

The anticipated period of investigation (POI) for the PRC, a non–market economy (NME) country, is July 1, 2001 through December 31, 2001. Regarding an investigation involving an NME country, the Department presumes, based on the extent of central government control in an NME, that a single dumping margin, should there be one, is appropriate for all NME exporters in the given country. *See, e.g., Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the PRC*, 59 FR 22585 (May 2, 1994). In the course of the investigation of pipe fittings from the PRC, all parties will have the opportunity to provide relevant information related to the issue of the PRC's status and the granting of separate rates to individual exporters.

Export Price

The petitioners identified the following three companies as producers and/or exporters of pipe fittings from the PRC: Eathu Casting & Forging Co., Ltd., GMS Pipe Fittings Industries, and ShenYang Metalcast Co., Ltd. To calculate export price (EP), the petitioners provided the average unit value (AUV) calculated from import statistics released by the Census Bureau. The petitioners calculated the AUV using the quantity and value of imports during the POI of pipe–fittings from the PRC, entered under HTSUS subheadings 7307.11.00.30 and 7307.11.00.60, the two HTSUS numbers covering non–malleable cast iron pipe fittings.

The petitioners calculated a net U.S. price by deducting from the AUV foreign inland freight. *See Initiation Checklist.*

Normal Value

The petitioners assert that the PRC is an NME country and no determination to the contrary has yet been made by the Department. In previous investigations, the Department has determined that the PRC is an NME. *See, Steel Concrete Reinforcing Bars from the People's Republic of China; Notice of Final Determination of Sales at Less Than Fair Value (Re–Bars from China)*, 66 FR 33522 (June 22, 2001), and *Notice of Final Determination of Sales at Less Than Fair Value: Foundry Coke Products from the People's Republic of China (Foundry Coke from China)*, 66 FR 39487 (July 31, 2001). In accordance with section 771(18)(C)(i) of the Act, the presumption of NME status remains in effect until revoked by the Department. The presumption of NME status for the PRC has not been revoked by the Department and, therefore, remains in effect for purposes of the initiation of this investigation. Because the PRC's status as an NME remains in effect, the petitioners determined the dumping margin using an FOP analysis.

For normal value (NV), the petitioners based the FOP, as defined by section 773(c)(3) of the Act, on the consumption rates of one U.S. pipe fittings producer for non–malleable cast iron pipe fittings. The petitioners assert that information regarding the Chinese producers' consumption rates is not available, and have therefore assumed, for purposes of the petition, that producers in the PRC use the same inputs in the same quantities as the petitioners use, except where a variance from the petitioners' cost model can be justified on the basis of available information. Based on the information provided by the petitioners, we believe that the petitioners' FOP methodology represents information reasonably available to the petitioners and is appropriate for purposes of initiating this investigation.

Pursuant to section 773(c) of the Act, the petitioners assert that India is the most appropriate surrogate country for the PRC, claiming that India is: (1) a market economy; (2) a significant producer of comparable merchandise; and (3) at a level of economic development comparable to the PRC in terms of per capita gross national product (GNP). Based on the information provided by the petitioners, we believe that the petitioners' use of India as a surrogate country is appropriate for purposes of initiating this investigation.

In accordance with section 773(c)(4) of the Act, the petitioners valued FOP, where possible, on reasonably available, public surrogate data from India. Raw materials were valued based on Indian import values, as published by *Monthly Statistics of the Foreign Trade of India* (*Indian Import Statistics*) for February

Display Glass Therefore from Japan: Final Determination; Rescission of Investigation and Partial Dismissal of Petition, 56 FR 32376, 32380–81 (July 16, 1991).

VOL
67
ISS
54
MR
20
2002
UMI

2001. Because these values are from a period preceding the POI, the petitioners inflated the value to December 2001 levels where appropriate, using the Indian Wholesale Prices Index (as published in the *International Financial Statistics* of the International Monetary Fund).

Labor was valued using the Department's regression–based wage rate for the PRC, in accordance with past Department practice. *See, Pipe Fittings Petition* at 14 and citations discussed therein. Electricity was valued using the 1997 Indian electricity prices for industry as published in the fourth quarter 2001 issue of *Energy Prices and Taxes*, published by the Organization for Economic Cooperation and Development's International Energy Agency. To inflate the price to December 2001 levels, the petitioners multiplied the computed amount by an inflation factor. *See, Pipe Fittings Petition* at 15 and 16.

Foundry coke was valued using Indian Import Statistics for February 2001. To inflate the price to December 2001 levels, the petitioners multiplied the computed amount by an inflation factor, and adjusted for price differences between U.S. foundry coke and blast furnace coke prices in the first quarter of 2001. *See, Pipe Fittings Petition* at 14 and 15.

We find the petitioners' calculation of foundry coke to be inappropriate because there is no evidence based on the actual Indian data that: (1) the data included the import value for both blast furnace coke and foundry coke, as claimed in the petition, and (2) the majority of Indian imports was of blast furnace coke. Accordingly, we have recalculated the surrogate value for foundry coke based on the figures in the *Indian Import Statistics* without any further adjustments.

The petitioners derived the surrogate value for natural gas from a price the Department utilized in the *Notice of Preliminary Determination of Sales at Less Than Fair Value: Certain Hot–Rolled Carbon Steel Flat Products From the People's Republic of China*, 66 FR 22183 (May 3, 2001). To convert to the unit of measurement used in the production factors of the U.S. surrogate, the petitioners multiplied the amount by 1,000. To inflate the price to December 2001 levels, the petitioners multiplied the computed amount by a U.S. inflation factor because it was denominated in U.S. dollars. *See, Pipe Fittings Petition* at 16. For overhead, depreciation, selling general and administrative (SG&A) expenses, the petitioners applied rates derived from the fiscal year financial statements as of December 31, 2000, of an Indian pipe fittings producer that the petitioners believe to produce iron and steel castings, including cast iron pipes and fittings. The Indian pipe fittings producer did not make any profits in both 2000 and 2001; therefore, the petitioners calculated the profit ratio using the financial statements of another Indian steel producer using the financial statements of that company as of March 31, 2001. *See, Pipe Fittings Petition* at 17. Based on the information provided by the petitioners, we believe that the surrogate values represent information reasonably available to the petitioners and are acceptable for purposes of initiating this investigation.

The petitioners did not include packing materials in its computation because it was unable to obtain information on this expense. The petitioners valued packing labor using the direct labor rate published on the Department's website. *See, Pipe Fittings Petition* at 17.

Based upon the comparison of EP to NV, the estimated dumping margin is 38.25 percent.

Fair Value Comparisons

Based on the data provided by the petitioners, there is reason to believe that imports of pipe fittings from the PRC are being, or are likely to be, sold at less than fair value.

Allegations and Evidence of Material Injury and Causation

The petitioners allege that the U.S. industry producing the domestic like product is being materially injured, or is threatened with material injury, by reason of imports of the subject merchandise sold at less than NV. The volume of imports from the PRC, using the latest available data, exceeded the statutory threshold of seven percent for a negligibility exclusion. See, section 771(24)(A)(ii) of the Act. The petitioners contend that the industry's injured condition is evidenced in the declining trends in operating income, decreased U.S. market share, and increasing Chinese imports. The allegations of injury and causation are supported by relevant evidence including U.S. Customs' import data, domestic consumption, and domestic production information. We have assessed the allegations and supporting evidence regarding material injury and causation, and have determined that these allegations are properly supported by accurate and adequate evidence and meet the statutory requirements for initiation. *See, Initiation Checklist.*

Initiation of the Antidumping Investigation

Based on our examination of the petition on pipe fittings, and the petitioners' response to our supplemental questionnaire clarifying the petition, and additional independent data, we find that the petition meets the requirements of section 732 of the Act. *See, Initiation Checklist.* Therefore, we are initiating the antidumping duty investigation to determine whether imports of pipe fittings from the PRC are being, or are likely to be, sold in the United States at less than fair value. Unless this deadline is extended, we will make our preliminary determination no later than 140 days after the date of this initiation.

Distribution of Copies of the Petition

In accordance with section 732(b)(3)(A) of the Act, a copy of the public version of the petition has been provided to the representatives of the government of the PRC. We will attempt to provide a copy of the public version of the petition to each exporter named in the petition, as appropriate.

International Trade Commission Notification

We have notified the ITC of our initiation, as required by section 732(d) of the Act.

Preliminary Determination by the ITC

The ITC will determine, no later than April 8, 2002 whether there is a reasonable indication that imports of pipe fittings from the PRC are causing material injury, or threatening to cause material injury, to a U.S. industry. A negative ITC determination will result in the investigation being terminated; otherwise, this investigation will proceed according to statutory and regulatory time limits.

This notice is issued and published pursuant to section 777(i) of the Act.

Dated: March 13, 2002.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

[FR Doc. 02–6739 Filed 3–19–02; 8:45 am]

BILLING CODE 3510–DS–S

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–847]

Persulfates From the People's Republic of China: Extension of Time Limit for Preliminary Results in Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review.

EFFECTIVE DATE: March 20, 2002.

FOR FURTHER INFORMATION CONTACT: Michael Strollo at (202) 482–0629, Office of AD/CVD Enforcement, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington DC 20230.

SUPPLEMENTARY INFORMATION:

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations are to 19 CFR part 351 (2001).

Background

On August 20, 2001, the Department published a notice of initiation of administrative review of the antidumping duty order on persulfates from the People's Republic of China. The period of review is July 1, 2000 through June 30, 2001. The review covers one exporter of the subject merchandise to the United States.

Pursuant to section 751(a)(3)(A) of the Act, the Department shall make a preliminary determination in an administrative review of an antidumping duty order within 245 days after the last day of the anniversary month of the date of publication of the order. The Act further provides, however, that the Department may extend the 245-day period to 365 days if it determines it is not practicable to complete the review within the foregoing time period. Due to the complexity of selecting surrogate values to value factors of production, the large numbers of the surrogate values, and the fact that the Department shall conduct verification in this proceeding, it is not practicable to complete this review within the time limit mandated by section 751(a)(3)(A) of the Act. Therefore, in accordance with section 751 (a)(3)(A) of the Act, we have fully extended the deadline until July 31, 2002.

Dated: March 13, 2002.

Richard W. Moreland,

Deputy Assistant Secretary for Import Administration.

International Trade Administration

Industry Sector and Functional Advisory Committees for Trade Policy Matters (ISACs and IFACs); Request for Nominations

AGENCY: International Trade Administration, Trade Development.

ACTION: Notice of charter renewal and opportunity to nominate candidates for vacancies on the ISACs and IFACs.

SUMMARY: On March 18, 2002, the Secretary of Commerce and the United States Trade Representative (USTR) renewed the charters of the 17 Industry Sector and four Industry Functional Advisory Committees on Trade Policy Matters for a two-year term to expire March 18, 2004. The Industry Sector and Functional Advisory Committees (ISACs and IFACs) advise the United States Trade Representative and the Secretary of Commerce on trade matters. There are currently opportunities for membership on each of these Committees, including opportunities to serve as environmental representative on three of the Committees: ISAC 3 (Chemicals and Allied Products), ISAC 10 (Lumber and Wood Products), and ISAC 12 (Paper and Paper Products). Nominations will be accepted for current vacancies and those that occur throughout the remainder of the charter term, which expires on March 18, 2004. In order to be considered for appointment to the ISACs and IFACs, a nominee must be a U.S. citizen who is not a full-time employee of a governmental entity, is not registered with the Department of Justice under the Foreign Agents Registration Act, and represents a U.S. entity that trades internationally or an association of such entities (an environmental nominee must represent a U.S. entity with an interest in environmental issues relevant to the work of these Committees). Priority will be given to manufacturing establishments and firms that are outside of the Washington, DC area. U.S.-based subsidiaries of foreign companies, non-government organizations (except environmental organizations applying to ISAC 3, ISAC 10, and ISAC 12), and academic institutions do not qualify for representation on a Committee.

Recruitment: Vacancies may occur throughout the charter period and new appointments are made on a rolling basis. Recruitment information is available on the International Trade Administration website at: *www.ita.doc.gov/icp*. Further inquiries may be directed to Ingrid V. Mitchem, Director, Industries Consultations Program, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Room 2015–B, Washington, DC 20230.

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act (5 U.S.C. appendix 2), the Secretary of Commerce (the Secretary) and the United States Trade Representative (USTR) have renewed the charters of seventeen ISACs and four IFACs. The Secretary and USTR welcome nominations for the Industry Sector Advisory Committees for Trade Policy Matters (ISACs) and the Industry Functional Advisory Committees for Trade Policy Matters (IFACs) listed below:

- Industry Sector Advisory Committees for Trade Policy Matters (ISAC) on:

Aerospace Equipment (ISAC 1);
Capital Goods (ISAC 2);
Chemicals and Allied Products (ISAC 3);
Consumer Goods (ISAC 4);
Electronics and Instrumentation (ISAC 5);
Energy (ISAC 6);
Ferrous Ores and Metals (ISAC 7);
Footwear, Leather, and Leather Products (ISAC 8);
Building Products and Other Materials (ISAC 9);
Lumber and Wood Products (ISAC 10);
Nonferrous Ores and Metals (ISAC 11);
Paper and Paper Products (ISAC 12);
Services (ISAC 13);
Small and Minority Business (ISAC 14);
Textiles and Apparel (ISAC 15);
Transportation, Construction, Mining, Agricultural Equipment (ISAC 16);
Wholesaling and Retailing (ISAC 17); and

- Industry Functional Advisory Committees on Trade Policy Matters on:

Customs (IFAC 1);
Standards (IFAC 2);
Intellectual Property Rights (IFAC 3); and
Electronic Commerce (IFAC 4).

Background

In section 135 of the Trade Act of 1974 (1974 Trade Act, 19 U.S.C. 2155), as amended, Congress established a private-sector advisory system to ensure that U.S. trade policy and trade negotiation objectives adequately reflect U.S. commercial and economic interests. Section 135(a)(1) directs the President to

> Seek information and advice from representative elements of the private sector and the non-federal governmental sector with respect to—
>
> (A) Negotiating objectives and bargaining positions before entering into a trade agreement under [title I of the Trade Act of 1974 and section 1102 of the Omnibus Trade and Competitiveness Act of 1988];
>
> (B) The operation of any trade agreement once entered into, including preparation for dispute settlement panel proceedings to which the United States is a party; and
>
> (C) Other matters arising in connection with the development, implementation, and administration of the trade policy of the United States * * *

Section 135(c)(2) of the 1974 Trade Act provides that—

> (2) The President shall establish such sectoral or functional advisory committees as may be appropriate. Such committees shall, insofar as is practicable, be representative of all industry, labor, agricultural, or service interests (including small business interests) in the sector or functional areas concerned. In organizing such committees, the United States Trade Representative and the Secretaries of Commerce, Labor, Agriculture, the Treasury, or other executive departments, as appropriate, shall—
>
> (A) Consult with interested private organizations; and
>
> (B) Take into account such factors as—
>
> (i) patterns of actual and potential competition between United States industry and agriculture and foreign enterprise in international trade,
>
> (ii) the character of the non-tariff barriers and other distortions affecting such competition,
>
> (iii) the necessity for reasonable limits on the number of such advisory committees,
>
> (iv) the necessity that each committee be reasonably limited in size, and
>
> (v) in the case of each sectoral committee, that the product lines covered by each committee be reasonably related.

Pursuant to this provision, Commerce and USTR have established and co-chair seventeen Industry Sector Advisory Committees (ISACs) and four Industry Functional Advisory Committees (IFACs). The Committees' efforts have resulted in strengthening U.S. negotiating positions by enabling the United States to display a united front when it negotiates trade agreements with other nations. Committees meet an average of four times a year in Washington, DC. Members serve without compensation and are responsible for all expenses incurred in attending Committee meetings.

The Secretary of Commerce and the USTR co-chair the seventeen ISACs and IFACs.

Functions

The duties of the ISACs and IFACs are to provide the President with advice on objectives and bargaining positions for multilateral trade negotiations, bilateral trade negotiations, and other trade-related matters. The Committees provide bipartisan, industry input in the development of trade policy objectives. The Committees' efforts result in strengthening the U.S. negotiating position by enabling the United States to display a united front when it negotiates trade agreements with other nations.

The ISACs provide advice and information on issues that affect specific sectors of U.S. industry. The ISACs address market-access problems; barriers to trade; tariff levels; discriminatory foreign procurement practices; information, marketing, and advocacy needs of their sector; and other important trade issues.

The IFACs focus on cross-cutting issues that affect all industry sectors, such as customs matters, product standards, and intellectual property rights. Other functional issues, such as government procurement and subsidies, are handled in ad hoc meetings. Each ISAC may also select a member to serve on each IFAC so that a broad range of industry perspectives is represented.

Committees meet an average of four times a year, in Washington, DC. Members are responsible for all travel expenses incurred to attend the meetings.

Membership

ISAC and IFAC members are appointed jointly by the Secretary of Commerce and the USTR. Appointments are made at the rechartering of each Committee and periodically throughout the two-year charter period. Members serve at the discretion of the Secretary and USTR. Appointments to an ISAC or IFAC expire at the end of the Committee's charter. However, members may be re-appointed, should the Committee's charter be renewed, if the member proves to work effectively with the committee and his/her participation is still needed.

Each Committee is made up of approximately 30–50 members, based on the charter of each Committee. Each Committee elects a chairperson from the membership of the Committee.

Eligibility

Eligibility for membership on any Committee is limited to U.S. citizens who are not full-time employees of a governmental entity, are not registered with the Department of Justice under the Foreign Agents Registration Act, and represent a U.S. entity that (a) is directly engaged in the import or export of goods or that sells its services abroad, (b) is an association of such entities, or (c) with respect to environmental representatives serving on ISACs 3, 10 or 12, has an interest in environmental issues relevant to the work of the Committee. For purposes of the preceding sentence, a "U. S. entity" is an organization incorporated in the United States (or if unincorporated, having its headquarters in the United States:

(1) That is controlled by U.S. citizens or by another U.S. entity. An entity is not a U.S. entity if more than 50 percent of its Board of Directors or membership is made up of non-U.S. citizens. If the nominee is to represent an organization more than 10 percent of whose Board of Directors or membership is made up of non-U.S. citizens, or non-U.S. entities, the nominee must demonstrate at the time of nomination that this non-U.S. interest does not constitute control and will not adversely affect his or her ability to serve as a trade advisor to the United States; and

(2) At least 50 percent of whose annual revenue is attributable to non-governmental, U.S. sources.

Nominees are considered based upon their ability to carry out the goals of section 135 of the Trade Act of 1974, as amended. Secondary criteria are ensuring that the Committees are balanced in terms of points of view, demographics, geography, and company size. Appointments to all ISACs and IFACs are made without regard to political affiliation.

Application Procedures

Requests for applications should be sent to the Director of the Industry Consultations Program, U.S. Department of Commerce, 14th and Constitution Avenue, NW, Room 2015–B, Washington, DC 20230.

This notice is issued under the Federal Advisory Committee Act (5 U.S.C., app. 2) and 21 CFR part 14 relating to advisory committees.

Dated: March 13, 2002.

Linda M. Conlin,

Assistant Secretary for Trade Development.

[FR Doc. 02–6660 Filed 3–19–02; 8:45 am]

BILLING CODE 3510–DR–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[Docket No. 020213030–2030–01; I.D. No. 012202C]

Announcement of Funding Opportunity to Submit Proposals for the Monitoring and Event Response for Harmful Algal Blooms (MERHAB) Program

AGENCY: Center for Sponsored Coastal Ocean Research/Coastal Ocean Program (CSCOR/COP), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of funding availability for financial assistance for project grants and cooperative agreements.

SUMMARY: The purpose of this document is to advise the public that CSCOR/COP is soliciting proposals for two types of projects: targeted research and regional intensive monitoring.

CSCOR/COP is soliciting targeted research proposals for one to three years of research and development of tools, approaches and technologies that could be included as routine components of existing Harmful Algal Bloom (HAB) monitoring programs. CSCOR/COP is also soliciting proposals from regional multi-investigator partnerships of one to five years for intensive monitoring of HABs that build the capacity of existing local, state, tribal, or regional coastal monitoring programs to provide early warning of HAB events to coastal communities and increase regional ability to rapidly respond to HAB events. Funding is contingent upon the availability of Federal appropriations. Projects funded under this announcement are anticipated to have a September 1, 2002, start date.

DATES: The deadline for receipt of proposals at the CSCOR/COP office is 3 p.m., e.s.t., April 25, 2002. Note that late-arriving applications provided to a delivery service on or before April 24, 2002, with delivery guaranteed before 3 p.m., e.s.t., on April 25, 2002, will be accepted for review if the applicant can document that the application was provided to the delivery service with delivery to the address listed below guaranteed prior to the specified closing date and time and, in any event, the proposals are received in the CSCOR/COP office by 3 p.m. e.s.t., no later than two business days following the closing date.

ADDRESSES: Submit the original and 19 copies of your proposal to (MERHAB02) Center for Sponsored Coastal Ocean Research/Coastal Ocean Program (N/SCI2), SSMC No. 4, 8th Floor, Station 8243, 1305 East-West Highway, Silver Spring, MD 20910. NOAA and Standard Form Applications with instructions are accessible on the CSCOR/COP Internet site http://www.cop.noaa.gov under the COP Grants Information Section, Part D, Application Forms for Initial Proposal Submission. For application forms, see Budget and

Application forms section. Forms may be viewed and, in most cases, filled in by computer. All forms must be printed, completed, and mailed to CSCOR/COP with original signatures. If you are unable to access this information, you may call CSCOR/COP at 301–713–3338 to leave a mailing request.

FOR FURTHER INFORMATION CONTACT:

Technical Information. Marc Suddleson, MERHAB 2002 Program Manager, CSCOR/COP, 301–713–3338/ext 162, Internet: marc.suddleson@noaa.gov

Business Management Information. Leslie McDonald, COP Grants Administrator, 301–713–3338/ext 155, Internet: Leslie.McDonald@noaa.gov

SUPPLEMENTARY INFORMATION: The following web sites furnish supplementary information from reports dealing with harmful algal blooms: Boesch et.al Feb 1997, Harmful Algal Blooms in Coastal Waters: Options for Prevention, Control and Mitigation, Silver Spring, MD at http://www.cop.noaa.gov/pubs/das/das10.html; and Anderson *et.al.* Sept 2000, Estimated Annual Economic Impact from Harmful Algal Blooms (HABs) in the U.S. WHOI at http://www.redtide.whoi.edu/hab pertinentinfo /Economics—Report.pdf).

Information on the Harmful Algal Bloom and Hypoxia Research and Control Act and the 2000 National Assessment of HABs in U.S. Waters, National Science and Technology Council Committee on Environment and Natural Resources (CENR), Washington, DC, can be located at http://www.habhrca.noaa.gov.

Details about ongoing MERHAB projects currently funded by the CSCOR/COP MERHAB Program are found at

http://www.cop.noaa.gov/Fact—Sheets/MERHAB.htm. Hard copies of these resources can be obtained from the CSCOR/COP office.

Background

Program Description

For complete program description and other requirements for CSCOR/COP, see the General Grant Administration Terms and Conditions annual notification in the **Federal Register** (66 FR 63019, December 4, 2001) and at the CSCOR/COP home page.

In spite of a growing list of affected resources and coastal communities, our ability to prevent, control, and mitigate the impacts of HABs remains limited. Acting on the findings of a 1996 NOAA and DOI Report, Harmful Algal Blooms in Coastal Waters: Options for Prevention, Control and Mitigation, the research agenda of the Ecology and Oceanography of Harmful Algal Bloom (ECOHAB) program for the past five years has focused on building a scientific understanding about the cause and behavior of HABs. ECOHAB continues to support research that develops understandings of the linkages between the biology, ecology, physiology, and behavior of harmful species and the physics, chemistry, bathymetry, and meteorology of the surrounding environment. ECOHAB research is developing the capabilities to forecast bloom landfall, evaluate toxicity, and provide mitigation strategies that might ameliorate the impact of blooms along U.S. coasts. ECOHAB is also producing new state-of-the art HAB technologies, such as detection assays and molecular probes.

With the maturation of ECOHAB and other HAB research programs, more effort is needed to adapt their research products into regionally and locally tested tools that can be used to prevent, control, or mitigate the impact of HABs. The 1996 NOAA and DOI Report noted that knowledge about the basic information on the causes and behavior of HABs would ultimately lead to the development of prevention, control, and mitigation (PCM) strategies. The plan called for Federal and state agencies with responsibilities for resource management, environmental protection, and public health to support PCM research.

While prevention of HABs is the preferred management option, effort to enhance the current abilities to reduce the incidence and extent of harmful algal blooms (before they begin) requires additional research and face legislative hurdles. For example, more research is needed to determine whether a cause-and-effect relationship exists between increased pollution and nutrient loading and an incidence of some HAB species (e.g., Pfiesteria, Pseudo-nitzchia, cyanobacteria). Further, a national regulatory strategy to effectively control polluted run off and nutrient loading is under development; but more research is required to educate decision makers.

Efforts to control HABs are also being explored, but these too face serious scientific and policy hurdles. Attempts to use chemicals to directly control HAB

VOL
67
ISS
54
MR
20
2002
UMI

cells encounter many logistical problems and environmental objections. Chemicals are likely to be nonspecific, indiscriminately targeting all co-occurring algae and other organisms along with the target algal species. Chemical application and other options, such as flocculants or biological controls need additional research to determine their wider impacts to the coastal ecosystem.

Strategies to mitigate or minimize human health risks, ecosystem damage, fisheries losses, and declines in tourism due to algal blooms are currently the best option for coastal management of the HAB problem. Many different types of actions can be taken to mitigate the impact of HABs, including forecasting bloom development and movement, monitoring HAB cells and toxins, and responding rapidly to HAB events.

Monitoring combined with rapid response to HAB events has been identified as the most effective way to mitigate the impact of HABs (CENR . 2000). A number of coastal states have existing HAB monitoring programs designed to prevent human illness from shellfish poisoning syndromes and to monitor the environment for blooms and forecast their development and movement. State shellfish monitoring programs detect toxins in different fisheries species either to provide advance warning of outbreaks or to delineate areas that require harvest restrictions. State environmental monitoring programs for plankton and fish in coastal estuaries and bays provide early warning of blooms.

Many states supplement their HAB monitoring activities with rapid response teams that are deployed to assess suspected HAB events. HABs have the potential to develop rapidly, and often the observable event may be short-lived. Rapid response is essential to ensure that the appropriate sampling is done to determine whether a HAB event is in progress. Regions also have established communication networks to distribute information about outbreaks to researchers, managers, and the public. Providing rapid and accurate information is critical to assess the risks to resources and human health and to avoid public misconceptions about the safety of coastal resources. Such misconceptions have caused severe economic impacts to regions not directly affected by HAB events. A study completed by Woods Hole Oceanographic Institute in September 2000 calculated the total estimated annual cost from HABs on public health, commercial fisheries, recreation and tourism, and monitoring and management in the United States to be $49 million. This estimate was noted by the authors to be highly conservative and sensitive to single events that equal or exceed the total estimated economic impact.

Many coastal communities experiencing HABs are not covered by regular public or private monitoring programs for HABs, and many do not receive adequate information about outbreaks. State monitoring programs have not kept pace with the expansion of the HABs problem. Tight state budgets and the need to monitor for more toxins in more organisms over larger areas have left many monitoring programs underfunded. Further, support of state monitoring efforts through the Federal Clean Water Program has not specifically addressed the need for increased HAB monitoring. The problem is exacerbated by managers' inability to quantify the benefits to human health, commercial fisheries, recreation and tourism of controlling HABs and to compare these to the costs of mitigation strategies.

CSCOR/COP Program Interest

Through the MERHAB program, CSCOR/COP intends to build capabilities of local, state, tribal, and private sector for regular and intensive measurement of HAB parameters. This will make existing monitoring programs more efficient while providing better coverage in time and space. MERHAB will enable rigorous field testing of state-of-the-art technology through targeted projects and will incorporate the new methods of detecting and tracking HABs into existing monitoring programs through regional, intensive monitoring projects. MERHAB will also develop event-response capabilities within affected regions to ensure trained and equipped personnel are able to mobilize quickly, conduct appropriate sampling and testing, and communicate effectively during HAB events.

With faster, less expensive, and more reliable detection methods for HAB cells and toxins, and stronger mechanisms in place to respond to outbreaks, programs will be better able to mitigate the impact of HABs on vital resources and will protect public health. As a result, managers will be able to better address the expanding HAB problems facing their coastal regions and, therefore, they will be better positioned to request long-term support from Federal and state agencies or from other funding entities.

Goal

The primary goal of the MERHAB program is to incorporate products generated from past or ongoing HAB research programs into operational components of existing monitoring programs in HAB-impacted coastal regions. MERHAB is not intended to provide long-term support for routine monitoring efforts.

A. MERHAB-Targeted Research Projects

(1) Objectives: (a) Develop a technology that will enhance HAB monitoring activities in U.S. coastal waters; and (b) incorporate that technology into existing HAB monitoring programs.

(2) Characteristics: (a) Should rigorously field-test new technologies to detect algal species, toxin, or toxicity and/or monitor the environmental conditions that support HABs. New technologies may include, but are not limited to, rapid field assays for shellfish, improved diagnostic techniques for in situ detection of HAB cells, and remote sensing technology to help target sampling efforts; (b) May be led either by an individual or by small investigative team; and (c) Must address specified research needs of the HAB community.

Investigators should include in their work plans efforts to build support for the incorporation of technology into one or more existing HAB monitoring programs. (See Part II: Further Supplementary Information Section (11) "Project Funding Priorities.")

B. MERHAB-regional, Intensive Monitoring Projects

(1) Objectives: (a) Develop new or increase existing regional capabilities for HAB monitoring; (b) Incorporate new tools for HAB measurement into existing monitoring efforts; (c) Include local, state, regional, Federal, or non-governmental entities as active partners in identifying environmental measurements and their importance to managing coastal resources and protecting human health (i.e. generating public advisories) in the area; (d) Determine long-term local and regional support that will assume financial responsibility for resulting enhancements in HAB monitoring once NOAA support has ended; and (e) Develop local and/or regional capabilities to respond to HAB events.

(2) Characteristics: (a) Include a suite of annual studies and involve a multi-disciplinary, collaborative team of investigators. The team should represent groups with strong interests in improved HAB monitoring, including, but not limited to, the natural and social science research community, existing monitoring programs, communities dependent upon affected resources, industry, and non-profit organizations; (b) Provide evidence that local, state, tribal, regional, and Federal representatives were consulted in the development of the proposal to ensure appropriate economic, regulatory, and management issues are addressed; (c) Include a plan for continued consultation with these representatives to facilitate the incorporation of research results into existing monitoring programs and to identify means to continue HAB monitoring efforts after MERHAB project funding has ended; (d) Form a management team with a designated chairperson serving as the main point of contact with the MERHAB Program Manager.

In similar CSCOR research programs (i.e. ECOHAB), management teams provide strong leadership and solid partnerships among principal investigators and collaborators. Teams serve to interpret results collected from the expanded suite of pilot studies, permitting acceptance or rejection of the approaches, techniques, or tools explored during each annual budget period. MERHAB management teams will also analyze results for application under local conditions and assess effectiveness under specific constraints so that application to other coastal systems or species may be determined.

Shared Research Project Characteristics

The following characteristics are shared by both MERHAB-Targeted projects and MERHAB-regional, intensive monitoring projects.

(1) Project results will be distributed to stakeholders via scientific, peer-reviewed articles, synthesis documents, briefings, electronic web sites, and any other means defined by the proposers.

(2) Project proposals should clearly identify a timetable of accomplishments and major program elements that will lead to specific interim and final assessments of applicability and effectiveness of a number of monitoring approaches.

Continuation of funding will be contingent upon the determination by the awarding agency that the selected project is on course to provide both interim and final products that will improve HAB monitoring capabilities in the local or national coastal environment impacted by HABs.

Expected Products and Outcomes

A. MERHAB-Targeted Projects

(1) Development and testing of new HAB monitoring tools;

(2) Demonstration of effective application of technology in an existing monitoring program; and

(3) Comprehensive data analysis and integration that advances the state of science and management (i.e. technical reports, peer-reviewed publications, databases, numerical and conceptual models, etc.).

B. MERHAB-regional, Intensive Monitoring Projects

(1) Include regional stakeholder input and participation through means that may include, but are not limited to, annual workshops, management and technical advisory committees that involve a broad spectrum of regional interests and training in use of new technology;

(2) Provide recommendations to management of the parameters to be measured in a region and the types of instruments that should be developed or adapted into existing monitoring programs;

(3) Deploy new HAB monitoring tools in existing monitoring programs;

(4) Conduct comprehensive data analysis and integration that advances the state of science and management. (i.e. technical reports, peer-reviewed publications, data bases, numerical and conceptual models; regional case studies with explicit applications to important management issues; risk analysis of management scenarios; regional economic valuation of direct and indirect costs associated with HAB events; and region-specific management recommendations based on study results);

(5) Accept commitments from one or more local, state, tribal, regional, or Federal organizations for continued, long-term support of expanding HAB monitoring capabilities;

(6) Develop real-time, scientific response capability during HAB outbreaks for the region that includes, but is not limited to, the use of local experts, establishing local academic-government- NGO-private partnerships for providing immediate analytical and sampling capacities, and expanding local abilities for transferring samples to analytical services outside the region; and

(7) Outreach to improve awareness of HAB outbreaks and their environmental and societal costs, and to mitigate their impact on vital natural resources, public health and local/regional economies.

Part I: Schedule and Proposal Submission

This document requests full proposals only. The provisions for proposal preparation provided here are mandatory. Proposals received after the published deadline or proposals that deviate from the prescribed format will be returned to the sender without further consideration. Information regarding this announcement, additional background information, and required Federal forms are available on the COP home page.

Full Proposals

Applications submitted in response to this announcement require an original proposal and 19 proposal copies at time of submission. This includes color or high-resolution graphics, unusually sized materials, or otherwise unusual materials submitted as part of the proposal. For color graphics, submit either color originals or color copies. The stated requirements for the number of proposal copies provide for a timely review process. Facsimile transmissions and electronic mail submission of full proposals will not be accepted.

Required Elements

All recipients must follow the instructions in the preparation of the CSCOR/COP application forms included in Part II: Further Supplementary Information, (10) Application forms and kit. Each proposal must also include the following nine elements or it will be returned to sender without further consideration:

(1) *Standard Form 424.* At time of proposal submission, all applicants shall submit the Standard Form, SF–424 (Rev 7–97), "Application for Federal Assistance," to indicate the total amount of funding proposed for the whole project period. This form is to be the cover page for the original proposal and all requested copies. Multi-institutional proposals must include signed SF–424 forms from all institutions requesting funding.

(2) *Signed summary title page.* The title page should be signed by the Principal Investigator (PI). The Summary Title page identifies the project's title starting with the acronym MERHAB 2002, a short title (less than 50 characters), the lead PI's name and affiliation, and complete address, phone, FAX, and E-mail information. The requested budget for each fiscal year should be included on the Summary Title page. Multi-investigator proposals must include the names and affiliations of each investigator on the title page. Multi-institution proposals must also identify the lead investigator from each fiscal year for each institution and the requested funding for each fiscal year for each institution on the title page, but no signatures are required on the title page from the additional institutions. Lead investigator and separate budget information is not requested on the title page for institutions that are proposed to receive

VOL 67 ISS 54 MR 20 2002 UMI

funds through a subcontract to the lead institution.

(3) *One-page abstract/project summary.* The Project Summary (Abstract) Form, submitted with the application, must include summaries of the problem, rationale, scientific objectives and/or hypotheses to be tested, and a brief summary of work to be completed. The prescribed CSCOR/COP format for the Project Summary Form can be found on the CSCOR/COP Internet site under the CSCOR/COP Grants Information section, Part D.

The summary should appear on a separate page, headed with the proposal title, institution(s), investigator(s), total proposed cost, and budget period. It should be written in the third person. The summary is used to help compare proposals quickly and allows the respondents to summarize these key points in their own words.

(4) *Statement of work/project description.* The statement of the proposed work/project must be complete and include: identification of the problem, scientific objectives, proposed methodology, relevance to the MERHAB 2002 program goals, and its scientific priorities. For MERHAB-Targeted project proposals, the project description (including relevant results from prior support) should not exceed 15 pages. For MERHAB-regional, intensive monitoring project proposals, the project description (including relevant results from prior support) should not exceed 20 pages. Both page limits are inclusive of figures, other visual materials, and letters of endorsement, but are exclusive of references, a milestone chart, and letters of collaboration from unfunded collaborators.

This section should clearly identify project management with a description of the functions of each PI within a team. It should provide a full scientific justification for the research, rather than simply reiterating justifications presented in this document. It should also include:

(a) The objective for the period of proposed work and its expected significance;

(b) The relation to the present state of knowledge in the field and relation to previous work and work in progress by the proposing principal investigator(s);

(c) A discussion of how the proposed project lends value to the program goals;

(d) Potential coordination with other investigators; and,

(5) *References cited.* Reference information is required. Each reference must include the names of all authors in the same sequence they appear in the publications, the article title, volume number, page numbers, and year of publications. While there is no established page limitation, this section should include bibliographic citations only and should not be used to provide parenthetical information outside the 15–page MERHAB-Targeted project or the 20–page MERHAB-regional project descriptions.

(6) *Milestone chart.* It should provide time lines of major tasks covering the duration of the proposed project.

(7) *Budget and Application Forms* Both NOAA and CSCOR/COP-specific application forms may be obtained at the CSCOR/COP Grants website. Forms may be viewed and, in most cases, filled in by computer. All forms must be printed, completed, and mailed to CSCOR/COP. If applicants are unable to access this information, they may call the CSCOR/COP grants administrator previously listed in the section entitled **FOR FURTHER INFORMATION CONTACT**. At time of proposal submission, all applicants must submit the Standard Form, SF–424 (Rev 7–97) Application for Federal Assistance, to indicate the total amount of funding proposed for the whole project period. Applicants must also submit a COP Summary Proposal Budget Form for each fiscal year increment. Multi-institution proposals must include a Summary Proposal Budget Form for each institution. Use of this budget form will provide for a detailed annual budget and for the level of detail required by the CSCOR/COP program staff to evaluate the effort to be invested by investigators and staff on a specific project. The COP budget form is compatible with forms in use by other agencies that participate in joint projects with CSCOR/COP and can be found on the CSCOR/COP home page under COP Grants Information, Part D. All applications must include a budget narrative and a justification to support all proposed budget categories. The SF–424A, Budget Information (Non-Construction) Form, will be requested only from those applicants subsequently recommended for award.

Ship time needs should be clearly identified in the proposed budget. The investigator is responsible for requesting ship time and for meeting all requirements to ensure the availability of requested ship time. Copies of relevant ship time request forms should be included with the proposal.

(8) *Biographical sketch.* With each proposal, the following must be included: abbreviated curriculum vitae, up to two pages per investigator; a list of up to five publications most closely related to the proposed project and up to five other significant publications; and a list of all persons (including their organizational affiliation), in alphabetical order, who have collaborated on a project, book, article, or paper within the last 48 months must be included. If no collaborators exist this should be so indicated. Students, post-doctoral associates, and graduate and postgraduate advisors of the PI should also be disclosed. This information is used to help identify potential conflicts of interest or bias in the selection of reviewers.

(9) *Proposal format and assembly.* The original proposal should be clamped in the upper left-hand corner, but left unbound. The 19 additional copies can be stapled in the upper left-hand corner or bound on the left edge. The page margin must be one inch (2.5 cm) at the top, bottom, left, and right, and the typeface standard 12–point size must be clear and easily legible. Proposals should be single spaced.

Part II: Further Supplementary Information

(1) *Program authorities.* For a list of all program authorities for the Coastal Ocean Program, see General Grant Administration Terms and Conditions of the Coastal Ocean Program published in the **Federal Register** (66 FR 63019, December 4, 2001) and at the CSCOR/COP home page. Specific authority cited for this announcement is 16 U.S.C. 1442 and Pub.L. 105–383, title VI, Nov. 13, 1998, 112 Stat. 3447.

(2) *Catalog of Federal Domestic Assistance (CFDA) number.* The CFDA number for the Coastal Ocean Program is 11.478.

(3) *Program description.* For complete CSCOR/COP program descriptions, see General Grant Administration Terms and Conditions of the Coastal Ocean Program published in the **Federal Register** (66 FR 63019, December 4, 2001).

(4) *Funding availability.* Funding is contingent upon receipt of fiscal years 2002 - 2006 Federal appropriations. Approximately $2,000,000 per fiscal year will be available for supporting studies proposed by submissions to this announcement. Support in out years after FY 2002 is contingent upon the availability of funds. It is anticipated that three to five MERHAB-Targeted research projects will be funded at approximately $100,000 per year for up to three years and that two to three MERHAB-regional, intensive monitoring proposals will be funded at approximately $600,000 per year for up to five years.

If an application is selected for funding, NOAA has no obligation to provide any additional prospective

funding in connection with that award in subsequent years. Continuation of an award to increase funding or extend the period of performance is based on satisfactory performance and is at the total discretion of the funding agency. Priority for these funds will be given to proposals that promote balanced coverage of the science objectives stated under this announcement.

Publication of this document does not obligate the CSCOR/COP to any specific award or to obligate any part of the entire amount of funds available. Recipients and subrecipients are subject to all Federal laws and agency policies, regulations, and procedures applicable to Federal financial assistance awards.

(5) *Matching requirements.* None.

(6) *Type of funding instrument.* Either project grants or cooperative agreements will be used for non-Federal applicants. Interagency transfer agreements or other appropriate mechanisms other than project grants or cooperative agreements will be used for Federal applicants.

(7) *Eligibility criteria.* For complete eligibility criteria for the CSCOR/COP, see CSCOR/COP's General Grant Administration Terms and Conditions annual document in the **Federal Register** (66 FR 63019, December 4, 2001) and the CSCOR/COP home page. Eligible applicants are institutions of higher education, not-for-profit institutions, state, local and Indian tribal governments and Federal agencies. CSCOR/COP will accept proposals that include foreign researchers as collaborators with researchers who are affiliated with a U.S. academic institution, Federal agency, or other non-profit organization.

Applications from non-Federal and Federal applicants will be competed against each other. Proposals selected for funding from non-Federal applicants will be funded through a project grant or cooperative agreement under the terms of this notice. Proposals from NOAA employees selected for funding shall be effected by an intra-agency fund transfer. Proposals selected for funding from a non-NOAA Federal agency will be funded through an inter-agency transfer.

NOTE: Before non-NOAA Federal applicants may be funded, they must demonstrate that they have legal authority to receive funds from another Federal agency in excess of their appropriation. Because this announcement is not proposing to procure goods or services from applicants, the Economy Act (31 U.S.C. 1535) is not an appropriate legal basis.

(8) *Award period.* Full proposals for targeted projects can cover a project period of up to three years, and full proposals for regional, intensive monitoring projects can cover a project period of up to five years. Multi-year project period funding may be funded incrementally on an annual basis, but, once awarded, multi-year projects will not compete for funding in subsequent years. Each annual award shall require an Implementation Plan and statement of work that can be easily divided into annual increments of meaningful work representing solid accomplishments (if prospective funding is not made available, or is discontinued).

(9) *Indirect costs.* Regardless of any approved indirect cost rate applicable to the award, the maximum dollar amount of allocable indirect costs for which DOC will reimburse the recipient shall be the lesser of: (a) the line item amount for the Federal share of indirect costs contained in the approved budget of the award; or (b) the Federal share of the total allocable indirect costs of the award based on the indirect cost rate approved by a cognizant or oversight Federal agency and current at the time the cost was incurred, provided the rate is approved on or before the award end date.

(10) *Application forms and kit.* For complete information on application forms for the CSCOR/COP, see CSCOR/COP's annual General Grant Administration Terms and Conditions Document in the **Federal Register** (66 FR 63019, December 4, 2001) at the CSCOR/COP home page and the information given under Required Elements, paragraph (7) Budget.

(11) *Project funding priorities.* For description of project funding priorities, see CSCOR/COP's annual General Grant Administration Terms and Conditions Document in the **Federal Register** (66 FR 63019, December 4, 2001) and the CSCOR/COP home page.

(12) *Evaluation criteria.* For complete information on evaluation criteria, see CSCOR/COP's annual General Grant Administration Terms and Condition Document in the **Federal Register** (66 FR 63019, December 4, 2001) and the CSCOR/COP home page.

(13) *Selection procedures.* For complete information on selection procedures, see CSCOR/COP's annual General Grant Administration Terms and Conditions Document in the **Federal Register** (66 FR 63019, December 4, 2001) and the CSCOR/COP home page. All proposals received under this specific Document will be evaluated and ranked individually in accordance with the assigned weights of the above evaluation criteria by independent peer mail review and/or panel review. No consensus advice will be given by the independent peer mail review or the review panel.

(14) *Other requirements.* (a) For a complete description of other requirements, see CSCOR/COP's annual General Grant Administration Terms and Conditions Document in the **Federal Register** (66 FR 63019, December 4, 2001) and the CSCOR/COP home page. NOAA has specific requirements that environmental data be submitted to the National Oceanographic Data Center (see section 16, Data Archiving).

(b) the Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreements contained in the **Federal Register** (66 FR 49917, October 1, 2001) are applicable to this solicitation. However, please note that the Department of Commerce will not implement the requirements of Executive Order 13202 (66 FR 49921), pursuant to guidance issued by the Office of Management and Budget in light of a court opinion which found that the Executive Order was not legally authorized. See Building and Construction Trades Department v. Allbaugh, 172 F. Supp. 2d 138 (D.D.C. 2001). This decision is currently on appeal. When the case has been finally resolved, the Department will provide further information on implementation of Executive Order 13202.

(c) Please note that NOAA is developing a policy on internal overhead charges; NOAA scientists considering submission of proposals should contact the appropriate CSCOR/COP Program Manager for the latest information.

(15) *Intergovernmental review.* Applications under this program are not subject to Executive Order 12372, "Intergovernmental Review of Federal Programs." It has been determined that this notice is not significant for purposes of Executive Order 12866. Pursuant to 5 U.S.C. 553(a) (2), an opportunity for public notice and comment is not required for this notice relating to grants, benefits and contracts. Because this notice is exempt from the notice and comment provisions of the Administrative Procedure Act, a Regulatory Flexibility Analysis is not required, and none has been prepared. It has been determined that this notice does not contain policies with Federalism implications as that term is defined in Executive Order 13132.

(16) *Data archiving.* Any data collected in projects supported by CSCOR/COP must be delivered to a National Data Center (NDC), such as the National Oceanographic Data Center (NODC), in a format to be determined by the institution, the NODC, and Program

VOL
67
ISS
54
MR
20
2002
UMI

Officer. It is the responsibility of the funded institution for the delivery of these data; the DOC will not provide additional support for delivery beyond the award. Additionally, all biological cultures established, molecular probes developed, genetic sequences identified, mathematical models constructed, or other resulting information products established through support provided by CSCOR/COP are encouraged to be made available to the general research community at no or a modest handling charge (to be determined by the institution, Program Officer, and DOC). For more details, refer to CSCOR/COP data policy posted at the COP home page.

(17) This notification involves collection-of-information requirements subject to the Paperwork Reduction Act (PRA). The use of Standard Forms 424, 424A, 424B, and SF-LLL has been approved by the Office of Management and Budget (OMB) under control numbers 0348–0043, 0348–0044, 0348–0040 and 0348–0046.

The following requirements have been approved by OMB under control number 0648–0384: a Summary Proposal Budget Form (30 minutes per response), a Project Summary Form (30 minutes per response), a standardized format for the annual Performance Report (5 hours per response), a standardized format for the Final Report (10 hours per response), and the submission of up to 20 copies of proposals (10 minutes per response). The response estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding these requirements and the burden estimate, or any other aspect of this collection of information, including suggestions for reducing this burden, to leslie.mcdonald@noaa.gov. Copies of these forms and formats can be found on the CSCOR/COP home page under Grants Information sections, Parts D and F.

Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection displays a currently valid OMB control number.

Dated: March 11, 2002.

Jamison S. Hawkins,

Deputy Assistant Administrator for Ocean Services and Coastal Zone Management.

BILLING CODE 3510–JS–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 030602F]

Atlantic Highly Migratory Species; Advisory Panel Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of Advisory Panel meetings.

SUMMARY: NMFS will hold joint meetings of the Atlantic Highly Migratory Species Advisory Panel (HMS AP) and the Atlantic Billfish Advisory Panel (Billfish AP), April 1 through 3, 2002, in Silver Spring, MD. The intent of these meetings is to consider alternatives for the conservation and management of highly migratory species.

DATES: The joint HMS-Billfish AP meetings will be held from 1 p.m. to 5 p.m. on Monday, April 1; from 8 a.m. to 5 p.m. on Tuesday, April 2; and from 8 a.m. to 3:30 p.m. on Wednesday, April 3, 2002.

ADDRESSES: The AP meetings will be held in the Holiday Inn, 8777 Georgia Ave. (Rt. 97), Silver Spring, MD 20910. Phone: 301–589–0800.

An agenda and materials related to the AP meeting are available from Othel Freeman, Highly Migratory Species Management Division, 1315 East-West Highway, Silver Spring, MD 20910, 301–713–2347.

FOR FURTHER INFORMATION CONTACT: Dr. Ronald G. Rinaldo, 301–713–2347.

SUPPLEMENTARY INFORMATION: The actions to be discussed by the APs are necessary to address requirements of the Magnuson-Stevens Fishery Conservation and Management Act and to implement recommendations of the International Commission for the Conservation of Atlantic Tunas as required by the Atlantic Tunas Convention Act, for the conservation and management of highly migratory species.

Special Accomodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Dr. Rinaldo (see **FOR FURTHER INFORMATION CONTACT**) at least 7 days prior to the meetings.

Authority: 16 U.S.C. 961 *et seq.*, and 16 U.S.C. 1801 *et seq.*

Dated: March 13, 2002.

John H. Dunnigan,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 031402D]

New England Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The New England Fishery Management Council (Council) is scheduling public meeting of its Groundfish and Monkfish Oversight Committees in April, 2002. Recommendations from these committees will be brought to the full Council for formal consideration and action, if appropriate.

DATES: These meetings will be held between April 9 and 11, 2002. *See* **SUPPLEMENTARY INFORMATION** for specific dates and times.

ADDRESSES: The meetings will be held in New London, CT and Warwick, RI. *See* **SUPPLEMENTARY INFORMATION** for specific locations.

Council address: New England Fishery Management Council, 50 Water Street, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Paul J. Howard, Executive Director, New England Fishery Management Council (978) 465-0492; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION: *Tuesday, April 9, 2002 at 9:30 a.m.*–Groundfish Oversight Committee Meeting.

Location: Radisson Hotel, 35 Governor Winthrop Blvd, New London, CT 06320; telephone: (860) 443-7000.

The Groundfish Oversight Committee will continue development of Amendment 13 to the Northeast Multispecies Fishery Management Plan (FMP). Amendment 13 will end overfishing and establish rebuilding schedules for overfished stocks. At a meeting on February 27, 2002, the New England Council decided to develop groundfish management measures for five broad areas and one user group: inshore Gulf of Maine, offshore Gulf of Maine, eastern Georges Bank, western Georges Bank, Southern New England/Mid Atlantic, and recreational/charter/party. This meeting will focus on commercial fishing for groundfish in the Southern New England/Mid-Atlantic area, the boundaries for this area will be determined at the March 27, 2002 Groundfish Committee meeting. Interested parties will be consulted to identify management measures that will achieve specific biological, economic, and social objectives identified by the Council. Such measures may include, but are not limited to, trip or possession limits, changes to the days-at-sea program, year-round or seasonal closed areas, or gear changes. The committee will consider these suggested measures and will develop a recommendation that will be reviewed by the Council at a later date. After Council approval, the measures will be analyzed and included in a draft supplemental environmental impact statement. The committee may also consider alternatives to this area management approach if technical advice received at the March 19, 2002 Council meeting suggests it is not feasible.

Wednesday, April 10, 2002 at 9:30 a.m. and Tuesday, April 11, 2002 at 8:30 a.m.–Monkfish Oversight Committee Meeting.

Location: Radisson Airport Hotel Providence; 2081 Post Road, Warwick, RI 02886; telephone: (401) 739-3000.

The Committee will review information provided by the Advisory Panel, Plan Development Team and/or Councils' staffs and continue development of Amendment 2 management alternatives. Measures that may be included or adjusted in Amendment 2 include, but are not limited to, permit qualification for vessels fishing south of 38° N, trip limits, days-at-sea allocations, closed areas, minimum fish size, minimum mesh size, and area-specific management programs for the Northern and Southern Fishery Management Areas, as well as for the offshore fishery in the Southern Area. Amendment 2 will also implement revisions to the monkfish overfishing definitions. Measures to be considered in Amendment 2 will be designed to achieve fishing mortality targets as well as to minimize bycatch, interactions with protected species and fishery impacts on essential fish habitat.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Paul J. Howard (*see* **ADDRESSES**) at least 5 days prior to the meeting dates.

Dated: March 15, 2002.

Richard W. Surdi,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 031102B]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Groundfish Stock Assessment Review (STAR) Panel for bocaccio and canary rockfish will hold a work session which is open to the public.

DATES: The bocaccio and canary rockfish STAR Panel will meet beginning at 9 a.m., April 15, 2002. The meeting will continue on April 16, 2002 beginning at 8 a.m. through April 19, 2002. The meetings will end at 5 p.m. each day, or as necessary to complete business.

ADDRESSES: The Pacific bocaccio and canary rockfish STAR Panel meeting will be held at NMFS Northwest Fisheries Science Center, Auditorium, 2725 Montlake Blvd. E, Seattle, WA 98112; telephone: 206–860–3200.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 200, Portland, OR 97220-1384.

FOR FURTHER INFORMATION CONTACT: Mr. Chuck Tracy, Staff Officer; 503–326–6352.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to review draft stock assessment documents and any other pertinent information, work with the Stock Assessment Team to make necessary revisions, and produce a STAR Panel report for use by the Council family and other interested persons.

Entry to the Northwest Fisheries Science Center requires identification with photograph (such as a student ID, state drivers license, etc.). A security guard will review the identification and issue a Visitor's Badge valid only for the date of the meeting.

Although nonemergency issues not contained in STAR Panel agenda may come before the STAR Panel for discussion, those issues may not be the subject of formal Panel action during this meeting. STAR Panel action will be restricted to those issues specifically listed in this notice, and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Panel's intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Ms. Carolyn Porter at 503–326–6352 at least 5 days prior to the meeting date.

Dated: March 15, 2002.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

In a notice and letter to the Commissioner of Customs published in the **Federal Register** on August 24, 1989 (54 FR 35223), CITA directed the U.S. Customs Service to apply all otherwise applicable visa and quota requirements to textiles and textile products which are classified as components of a set. This directive applied to all items which, if imported separately, would have required a visa and the reporting of quota. Recently, there has been uncertainty concerning the continuing applicability of this directive. The letter published below reconfirms the previously published directive.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 15, 2002.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

This letter reconfirms the directive of August 18, 1989 that clarified the intent of the Committee for the Implementation of Textile Agreements on the applicability of visa requirements and quota reporting of textiles and textile products entered as components of sets under General Rule of Interpretation (GRI) 3 of the Harmonized Tariff Schedule (HTS).

Effective on March 18, 2002, the directive of August 18, 1989 is reissued as follows:

Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended; all applicable visa and quota requirements will apply for textiles and textile products which are classified as components of a set. This rule applies to all items which, if imported separately, would have required a visa and the reporting of quota.

Effective on March 18, 2002, you are directed to prohibit entry for consumption or withdrawal from warehouse for consumption into the United States (i.e., the 50 states, the District of Columbia and the Commonwealth of Puerto Rico) of any textile item for which classification is claimed as sets under GRI 3 of the HTS, where a separate textile category currently exists or comes into existence requiring separate reporting of the components forming those sets.

Entry shall be permitted if all visa and quota requirements are met.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,
D. Michael Hutchinson,
Acting Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

Department of the Air Force

HQ USAF Scientific Advisory Board

AGENCY: Department of the Air Force, DoD.

ACTION: Notice of meeting.

SUMMARY: Pursuant to Public Law 92–463, notice is hereby given of the forthcoming meeting of the Task Force on the Threat of Asymmetric Attack. The purpose of the meeting is to allow the SAB and study leadership to review their progress on strategies for the conduct of asymmetric warfare. This meeting will be closed to the public.

DATES: April 1, 2002.

ADDRESSES: Frost & Associates, 660 Southpointe Court, Suite 210, Colorado Springs, CO 80906.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Ripperger, Air Force Scientific Advisory Board Secretariat, 1180 AirForce Pentagon, Rm 5D982, Washington DC 20330–1180, (703) 697–4811.

Pamela D. Fitzgerald,

Air Force Federal Register Liaison Officer.

BILLING CODE 5001–05–U

DEPARTMENT OF DEFENSE

Department of the Army

Preparation of Environmental Impact Statement (EIS) for Military Training Activities at Makua Military Reservation, Oahu, Hawaii

AGENCY: Department of the Army, DoD.

ACTION: Notice of intent.

SUMMARY: The Army proposed to resume consistent military training activities at Makua Military Reservation (MMR), Oahu, Hawaii, to provide for company level, modified live-fire exercises. In accordance with the Settlement Agreement and Stipulated Order between Malama Makua and the United States Department of Defense, filed 4 October 2001 (the "Settlement Agreement"), the Army will conduct a limited number of live-fire training exercises during the term specified within for the preparation of the subject EIS. The Army needs to conduct a minimum of 18 company-level, combined arms, live-fire exercises per year. Other military components that have used Makua in the past include the Marine Corps, Army Reserves, and the Hawaii Army National Guard, which further increases the total number of required company combined-arms live-fire exercises (CALFEXs) per year. Conducting the required number of company CALFEXs is critical to maintaining the readiness of all military units assigned or stationed in Hawaii. Training at the company level is one of the key building blocks in the Army's progressive training doctrine where smaller units first train as smaller units and then train collectively as part of a larger unit. The training that a new infantry company commander receives during a company-level CALFEX is invaluable in teaching him the skills required to coordinate the combined arms support provided by helicopter, artillery, mortar, and combat engineer support teams when attacking an objective. These communication and coordination skills are essential later when several companies join together and train/fight as a battalion under the control of a battalion commander. The EIS will address, among other things, the potential direct, indirect and cumulative environmental impacts associated with the proposal to continue military training activities at MMR. The EIS development process will be conducted in accordance with the aforementioned Settlement Agreement and Stipulated Order.

ADDRESSES: Written comments may be forwarded to Mr. Calvin K. Mashita, U.S. Army Corps of Engineers, Honolulu Engineer District, Programs and Project Management Division, ATTN: CEPOH–PP–E (Mashita), Building 230, Fort Shafter, Hawaii 96858–5440.

FOR FURTHER INFORMATION CONTACT:

Makua training activities: Colonel William E. Ryan III, (808) 656–1289, fax (808) 656–1259; email *William.ryaniii@usace.army.mil* or by writing to Director of Public Works, U.S. Army Garrison Hawaii (USAG–HI), Schofield Barracks, Hawaii 96857–5013.

EIS information: Mr. Calvin K. Mashita, (808) 438–8417; fax (808) 438–8865; email *calvin.k.mashita@poh01.usace.army.mil* or by writing to Mr. Mashita at the above address.

SUPPLEMENTARY INFORMATION: Proposed alternatives to be considered may include, but not be limited to, the following:

(1) *Alternative 1:* Modified Live-Fire Training at Makua Military Reservation (Proposed Action). The Army would conduct company CALFEXs at MMR but with certain restrictions. In particular, the Army would eliminate the use of TOW missiles, incendiary munitions, and tracers. Under this alternative, the Army will not be limited to the current number of CALFEXs specified in the Settlement Agreement.

(2) *Alternative 2:* No action. The Army will not conduct live-fire training exercises at MMR, except for the limited number of modified CALFEXs authorized by the Settlement Agreement.

(3) *Alternative 3:* Conduct CALFEX Training at an Alternate Site. Personnel and equipment required for CALFEX Training would be transported to one of the following alternate sites:

(a) *Alternative 3A:* Pohakuloa Training Area (PTA) on the Big Island of Hawaii.

(b) *Alternative 3B:* Continental United States (CONUS).

(c) *Alternative 3C:* A replacement training facility at another Army installation on Oahu. The Army would construct another facility on Oahu that could accommodate the company CALFEXs.

(4) *Alternative 4:* Return to Training Less Restrictive Than the Proposed Action. The Army would train with less restrictions on the types of weapon systems and the numbers of training exercises. For example, the Army would resume the use of tracer ammunition.

(5) *Alternative 5:* Conduct Non-Live Fire Training at MMR. The Army would conduct training exercises at MMR but without any live firing of weapons or devises otherwise of an incendiary nature.

Scoping Process: Federal, state and local agencies, and the public are invited to participate in the scoping process for the completion of this EIS. The scoping process will help identify potential impacts and key issues to be analyzed in the EIS. Individuals or organizations wishing to participate in the scoping process are invited to participate in a scoping meeting to be held in the Waianae District, on the island of Oahu. Notification of the time and location for the scoping meeting will be published in local newspapers. Additionally, written comments on the scope of analysis are invited and will be accepted within 15 days after the scoping meeting.

Dated: March 15, 2002.

Raymond J. Fatz,

Deputy Assistant Secretary of the Army, (Environment, Safety and Occupational Health) OASA(I&E).

BILLING CODE 3710–08–M

DEPARTMENT OF ENERGY

[Docket No. EA–260]

Application To Export Electric Energy; EPCOR Merchant and Capital (US) Inc.

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application.

SUMMARY: EPCOR Merchant and Capital (US) Inc. (EPCOR) has applied for authority to transmit electric energy from the United States to Canada pursuant to section 202(e) of the Federal Power Act.

DATES: Comments, protests or requests to intervene must be submitted on or before April 4, 2002.

ADDRESSES: Comments, protests or requests to intervene should be addressed as follows: Office of Coal & Power Import/Export (FE–27), Office of Fossil Energy, U.S. Department of Energy, 1000 Independence Avenue, SW, Washington, DC 20585–0350 (FAX 202–287–5736).

FOR FURTHER INFORMATION CONTACT: Rosalind Carter (Program Office) 202–586–7983 or Michael Skinker (Program Attorney) 202–586–2793.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated and require authorization under section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)).

On February 7, 2002, the Office of Fossil Energy (FE) of the Department of Energy (DOE) received an application from EPCOR to transmit electric energy from the United States to Canada. EPCOR is a Delaware corporation with its principal place of business in Calgary, Alberta, Canada. EPCOR is a power marketer and will have title to any electricity exported to Canada.

EPCOR will purchase the power to be exported from electric utilities and federal power marketing agencies within the United States and arrange for the delivery of electric energy to Canada over the existing international transmission facilities owned by Basin Electric Power Cooperative, Bonneville Power Administration, Citizen Utilities, Eastern Maine Electric Cooperative, International Transmission Company, Joint Owners of the Highgate Project, Long Sault, Inc., Maine Electric Power Company, Maine Public Service Company, Minnesota Power Inc., Minnkota Power Cooperative, New York Power Authority, Niagara Mohawk Power Corporation, Northern States Power, and Vermont Electric Transmission Company. The construction, operation, maintenance, and connection of each of the international transmission facilities to be utilized by EPCOR, as more fully described in the application, has previously been authorized by a Presidential permit issued pursuant to Executive Order 10485, as amended.

EPCOR has requested that the Department of Energy (DOE) expedite the processing of this application so that EPCOR may assist in alleviating unexpected power shortages in the Canadian Providence of Alberta.

Procedural Matters: Any person desiring to become a party to this proceeding or to be heard by filing comments or protests to this application should file a petition to intervene, comment or protest at the address provided above in accordance with §§ 385.211 or 385.214 of the FERC's Rules of Practice and Procedures (18 CFR 385.211, 385.214). Fifteen copies of each petition and protest should be filed with DOE on or before the date listed above.

Comments on the EPCOR application to export electric energy to Canada should be clearly marked with Docket EA–260. Additional copies are to be filed directly with Rob Imbeau, EPCOR Merchant and Capital (US) Inc., c/o EPCOR Merchant and Capital L.P., 505 2nd Street, SW, 8th Floor, Calgary, Alberta T2P 1N8 Canada AND Timothy J. Moran, Victor A. Contract, Skadden, Arps, Slate, Meagher & Flom LLP, 1440 New York Avenue, NW, Washington, DC 20005–2111.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to the National Environmental Policy Act of 1969, and a determination is made by the DOE that the proposed action will not adversely impact on the reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above or by accessing the Fossil Energy Home Page at *http://www.fe.doe.gov*. Upon reaching the Fossil Energy Home page, select "Electricity Regulation," and then "Pending Procedures" from the options menus.

Worker Advocacy Advisory Committee Meeting

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the Worker Advocacy Advisory Committee. The Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770), requires that notice of this meeting be published in the **Federal Register**.

DATES: Thursday, April 4, 2002, 12:30–5:30 p.m. and Friday, April 5, 2001, 8:00 a.m.–12:30 p.m.

ADDRESSES: Loews L'Enfant Plaza Hotel, 480 L'Enfant Plaza, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Judy Keating, Executive Administrator, Worker Advocacy Advisory Committee, U.S. Department of Energy, EH–8, 1000 Independence Avenue, SW, Washington, DC 20585, Telephone Number 202–586–7551, E-mail: judy.keating@eh.doe.gov.

SUPPLEMENTARY INFORMATION:

Purpose of the Meeting: To provide advice to the Director of the Office of Worker Advocacy of the Department of Energy on plans, priorities, and strategies for assisting workers who have been diagnosed with work-related illnesses.

Tentative Agenda

Welcome and Introductions
Organization of the Office of Worker Advocacy
Status of Interagency Work
Discussion of Subcommittee Topics, including claims processing, and Insurer and Contractor Relations
Public Comment
Next Steps/Path Forward

Public Participation: This two-day meeting is open to the public on a first-come, first-serve basis because of limited seating. Written statements may be filed with the committee before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Judy Keating at the address or telephone listed above. Requests to make oral statements must be made and received five days prior to the meeting; reasonable provision will be made to include the statement in the agenda. The Chair of the committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes: The minutes of this meeting will be available for public review and copying at the Freedom of Information Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 9 a.m. and 4 p.m., Monday through Friday, except holidays.

Issued in Washington, DC on March 15, 2002.

Rachel M. Samuel,

Deputy Advisory Committee Management Officer.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP02–6–001]

Colorado Interstate Gas Company; Notice of Amendment to Application

March 14, 2002.

Take notice that on March 4, 2002, Colorado Interstate Gas Company (CIG), Post Office Box 1087, Colorado Springs, Colorado 80944, filed pursuant to section 7(c) of the Natural Gas Act (NGA) and Part 157 of the Commission's Regulations in Docket No. CP02–6–001 an amendment to its pending application in Docket No. CP02–6–000 to modify the proposed expansion of its existing interstate pipeline system by reducing the lengths of the proposed loop line segments, all as more fully set forth in the application which is on file with the Commission and open to public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket #" and follow the instructions (call 202–208–2222 for assistance).

In its application in Docket No. CP02–6–000, CIG stated that it proposed to construct and operate facilities necessary to transport additional volumes of approximately 57.8 MMcf per day (55 MDth per day) of natural gas out of the Raton Basin Area in Colorado and New Mexico. In addition, CIG stated that it proposed to construct and operate facilities south of its Keyes Compressor Station to allow Raton Basin shippers to deliver incremental quantities of gas to interconnections with the interstate pipeline systems of El Paso Natural Gas Company and Northern Natural Gas Company. To accomplish this, CIG proposed to construct two loop line segments along its Campo Lateral and a loop of a portion of its existing Line 3A south of the existing Keyes Compressor Station.

CIG states that, subsequently, one of the shippers holding rights to a portion of the proposed incremental capacity on the Raton Basin 2002 Expansion Project was unable to meet the terms set forth in its Transportation Precedent Agreement with CIG, resulting in the termination of this agreement. CIG states that, as a result of the termination of the agreement, it now proposes to amend its application in this proceeding to revise the facilities to be constructed. Specifically, CIG states that it plans to reduce the lengths of the proposed pipeline loop segments, as follows:

(1) Reduce the length of 16-inch diameter pipeline loop of CIG's existing Campo Lateral from 25.61 miles to 22.10 miles; this loop line would extend from the outlet of the CIG's Trinidad Compressor Station in Section 25, Township 32 South, Range 63 West to a point west of Trinchera Creek in Section 21, Township 33 South, Range 59 West, all in Las Animas County, Colorado.

(2) Reduce the length of 16-inch diameter pipeline loop of CIG's existing Campo Lateral from 28.14 miles to 24.20 miles; this loop line would extend from the outlet of CIG's Kim Compressor Station in Section 31, Township 32 South, Range 54 West, Las Animas County, Colorado to a point east of County Road 1 in Section 29, Township 32 South, Range 50 West, Baca County, Colorado.

(3) Reduce the length of 20-inch diameter pipeline loop of CIG's existing Line 3A from 14.40 miles to 7.67 miles, this loop line would extend from the outlet of CIG's Keyes Compressor Station in Section 17, Township 5 North, Range 7 East to Gate 9/Keyes Meter Station in Section 23, Township 4 North, Range 7 East, all in Cimarron County, Oklahoma.

CIG states that the revised Campo Lateral loop line segments will increase the take-away capacity from the Raton Basin Area by approximately 47.3 MMcf per day (45 MDth per day). CIG further states that the 3A loop line will facilitate the delivery of incremental volumes to points on the southern end of its transmission system.

CIG estimates that the proposed cost of the expansion will be $22,070,400. Further, CIG states that the combination of existing and revised incremental entitlements represent 100 percent of CIG's capacity out of the Raton Basin Area through the Campo Lateral.

Any questions regarding this amendment should be directed to Robert T. Tomlinson; Director, Regulatory Affairs; at (719) 520–3788; Colorado Interstate Gas Company; P.O. Box 1087; Colorado Springs, Colorado 80944. process.

Any person desiring to be heard or to make any protest with reference to said document should, on or before April 4, 2002, file with the Federal Energy Regulatory Commission; 888 First Street, NE., Washington, DC 20426 a protest or motion to intervene in accordance with the requirements of Rule 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214) and the Regulations under the NGA (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

A person obtaining intervenor status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents issued by the Commission, filed by the applicant, or filed by all other intervenors. An intervenor can file for rehearing of any Commission order and can petition for court review of any such order. However, an intervenor must serve copies of comments or any other filing it makes with the Commission to every other intervenor in the proceeding, as well as filing an original and 14 copies with the Commission.

A person does not have to intervene, however, in order to have comments considered; a person, instead, may submit two copies of such comments to the Secretary of the Commission. Commenters will be placed on the Commission's environmental mailing list, will receive copies of environmental documents, and will be able to participate in meetings associated with the Commission's environmental review process. Commenters will not receive copies of all documents filed by other parties or issued by the Commission and will not have the right to seek rehearing or appeal the Commission's final order to a Federal court.

The Commission will consider all comments and concerns equally, whether filed by Commenters or those requesting intervenor status.

Comments, protests, and interventions may be filed electronically via the Internet in lieu of paper copies. See 18 CFR 385.2001(a) (1)(iii) and the instructions on the Commission's web site under the "e-filing" link.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the NGA and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this document if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for CIG to appear or be represented at the hearing.

Linwood A. Watson, Jr.,

Deputy Secretary.

[Docket No. RP02–197–000]

Eastern Shore Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

March 14, 2002.

Take notice that on March 11, 2002, Eastern Shore Natural Gas Company (ESNG) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1,Thirty-Sixth Revised Sheet No. 7 and Thirty-Sixth Revised Sheet No. 8, with a proposed effective date of April 1, 2002.

ESNG states that the purpose of this instant filing is to track rate changes attributable to storage services purchased from Transcontinental Gas Pipe Line Corporation (Transco) under its Rate Schedules GSS and LSS. The costs of the above referenced storage services comprise the rates and charges payable under ESNG's respective Rate Schedules GSS and LSS. This tracking filing is being made pursuant to Section 3 of ESNG's Rate Schedules GSS and LSS.

ESNG states that copies of the filing have been served upon its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Gulf South Pipeline Company, LP; Notice of Negotiated Rate Filing

March 14, 2002.

Take notice that on March 8, 2002, Gulf South Pipeline Company, LP (Gulf South) tendered for filing contracts between Gulf South and the following companies for disclosure of recently negotiated rate transactions. As shown on the contracts, Gulf South requests an effective date of April 1, 2002.

Special Negotiated Rate Between—

Gulf South Pipeline Company, LP and The Utilities Board of the City of Bay Minette, Contract #14483
Gulf South Pipeline Company, LP and The City of Pascagoula, Contract #27272

Gulf South states that it has served copies of this filing upon all parties on the official service list created by the Secretary in this proceeding Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. [Docket No. RP02–151–001]

Gulf South Pipeline Company, LP; Notice of Compliance Filing

March 14, 2002.

Take notice that on March 7, 2002, Gulf South Pipeline Company, LP (Gulf South) tendered for filing as part of its FERC Gas Tariff, Sixth Revised Volume No. 1, the following tariff sheets, to become effective February 25, 2002:

Substitute Second Revised Sheet No. 306
Substitute Original Sheet No. 307

Gulf South states that the above tariff sheets have been filed to comply with the Order issued February 22, 2002, 98 FERC ¶ 61,186. In its original filing, Gulf South proposed provisions concerning the allocated market and regulatory risks between Gulf South and its No Notice Service (NNS) Customers. The Commission directed Gulf South to remove the 90-day prior notice written provision and to file revised tariff sheets reflecting a more reasonable notice period. The compliance filing incorporates this change.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection. [Docket No. EL02–66–000]

Minnesota Municipal Power Agency, Complainant, v. Southern Minnesota Municipal Power Agency, Respondent; Notice of Complaint

March 14, 2002.

Take notice that on March 11, 2002, the Minnesota Municipal Power Agency (the MMPA) filed a Complaint against the Southern Minnesota Municipal Power Agency (SMMPA), for improperly charging the MMPA for losses under SMMPA's Open Access Transmission Tariff.

Pursuant to requirements set forth in 18 CFR 385.206, MMPA has served a copy of the complaint and supporting documents upon SMMPA.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests must be filed on or before April 1, 2002. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Answers to the complaint shall also be due on or before April 1, 2002. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests, interventions and answers may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

[Docket No. RP85–60–014]

Overthrust Pipeline Company; Notice of Report of Refunds

March 14, 2002.

Take notice that on March 11, 2002, Overthrust Pipeline Company tendered for filing a refund report. Overthrust states that the report documents refunds of amounts pertaining to and detailing the Deferred Income Tax (DIT) refund payments for the year 2001.

Overthrust states that it is filing the refund report pursuant to a Commission order dated May 21, 1991, "Order Approving Settlement with Modifications" in Docket Nos. RP85–60–000 and –002. Overthrust explains that Article V of the settlement, as modified, requires Overthrust to file an annual report 60 days after making the actual DIT refunds.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed on or before March 21, 2002. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

[Docket No. CP93–618–013]

PG&E Gas Transmission, Northwest Corporation; Notice of Annual Report

March 14, 2002.

Take notice that on January 28, 2002, PG&E Gas Transmission, Northwest Corporation (GTN) tendered for filing its "Annual Report on Deferred Revenue Recovery Mechanism and Revenue Reconciliation for the Year Ending October 31, 2001" for its Medford, Oregon Extension FTS–1 (E–2).

GTN asserts that the purpose of this filing is to comply with the Commission's Order of January 12, 1995 in Docket Nos. CP93–618, *et al.* That Order requires GTN to file an annual report concerning its deferred revenue recovery mechanism and detailing the cost of service for GTN's Medford Extension and the status of its deferred revenue recovery mechanism.

GTN further states that a copy of this filing has been served on GTN's jurisdictional customers and interested state regulatory agencies, as well as the Official Service list compiled by the Secretary in this proceeding.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed as provided in section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection. Reliant Energy Gas Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

March 14, 2002.

Take notice that on March 8, 2002, Reliant Energy Gas Transmission Company (REGT) tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, the following revised tariff sheets to be effective May 1, 2002:

Ninth Revised Sheet No. 5
Ninth Revised Sheet No. 6
Tenth Revised Sheet No. 7
First Revised Sheet No. 15

REGT states that the purpose of this filing is to adjust REGT's fuel percentages and Electric Power Costs (EPC) Tracker pursuant to Sections 27 and 28 of its General Terms and Conditions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. [Docket No. P–2114–106]

Yakama Nation, Complainant, v. Public Utility District No. 2 of Grant County, Washington, Respondent; Notice of Complaint

March 14, 2002.

Take notice on March 8, 2002, the Yakama Nation (Complainant) filed with the Federal Energy Regulatory Commission (Commission) a document entitled "Complaint of the Yakama Nation and Request for Fast-Track Processing." The Complainant requests, pursuant to 18 CFR 385.206 of the Commission's regulations, that the Commission find Public Utility District No. 2 of Grant County, Washington to be in violation of its license for the Priest Rapids Hydroelectric Project (Project), FERC Project No. 2114, Federal law authorizing the development of the Project, as well as Sections 10, 19, and 20 Federal Power Act due to discriminatory and anticompetitive provisions contained in wholesale power contracts required under the Project license. The Complainant requests that the Commission require the Licensee to correct these violations and to provide remedies designed to alleviate some of the harms that the violations have inflicted on the Yakama Nation.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests must be filed on or before March 28, 2002. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Answers to the complaint shall also be due on or before March 28, 2002. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EC02–55–000, et al.]

Trans-Elect, Inc., et al.; Electric Rate and Corporate Regulation Filings

March 13, 2002.

Take notice that the following filings have been made with the Commission. Any comments should be submitted in accordance with Standard Paragraph E at the end of this notice.

1. Trans-Elect, Inc., Michigan Transco Holdings, Limited Partnership, Michigan Electric Transmission Company LLC

[Docket No. EC02–55–000]

Take notice that on March 8, 2002, Trans-Elect, Inc. (Trans-Elect) and Michigan Transco Holdings, Limited Partnership (Michigan Transco Holdings LP), on behalf of Michigan Electric Transmission Company (Michigan Transco LLC) (collectively, Trans-Elect Applicants) submitted an application for approval of the transfer of operational control over the jurisdictional transmission facilities to be acquired by Michigan Transco LLC to the Midwest Independent Transmission System Operator, Inc. (Midwest ISO), and for transfer of certain related transmission service agreements to the Midwest ISO.

Copies of this filing were served on all affected state utility commissions.

Comment Date: March 29, 2002.

2. Alliance Companies, et al. and National Grid USA

[Docket No. EL02–65–000]

Take notice that on March 6, 2002, pursuant to Rule 207 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.207, Ameren Services Company (on behalf of Union Electric Company and Central Illinois Public Service Company), American Electric Power Service Corporation (on behalf of Appalachian Power Company, Columbus Southern Power Company, Indiana Michigan Power Company, Kentucky Power Company, Kingsport Power Company, Ohio Power Company, and Wheeling Power Company), The Dayton Power and Light Company, Exelon Corporation (on behalf of Commonwealth Edison Company and Commonwealth Edison Company of Indiana, Inc.), FirstEnergy Corp. (on behalf of American Transmission Systems, Inc., The Cleveland Electric Illuminating Company, Ohio Edison Company, Pennsylvania Power Company, and The Toledo Edison Company), Illinois Power Company, and Northern Indiana Public Service Company (collectively, the Alliance Companies), and National Grid USA, tendered for filing a petition for the Commission to issue an order finding that the proposed policy resolutions contained in the petition provide an appropriate basis for the participation of Alliance GridCo in the Midwest Regional Transmission Organization (RTO).

Alliance GridCo is the Alliance Transmission Company LLC that will be formed with National Grid USA as managing member, provided the Alliance business model can be successfully accommodated within an RTO. Through this petition, the Alliance Companies and National Grid USA attempt to find a way to accommodate Alliance GridCo as a viable transmission business underneath the Midwest ISO umbrella. Should the Commission believe its policy goals would best be served by having Alliance GridCo operate underneath the Midwest ISO umbrella, and the Commission grants the petition, the Alliance Companies and National Grid USA anticipate that Alliance GridCo would be operational by October 1, 2002.

Comment Date: March 28, 2002.

3. Pacific Gas and Electric Company

[Docket No. ER01–833–000]

Take notice that on March 6, 2002 Pacific Gas and Electric Company filed an amendment to its February 28, 2002 filing for Further Request for Deferral of Consideration of the unexecuted Wholesale Distribution Tariff (WDT) Service Agreement and Interconnection Agreement between Pacific Gas and Electric Company and Modesto Irrigation District (MID).

PG&E requests that the Commission defer consideration of the proceedings filed in ER01–833–000 to August 26, 2002, 180 days beyond the last request for Deferral in order that the parties may finalize and executed the Agreements.

Copies of this filing have been served upon MID, the California Independent System Operator Corporation, and the California Public Utilities Commission.

Comment Date: March 27, 2002.

4. Southern California Edison Company

[Docket No. ER02–1286–000]

Take notice that on March 8, 2002, Southern California Edison Company (SCE) tendered for filing a Service Agreement For Wholesale Distribution Service under SCE's Wholesale Distribution Access Tariff, an Interconnection Facilities Agreement, and a Reliability Management System Agreement (Agreements) between SCE and Ridgewood Olinda, LLC (Ridgewood).

SCE respectfully requests the Agreements become effective on March 11, 2002.

These Agreements specify the terms and conditions under which SCE will interconnect Ridgewood's generating facility to its electrical system and provide Distribution Service for up to 2.4 MW of power produced by the generating facility. Copies of this filing were served upon the Public Utilities Commission of the State of California and Ridgewood.

Comment Date: March 29, 2002.

5. Rainy River Energy Corporation-Taconite Harbor

[Docket No. ER02–1258–000]

Take notice that on March 5, 2002, Rainy River Energy Corporation-Taconite Harbor (RR-TH) file with the Federal Energy Regulatory Commission (Commission) a Power Sales Agreement for short term power sales.

Comment Date: March 26, 2002.

6. Generation Power, Inc.

[Docket No. ER02–894–001]

Take notice that on March 7, 2002, Generation Power, Inc. amended its filing of January 30, 2002, which petitioned the Federal Energy Regulatory Commission (Commission) Commission for acceptance of Generation Power Rate Schedule FERC No. 1; the granting of certain blanket approvals, including the authority to sell electricity at market-based rates; and the waiver of certain Commission regulations.

Generation Power intends to engage in wholesale electric power and energy purchases and sales as a marketer. Generation Power is not in the business of generating or transmitting electric power. Generation Power does not have any affiliates as defined at 18 CFR 161.2.

Comment Date: March 28, 2002.

7. American Transmission Company LLC

[Docket No. ER01–1107–002]

Take notice that on March 7, 2002, American Transmission Company LLC (ATCLLC) tendered for filing a refund report in accordance with the Federal Energy Regulatory Commission's January 30, 2002 letter order in the above-referenced proceeding.

Copies of the refund report have been served on parties to the service list, the Public Service Commission of Wisconsin, the Illinois Commerce Commission, and the Michigan Public Service Commission.

Comment Date: March 28, 2002.

8. Conectiv Energy Supply, Inc.

[Docket No. ER00–1770–004]

Take notice that on March 11, 2002, Conectiv Energy Supply, Inc. (CESI) tendered for filing its triennial market power analysis in support of its market-based rate authority in compliance with the Commission's April 25, 2000, order accepting CESI's updated market-based tariff and Code of Conduct. Conectiv Energy Supply, Inc., 91 FERC ¶ 61,076 (2000). In that proceeding, CESI committed to update its market power analysis within three years of March 10, 1999.

Comment Date: April 1, 2002.

9. UGI Development Company

[Docket No. ER99–2817–001]

Take notice that on March 11, 2002, UGI Development Company (UGID) tendered for filing its triennial market power update.

Comment Date: April 1, 2002.

10. Commonwealth Edison Company

[Docket No. ER02–1283–000]

Take notice that on March 8, 2002, Commonwealth Edison Company (ComEd) submitted for filing two Form of Service Agreements for Firm Point-To-Point Transmission Service and the corresponding Network Upgrade Agreements between ComEd and Madison Gas and Electric Company (Madison) and one Form of Service Agreement for Firm Point-To-Point Transmission Service and the corresponding Network Upgrade Agreement between ComEd and MPEX (collectively, Service Agreements) under the terms of ComEd's Open Access Transmission Tariff (OATT).

ComEd requests an effective date of March 5, 2002, and accordingly seeks waiver of the Commission's notice requirements. A copy of this filing was served on Madison and MPEX.

Comment Date: March 29, 2002.

11. Xcel Energy Services, Inc.

[Docket No. ER02–1284–000]

Take notice that on March 11, 2002, Xcel Energy Services, Inc. (XES), on behalf of Northern States Power Company and Northern States Power Company (Wisconsin) (collectively, NSP) submitted for filing a Form of Service Agreement with South Plains Electric Cooperative, Inc. (South Plains), which is in accordance with NSP's Rate Schedule for Market-Based Power Sales (NSP Companies FERC Electric Tariff, Original Volume No. 6). XES requests that this agreement become effective on March 1, 2002.

Comment Date: April 1, 2002.

12. Cinergy Services, Inc.

[Docket No. ER02–1285–000]

Take notice that on March 8, 2002, that Cinergy Services, Inc. (Cinergy) tendered for filing a proposed Notice of Cancellation with Narrative Statement and revisions to Cinergy's Open Access Transmission Tariff (Cinergy OATT), FERC Electric Tariff, Second Revised Volume No. 5.

Cinergy states that its proposed revisions are intended to cancel the Forms of Service Agreement for Firm Point-to-Point Transmission Service, Non-Firm Point-to-Point Transmission Service and Network Transmission Service, as well as certain transmission-related services with respect thereto, which are no longer necessary due to the start-up of Midwest Independent Transmission System Operator, Inc. and its Open Access Transmission Tariff on February 1, 2002.

Cinergy states that it has served copies of its filing by placing a copy of same in the United States mail, first-class postage prepaid, addressed to all customers under the Cinergy OATT.

Comment Date: March 29, 2002.

13. Entergy Services, Inc.

[Docket No. ER02–1287–000]

Take notice that on March 8, 2002, Entergy Services, Inc. (Entergy Services) submitted for filing on behalf of Entergy Arkansas, Inc. (EAI) a 2002 Wholesale Formula Rate Update (Update) in accordance with: (1) The Power Coordination, Interchange and Transmission Service Agreements (PCITA) between EAI and the Cities of Conway, West Memphis and Osceola Arkansas (Arkansas Cities); the cities of Campbell and Thayer, Missouri (Missouri Cities); and the Arkansas Electric Cooperative Corporation (AECC); (2) the Hydroelectric Power Transmission and Distribution Service Agreement between EAI and the City of North Little Rock, Arkansas (North Little Rock); (3) the Transmission Service Agreement (TSA) between EAI and the City of Hope, Arkansas (Hope); (4) the TSA between EAI and the Louisiana Energy & Power Authority (LEPA); (5) the Wholesale Power Service

2002
UMI

Agreement (WPSA) between EAI and the City of Prescott, Arkansas (Prescott); and (6) the WPSA between EAI and the Farmers Electric Cooperative Corporation (Farmers). Entergy Services states that the Update redetermines the formula rate charges and the Transmission Loss Factor in accordance with: (1) the above agreements; (2) the 1994 Joint Stipulation between EAI and AECC accepted by the Commission in Docket No. ER95–49–000, as revised by the 24th Amendment to the AECC PCITA on March 26, 1996 in Docket No. ER96–1116; (3) the formula rate revisions accepted by the Commission on February 21, 1995 in Docket No. ER95–393–000, as applicable to the Arkansas Cities, the Missouri Cities, Hope and North Little Rock; (4) the formula rate revisions applicable to LEPA accepted by the Commission on January 10, 1997 in Docket No. ER97–257–000; and (5) the Settlement Agreement accepted by the Commission on July 2, 1999 in Docket No. ER98–2028–000 (the 1998 Formula Rate Update proceeding).

Comment Date: March 29, 2002.

14. PPL Electric Utilities Corporation

[Docket No. ER02–1288–000]

Take notice that on March 8, 2002, PPL Electric Utilities Corporation (PPL Electric Utilities) tendered for filing an Interconnection Agreement between PPL Electric Utilities and the Mt. Carmel Cogen, Inc.

Comment Date: March 29, 2002.

15. Midwest Independent Transmission System Operator, Inc., Trans-Elect, Inc., Michigan Transco Holdings, Limited Partnership and Michigan Electric Transmission Company LLC

[Docket No. ER02–1289–000]

Take notice that on March 8, 2002, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO), and Trans-Elect, Inc. and Michigan Transco Holdings, Limited Partnership, on behalf of Michigan Electric Transmission Company LLC (Michigan Transco LLC) (collectively, Trans-Elect Applicants), filed pursuant to section 205 of the Federal Power Act for Commission approval or acceptance of certain changes to the Midwest ISO's open access transmission tariff (Midwest ISO Tariff) to recognize Michigan Transco LLC's participation as a transmission owner in the Midwest ISO and to establish rates for the Michigan Transco LLC pricing zone. The Midwest ISO and Trans-Elect Applicants also filed a supplemental agreement to establish certain conditions for Michigan Transco LLC's participation in the Midwest ISO.

Copies of this filing were served on all affected state utility commissions and transmission customers, as well as on all members of the Midwest ISO.

Comment Date: March 29, 2002.

16. Central Power and Light Company

[Docket No. ER02–1290–000]

Take notice that on March 8, 2002, Central Power and Light Company (CPL) submitted for filing First Revised Rate Schedule No. 70 with the City of Robstown, Texas (Robstown).

CPL seeks an effective date of April 1, 2002 and, accordingly, seeks waiver of the Commission's notice requirements. CPL states that a copy of this filing has been served on Robstown and the Public Utilities Commission of Texas.

Comment Date: March 29, 2002.

17. Entergy Services, Inc.

[Docket No. ER02–1293–000]

Take notice that on March 8, 2002, Entergy Services, Inc., on behalf of Entergy Arkansas, Inc., Entergy Gulf States, Inc., Entergy Louisiana, Inc., Entergy Mississippi, Inc., and Entergy New Orleans, Inc., (collectively, the Entergy Operating Companies) tendered for filing a Non-Firm Point-To-Point Transmission Service Agreement and a Short-Term Firm Point-To-Point Transmission Service Agreement both between Entergy Services, Inc., as agent for the Entergy Operating Companies, and NRG Power Marketing Inc.

Comment Date: March 29, 2002.

18. Ameren Energy, Inc. on Behalf of Union Electric Company d/b/a AmerenUE and Ameren Energy Generating Company

[Docket No. ER02–1294–000]

Take notice that on March 8, 2002, Ameren Energy, Inc. (Ameren Energy), on behalf of Union Electric Company d/b/a AmerenUE and Ameren Energy Generating Company (collectively, the Ameren Parties), pursuant to section 205 of the Federal Power Act, 16 USC 824d, and the market rate authority granted to the Ameren Parties, submitted for filing umbrella power sales service agreements under the Ameren Parties' market rate authorizations entered into with Williams Energy Marketing & Trading Company.

Ameren Energy seeks Commission acceptance of these service agreements effective February 22, 2002. Copies of this filing were served on the public utilities commissions of Illinois and Missouri and the counterparty.

Comment Date: March 29, 2002.

19. Progress Energy Inc. on Behalf of Progress Ventures, Inc.

[Docket No. ER02–1295–000]

Take notice that on March 8, 2002, Progress Ventures, Inc. (Progress Ventures) tendered for filing an executed Service Agreement between Progress Ventures and the following eligible buyer, Aquila Energy Marketing Corporation. Service to this eligible buyer will be in accordance with the terms and conditions of Progress Ventures Market-Based Rates Tariff, FERC Electric Tariff No. 1.

Progress Ventures requests an effective date of March 6, 2002 for this Service Agreement. Copies of the filing were served upon the North Carolina Utilities Commission, the South Carolina Public Service Commission, the Florida Public Service Commission and the Georgia Public Service Commission.

Comment Date: March 29, 2002.

20. Puget Sound Energy, Inc.

[Docket No. ER02–1296–000]

Take notice that on March 8, 2002, Puget Sound Energy, Inc. (PSE), tendered for filing a Port Townsend Area Transmission Agreement by Public Utility District No. 1 of Clallam County (Clallam), Port Townsend Paper Corporation (Port Townsend Paper), and PSE. A copy of the filing was served upon Clallam and Port Townsend Paper.

Comment Date: March 29, 2002.

Standard Paragraph

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Magalie R. Salas,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP01–439–000]

Columbia Gas Transmission Corporation; Notice of Availability of the Environmental Assessment for the Proposed Delaware Valley Energy Expansion Project

March 14, 2002.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline facilities proposed by Columbia Gas Transmission Corporation (Columbia) in the above referenced docket.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

The EA assesses the environmental effects of the construction and operation of the proposed facilities in Chester and Delaware Counties, Pennsylvania and Gloucester, County, New Jersey. These facilities would consist of the abandonment of 8.84 miles of 10-inch-diameter pipeline and 0.30 mile of 14-inch-diameter pipeline and replacement with 24-inch-diameter pipeline in Chester County, Pennsylvania. Columbia would construct 5.10 miles of 20-inch-diameter loop in Delaware County, and 9.62 miles of 20-inch-diameter pipeline and a meter station in Gloucester County, New Jersey. Columbia would also install a 6,000 horsepower compressor at both its existing Eagle and Downingtown Compressor Stations in Chester County, Pennsylvania.

The facilities would supply 165,000 dekatherms per day of gas to the Mantua Creek Power Plant presently under construction in Gloucester County, New Jersey.

The EA has been placed in the public files of the FERC. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference and Files Maintenance Branch 888 First Street, NE., Room 2A, Washington, DC 20426, (202) 208–1371.

Copies of the EA have been mailed to Federal, state and local agencies, public interest groups, interested individuals, newspapers, and parties to this proceeding.

Any person wishing to comment on the EA may do so. To ensure consideration prior to a Commission decision on the proposal, it is important that we receive your comments before the date specified below. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

1. Send two copies of your comments to: Magalie R. Salas, Secretary, Federal Energy Regulatory Commission, 888 First St., N.E., Room 1A, Washington, DC 20426;

2. Label one copy of the comments for the attention of the Gas 1, PJ–11.1;

3. Reference Docket No. CP01–439–000; and

4 Mail your comments so that they will be received in Washington, DC on or before April 12, 2002.

Comments may also be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's website at *http://www.ferc.fed.us/efi/doorbell.htm* under the link to the User's Guide. Before you can file comments you will need to create an account which can be created by clicking on "Login to File" and then "New User Account".

Comments will be considered by the Commission but will not serve to make the commentor a party to the proceeding. Any person seeking to become a party to the proceeding must file a motion to intervene pursuant to Rule 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.214).[1] Only intervenors have the right to seek rehearing of the Commission's decision.

Affected landowners and parties with environmental concerns may be granted intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which would not be adequately represented by any other parties. You do not need intervenor status to have your comments considered.

Additional information about the proposed project is available from the Commission's Office of External Affairs at (202) 208–0004 or on the FERC website (www.ferc.fed.us) using the "RIMS" link to information in this docket number. Click on the "RIMS" link, select "Docket #" from the RIMS Menu, and follow the instructions. For assistance with access to RIMS, the RIMS helpline can be reached at (202) 208–2222.

Similarly, the "CIPS" link on the FERC Internet website provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings. From the FERC Internet website, click on the "CIPS" link, select

"Docket #" from the CIPS menu, and follow the instructions. For assistance with access to CIPS, the CIPS helpline can be reached at (202) 208–2474.

Linwood A. Watson, Jr.,

Deputy Secretary.

[FR Doc. 02–6695 Filed 3–19–02; 8:45 am]

BILLING CODE 6717–01–P

[1] Interventions may also be filed electronically via the Internet in lieu of paper. See the previous discussion on filing comments electronically.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Application Ready for Environmental Analysis, Soliciting Comments, Recommendations, Terms and Conditions, and Prescriptions

March 14, 2002.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Amended application for new license.

b. *Project No.:* 1354–005.

c. *Date filed:* July 28, 2001.

d. *Applicant:* Pacific Gas and Electric Company.

e. *Name of Project:* Crane Valley.

f. *Location:* On Willow Creek, North Fork Willow Creek, South Fork Willow Creek, Chilkoot Creek, and Chiquito Creek within the San Joaquin River Basin. The project is in Madera and Fresno counties near the town of Oakhurst, California.

The project includes 738.11 acres of federal lands within the Sierra National Forest.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791 (a)–825(r).

h. *Applicant Contact:* Mr. James Holeman (415) 973–6891 or Mr. Nicholas Markevich, 245 Market Street, P.O. Box 770000, San Francisco, CA 94177, (415) 973–5358.

i. *FERC Contact:* Jim Fargo at (202) 219–2848; e-mail *james.fargo@ferc.fed.us*

VOL
67
ISS
54
MR
20
2002
UMI

j. *Deadline for filing comments, recommendations, terms and conditions, and prescriptions:* 60 days from the issuance date of this notice.

All documents (original and eight copies) should be filed with: Magalie R. Salas Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426.

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

Comments, recommendations, terms and conditions, and prescriptions may be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site *(http://www.ferc.gov)* under the "e-Filing" link.

k. Status of environmental analysis: This application has been accepted for filing and is now ready for environmental analysis. At this time we do not anticipate the need for preparing a draft EA. We intend to prepare a supplement to the environmental document issued in 1992. The supplemental EA will include our recommendations for operating procedures and environmental enhancement measures that should be part of any new license issued by the Commission. Recipients will have 45 days to provide the Commission with any comments on that document. All comments on the EA, filed with the Commission, will be considered in the licensing decision. However, should substantive comments requiring re-analysis be received on the NEPA document, we would consider preparing a subsequent NEPA document before the licensing decision.

1. The Crane Valley—with 26.7 megawatts (MW) of normal operating capacity—has storage, diversion, water conveyance, and power production facilities.

- The Crane Valley reservoir (Bass Lake) with a maximum storage capacity of 45,410 acre-feet (ac-ft) and Chilkoot reservoir, upstream of Crane Valley, with a maximum capacity of 310 ac-ft
- A small diversion on a tributary to the West Fork Chiquito Creek that brings water to Chilkoot reservoir
- A conveyance system—including three diversion dams, three forebays, one afterbay, and about 14 miles of canals, tunnels and flumes—linking these five powerhouses:
  - —Crane Valley, with 0.9 MW of normal operating capacity
  - —San Joaquin No. 3, with 3.4 MW of normal operating capacity
  - —San Joaquin No. 2, with 3.2 MW of normal operating capacity
  - —San Joaquin No. 1A, with 0.4 MW of normal operating capacity
  - —Wishon, with 18.8 MW of normal operating capacity

Historically, the Project produces 123.3 gigawatthours (GWh) of electrical energy annually and has a dependable capacity of 8.4 MW.

m. Locations of the Application: Copies of the application are available for inspection or reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 888 First Street, NE, Washington, D.C. 20426, or by calling (202) 208–2326. The applications may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link-select "Docket #" and follow the instructions (call 202–208–2222 for assistance). A copy is also available for inspection and reproduction at the address in item h above.

n. The Commission directs, pursuant to Section 4.34(b) of the Regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice. All reply comments must be filed with the Commission within 105 days from the date of this notice.

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "COMMENTS", "REPLY COMMENTS", "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b), and 385.2010.

Linwood A. Watson, Jr.,
Deputy Secretary.

[FR Doc. 02–6699 Filed 3–19–02; 8:45 am]

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7160–6]

Agency Information Collection Activities: Proposed Collection; Comment Request; Hazardous Remediation Waste Management Requirements (HWIR-Media)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): "Hazardous Remediation Waste Management Requirements (HWIR-Media)," EPA ICR Number 1775.03; OMB Control Number 2050–0161; Expiration Date 06/30/2002. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before May 20, 2002.

ADDRESSES: Commenters must send an original and two copies of their comments referencing Docket Number F–2002–MH2P–FFFFF to RCRA Docket Information Center, Office of Solid Waste (5305W) United States Environmental Protection Agency, Ariel Rios Building, 1200 Pennsylvania Avenue, NW, Washington, DC, 20460. Hand deliveries of comments should be made to the Arlington, VA address listed below. Comments may also be submitted electronically by sending electronic mail through the Internet to: *rcra-docket@epamail.gov*. Comments in electronic format should also be identified by the Docket Number F–2002–MH2P–FFFFF. All electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this action will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into paper form and place them in the official record, which will also include all comments submitted directly in writing. The official record is the paper record maintained in the RCRA Information Center (the RIC address is listed above in this section).

Commenters should not submit any confidential business information (CBI) electronically. An original and two copies of CBI must be submitted under separate cover to: RCRA CBI Document Control Officer, Office of Solid Waste (5303W), United States Environmental Protection Agency, Ariel Rios Building, 1200 Pennsylvania Avenue, NW, Mailcode 5303W, Washington, DC, 20460.

Public comments and supporting materials are available for viewing in the RCRA Information Center (RIC), located at Crystal Gateway, First Floor, 1235 Jefferson Davis Highway, Arlington, Virginia. The RIC is open from 9 a.m. to 4 p.m. Monday through Friday, excluding federal holidays. To review docket materials, it is recommended that the public make an appointment by calling (703) 603–9230. The public may copy a maximum of 100 pages from any regulatory docket at no charge. Additional copies are $0.15/page.

This notice and the supporting documents that detail the Reporting and Record keeping Requirements for the Hazardous Remediation Waste Management Requirements (HWIR-Media) Final Rule ICR are also available.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline at 800 424–9346 or TDD 800 553–7672 (hearing impaired). In the Washington, DC, metropolitan area, call 703 412–9810 or TDD 703 412–3323.

For more detailed information on specific aspects of this rulemaking contact Mike Fitzpatrick by phone at (703) 308–8411, by facsimile at (703) 308–8609, by mail at the Office of Solid Waste (5303W), United States Environmental Protection Agency, Ariel Rios Building, 1200 Pennsylvania Avenue, NW, Mailcode 5303W, Washington, DC, 20460 or e-mail at *fitzpatrick.mike@epa.gov*.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those owners or operators of facilities that wish to voluntarily clean up contamination of their site.

Title: "Hazardous Remediation Waste Management Requirements (HWIR-Media)" OMB Control No. 2050–0161; EPA ICR No. 1775.03 expiring 06/30/02.

Abstract: All information collection activities required by this rule are authorized by sections 3004 and 3005 of the Solid Waste Disposal Act of 1970, as amended by the Resource Conservation and Recovery Act of 1976 (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984 (SHWA), 42 U.S.C. 6912(a), 6921, 6924, 6925, 6926, and 6927. EPA believes the information collection for this rule is necessary to balance streamlined regulations of remediation wastes with the Agency's responsibility to protect human health and the environment. The respondents are primarily owners or operators of facilities that wish to voluntarily clean up contamination of their site.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: EPA believes that the previous ICR (ICR Number 1775.02) overestimated the number of respondents reading the regulations, since ICRs need only burden respondents for reading the regulations in association with the collection of information. Given this, the current ICR assumes that 176 respondents will perform the paperwork requirements and hence will read the regulations. This is consistent with all other ICRs in the Office of Solid Waste. For hazardous remediation waste management sites that wish to utilize the flexibility provided by the optional requirements of the HWIR-media Rule, the estimated total annual hour burden for this information collection is 4,959 hours, which is about 29,000 hours lower than the previous ICR's burden estimate. The estimated total annual cost burden for this information collection is $334,886, which includes labor, capital, operations and maintenance, and purchased service costs. The total burden over the three year period of this ICR is estimated to be 14,877 hours and $1,004,658.

EPA estimates that, on average, 30 sites will be subject to the requirements in 40 CFR 264.1(j) and part 270, subpart H (i.e., the requirements for sites with RAPs) over the three-year period of this ICR. Note that this ICR addresses only non-permitted sites under 40 CFR 264.1(j) and part 270, subpart H. A site may conduct cleanup through a RAP, permit, or other specified mechanism. Permitted facilities would obtain a RAP by modifying their permit. These activities are already addressed in "Part B Permit Application, Permit Modifications, and Special Permits," ICR Number 1573. Therefore, this ICR addresses only non-permitted sites under the RAP requirements.

EPA also estimated the number of owners/operators of hazardous remediation waste management sites subject to the 40 CFR 264.554 requirements for staging piles. Based on the Biennial Reporting System (BRS) data, EPA estimates that, currently, there are 87 existing hazardous remediation waste management sites with staging piles. Additionally, EPA estimates that, each year, 59 owners/operators of non-permitted hazardous remediation waste management sites will seek a new staging pile designation.

EPA estimates that 176 owners/operators of hazardous remediation waste management sites (i.e., 30 + 87 + 59 = 176) will be subject to the requirements in this ICR and will, therefore, read the regulations each year.

For owners/operators of hazardous remediation waste management sites subject to the 40 CFR 264.1(j) and part 270, subpart H requirements, the reporting burden is estimated to be 27.33 hours per respondent per year. This hourly burden includes time for preparing and submitting a RAP application, information to modify a RAP, and information to transfer a RAP. The recordkeeping burden is estimated to be 42.13 hours per respondent per year. This hourly burden includes time for reading the regulations and maintaining documentation (e.g., waste analyses results, contingency and emergency plan, file of RAP documents) on site.

VOL
67
ISS
54
MR
20
2002
UMI

For owners/operators of hazardous remediation waste management sites subject to the 40 CFR 264.554 requirements for staging piles, the reporting burden is estimated to be 7.08 hours per year per respondent. This hourly burden includes time for preparing and submitting information for a staging pile designation and documentation supporting a staging pile extension. The recordkeeping burden is estimated to be 12.61 hours per respondent per year. This hourly burden includes time for reading the regulations and complying with the recordkeeping requirements in section 264.554(d)(1)(iii).

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: March 11, 2002.

Elizabeth Cotsworth,

Director, Office of Solid Waste.

[FR Doc. 02-6723 Filed 3-19-02; 8:45 am]

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[PF-1070; FRL-6824-4]

Notice of Filing a Pesticide Petition to Establish a Tolerance for a Certain Pesticide Chemical in or on Food

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of a pesticide petition proposing the establishment of regulations for residues of a certain pesticide chemical in or on various food commodities.

DATES: Comments, identified by docket control number PF-1070, must be received on or before April 19, 2002.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I.C. of the **SUPPLEMENTARY INFORMATION.** To ensure proper receipt by EPA, it is imperative that you identify docket control number PF-1070 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By mail: Thomas C. Harris, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 308-9423; e-mail address: harris.thomas@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS codes	Examples of potentially affected entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations" and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

2. *In person.* The Agency has established an official record for this action under docket control number PF-1070. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number PF-1070 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: opp-docket@epa.gov, or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in Wordperfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number PF-1070. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT.**

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Make sure to submit your comments by the deadline in this notice.
7. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. What Action is the Agency Taking?

EPA has received a pesticide petition as follows proposing the establishment and/or amendment of regulations for residues of a certain pesticide chemical in or on various food commodities under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that this petition contains data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 7, 2002.

Peter Caulkins,

Acting Director, Registration Division, Office of Pesticide Programs.

Summary of Petition

The petitioner summary of the pesticide petition is printed below as required by section 408(d)(3) of the FFDCA. The summary of the petition was prepared by Syngenta Crop Protection and represents the view of the petitioner. EPA is publishing the petition summary verbatim without editing it in any way. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

Syngenta Crop Protection

PP 7F4845

EPA has received a pesticide petition (7F4845) from Syngenta Crop Protection, Inc. (formerly Novartis Crop Protection, Inc.), P.O. Box 18300, Greensboro, NC 27419 proposing, pursuant to section 408(d) of FFDCA, 21 U.S.C. 346a(d), to amend 40 CFR part 180 by establishing a tolerance for residues of emamectin benzoate, 4'-epi-methylamino- 4'-deoxyavermectin B_1 benzoate (a mixture of a minimum of 90% 4'-epi- methylamino-4'-deoxyavermectin B_1a, and a maximum of 10% 4'-epi-methlyamino- 4'-deoxyavermectin B_1b benzoate), and its metabolites 8,9 isomer of the B_1a and B_1b component of the parent insecticide in or on the raw agricultural commodities fruiting vegetables (except cucurbits) group at 0.02 parts per million (ppm), brassica leafy vegetables group at 0.025 ppm, turnip, tops at 0.025 ppm, leafy vegetables (except brassica) group at 0.1 ppm, cottonseed at 0.025 ppm, cotton gin byproducts at 0.5 ppm. This notice is an update to a notice of filing originally published on August 29, 1997 (62 FR 45804) (FRL-5738-2). This new notice represents an amendment to the original petition (7F4845) which only included the fruiting vegetables (except cucurbits) group. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Plant metabolism.* The metabolism of emamectin benzoate in plants has been studied in lettuce, cabbage, and sweet corn. The major portion of the residue is parent compound and its delta 8,9- photoisomer. The metabolism of emamectin has also been investigated in goats and poultry to characterize the fate of residues that may be present in animal feed items.

2. *Analytical method.* Adequate analytical methods (HPLC-fluorescence methods) are available for enforcement purposes.

3. *Magnitude of residues.* The appropriate number of residue trials have been conducted for cotton, tomatoes, peppers, leaf lettuce, spinach, head lettuce, celery, and mustard greens. These trials were conducted in the major U.S. growing areas for these crops. Processing studies were conducted to provide tomato product, cottonseed hull, meal, and refined oil samples for analysis.

B. Toxicological Profile

A full description of the studies describing the toxicity, animal metabolism, metabolite toxicology, and endocrine disruption of emamectin benzoate can be found in the posting for its first tolerances in the**Federal Register** of May 19, 1999 (64 FR 27192) (FRL-6079-7).

C. Aggregate Exposure

1. *Dietary exposure.* Emamectin benzoate tolerances have been established for head lettuce, celery, and head and stem brassica vegetables. Syngenta assessed chronic exposure by using the mean of the field trial residue values and projected market share values. The acute exposure assessment was performed as a Tier 3, 5000 iteration, Monte Carlo analysis. Actual field trial residue values were utilized along with market share for each crop.

VOL 67 ISS 54 MR 20 2002 UMI

i. *Food.* Chronic dietary exposure to emamectin benzoate is negligible. Exposure calculations made from conservative residue values generated from field trials conducted at maximum application rates and minimum pre-harvest intervals show that chronic exposure is only 1.1% of the population adjusted dose (PAD) for the most sensitive subpopulation (non-black/non-white/non-hispanics). The second most sensitive subpopulation is children (1–6 years old) with an exposure of 1.0% of the chronic PAD. The chronic PAD is based on a no observable adverse effect level (NOAEL) of 0.075 milligrams/kilogram body weight/day (mg/kg bwt/day) based on a 15-day neurotoxicity study in mice and an uncertainty factor of 900. This uncertainty factor is due to a 100–fold safety factor for interspecies and intraspecies variation and an additional 9–fold safety factor for use of a toxicological study of short duration (3x) plus a FQPA safety factor (3x).

Acute exposure for the most sensitive subpopulation is 26.8% of the acute PAD (aPAD) for non-nursing infants <1 year). The exposure to the U.S. population is 16.7% of the aPAD. These exposures were compared to the same toxicological endpoint as described above for the chronic assessment except an uncertainty factor of 300 was assumed (100–fold for interspecies and intraspecies variation and a 3–fold FQPA safety factor.

ii. *Drinking water—a. Chronic exposure.* The estimated maximum concentrations of emamectin benzoate in surface and ground water are 0.00137 parts per billion (ppb) (Day 56 EEC/3 from GENEEC) and 0.00600 ppb (SCI-GROW), respectively. The chronic PAD for emamectin benzoate is 0.000083 mg/kg bwt/day. From the chronic dietary exposure analysis, an exposure estimate of 0.0000006 mg/kg bwt/day was determined for the U.S. population and 0.0000007, 0.0000008, and 0.0000009 mg/kg/day for the females (13+/nursing), children (1–6 years) and non-hispanic/non-white/non-black subgroups, respectively. Based on EPA's "Interim Guidance for Conducting Drinking Water Exposure and Risk Assessments" document (December 2, 1997), chronic drinking water levels of comparison (DWLOC) for emamectin benzoate were calculated to be 3 ppb for the U.S. population and 2, 1, 3 ppb for the females (13+/nursing), children (1–6 years), and non-hispanic/non-white/non-black subgroups, respectively. Based on this analysis, emamectin benzoate estimated environmental concentrations (EECs) do not exceed the calculated chronic DWLOCs.

b. *Acute exposure.* The estimated maximum concentrations of emamectin benzoate in surface and ground water are 0.09688 ppb (peak EEC from GENEEC) and 0.00600 ppb (SCI-GROW), respectively. The aPAD for emamectin benzoate is 0.00025 mg/kg bwt/day. From the acute dietary exposure analysis, the highest acute food exposure from the uses of emamectin benzoate was 0.000042 mg/kg/day at the 99.9th percentile for the U.S. population and 0.000058 and 0.000067 mg/kg/day for the children (1–6 years) and non-nursing infants (<1 yr) subgroups, respectively. Using this information, acute DWLOCs for emamectin benzoate were calculated to be 7 ppb for the U.S. population and 2 ppb and 2 ppb for the children (1–6 years), and non-nursing infants (<1 yr) subgroups, respectively. Based on this analysis, emamectin benzoate EECs do not exceed the calculated acute DWLOCs.

2. *Non-dietary exposure.* No products containing emamectin benzoate have yet been registered under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for any non-food use. No significant non-dietary, non-occupational exposure is anticipated.

D. Cumulative Effects

Emamectin benzoate is synthetically derived from avermectin, which is derived from *Streptomyces avermitilus*, which produces the insecticide avermectin, which is a mixture of two homologs, avermectin B_1a and B_1b, which have equal biological activity. Currently, the only other member of this class that is registered for agricultural uses is abamectin. Abamectin and ivermectin are structurally similar to emamectin. EPA does not have at this time available data to determine whether emamectin benzoate has a common mechanism of toxicity with other substances or how to include this pesticide in a cumulative risk assessment. Unlike other pesticides for which EPA has followed a cumulative risk approach based upon a common mechanism, emamectin benzoate does not appear to produce a toxic metabolite produced by other substances. For the purpose of this tolerance action, therefore, Syngenta has not assumed that emamectin benzoate has a common mechanism of toxicity with these other substances.

E. Safety Determination

1. *U.S. population—i. Acute risk.* Exposure to emamectin benzoate residues in food will occupy no more than 16.7% of the aPAD for adult population subgroups and no more than 26.8% of the aPAD for infant/children subgroups. Residue levels used for food-source dietary risk assessments were highly refined and did incorporate percent of crop treated information. Acute dietary exposure estimates were for the 99.9th percentile. Estimated concentrations of emamectin residues in surface and ground water are lower than the DWLOCs. Therefore, Syngenta does not expect acute aggregate risk to emamectin benzoate residues from food and water sources to exceed the level of concern for acute dietary exposure.

ii. *Chronic risk.* The chronic dietary exposure to emamectin residues in food will occupy no more than 0.7% of the chronic RfD for adult population subgroups and no more than 1.0% PAD for children, 1–6 years old, subgroups. Residue levels used for food-source dietary risk assessments were highly refined and did incorporate percent of crop treated information, as indicated above. The estimated concentrations of emamectin residues in surface and ground water are lower than the DWLOCs. The expected chronic aggregate risk to emamectin residues from food and water sources would not be expected to exceed the level of concern for chronic dietary exposure.

2. *Infants and children.* For emamectin benzoate, the Agency has determined the tenfold safety factor for the protection of infants and children should be reduced to 3x. The rationale for reducing the FQPA safety factor is as follows: No increased susceptibility was demonstrated in rats or rabbits following *in utero* and/or postnatal exposure to emamectin. However, increased susceptibility was demonstrated in a developmental neurotoxicity study in rats.

Although, increased susceptibility was demonstrated in a developmental neurotoxicity study in rats, EPA determined that the 10x factor should be reduced to 3x based on the following weight-of-the-evidence considerations in the developmental neurotoxicity study: (1) The lowest observed adverse effect level (LOAEL) was based on a single effect/end point (i.e., decrease in open field motor activity); (2) the effect at the LOAEL was seen only on postnatal day 17 and was not seen either on earlier day 13 or later day 21 evaluations, whereas, at the high dose (3.6/2.5 mg/kg/day), this effect was seen on postnatal days 13 and 17; (3) the effect at the LOAEL was not accompanied with other toxicity whereas, at the high dose tremors and hind limb splay were also seen; (4) the decreased performance was lower only when compared to the concurrent control; and (5) there was limited (only two studies) historical control data available for comparison.

Syngenta believes the clinical signs of avermectin-family neurotoxicity seen in neonatal rats are unlikely to be useful predictors of human risk. Young rats are considerably more sensitive to avermectin-type compounds than either adult rats or humans and other primates. (In neonatal rats, unlike humans, the P-glycoprotein levels are only a small fraction of the levels seen in adult rats.) Moreover, data from clinical experience with ivermectin, a related human drug, and studies on ivermectin and abamectin, a related pesticide, demonstrate that both the neonatal rat and the CF–1 mouse overpredict the toxicity of the avermectin-type compounds to humans and to non-human primates.

3. *Conclusion.* There is a complete toxicity data base for emamectin benzoate and exposure data are complete or are conservatively estimated based on data that reasonably account for potential exposures. Based on these risk assessments, Syngenta concludes that, there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to emamectin benzoate residues.

F. International Tolerances

No Codex maximum residue levels have been established for residues of emamectin benzoate.

BILLING CODE 6560–50–S

EXECUTIVE OFFICE OF THE PRESIDENT

Information Collection Activities and Request for Comments

AGENCY: Office of National Drug Control Policy, Executive.

ACTION: Notice.

SUMMARY: The National Youth Anti-Drug Media Campaign is a program within the Office of National Drug Control Policy (ONDCP). To generate anti-drug awareness, the Media Campaign has partnered with the Advertising Council to create an advertising campaign that encourages local community coalitions to engage in drug prevention activities. In addition, the partnership proposes to collect information from interested adults to determine whether public service advertising increases participation in local coalition activities, the usefulness of local public service announcements, and community response to public service announcements. ONDCP invites comments on the (a) information necessary to accurately measure partnership efforts; (b) quality, utility and clarity of the information; (c) methods that minimize the burden of information collection techniques; and (d) accuracy of the estimated burden of information collection.

FOR FURTHER INFORMATION CONTACT: Gem Benoza (202) 395–4625.

Dated: March 13, 2002.

Don Maple,

Media Campaign Deputy Director.

BILLING CODE 3180–02–U

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Commission hereby gives notice of the filing of the following agreement(s) under the Shipping Act of 1984. Interested parties can review or obtain copies of agreements at the Washington, DC offices of the Commission, 800 North Capitol Street, NW., Room 940. Interested parties may submit comments on an agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days of the date this notice appears in the **Federal Register**.

Agreement No.: 011793.

Title: Maersk Sealand/Great Western Asia-U.S. West Coast Slot Charter Agreement.

Parties: A.P. Moller-Maersk Sealand, Great Western Steamship Company.

Synopsis: Under the proposed agreement, Great Western will charter container slots from Maersk Sealand in the trade between U.S. West Coast ports and ports in Asia. The parties request expedited review.

Agreement No.: 011794.

Title: COSCON/KL/YMUK/Hanjin/Senator Asia & Europe/U.S. Atlantic & Gulf Coast Slot Allocation & Sailing Agreement.

Parties: COSCO Container Lines Company, Limited, Hanjin Shipping Co., Ltd., Kawasaki Kisen Kaisha, Ltd., Senator Lines GmbH, Yangming (UK) Ltd.

Synopsis: Under the proposed agreement, the parties will be selling or exchanging container slots and coordinating their services in the trades between U.S. Atlantic and Gulf ports and ports in Asia, Central America, and Europe.

Agreement No.: 201087–001.

Title: Oakland-International Transportation Marine Terminal Agreement.

Parties: City of Oakland, Board of Port Commissioners, International Transportation Service, Inc.

Synopsis: The proposed amendment foresees the replacement of cranes with resultant changes in the breakpoint level and the minimum annual guarantee as well as a change in the extent of the premises covered by the agreement. The agreement continues to run through June 30, 2003.

Agreement No.: 201131.

Title: NY/NJ-Maher Lease Agreement.

Parties: The Port Authority of New York and New Jersey, Maher Terminals, Inc.

Synopsis: The agreement covers the lease of a marine terminal at the port authority's Elizabeth Marine Terminal. The agreement runs through September 30, 2030.

Agreement No.: 201132.

Title: NY/NJ-Port Newark Container Terminal LLC Lease Agreement.

Parties: The Port Authority of New York and New Jersey, Port Newark Container Terminal LLC.

Synopsis: The agreement covers the lease of a marine terminal at the port authority's Newark Marine Terminal. The agreement runs through November 30, 2030.

Dated: March 15, 2002.

By Order of the Federal Maritime Commission.

Bryant L. VanBrakle,

Secretary.

BILLING CODE 6730–01–P

FEDERAL MARITIME COMMISSION

Request for Additional Information

The Commission gives notice that it has requested that the parties to the below listed agreement provide additional information pursuant to section 6(d) of the Shipping Act of 1984, 46 U.S.C. app. 1705(d). The Commission has determined that further information is necessary to evaluate the impact of the proposed Reefer Trade Management Program. This action prevents the agreement from becoming effective as originally scheduled.

The Commission also gives notice that it has determined to hold an oral hearing at which interested parties may present information and views on the likely effects of the proposed Reefer Trade Management Program on competition, transportation services, and transportation costs for shippers of refrigerated cargo. The Commission will establish the date, specific issues to be heard, and procedures for this hearing by further notice.

VOL 67 ISS 54 MR 20 2002 UMI

Agreement No.: 011325–027.
Title: Westbound Transpacific Stabilization Agreement.
Parties: American President Lines, Ltd., APL Co. PTE, A.P. Miller-Maersk Sealand, COSCO Container Lines, Evergreen Marine Corporation, Hanjin Shipping Company, Ltd., Hapag-Lloyd Container Linie GmbH, Hyundai Merchant Marine Co., Ltd., Kawasaki Kisen Kaisha, Ltd., Mitsui O.S.K. Lines, Ltd., Nippon Yusen Kaisha, Orient Overseas Container Line Limited, P&O Nedlloyd B.V., P&O Nedlloyd Limited, Yangming Marine Transport Corp.

By Order of the Federal Maritime Commission.

Dated: March 15, 2002.

FEDERAL MARITIME COMMISSION

Ocean Transportation Intermediary License Revocations

The Federal Maritime Commission hereby gives notice that the following Ocean Transportation Intermediary licenses have been revoked pursuant to section 19 of the Shipping Act of 1984 (46 U.S.C. app. 1718) and the regulations of the Commission pertaining to the licensing of Ocean Transportation Intermediaries, effective on the corresponding date shown below:

License Number: 16183N.
Name: AJ International Shipping/ Logistics, Inc.
Address: 4548 Mundy Road, Jacksonville, FL 32207.
Date Revoked: February 6, 2002.
Reason: Failed to maintain valid bond.

License Number: 4088F.
Name: Able Freight Services, Inc.
Address: 5340 W. 104th Street, Los Angeles, CA 90045.
Date Revoked: February 10, 2002.
Reason: Failed to maintain valid bond.

License Number: 4503F
Name: Aimar USA, Inc.
Address: 7500 W. 18th Lane, Hialeah, FL 33014.
Date Revoked: February 11, 2002.
Reason: Failed to maintain a valid bond.

License Number: 3202F.
Name: BWI Transworld Illinois, Inc.
Address: 765 Route 83, Suite 112, Bensenville, IL 60106.
Date Revoked: February 2, 2002.
Reason: Failed to maintain a valid bond.

License Number: 506F.
Name: DBM Logistics, Inc.
Address: 5130 Franklintown Road, Baltimore, MD 21207.
Date Revoked: February 16, 2002.
Reason: Failed to maintain a valid bond.

License Number: 4425F.
Name: Esprit International Shipping Combined Transport, Inc. dba Capital Freight Management.
Address: 701 S. Atlantic Blvd., Suite 200, Monterey Park, CA 91754.
Date Revoked: February 13, 2002.
Reason: Failed to maintain a valid bond.

License Number: 15791N.
Name: Fast Service Inc.
Address: 206 Warren Street, Harrison, NJ 07029.
Date Revoked: February 17, 2002.
Reason: Failed to maintain a valid bond.

License Number: 3968F.
Name: Flamingo Freight Forwarders, Inc.
Address: 9921 NW 80th Avenue, Bay 1–Q, Hialeah Gardens, FL 33016.
Date Revoked: February 22, 2002.
Reason: Failed to maintain a valid bond.

License Number: 17080N.
Name: General Cargo & Logistics.
Address: 4261 182nd Street, Suite J, Torrance, CA 90504.
Date Revoked: February 23, 2002.
Reason: Failed to maintain a valid bond.

License Number: 3886NF.
Name: Goodship International, Inc.
Address: 1058 Tower Lane, Bensenville, IL 60106.
Date Revoked: February 27, 2002.
Reason: Surrendered license voluntarily.

License Number: 16421N.
Name: Korea Express Atlanta, Inc. dba Korea Freight Line, Inc.
Address: 5559 New Peachtree Road, Chamblee, GA 30341.
Date Revoked: February 16, 2002.
Reason: Failed to maintain a valid bond.

License Number: 3217F.
Name: Kremer International Transport, Inc.
Address: 3501 Watson Road, St. Louis, MO 63139.
Date Revoked: February 13, 2002.
Reason: Failed to maintain a valid bond.

License Number: 4547NF.
Name: Millennium Shipping Company.
Address: 4100 East 51st Street, Suite 104, Tulsa, OK 74135.
Date Revoked: February 2, 2002.
Reason: Failed to maintain a valid bond.

License Number: 15292N.
Name: Moon Beam International, Inc.
Address: 2740 Tonawanda Creek Road, Amherst, NY 14228.
Date Revoked: February 13, 2002.
Reason: Failed to maintain a valid bond.

License Number: 1739F.
Name: Ronald D. Stribling dba Ronald D. Stribling Company.
Address: 4110 NE 122nd Avenue, Suite 140, Portland, OR 97230.
Date Revoked: February 13, 2002.
Reason: Failed to maintain a valid bond.

License Number: 13490N.
Name: Sotby Transocean Line, Inc.
Address: 1630 Bath Avenue, Brooklyn, NY 11214.
Date Revoked: January 18, 2002.
Reason: Failed to maintain a valid bond.

License Number: 16655N.
Name: Vayer L.A., Inc.
Address: 11755 Sheldon Street, Sun Valley, CA 91352.
Date Revoked: February 22, 2002.
Reason: Failed to maintain a valid bond.

Ronald D. Murphy,

Deputy Director, Bureau of Consumer Complaints and Licensing.

BILLING CODE 6730–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 12, 2002.

A. Federal Reserve Bank of San Francisco (Maria Villanueva, Consumer Regulation Group) 101 Market Street, San Francisco, California 94105–1579:

1. Plumas Bancorp, Quincy, California; to become a bank holding company by acquiring 100 percent of the voting shares of Plumas Bank, Quincy, California.

Board of Governors of the Federal Reserve System, March 14, 2002.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–02–36]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 487–1210.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS–D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project: The CDC/ATSDR Educational Loan Repayment Program (ELRP)—New—Office of the Director, Human Resources Management Office, Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry (CDC/ ATSDR).

The Centers for Disease Control and Prevention (CDC) intends to implement an Educational Loan Repayment Program (ELRP) authorized under 42 U.S.C. Sect. 247b-7 as a recruitment and retention incentive for highly qualified health professionals in hard-to-fill positions. The ELRP will be implemented on a pilot basis with up to fifteen (15) loans.

Under the ELRP, a maximum of $35,000 a year (plus 39 per cent of total loan repayment for tax credit as loan repayment benefits represent taxable income) may be repaid toward a participant's outstanding eligible educational debt. The participant is responsible for a loan repayment equal to a total of 10 percent of his/her annual CDC base salary, while the ELRP will repay at a rate of one-third (1/3) of the remaining repayable debt (up to the maximum allowable) for each of the three (3) years. The participant must sign a contract agreeing to remain employed by CDC for a period of not less than three years. Failure to complete the minimum three-year service agreement period will be considered a breach of contract and will subject the ELRP participant to assessment of monetary penalties and damages. Actual loan repayment amounts are based on the proportion of a participant's qualifying debt relative to his/her beginning CDC base salary.

Overall ELRP eligibility requirements:

a. Be a citizen of the United States;

b. Hold a relevant Doctoral degree or equivalent;

c. Have been selected for a vacant position or is currently assigned to a covered hard-to-fill health professional occupational series at CDC/ATSDR; and,

d. Have a qualifying educational debt in excess of 20 percent of their annual CDC base salary.

There are no costs to respondents.

Respondents	Number of respondents	Responses/ respondent	Avg. burden per response (in hrs)	Total burden (in hrs)
Supervisor	15	1	15/60	4
Applicant	15	1	15/60	4
Lender	45	1	30/60	23
Total				31

Dated: March 14, 2002.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

National Vaccine Advisory Committee/ Vaccine Supply Conference Call

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the following Federal Advisory Committee meeting.

Name: National Vaccine Advisory Committee (NVAC) Vaccine Supply Conference Call.

Time and Date: 11 a.m.–1 p.m., April 1, 2002.

Place: Audio Conference Call.

Status: This meeting is open to the public, telephone lines are limited. The public can join the meeting by Audio Conference Call by calling (888) 398–1687 and providing the following information:

Pass code: Peter.

Leaders Name: Dr. Georges Peter.

Purpose: This committee advises and makes recommendations to the Director of the National Vaccine Program on matters related to the Program responsibilities.

Matters To Be Discussed: To discuss recommendations from the NVAC Workshop on Strengthening the Vaccine Supply.

Agenda items are subject to change as priorities dictate.

Public comments will be permitted at the end of the NVAC meeting on April 1, 2002.

Contact Person for More Information: Gloria Sagar, Committee Management Specialist, NVPO, CDC, 4770 Buford Highway, M/S K–77, Atlanta, Georgia 30341, telephone (770)488–2040.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Dated: March 12, 2002.

Alvin Hall,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Proposed Criteria for Selecting New Environmental Chemicals or Categories of Chemicals for Analytic Development and for Inclusion in Future Releases of the National Report on Human Exposure to Environmental Chemicals

AGENCY: Centers for Disease Control and Prevention (CDC), Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: Requests public comment on CDC's proposed criteria for selecting new environmental chemicals or categories of chemicals for analytical method development and for selecting additional environmental chemicals or categories of chemicals tc appear in future releases of the "National Report on Human Exposure to Environmental Chemicals" (the "Report"). The proposed criteria for choosing new environmental chemicals or categories of chemicals for analytic development and for including chemicals or categories of chemicals in future editions of the "Report" are as follows: (1) Independent scientific data which suggest that the potential for exposure of the U.S. population to a particular chemical is changing or persisting; (2) seriousness of health effects known or suspected to result from exposure to the chemical (for example, cancer and birth defects); (3) the proportion of the U.S. population likely to be exposed to levels of chemicals of known or potential health significance; (4) the need to assess the efficacy of public health actions to reduce exposure to a chemical in the U.S. population or a large component of the U.S. population (for example, in children); (5) the existence of an analytic method that can measure the chemical or its metabolite in blood or urine with adequate accuracy, precision, sensitivity, specificity, and speed; and (6) the incremental analytical cost (in dollars and personnel) to perform the analyses (preference is given to chemicals that can be added readily to existing analytical methods). After reviewing and incorporating public comments from this announcement, CDC will publish the criteria in their final form in the **Federal Register** along with a general notice requesting public nominations of new chemicals that satisfy the new criteria. The criteria will be used by experts to prioritize the nominated chemicals for analytical method development and for eventual inclusion in the "Report."

DATES: Submit comments on or before April 19, 2002.

ADDRESSES: Address all comments concerning this notice to Dorothy Sussman, Centers for Disease Control and Prevention, National Center for Environmental Health, Division of Laboratory Sciences, Mail Stop F–20, 4770 Buford Highway, Atlanta, Georgia 30341.

FOR FURTHER INFORMATION CONTACT: Technical Information: Dr. Richard Wang, Telephone 770–488–7950

SUPPLEMENTARY INFORMATION: The "Report" provides an ongoing assessment of the exposure of the U.S. population to environmental chemicals using biomonitoring. (The "Report" is published by CDC under the authoritities 42 U.S.C. 241 and 42 U.S.C. 242k). For the "Report," an environmental chemical means a chemical compound or chemical element present in air, water, soil, dust, food, or other environmental media. Biomonitoring is the assessment of human exposure to chemicals by measuring the chemicals or their breakdown products in human specimens, such as blood or urine. The "Report" provides this exposure information about participants in an ongoing national survey known as the National Health and Nutrition Examination Survey (NHANES). This survey is conducted by CDC's National Center for Health Statistics; measurements are conducted by CDC's National Center for Environmental Health. The first "Report," published in March 2001, gave information about levels of 27 chemicals found in the U.S. population. The "Report" can be obtained at the following: *www.cdc.gov/nceh/dls/report/*; email *ncehdls@cdc.gov* or Telephone 1–866–670–6052. In addition to those chemicals in the first "Report," the following categories or classes of environmental chemicals will be in the second "Report:" polycyclic aromatic hydrocarbons (PAHs), co-planar and non-planar polychlorinated biphenyls (PCBs), persistent organochlorine pesticides, carbamate pesticides, dioxins, and furans.

Future editions of the "Report" will provide detailed assessments of exposure levels among different population groups defined by sex, race/ethnicity, age, urban /rural residence, education level, income, and other characteristics. Over time, CDC will be able to track trends in exposure levels. Future editions may also include additional exposure information for special-exposure populations (*e.g.*, children) from studies of people through localized or point sources and from studies of adverse health effects resulting from exposure to varying levels of environmental chemicals.

Dated: March 12, 2002.

Joseph R. Carter,

Associate Director for Management and Operations, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare and Medicaid Services

[Document Identifier: CMS–R–74]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare and Medicaid Services, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare and Medicaid Services (CMS) (formerly known as the Health Care Financing Administration (HCFA)), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: Extension of a currently approved collection.

Title of Information Collection: Income and Eligibility Verification System (IEVS) and Supporting Regulations in 42 CFR 435.940–435.965.

Form No.: CMS–R–74 (OMB# 0938–0467).

Use: Section 1137 of the Social Security Act requires Medicaid State agencies and other federally funded welfare agencies to request income and resource data from certain federal agencies, State wage information collection agencies, and State unemployment compensation agencies through an IEVS. The purpose of the IEVS is to ensure that only eligible individuals receive benefits.

Frequency: Annually.

Affected Public: State, local, or tribal government.

Number of Respondents: 54.

Total Annual Responses: 54.

Total Annual Hours: 131,390.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS's Web Site address at *http://www.hcfa.gov/regs/prdact95.htm*, or e-mail your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@hcfa.gov*, or call the Reports Clearance Office on (410) 786–1326. Written comments and recommendations for the proposed information collections must be mailed within 60 days of this notice directly to the CMS Paperwork Clearance Officer designated at the following address:

CMS, Office of Information Services, Security and Standards Group, Division of CMS Enterprise Standards, Attention: Julie Brown, CMS–R–74, Room N2–14–26, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Dated: March 12, 2002.

John P. Burke, III,

Reports Clearance Officer, Security and Standards Group, Division of CMS Enterprise Standards.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare and Medicaid Services

[Document Identifier: CMS–416]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare and Medicaid Services, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare and Medicaid Services (CMS) (formerly known as the Health Care Financing Administration (HCFA)), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: Extension of a currently approved collection.

Title of Information Collection: Annual Early and Periodic Screening, Diagnostic, and Treatment Services (EPSDT) Participation Report and Supporting Regulations in 42 CFR 441.60.

Form No.: CMS–416 (OMB# 0938–0354).

Use: States are required to submit an annual report on the provision of EPSDT services to CMS pursuant to section 1902(a)(43) of the Social Security Act. These reports provide CMS with data necessary to assess the effectiveness of State EPSDT programs. It is also helpful in developing trend patterns, national projections, responding to inquiries, and

determining a State's results in achieving its participation goal.

Frequency: Annually.

Affected Public: State, Local or Tribal Government.

Number of Respondents: 56;

Total Annual Responses: 56.

Total Annual Hours: 1,568.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS's Web Site address at *http://www.hcfa.gov/regs/prdact95.htm*, or e-mail your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@hcfa.gov*, or call the Reports Clearance Office on (410) 786–1326. Written comments and recommendations for the proposed information collections must be mailed within 60 days of this notice directly to the CMS Paperwork Clearance Officer designated at the following address:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare and Medicaid Services

[Document Identifier: CMS–1880/1882]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare and Medicaid Services, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare and Medicaid Services (CMS) (formerly known as the Health Care Financing Administration (HCFA)), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: Extension of a currently approved collection.

Title of Information Collection: Request for Certification as Supplier of Portable X-ray Services under the Medicare/Medicaid Program for Portable X-ray Survey Report and Supporting Regulations in 42 CFR 486.100—486.110.

Form No.: CMS–1880/1882 (OMB# 0938–0027).

Use: The Medicare program requires portable X-ray suppliers to be surveyed for health and safety standards. The CMS–1880 is used by the surveyor to determine if a portable X-ray applicant meets the eligibility requirements. It also promotes data reduction or introduction, and retrieval from the Online Survey Certification and Reporting (OSCAR) System by the CMS Regional Offices. The CMS–1882 is the survey form that records survey results. The form is primarily a coding work sheet designed to facilitate data reduction and retrieval into the OSCAR system at the CMS Regional Offices.

Frequency: On occasion.

Affected Public: Business or other for profit.

Number of Respondents: 655.

Total Annual Responses: 98.

Total Annual Hours: 172.

Centers for Medicare and Medicaid Services

[Document Identifier: CMS–R–299]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare and Medicaid Services, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare and Medicaid Services (CMS) (formerly known as the Health Care Financing Administration (HCFA)), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: Revision of a currently approved collection.

Title of Information Collection: A Project to Develop an Outcome-Based Continuous Quality Improvement System and Core Outcome and Comprehensive Assessment Data Set for PACE.

Form No.: CMS–R–299CMS—(OMB# 0938–0791).

Use: The purpose of this project is to develop an outcome-based continuous quality improvement (OBCQI) system and core comprehensive assessment data set for the PACE program by (a) developing and testing a set of data items for core outcome and comprehensive assessment (COCOA), (b) testing risk-adjustment methods so each site's outcomes can be

appropriately evaluated, (c) designing an OBCQI approach to improve quality in a systematic, evolutionary manner, and (d) testing the usefulness of the data items for assessment and care planning. A three-phase field test will result in the refinement of the draft COCOA data items and protocols as needed. Findings from the project are intended to guide the possible implementation of a national approach for OBCQI and core comprehensive assessment for PACE.

Frequency: On Occasion.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 00D–1542]

Draft Guidance for Industry on Electronic Records; Electronic Signatures, Time Stamps; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guidance for industry entitled "Guidance for Industry, 21 CFR Part 11; Electronic Records; Electronic Signatures, Time Stamps." The draft guidance describes the agency's current thinking on issues pertaining to the use of computer generated time stamps in computer systems subject to part 11 (21 CFR part 11) requirements, to ensure that electronic records and electronic signatures are trustworthy, reliable, and compatible with FDA's public health responsibilities. The use of the computer generated time stamps is a requirement of part 11 of title 21 of the Code of Federal Regulations.

DATES: Submit written or electronic comments on the draft guidance by June 18, 2002. General comments on agency guidance documents are welcome at any time.

ADDRESSES: Submit written requests for single copies of the draft guidance to the Division of Compliance Information and Quality Assurance (HFC–240), Office of Enforcement, 5600 Fishers Lane, Rockville, MD 20857. Send one self-addressed adhesive label to assist that office in processing your requests. Submit written comments on the draft guidance document to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1060, Rockville, MD 20852. Submit electronic comments to http://www.fda.gov/dockets/ecomments. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Paul J. Motise, Office of Enforcement (HFC–240), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–0383, e-mail: pmotise@ora.fda.gov.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance entitled "Guidance for Industry, 21 CFR Part 11; Electronic Records; Electronic Signatures, Time Stamps." In the **Federal Register** of March 20, 1997 (62 FR 13430), FDA published a regulation providing criteria under which the agency considers electronic records and electronic signatures to be trustworthy, reliable, and generally equivalent to paper records and handwritten signatures executed on paper (part 11). The preamble to part 11 stated that the agency anticipated issuing supplemental guidance documents and would afford all interested parties the opportunity to comment on draft guidance documents.

The draft guidance addresses issues pertaining to computer generated time stamps in computer systems used to create, modify, maintain, archive, retrieve, or transmit electronic records and electronic signatures subject to part 11. Part 11 requires persons subject to the regulation to implement time stamps in audit trails and signature manifestations, and the draft guidance is intended to assist people who must meet this requirement; it may also assist FDA staff who apply part 11 to persons subject to the regulation.

The draft guidance provides specific information on key principles and practices, and it addresses some frequently asked questions. However, it is not intended to cover every aspect of time stamps.

This level 1 draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). This draft guidance, when finalized, will represent the agency's current thinking on computer generated time stamps used in computer systems subject to part 11. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

II. Comments

Interested persons may submit to the Dockets Management Branch (address above) written or electronic comments on the draft guidance. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. A copy of the draft guidance and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

III. Electronic Access

Persons with access to the Internet may obtain the document at http://www.fda.gov/ora/compliance_ref/Part11/default.htm.

Dated: March 12, 2002.

Margaret M. Dotzel,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Availability of Funds for Grants for the Community Access Program

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice of availability of funds.

SUMMARY: The Health Resources and Services Administration (HRSA) announces the availability of funding to assist communities and their safety net providers in developing integrated health care delivery systems that serve the uninsured and underinsured with greater efficiency and improved quality of care. This funding is part of the $105 million appropriated for the Community Access Program (CAP) under the fiscal year 2002 Health and Human Services Appropriations Act. Up to $20 million will be available as 1-year CAP grants with the possibility of supplemental funding depending on performance and funding availability. Current annual awards to communities average about $900,000 per award, and range from approximately $150,000 to $1.2 million. Applicants are encouraged to propose total budgets in this range.

The purpose of this program is to assist communities and consortia of health care providers, faith-based organizations and others to support the infrastructure necessary to fully develop or strengthen integrated health systems of care that coordinate health services for the uninsured and underinsured. The goals are to increase access to care, generate system-wide efficiency and cost savings, and improve health in targeted populations. The coordination of services through the CAP grant will allow the uninsured and underinsured to receive more efficient and higher quality care and gain entry into a comprehensive system of care. The system will be characterized by effective collaboration, information sharing, and clinical and financial coordination among all levels of care in the community network.

DATES: The timeline for application submission, review and award is as follows:

Application kits and additional guidance are available through the HRSA Grants Application Center (GAC).

May 7, 2002—Applications due.

June–2002—Applications reviewed.

July–August—Site visits to selected applicants.

September 2002—Grant awards announced.

ADDRESSES: To receive a complete application kit (i.e., application instructions, necessary forms, and application review criteria), contact the HRSA GAC at:

Health Resources and Services Administration Grants Application Center COMMUNITY ACCESS PROGRAM: CFDA #93.252, 901 Russell Avenue, Suite 450, Gaithersburg, MD 20879, Phone: 1–877—HRSA–123, Fax: 1–877–HRSA–345. E-mail: *hrsagac@hrsa.gov*.

FOR FURTHER INFORMATION CONTACT: Community Access Program Office, Health Resources and Services Administration, 4350 East West Highway, 3rd Floor, Bethesda, Maryland 20854, Phone: 301–443–0536, Fax: 301–443–0248. E-mail: *capcentral@hrsa.gov*.

SUPPLEMENTARY INFORMATION:

Program Description

The program has been in existence since FY 2000 with 136 projects funded to date. Many communities supported by earlier grants have already taken action to meet the health needs of all their residents. There are many exciting, dynamic models. Each of the existing CAP communities has created a project that addresses its own needs. We are interested in funding new communities that plan to generate better health for more people at less cost.

There is no one successful model that we are trying to replicate. Some successful communities:

- Have a project design that builds on its current capacities and strengths.
- Build coalitions that include the major players in the political and health delivery systems.
- Use Federal funds to plan a transition to an expanded approach that will be competitive within its own market.
- Have a plan for sustainability after Federal funds expire.
- Have a coalition that works with its county board, city council, State legislature and State health programs to ensure coordination and efficient use of all available resources.

CAP requires a coalition/collaboration of partners that includes primary, secondary and preventive care. The coalition/collaboration should include the providers of safety net services who currently serve the community. Many existing CAP coalitions have:

- Coordinated the provision of care through public hospitals, public health departments, and Federally Qualified Health Centers and existing other federally funded programs like Healthy Start and Ryan White;
- Included a strong linkage with social service organizations and faith-based programs.
- Linked hospital and clinic services using state of the art information technology.
- Developed management systems that allow transitions between Medicaid, uninsured, and insured status for low income populations to reduce administrative burden on providers.
- Created networks to ensure a primary care home for uninsured persons and distributed the caseloads among all providers.
- Linked mental health and substance abuse services to primary care.
- Ensured partnership with the local business community.
- Addressed service gaps by expanding health centers.

Although there are many models emerging, these are not really common characteristics but are "issues frequently addressed." They are:

- Common enrollment systems.
- Standardized financial eligibility.
- Agreement about sliding fee scales.
- Coordination of services among providers.
- Ensured primary care or medical homes.
- Provision of specialty services.
- Automated appointment systems.
- Case management services.
- Strategies for affordable pharmaceutical services.
- Disease management programs across the array of community providers.
- Outreach to hard-to-enroll populations.
- Information systems to implement the desired strategies.
- Included use of local taxing authorities and redirected funds within the system to provide for sustainability.

These communities are demonstrating that these changes are possible and they are reporting the results of their efforts across the Nation. They are communities with clear goals, an operational plan for meeting these goals, a history of commitment to serving indigent populations, and a track record to indicate a reasonable chance of success.

Eligible Applicants

To encourage the development of different models, this program seeks a variety of applicants representing all types of communities. Applicants who receive funding may be large health care systems or small organizations. Applications are encouraged from urban areas, rural communities, tribal organizations, and faith-based communities.

Applications may be submitted by public and private non-profit entities that demonstrate a commitment to and experience with providing a coordinated continuum of care to uninsured individuals. Each applicant must represent a community-wide coalition that is committed to the project and includes safety net providers (where they exist) who have traditionally provided care to the community's uninsured and underinsured regardless of ability to pay. The community-wide coalition must consist of partners from all levels of care and partners who represent a range of services (*e.g.*, mental health and substance abuse treatment, maternal and child health care, oral health, HIV/AIDS care) to a wide variety of populations. Coalitions are encouraged to include partners from private industry, faith-based organizations, and other organizations within communities.

Examples of eligible applicants which may apply on behalf of the community-wide coalition include, but are not limited to:

- A consortium or network of providers (*e.g.*, public and charitable hospitals; community, migrant, homeless, public housing, and school-based health centers; rural health clinics; free health clinics; teaching hospitals and academic institutions).
- Local government agencies (*e.g.*, local public health departments with service delivery components).
- Tribal governments.
- Managed care plans or other payers (*e.g.*, HMOs).
- Agencies of State government, multi-State health systems, or other groups may submit applications on behalf of multiple communities if they demonstrate the ability to coordinate community health care delivery systems and bring resources to the community.

Existing CAP grantees are not eligible to apply for this funding.

Application Review and Funding Criteria

Each of the applications that has passed an eligibility and conformance review by Federal staff will be assigned to members of an Objective Review Committee (ORC) for review. Members of the ORC will use the following evaluation criteria in their review of applications:

1. *Community Needs Assessment*—Evidence that the target population has significant need (20 Points).

2. *Business Plan to Produce Defined Results*—Clarity and scope of projected results in terms of increased access to culturally competent care and/or health status for the target population, and alignment of these projected results with organizational capacity, a clear and accountable set of activities, operational plan and budget (30 Points).

3. *Service Integration Strategy & Readiness*—Integration of appropriate health and other services across the community of providers and organizations, readiness, evidence of progress towards developing an integrated system of care for the target population, and scope and quality of services (25 Points).

4. *Sustainability*—Demonstration of existing and sustainable public or private funding sources or cost-savings to be generated and reinvested in the system of care (15 Points).

5. *Evaluation*—Robust self-evaluation plan, specific performance measures, and strong commitment to participation in a national evaluation (10 Points).

A Validation Site Visit will be conducted prior to final award decisions of those applicants recommended by the ORC for funding. Site visits are expected to occur in the July/August timeframe.

Use of Grant Funds

Funding provided through this program may NOT be used to substitute for or duplicate funds currently supporting similar activities. Grant funds may support costs such as:

- Project staff salaries.
- Consultant support.
- Management information systems (*e.g.*, hardware and software).
- Project-related travel.
- Replication activities and travel to support peer-to-peer learning communities.
- Other direct expenses necessary for the integration of administrative, clinical, information system, or financial functions.
- Program evaluation activities.
- Case management and disease management activities that are not reimbursable services.

With appropriate justification on why funds are needed to support the following costs, up to a total of 15 percent in total of grant funds applied for may be used for any combination of the following:

- Alteration or renovation of facilities.
- Primary care site development.
- Service expansions or direct patient care.

(Direct patient care is defined as provision of services or supplies that are ordinarily reimbursable, *e.g.*, exams, therapy sessions, pharmaceuticals.)

- Capital equipment used for reimbursable services (e.g., radiology equipment, ambulances).

Grant funds may NOT be used for:

- Construction.
- Reserve requirements for state insurance licensure.

Expected Results

The integration and coordination of services among a community's safety net providers are expected to result in:

- Increased access to culturally competent care in terms of measures such as: numbers of vulnerable people served, the scope and continuity of provided services, the number of new access points such as health center expansions or new sites, and other;
- Improved health status in the target population;
- A sustainable system that provides coordinated care to the target population; and,
- Elimination of unnecessary, duplicate functions in service delivery and administrative functions, resulting in cost savings to reinvest in the system.

Dated: March 12, 2002.

Elizabeth M. Duke,

Administrator.

BILLING CODE 4165–15–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Intent To Issue a Final Comprehensive Conservation Plan, Associated Environmental Assessment, and Finding of No Significant Impact for Balcones Canyonlands National Wildlife Refuge in the Southwest Region

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This notice advises the public that the U.S. Fish and Wildlife Service (Service) has prepared a Final Comprehensive Conservation Plan (CCP), associated Environmental Assessment (EA), and a Finding of No Significant Impact (FONSI) for the Balcones Canyonlands National Wildlife Refuge, north of Austin, Texas, pursuant to the National Wildlife Refuge System Improvement Act of 1997, and National Environmental Policy Act of 1969, and its implementing regulations. The Regional Director, Southwest Regional Office, upon issuing a FONSI, considered a reasonable range of management framework alternatives, and has selected Alternative 2, found in the EA, to be the Service's proposed alternative.

VOL
67
ISS
54
MR
20
2002
UMI

Approval of the Balcones Canyonlands NWR CCP formalizes 8 goals which will result in:

- Restoration and enhancement of threatened and endangered species habitat on Refuge lands. (Goal 1)
- Protection and enhancement of habitat for a diversity of wildlife including other migratory birds. (Goal 2)
- Restoration of watershed health to minimize sheet runoff and siltation, enhance seasonal stream flow, and maximize ground and surface water recharge. (Goal 3)
- Development of interpretive programs that enable the public to (1) enjoy the fish and wildlife resources found on the refuge, (2) understand these resources and issues related to them, and (3) act to promote fish and wildlife conservation. (Goal 4)
- Protection of habitat within approved Refuge boundaries by fee acquisition or conservation easement. (Goal 5)
- Accurate, up-to-date data on roads, other physical infrastructure, habitats and wildlife, and plant species.(Goal 6)
- Compliance with historic and archeological resource protection laws and regulations. (Goal 7)
- Efficient Administration that Supports Refuge Objectives Accomplishments. (Goal 8)

Some of the specific changes to the existing program changes include but are not necessarily limited to the following objectives:

- Restore and enhance 500 acres of black-capped vireo habitat within 10 years.
- Maintain brown-headed cowbirds parasitism on black-capped vireo nests below 10%.
- Protect existing golden-cheeked warbler habitat on Refuge lands and enhance additional areas for golden-cheeked warbler where appropriate.
- Within five years design and begin to implement a plan to locate and map caves and other karst features, monitor changes occurring in them, and take actions as needed to protect them.
- Continue to support and promote the conservation of the golden-cheeked warbler and black-capped vireo in their migration and wintering areas through coordination with Central American ornithologists and participation in the Nature Conservancy's International Program.
- Within 10 years restore and manage at least 1,000 acres of existing and former native grassland and savannah habitat on the Refuge and increase the amount and diversity of native annual and perennial grasses and forbs on the refuge.
- Within ten years, design and implement a plan to restore wetlands and riparian corridors.
- Within ten years rehabilitate and improve existing wells for wildlife water sources for public viewing sites using wind and solar power.
- Control invasive species (e.g. second-growth juniper, prickly pear and false-willow) on at least 50 acres per year to improve ground cover and plant diversity.
- Reduce the Refuge white-tailed deer herd to achieve and maintain a density of one deer per 20 or more acres within five years to reduce adverse effects on Refuge habitat.
- Maintain and increase herbarium collection and print a Refuge Plant list within three years. Identify native plant and wildlife species that are unique to the Balcones Canyonlands region for potential restoration and enhancement on the Refuge.
- Control feral, exotic and domestic animals that can compete with native wildlife and damage its habitat (e.g. dogs, cats, feral hogs, emu, etc.). Complete hog control plan within three years.
- Restore native plant growth on eroded and disturbed sites to increase water holding capacity of the soils. Restore 50 acres per year.
- Through increasing visitation to 5,000 visitors per year, provide public opportunities to view and learn about Refuge wildlife species and representative habitat characteristics of the Texas Hill Country, and to promote a conservation ethic.
- Provide compatible wildlife dependent outdoor recreational opportunities for the public on the Refuge to include wildlife viewing access, while striving for a balance between conflicting user groups. Annually evaluate hunting program to include newly acquired tracts.
- Within five years develop a public outreach program to aid in the understanding of Refuge purposes, issues specific to Balcones Canyonlands National Wildlife Refuge.
- Within five years develop a public outreach program to aid in the understanding of Refuge purposes, issues specific to Balcones Canyonlands National Wildlife Refuge.
- Within five years design and implement Partnership and Volunteer programs to facilitate meeting Refuge management objectives.
- Improve five miles of public or administrative roads per year to improve access to the Refuge for public and administrative use.
- Annually review and update the land protection plan priorities. Acquire lands according to revised priorities.
- Meet with five private owners of lands within the Refuge per year to exchange information and provide assistance on management of wildlife populations and endangered species habitat.
- Within five years map roads, inspect ponds, map and monitor Refuge habitats and species distributions.
- Within three years, create and maintain a database of Refuge biological resources for use in making management decisions and documenting changes in habitat and wildlife composition.
- Maintain files on all archeological and cultural resource sites. Annually inspect all sites and record condition.
- Within three years complete plans for implementation of objectives and strategies in this comprehensive conservation plan.
- Within five years increase Refuge staff to meet minimal needs for implementation of Refuge objectives and strategies identified in this comprehensive conservation plan.
- Conduct, encourage and support research and management studies that will increase scientific data available for use in making Refuge management decisions.
- Within five years obtain adequate equipment and storage facilities to implement management strategies to meet objectives identified in this management plan.
- Within five years plan acquisition, remodeling and/or construction of a permanent Refuge Office and Visitor Contact Station to be located on Refuge lands.

The implementation of the above management approaches among others and employment of strategies associated with those approaches should assist in the achievement of the refuge's broad goals.

Based on a review and evaluation of the information contained in the CCP and EA for the Balcones Canyonlands National Wildlife Refuge, the Regional Director, Southwest Region, U.S. Fish and Wildlife Service, has selected Alternative 2 detailed in the EA. Consequently the Regional Director has determined that the approval of the individual or cumulative approaches reflected in Alternative 2 the Proposed Alternative and CCP Goals, Objectives and Strategies, is not deemed to constitute a major Federal action which would significantly affect the quality of the human environment within the meaning of Section 102(2) (c) of the National Environmental Policy Act (NEPA). Therefore, an Environmental Impact Statement is not required. However, it is the intent of the Service to revisit questions of potential significant environmental consequences in accordance with NEPA upon consideration of the implementation of site specific proposals called for and discussed in the final plan document.

ADDRESSES: A paper copy and/or a Compact Disk copy may be obtained by writing to: Mr. John Slown, Natural Resource Planner, Division of Refuges, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, NM 87103–1306.

SUPPLEMENTARY INFORMATION: It is Service policy to have all lands within the National Wildlife Refuge System managed in accordance with an approved CCP. The CCP guides management decisions and identifies refuge goals, long-range objectives, and strategies for achieving refuge purposes. The planning process has considered many elements, including habitat and wildlife management, habitat protection and acquisition, public and recreational uses, and cultural resources. Public input into this planning process has assisted in the development of these documents. The CCP will provide other agencies and the public with a clear understanding of the desired conditions for the Refuges and how the Service will implement management strategies.

The Service considered comments and advice generated in response to draft documents issued in November 1998. The Service is furnishing this notice in compliance with Service CCP policy to advise other agencies and the public of the availability of the final documents.

Dated: March 8, 2002.

Geoffrey L. Haskett,

Acting Regional Director.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of Applications for Permit

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of applications for permit.

SUMMARY: The public is invited to comment on the following applications to conduct certain activities with endangered species and/or marine mammals.

DATES: Written data, comments or requests must be received by April 19, 2002.

ADDRESSES: Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 30 days of the date of publication of this notice to: U.S. Fish and Wildlife Service, Division of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203; fax 703/358–2281.

FOR FURTHER INFORMATION CONTACT: Division of Management Authority, telephone 703/358–2104.

SUPPLEMENTARY INFORMATION:

Endangered Species

The public is invited to comment on the following application(s) for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*). Written data, comments, or requests for copies of these complete applications should be submitted to the Director (address above).

Applicant: San Diego Wild Animal Park, Escondido, California, PRT–047997.

The applicant requests a permit to import one male and one female captive-born Asian wild asses (*Equus kiang holdereri = E. hemionus*) and one female captive-born Somali wild ass (*Equus africanus somalicus*) from Tierpark Berlin-Friedrichsfelde, Germany for the purpose of enhancement of the survival of the species.

Applicant: Wheeling Park Commission, Ogelbay's Good Zoo, Wheeling, WV, PRT–053684.

The applicant request a permit to acquire through interstate commerce one male captive-born Komodo monitor (*Varanus komodoensis*) for the purpose of enhancement of the survival of the species through conservation education.

Applicant: Director, Division of Law Enforcement, U.S. Fish and Wildlife Service, Arlington, Virginia, PRT–691650.

The applicant requests renewal of a permit for five years to import and export any endangered or threatened species for the explicit purpose of investigations and other law enforcement activities in order to enhance the survival of the species in the wild.

Applicant: Director, National Fish and Wildlife Forensics Laboratory, U.S. Fish and Wildlife Service, Ashland, Oregon, PRT–053639.

The applicant requests renewal of a permit for five years to import and export any endangered or threatened species for the explicit purpose of forensics activities which will directly or indirectly enhance the survival of the species in the wild.

Applicant: John Newton Walker, Dallas, TX, PRT–053503.

The applicant request a permit to import the sport-hunted trophy of one male bontebok (*Damaliscus pygargus dorcas*) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

Applicant: Omaha's Henry Doorly Zoo, Omaha, NE, PRT–053363.

The applicant request a permit to import two captive-born female Bornean orangutans (*Pongo pygmaeus pygmaeus*) from the Hong Kong Zoological and Botanical Gardens, Hong Kong, for the purpose of enhancement of the survival of the species through captive propagation.

Applicant: Omaha's Henry Doorly Zoo, Omaha, NE, PRT–053606.

The applicant request a permit to import captive-born male Amur leopard (*Panthera pardus orientalis*) from Jungle Cat World, Orono, Ontario, Canada, for the purpose of enhancement of the survival of the species through captive propagation.

Marine Mammals

The public is invited to comment on the following application(s) for a permit to conduct certain activities with marine mammals. The application(s) was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) and the regulations governing marine mammals (50 CFR 18). Written data, comments, or requests for copies of the complete applications or requests for a public hearing on these applications should be submitted to the Director (address above). Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such a hearing is at the discretion of the Director.

Applicant: John F. Wilhelm, Mill Valley, CA, PRT–053629.

The applicant requests a permit to import a polar bear (Ursus maritimus) sport hunted from the Southern Beaufort Seapolar bear population in Canada for personal use.

The U.S. Fish and Wildlife Service has information collection approval from OMB through March 31, 2004, OMB Control Number 1018–0093.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered Species Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications.

SUMMARY: The following applicants have applied for a scientific research permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 USC 1531 *et seq.*). The U.S. Fish and Wildlife Service solicits review and comment from local, State, and Federal agencies, and the public on the following permit requests.

Permit No. TE–052307

Applicant: Marck Menke, San Fransisco, California.

The applicant requests a permit to take (collect) *Eriodictyon altissimum* (Indian Knob Mountain Balm) and *Eriodictyon capitatum* (Lompoc Yerba Santa) in conjunction with evolutionary plant studies in San Luis Obispo and Santa Barbara Counties, California for the purpose of enhancing their survival.

Permit No. TE–797233

Applicant: Entomological Consulting Services, Ltd., Pleasant Hill, California.

The permittee requests a permit amendment to take (survey by pursuit) the Palos Verdes blue butterfly *(Glaucopsyche lygdamus palosverdesensis)* and the Smith's blue butterfly *(Euphilotes enoptes smithi)*, and take (harass by survey and collect) the Ohlone tiger beetle *(Cicindela ohlone)* in conjunction with life history studies in Los Angeles, Monterey, Santa Cruz, and San Luis Obispo Counties, California for the purpose of enhancing their survival.

Permit No. TE–040555

Applicant: Steven L. Jessup, Ashland, Oregon.

The applicant requests a permit to take (collect tissue samples, flowers, and leaves) *Fritillaria gentneri* (Gentner's fritillary) in conjunction with genetic plant studies in Jackson and Josephine Counties, Oregon for the purpose of enhancing its survival.

Permit No. TE–051582

Applicant: William Goggin, San Leandro, California.

The applicant requests a permit to: take (harass by survey) the California clapper rail *(Rallus longirostris obsoletus)* and the southwestern willow flycatcher *(Empidonax traillii extimus)*; and take (capture) the California tiger salamander *(Ambystoma californiense)*, the California freshwater shrimp *(Syncaris pacifica)*, the Alameda whipsnake *(Masticophis lateralis euryxanthus)*, the salt marsh harvest mouse *(Reithrodontomys raviventris)*, and the San Francisco garter snake *(Thamnophis sirtalis tetrataenia)* throughout the range of each species in conjunction with surveys for the purpose of enhancing their survival.

Permit No. TE–787484

Applicant: Kathleen M. Keane, Long Beach, California.

The permittee requests a permit amendment to take (locate and monitor nests) the California least tern *(Sterna antillarum browni)* in Santa Barbara and San Luis Obispo Counties, California in conjunction with monitoring activities for the purpose of enhancing its survival.

Permit No. TE–702631

Applicant: Regional Director, Region 1, U.S. Fish and Wildlife Service, Portland, Oregon.

The permittee requests a permit amendment to take the Carson wandering skipper *(Pseudocopaeodes eunus obscurus)* and the Columbia Basin distinct population segment of the pygmy rabbit *(Brachylagus idahoensis)*. Take activities will be conducted throughout the range of the species in conjunction with recovery efforts for the purpose of enhancing their propagation and survival.

Permit No. TE–052744

Applicant: Shannon Hickey, Davis, California.

The applicant requests a permit to take (harass by survey, collect and sacrifice) the Conservancy fairy shrimp *(Branchinecta conservatio)*, the longhorn fairy shrimp *(Branchinecta longiantenna)*, the San Diego fairy shrimp *(Branchinecta sandiegonensis)*, the vernal pool tadpole shrimp *(Lepidurus packardi)*, and the Riverside fairy shrimp *(Streptocephalus wootoni)* throughout the range of each species in conjunction with surveys for the purpose of enhancing their survival.

Permit No. TE–812206

Applicant: Robin Church, La Mesa, California.

The applicant requests a permit to take (harass by survey) the southwestern willow flycatcher *(Empidonax traillii extimus)* in San Diego, Orange, and Riverside Counties, California in conjunction with surveys for the purpose of enhancing its survival.

Permit No. TE–052847

Applicant: Mike D. Taylor, Irvine, California

The applicant requests a permit to take (monitor nests) the least Bell's vireo (*Vireo bellii pusillus*) in Los Angeles, Orange, and Riverside Counties, California in conjunction with surveys for the purpose of enhancing its survival.

Permit No. TE–052953

Applicant: Oregon Department of Forestry, Salem, Oregon.

The applicant requests a permit to take (harass by survey) the Oregon chub (*Oregonichthys crameri*) in Baker, Benton, Clackamas, Crook, Deschutes, Gilliam, Grant, Lake, Lane, Linn, Hood River, Jackson, Jefferson, Klamath, Marion, Multnomah, Polk, Umatilla, Union, Wasco, Washington, Wheeler, and Yamhill Counties, Oregon in conjunction with surveys for the purpose of enhancing its survival.

Permit No. TE–052747

Applicant: Edward J. Stanton, Sun City, California.

The applicant requests a permit to take (survey by pursuit) the Quino checkerspot butterfly (*Euphydryas editha quino*) in conjunction with vegetation management activities in Riverside County, California for the purpose of enhancing its survival.

Permit No. TE–051248

Applicant: Paul M. Lemons, La Jolla, California.

The applicant requests a permit to take (survey by pursuit) the Quino checkerspot butterfly (*Euphydryas editha quino*) throughout the range of the species in conjunction with surveys for the purpose of enhancing its survival.

Permit No. TE–051250

Applicant: Kamarul Muri, Encinitas, California.

The applicant requests a permit to take (survey by pursuit) the Quino checkerspot butterfly (*Euphydryas editha quino*) throughout the range of the species in conjunction with surveys for the purpose of enhancing its survival.

Permit No. TE–051230

Applicant: Michele Balk, Encinitas, California.

The applicant requests a permit to take (survey by pursuit) the Quino checkerspot butterfly (*Euphydryas editha quino*) throughout the range of the species in conjunction with surveys for the purpose of enhancing its survival.

Permit No. TE–053020

Applicant: Andrew Pigniolo, San Diego, California.

The applicant requests a permit to take (survey by pursuit) the Quino checkerspot butterfly (*Euphydryas editha quino*) in San Diego and Riverside Counties, California, in conjunction with surveys for the purpose of enhancing its survival.

Permit No. TE–053018

Applicant: Environmental Science & Assessment, Portland, Oregon.

The applicant requests a permit to take (survey, mark, recapture) the Oregon chub (*Oregonichthys crameri*) in Marion and Linn Counties, Oregon, in conjunction with surveys for the purpose of enhancing its survival.

DATES: Written comments on these permit applications must be received within 30 days of the date of publication of this notice.

ADDRESSES: Written data or comments should be submitted to the Chief, Endangered Species, Ecological Services, Fish and Wildlife Service, 911 NE. 11th Avenue, Portland, Oregon 97232–4181; Fax: (503) 231–6243. Please refer to the respective permit number for each application when submitting comments. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT: Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 20 days of the date of publication of this notice to the address above; telephone: (503) 231–2063. Please refer to the respective permit number for each application when requesting copies of documents.

Dated: March 24, 2002.

Rowan W. Gould,

Regional Director, Region 1, Portland, Oregon.

Notice of Receipt of Applications for Permit

Endangered Species

The public is invited to comment on the following application(s) for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*). Written data, comments, or requests for copies of these complete applications should be submitted to the Director (address below) and must be received within 30 days of the date of this notice.

Applicant: Jeanne A. Mortimer/ University of Florida, Gainesville, FL, PRT–811272.

The applicant requests re-issuance of a permit to import biological samples obtained from green sea turtles (*Chelonia mydas*) and hawksbill sea turtles (*Eretmochelys imbricata*) located on beaches or in waters on/around the Republic of Seychelles and Chagos Island, British Indian Ocean Territory, for scientific research. This notification covers activities conducted by the applicant over a five year period.

Applicant: Clifford G. McGehee, Jacksonville, FL, PRT–053223.

The applicant request a permit to import the sport-hunted trophy of one male bontebok (Damaliscus pygargus dorcas) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

Applicant: Anthony Gioffre, Dublin, OH, PRT–053326.

The applicant request a permit to import the sport-hunted trophy of one male bontebok (Damaliscus pygargus dorcas) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

Applicant: Savannah River Ecology Laboratory/University of Georgia, Aiken, SC, PRT–051521.

The applicant requests a permit to export biological samples from wood stork (*Mycteria americana*) collected in the wild in the United States, to the Universidade Federal de Sao Carlos, San Carlos, Brazil, for scientific research.

Applicant: Bonnie Ringo, Cave Junction, OR, PRT–049054.

The applicant requests a permit to export five captive-born white tigers (*Panthera tigris*) to the Zion Wildlife Gardens, Kerikeri, New Zealand, for the purpose of enhancement of the survival of the species.

Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 30 days of the date of publication of this notice to: U.S. Fish and Wildlife Service, Division of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203, telephone 703/358–2104 or fax 703/358–2281.

Dated: February 22, 2002.

Michael S. Moore,

Senior Permit Biologist, Branch of Permits, Division of Management Authority.

Fish and Wildlife Service

Endangered and Threatened Wildlife and Plants; Status of the Rio Grande Cutthroat Trout

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Re-opening of the comment period for the Rio Grande cutthroat trout candidate status review.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service) announce a re-opening of the comment period for the candidate status review for the Rio Grande cutthroat trout (*Oncorhynchus clarki virginalis*). We are re-opening the comment period to allow interested parties additional time to submit information to us for our consideration in determining whether the Rio Grande cutthroat trout should be a candidate for listing. On December 28, 2001 (66 FR 67289), we published a notice opening a comment period to obtain information on the status of the Rio Grande Cutthroat Trout. That comment period

VOL
67
ISS
54
MR
20
2002
UMI

closed on February 26, 2002. On or before June 4, 2002, we will make a determination concerning the results of this review for the Rio Grande cutthroat trout and, shortly thereafter, we will publish this determination in the **Federal Register**. We will accept information at any time on the status of the Rio Grande cutthroat trout; however, information must be received by March 29, 2002, in order for us to be able to consider it in our June 4, 2002, determination of candidate status.

DATES: Comments and information from all interested parties for our use in the status review will be accepted until March 29, 2002.

ADDRESSES: Questions and comments concerning this status review should be sent to Joy Nicholopoulos, Field Supervisor, U.S. Fish and Wildlife Service, 2105 Osuna Rd. NE, Albuquerque, NM 87113. Comments and materials received will be available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Joy Nicholopoulos, Field Supervisor, (see **ADDRESSES** section), telephone (505) 346–2525.

SUPPLEMENTARY INFORMATION:

Background

On February 25, 1998, we received a petition from Kieran Suckling, of the Southwest Center for Biological Diversity requesting that the Service add the Rio Grande cutthroat trout (*Onchorynchus clarki virginalis*) to the list of threatened and endangered species. The petition addressed the range-wide distribution of the Rio Grande cutthroat trout that included populations in Colorado and New Mexico.

The Rio Grande cutthroat trout is the southernmost of 14 subspecies of cutthroat trout (Behnke 1967, 1972, 1992; Sublette *et al.* 1990). There are two phenotypic forms of the subspecies, one in the Rio Grande and one in the Pecos River (Behnke 1992). The species derives its name from the distinctive red or orange slashes beneath the lower jaw. The general body coloration is yellowish green to grayish brown; the abdomen is creamy white. Variably-sized black spots cover the upper body and are more numerous posteriorly; dorsal, adipose, and caudal fins carry black spots (Koster 1957, Behnke 1992, Sublette et al. 1990). Although the historical distribution of the Rio Grande cutthroat trout is not known with certainty, it is likely that the subspecies occurred not only in all waters in the upper Rio Grande, Pecos, and Canadian River Basins that are currently capable of supporting trout, but also in other stream reaches within these watersheds that formerly provided the habitat requisites of coldwater species.

Section 4(b)(3)(B) of the Act requires that we make a finding on whether a petition to list, delist or reclassify a species presents substantial scientific or commercial information indicating that the petitioned action is—(a) not warranted; (b) warranted; or (c) warranted but precluded from immediate proposal by other pending listing proposals of higher priority. We subsequently published a notice of a 90-day finding in the **Federal Register** (63 FR 49062) on September 14, 1998. In the 90-day finding we concluded that the petition did not present substantial information indicating that listing of the Rio Grande cutthroat trout may be warranted.

Our finding recognized that livestock grazing, road construction, and logging were primary factors in the constriction of the Rio Grande cutthroat trout's historical range, and continue to impact streams and riparian habitats where measures to limit those impacts are lacking. The Service concluded that the management objectives of both States, set forth in respective management plans formulated for the Rio Grande cutthroat, would provide for the continued management, conservation, and stability of this subspecies and its habitats.

On June 9, 1999, a complaint was filed by the Southwest Center for Biological Diversity challenging the September 14, 1998, 90-day petition finding as violating the Act and the Administrative Procedures Act. Recently, while the litigation was pending, we received some information (particularly related to the presence of whirling disease in hatchery fish and in the wild) that led us to believe that further review of the status of the species was warranted.

On November 8, 2001, a settlement agreement executed by both parties (the Service and the Southwest Center for Biological Diversity) was filed with the court. The settlement stipulates that we will initiate a candidate status review for the Rio Grande cutthroat trout. The settlement also stipulates that on or before June 4, 2002, we will make a determination concerning the results of this review and, shortly thereafter, we will publish our determination in the **Federal Register**. The agreement also states that we will not vacate our previous determination in the interim.

Request for Information

Our determination of candidate status for the Rio Grande cutthroat trout shall be based upon the best available scientific and commercial data, as required under section 4(b)(1)(A) of the Act. We request you submit any further information on the Rio Grande cutthroat trout. We are particularly interested in any information concerning the following:

(1) Current population numbers and trends for each of the populations of the Rio Grande cutthroat trout;

(2) Whether there are documented increases in those populations or their habitat;

(3) The status of remaining habitat areas;

(4) The current threats and future threats to those populations and remaining habitat areas; and

(5) Other regulatory mechanisms that address those threats; and the success of those mechanisms to date.

Battle of Midway National Memorial Advisory Committee; Meeting Notice

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meeting.

SUMMARY: The Battle of Midway National Memorial Advisory Committee will hold its first meeting by teleconference on Thursday, April 4, 2002, from 2:00 p.m. to 4:00 p.m. Eastern Standard Time. During this teleconference, the committee will review its purpose as identified by Congress and the Secretary of the Interior, a list of objectives for the committee will be developed, and planning for the 60th anniversary celebration of the Battle of Midway will be initiated. A portion of the meeting will focus on the organization and functioning of a Federal Advisory Committee.

DATES: April 4, 2002, 2:00 p.m. to 4:00 p.m.

ADDRESSES: U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, Arlington, Virginia, room 500 or by teleconference.

FOR FURTHER INFORMATION CONTACT: Any member of the public wishing further information concerning the meeting or who wishes to submit oral or written comments should contact Barbara Maxfield, External Affairs Chief for the Fish and Wildlife Service's Pacific Islands Office, Box 50088, Honolulu, HI 96850; telephone (808) 541–2749; fax (808) 541–2756 no later than February 15, 2002. You may obtain copies of the draft meeting agenda from the same source.

SUPPLEMENTARY INFORMATION: As directed by Congress, the Secretary of the Interior established the Battle of Midway National Memorial Advisory Committee to facilitate development of a strategy for the dedication and management of this National Memorial. Members of the public are welcome to participate in any of its meetings.

Members of the public in the Washington, DC, area may attend the meeting in person in the U.S. Fish and Wildlife Service's Washington Office at 4401 N. Fairfax Drive, Arlington, Virginia, in room 500. Members of the public may also participate by teleconference, however, teleconference lines are limited. Please call Barbara Maxfield (808) 541–2749 if you are interested in participating in the call and to obtain the dial-in number. Seating in room 500 of the Fish and Wildlife Service's Arlington Square office is limited and is available on a first come, first served basis.

We will distribute written comments submitted to the Fish and Wildlife Service at the Honolulu address above to committee members prior to the meeting if we receive them in sufficient time to allow distribution. We will provide an opportunity for oral comments from the public during this teleconference meeting as well.

Dated: February 19, 2002.

Jerry F. Leinecke,

Project Leader, Hawaiian and Pacific Islands National Wildlife Refuge Complex.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Navajo Nation Liquor Ordinance

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice publishes the Navajo Nation Liquor Ordinance. The Ordinance is enacted as an amendment to the Navajo Nation Code § 412. The Ordinance regulates the control, possession, and sale of liquor on the Navajo Nation Indian trust lands, in conformity with the laws of the State of Arizona, where applicable and necessary. Although the Ordinance was adopted on July 20, 2001, it does not become effective until published in the **Federal Register** because the failure to comply with the Ordinance may result in criminal charges.

DATES: This Ordinance is effective on March 20, 2002.

FOR FURTHER INFORMATION CONTACT: Kaye Armstrong, Office of Tribal Services, 1849 C Street, NW., MS 4631–MIB, Washington, DC 20240–4001; telephone (202) 208–4400.

SUPPLEMENTARY INFORMATION: Pursuant to the Act of August 15, 1953, Public Law 83–277, 67 Stat. 586, 18 U.S.C. 1161, as interpreted by the Supreme Court in *Rice* v. *Rehner*, 463 U.S. 713 (1983), the Secretary of the Interior shall certify and publish in the **Federal Register** notice of adopted liquor ordinances for the purpose of regulating liquor transaction in Indian country. The Navajo Nation Liquor Ordinance, which amends the Navajo Nation Code § 412, as authorized by Resolution No. CJY–62–01, was duly adopted by the Navajo Nation Council on July 20, 2001. The Navajo Nation, in furtherance of its economic and social goals, has taken positive steps to regulate retail sales of alcohol and use revenues to combat alcohol abuse and its debilitating effects among individuals and family members within the Navajo Nation.

This notice is published in accordance with the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 Departmental Manual 8.1.

I certify that by Resolution No. CJY–62–01, the Navajo Nation Liquor Ordinance, amending the Navajo Nation Code § 412, was duly adopted by the Navajo Nation Council on July 20, 2001.

Dated: March 11, 2002.

Neal A. McCaleb,

Assistant Secretary—Indian Affairs.

The Navajo Nation Liquor Ordinance, amending the Navajo Nation Code § 412, reads as follows:

Amendment to Navajo Nation Code § 412

1. The Navajo Nation Council hereby amends 17 N.N.C. § 412 in the following manner:

(c) It shall not be unlawful for any person, Indian or non-Indian, to sell, deliver, transport or consume intoxicating liquor in that part of the Navajo Nation covered by the Antelope Point Resort and Marina Business Site Lease provided that the transportation, sale, delivery and consumption of alcoholic beverages is in conformity with applicable state regulatory liquor law, specifically excluding any state regulatory liquor laws which would require the Navajo Nation and/or its Lessee to be licensed by the State of Arizona, or to be in any way subject to the administrative, executive, judicial or legislative jurisdiction of the State of Arizona, and that all sales of alcoholic beverages be at prices no less than the prices charged for similar products in adjoining areas of the State of Arizona. The Economic Development Committee of the Navajo Nation Council is hereby authorized to approve such rules and regulations as are necessary and appropriate to ensure the proper transportation, sale, delivery and consumption of alcoholic beverages within the area of the Antelope Point Business Site Lease.

2. The Navajo Nation Council further stipulates that at the end of the term of the Antelope Point Resort and Marina Business Site Lease, and any options granted thereto, this legislation shall be subject to review and reauthorization by the Navajo Nation Council.

BILLING CODE 4310–04–P

DEPARTMENT OF THE INTERIOR

National Park Service

CORRECTION—Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects in the Possession of the U.S. Department of the Interior, National Park Service, Effigy Mounds National Monument, Harpers Ferry, IA

AGENCY: National Park Service, Interior

ACTION: Correction

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act (NAGPRA), 43 CFR 10.9, of the completion of an inventory of human remains and associated funerary objects in the possession of the U.S. Department of the Interior, National Park Service, Effigy Mounds National Monument, Harpers Ferry, IA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 43 CFR 10.2 (c). The determinations within this notice are the sole responsibility of the National Park Service unit that has control or possession of these Native American human remains and associated funerary objects. The Assistant Director, Cultural Resources Stewardship and Partnerships is not responsible for the determinations within this notice.

On March 9, 2001, the National Park Service published a Notice of Inventory Completion in the Federal Register for 15 Native American human remains and 3 associated funerary objects in the possession of Effigy Mounds National Monument. The notice incorrectly listed 12 human remains and 3 associated funerary objects recovered from Mound #57 as culturally affiliated with the Iowa Tribe of Kansas and Nebraska; Iowa Tribe of Oklahoma; Otoe-Missouria Tribe of Indians, Oklahoma; Ho-Chunk Nation of Wisconsin; Winnebago Tribe of Nebraska; Upper Sioux Indian Community of the Upper Sioux Reservation, Minnesota; Shakopee Mdewakanton Sioux Community of Minnesota (Prior Lake); Lower Sioux Indian Community of Minnesota Mdewakanton Sioux Indians of the Lower Sioux Reservation in Minnesota; and Prairie Island Indian Community of Minnesota Mdewakanton Sioux Indians of the Prairie Island Reservation, Minnesota. Based on additional information, the superintendent of Effigy Mounds National Monument determined that the 12 human remains and 3 associated funerary objects recovered from Mound #57 are culturally unidentifiable.

The Notice of Inventory Completion published by Effigy Mounds National Monument on March 9, 2001 (Federal Register Document 01-5944, pages 14201-14203) is corrected as follows:

The third paragraph is deleted.

The first sentence of the ninth paragraph is corrected to read: "Based on the above-mentioned information, the Effigy Mounds National Monument superintendent has determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of three individuals of Native American ancestry."

The second sentence of the ninth paragraph is deleted.

This correction has been sent to officials of the Iowa Tribe of Kansas and Nebraska; Iowa Tribe of Oklahoma; Otoe-Missouria Tribe of Indians, Oklahoma; Ho-Chunk Nation of Wisconsin; Sac and Fox Tribe of the Mississippi in Iowa; Sac and Fox Nation of Missouri in Kansas and Nebraska; Sac and Fox Nation, Oklahoma; Winnebago Tribe of Nebraska; Upper Sioux Indian Community of the Upper Sioux Reservation, Minnesota; Shakopee Mdewakanton Sioux Community of Minnesota; Lower Sioux Indian Community of Minnesota Mdewakanton Sioux Indians of the Lower Sioux Reservation in Minnesota; and Prairie Island Indian Community of Minnesota Mdewakanton Sioux Indians of the Prairie Island Reservation, Minnesota.

Repatriation of the three other human remains listed in the March 9, 2001, Notice of Inventory Completion is not affected by this correction.

Dated: September 12, 2001

John Robbins,

Assistant Director, Cultural Resources Stewardship and Partnerships.

BILLING CODE 4310–70–S

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

Agency Information Collection Activities: Proposed Collection: Comment Request

ACTION: 60-Day Notice of Information Collection Under Review; Visa Waiver Program Carrier Agreement; Form I–775.

The Department of Justice, Immigration and Naturalization Service has submitted the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for sixty days until May 20, 2002.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* Revision of a currently approved collection.

(2) *Title of the Form/Collection:* Visa Waiver Program Carrier Agreement.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form I–775. Inspections Division, Immigration and Naturalization Service.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Business or other for-profit. The agreement between a transportation company and the United States is needed to ensure that the transportation company will remain responsible for the aliens it transports to the United States under the Visa Waiver Program.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 400 responses at 2 hours per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 800 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Richard A. Sloan 202–514–3291, Director, Regulations and Forms Services Division, Immigration and Naturalization Service, U.S. Department of Justice, Room 4034, 425 I Street, NW., Washington, DC 20536. Additionally, comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time may also be directed to Mr. Richard A. Sloan.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, 601 D Street, NW., Patrick Henry Building, Suite 1600, Washington, DC 20530.

Dated: March 14, 2002.

Richard A. Sloan,

Department Clearance Officer, United States Department of Justice, Immigration and Naturalization Service.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of February, 2002.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–39,624; Nedec America Corp./ Power General, Canton, MA
TA–W–40,362; American Tissue Mills of Maine, Augusta, ME
TA–W–40,434; Imperial Carbide, Inc., Meadville, PA
TA–W–40,583; Mocaro Dyeing and Finishing, Inc., Statesville, NC
TA–W–40,704; Texfi Industries, Inc., Jefferson, GA
TA–W–40,597; Huhtamaki Food Service Div. Formerly Known as Packaging Mt. Carmel, PA
TA–W–40,750; Meridian Automotive Systems, Portland, OR
TA–W–40,804 & A; Cabinet Works LLC, Jefferson City, TN and Distinctive Woodworks LLC, Jefferson City, TN
TA–W–40,718; Bilco Manufacturing Corp., Macon, GA
TA–W–40,174; Diamond Tool and Die, Townville, PA
TA–W–39,422; Leatex Chemical Co., Philadelphia, PA

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

Increased imports did not contribute importantly to worker separations at the firm.

TA–W–40,870; Porex Technologies, Porous Products Group, A Div. Of Webmd Corp., College Point, NY
TA–W–40,809; Cascade General, Inc., Portland, OR
TA–W–39,704 Trico Products Corp., Buffalo, NY
TA–W–39,829; Acme Pattern Works, Inc., Chicago Heights, IL
TA–W–39,989; Crouse-Hinds, Div. Of Cooper Industries, Inc., Syracuse, NY
TA–W–40,135; GKN Aerospace North America, Carson, CA
TA–W–40,695; Nolato Shieldmate, Inc., Ilasca, IL
TA–W–40,721; Englehard Corp., McIntyre, GA
TA–W–40,765; Becton Dickinson, Hancock, NY

The workers firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–40,770; Tree Machine Tools, Inc., Franklin, WI
TA–W–40,812; GeoComm Corp., El Paso, TX

The investigation revealed that criteria (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA–W–40,443; James Hamilton Construction Co., Employed at Chico Mines Project, Silver City, NM

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued; the date following the company name and location of each determination references the impact date for all workers of such determination.

TA–W–40,573; Nortel Networks, Bohemia, NY: November 7, 2000.
TA–W–40,754; Molycorp, Inc., A Subsidiary of Unocal, Washington, PA: January 21, 2001
TA–W–39,735; Atchison Products, Inc., Boonville, MO: June 14, 2000.
TA–W–39,748; Engel Machinery, Inc., York, PA: August 6, 2000.
TA–W–40,037; Glad Rags, Inc., Buchanan, VA: August 31, 2000.
TA–W–40,106; Haskell—Senator International, Verona, PA: September 7, 2000.
TA–W–40,192; Camoplast Accufab, Inc., A Div. Of Camoplast, Ltd, Chillicothe, OH: September 26, 2000.
TA–W–40,284; The Carbide/Graphite Group, Inc., Niagara Falls, NY: September 24, 2000.
TA–W–40,308; Nachi Machining Technology Co., Machine Department, Macomb, MI: October 15, 2000.
TA–W–40,372; Square D Company, Schneider Electric North America, Middletown, OH: November 15, 2000.
TA–W–40,374; Osan Manufacturing, Boyertown, PA: November 16, 2000.
TA–W–40,705; ITT Industries, Newton, MA: December 18, 2000.
TA–W–40,463; Dunham-Bush, Inc., Harrisonburg, VA: October 31, 2000.
TA–W–40,500; Swift Spinning Mills, Inc., Marubeni Denim Div., Columbus, GA: December 19, 2000.
TA–W–40,561; Thermal Industries, Inc., Vinylium Corp., Pittsburgh, PA: October 19, 2000.

TA–W–40,722; Willow Creek Apparel, Inc., Jonesville, NC: January 7, 2001.
TA–W–40,783; Intertape Polymer Group, Inc., Central Products Company, Richmond, KY: December 21, 2000.
TA–W–40,841: FCI USA, Inc., Emigsville, PA: January 7, 2001.
TA–W–40,713; SDS Lumber Co., Plywood Div., Bingen, WA: January 9, 2001.
TA–W–40,618; Acordis Industrial Fibers, Inc., Scottsboro, AL: November 30, 2000.
TA–W–40,559; Maysville Garment, Inc., Maysville, NC: December 8, 2000.
TA–W–40,542; Vision Metals, Inc., Gulf States Tube Div., Rosenburg, TX: December 8, 2000.
TA–W–40,483, & A; Sumitomo Electric Wiring Systems, Inc., Wiring Harness Div., Edmonton, KY and Morgantown, KY: December 12, 2000.
TA–W–40,428; Sunlite Casual Furniture, Paragould, AR: December 4, 2000.
TA–W–40,377 & A; Dexter Shoe Co., Dexter, ME and National Sales Office, West Newton, MA: November 20, 2000.
TA–W–40,327; Storaenso North America, A Div. Of Storaenso OJY, Niagara, WI: October 29, 2001.
TA–W–40,257; H.R. Jones Veneer, Inc., Grand Ronde, OR: September 28, 2000.
TA–W–40,138; Cross Creek Apparel, LLC, Div of Russell Corp., Mount Airy, NC: March 12, 2001.
TA–W–39,717; Trio Tool and Die Manufacturing, Inc., Meadville, PA: July 17, 2000.
TA–W–39,532; Power Conversion Products, LLC, Crystal Lake, IL: June 18, 2000.

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (P.L. 103–182) concerning transitional adjustment assistance hereinafter called (NAFTA–TAA) and in accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA–TAA issued during the month of February, 2002.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA–TAA the following group eligibility requirements of section 250 of the Trade Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, (including workers in any agricultural firm or appropriate subdivision thereof) have become totally or partially separated from employment and either—

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) That imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased, and that the increases imports contributed importantly to such workers' separations or threat of separation and to the decline in sales or production of such firm or subdivision; or

(4) That there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFTA–TAA

In each of the following cases the investigation revealed that criteria (3) and (4) were not met. Imports from Canada or Mexico did not contribute importantly to workers' separations.

There was no shift in production from the subject firm to Canada or Mexico during the relevant period.

NAFTA–TAA–05507; Dana Corp., Victor Reinz Div., Robinson, IL
NAFTA–TAA–05510; Corning Asahi Video, Inc., A Div. of Corning Asohi Video, State College, PA
NAFTA–TAA–05836; Tyco Electronics Corp., Jacobus, PA
NAFTA–TAA–05702; Meridian Automotive Systems, Portland, OR
NAFTA–TAA–05741; Cooper Industries, Western Power Products, Hood River, OR

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of March, 2002.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–40,157 & A; The Steel Group, The Steel Co., Chicago, IL and Midwest Annealing and Processing Corp., East Chicago, IN
TA–W–40,436 & A; Dometic Corp., Awning Line, LAGrange, IN
TA–W–39,747; Precision Flame, Inc., Bourbonnais, IL
TA–W–40,672; Trio Dyeing and Finishing Co., Inc., Paterson, NJ
TA–W–40,453; Penley Corp., West Paris, ME

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

Increased imports did not contribute importantly to worker separations at the firm.

TA–W–40,773; S–B Power Tool Co., Walnut Ridge, AR
TA–W–40,720 & A; Rohm Device USA LLC, 760 Kifer Road, Sunnyvale, CA, Rohm Device USA LLC, 760 Kifer Road, Sunnyvale, CA and Rohm Device USA LLC, 611 N. Pastoria Avenue, Sunnyvale, CA
TA–W–40,550; Nokia, Inc., Nokia Networks, Product Operation, Fort Worth, TX

The workers firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–40,497; Lundeen's Inc., North Platte, NE
TA–W–40,444; Purcell Tire and Rubber Co., Santa Rita, NM
TA–W–39,282 & A,B,C,D,E; Standard Corp., Integrated Logistics, Wilmington, NC, Leland, NC, Kinston, NC, Grifton, NC Charleston, SC and Moncks Corner, SC

The investigation revealed that criteria (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA–W–40,684; Independent Tool and Manufacturing, Inc., Meadville, PA
TA–W–40,610; The Goodyear Tire and Rubber Co., Gadsden, AL

Affirmative Determinations for Worker Adjustment Assistance

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (P.L. 103–182) concerning transitional adjustment assistance hereinafter called (NAFTA–TAA) and in accordance with section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA–TAA issued during the month of March, 2002.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA–TAA the following group eligibility requirements of section 250 of the Trade Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, (including workers in any agricultural firm or appropriate subdivision thereof) have become totally or partially separated from employment and either—

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) That imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased, and that the increases imports contributed importantly to such workers' separations or threat or separation and to the decline in sales or production of such firm or subdivision; or

(4) That there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFA–TAA

In each of the following cases the investigation revealed that criteria (3) and (4) were not met. Imports from Canada or Mexico did not contribute importantly to workers' separations. There was no shift in production from the subject firm to Canada or Mexico during the relevant period.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–40,354]

International Paper Company, Erie, Pennsylvania; Including Contract Employees of Honeywell, Inc. Employed at International Paper Company Erie, Pennsylvania Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on February 4, 2002, applicable to workers of International Paper Company, Erie, Pennsylvania. The notice was published in the **Federal Register** on February 28, 2002 (67 FR 9326).

At the request of Honeywell, Inc., the Department reviewed the certification for workers of the subject firm.

Information provided by the company shows that some workers at International Paper, Erie, Pennsylvania were contracted from Honeywell, Inc. to maintain and operate automated control systems required for the production of hardwood pulp and writing, text and cover paper produced at the Erie, Pennsylvania location of the subject firm.

Based on these findings, the Department is amending the

VOL

certification to include contract workers of Honeywell, Inc., employed at International Paper Company, Erie, Pennsylvania.

The intent of the Department's certification is to include all workers at International Paper Company, Erie, Pennsylvania, adversely affected by imports.

The amended notice applicable to TA–W–40,354 is hereby issued as follows:

All workers of International Paper Company, Erie, Pennsylvania including contract workers of Honeywell, Inc. engaged in employment related to the maintenance and operation of automated control systems required for the production of hardwood pulp and writing, text and cover paper at International Paper Company, Erie, Pennsylvania who became totally or partially separated from employment on or after November 2, 2000, through February 4, 2004, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC this 1st day of March, 2002.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Division of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Division of Trade Adjustment Assistance, at the address shown below, not later than April 1, 2002.

Interested persons are invited to submit written comments regrading the subject matter of the investigations to the Director, Division of Trade Adjustment Assistance, at the address shown below, not later than April 1, 2002.

The petitions filed in this case are available for inspection at the Office of the Director, Division of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, Room C–5311, 2000 Constitution Avenue, NW, Washington, DC 20210.

Signed at Washington, DC this 28th day of January, 2002.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–40,523]

Parallax Power Components LLC, MagneTek, Inc., Goodland, Indiana; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on January 23, 2002, applicable to workers of Parallax Power Components LLC, Goodland, Indiana. The notice was published in the **Federal Register** on February 5, 2002 (67 FR 5294).

At the request of the company, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of transformers. New information shows that Parallax Power Components purchased the Goodland, Indiana location of MagneTek, Inc. on June 29, 2001.

Information also shows that some workers separated from employment at the subject firm had their wages reported under a separate unemployment insurance (UI) tax account for Parallax Power Components LLC, MagneTek, Inc.

Accordingly, the Department is amending the certification to properly reflect this matter.

The intent of the Department's certification is to include all workers of Parallax Power Components LLC, Goodland, Indiana who were adversely affected by increased imports.

The amended notice applicable to TA–W–40,523 is hereby issued as follows:

"All workers of Parallax Power Components LLC, MagneTek, Inc., Goodland, Indiana who became totally or partially separated from employment on or after December 17, 2000, through January 23, 2004, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed at Washington, DC this 6th day of March, 2002.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–39,574]

SGL Carbon Group, Morganton, North Carolina; Notice of Revised Determination on Reconsideration

By letter of November 5, 2001, the International Chemical Workers Union, AFL–CIO, Local 427, requested administrative reconsideration regarding the Department's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance, applicable to the workers of the subject firm.

The initial investigation resulted in a negative determination issued on September 21, 2001, based on the finding that imports of graphite electrodes and specialty graphite products did not contribute importantly to worker separations at the subject plant. The denial notice was published in the **Federal Register** on October 11, 2001 (66 FR 51973).

To support the request for reconsideration, the International Chemical Workers Union, AFL–CIO, Local 427 provided additional information indicating that a sister plant (SGL Carbon Corporation, Carbon and Graphite Unit, Niagara Falls, New York) was certified for TAA. The applicant further stated that the subject plant produced the same products, shared the same customers and conducted interplant shipments with the sister facility.

A review of the allegation and information provided by the company shows that a meaningful portion of subject plant production was in direct support of the SGL Carbon Corporation, Carbon and Graphite Unit, Niagara Falls, New York plant. That facility was certified TA–W–39,053) on August 31, 2001.

Conclusion

After careful review of the additional facts obtained on reconsideration, I conclude that increased imports of articles like or directly competitive with those produced at SGL Carbon Group, Morganton, North Carolina, contributed importantly to the decline in sales or production and to the total or partial separation of workers at the subject firm. In accordance with the provisions of the Act, I make the following certification:

All workers of SGL Carbon Group, Morganton, North Carolina, who became totally or partially separated from employment on or after March 29, 2000 through two years from the date of this certification, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Dated: Signed in Washington, DC this 28th day of February 2002.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

Universal Furniture Limited, Morristown, and Universal Furniture Limited Corporate Office, High Point, NC; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on April 30, 2001, applicable to workers of Universal Furniture Limited, Morristown, Tennessee. The notice was published in the **Federal Register** on May 18, 2001 (66 FR 27690).

At the request of the company, the Department reviewed the certification for workers of the subject firm. The workers were engaged in the production of bedroom and dining room furniture.

Information shows that worker separations occurred at the Corporate Office, High Point, North Carolina location of the subject firm. The workers provide administrative support functions and purchasing for the subject firm's production facilities including Morristown, Tennessee.

Accordingly, the Department is amending the certification to included workers of the Universal Furniture Limited, Corporate Office, High Point, North Carolina.

The intent of the Department's certification is to include all workers of Universal Furniture Limited adversely affect by increased imports.

The amended notice applicable to TA–W–38,811 is hereby issued as follows:

All workers of Universal Furniture Limited, Morristown, Tennessee (TA–W–38, 811) and Universal Furniture Limited, Corporate Office, High Point, North Carolina (TA–W–38, 811B) who became totally or partially separated from employment on or after March 10, 2000, through April 30, 2003, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC this 5th day of March, 2002.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the division of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Division of Trade Adjustment Assistance at the address shown below, not later than April 1, 2002.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Division of Trade Adjustment Assistance at the address shown below, not later than April 1, 2002.

The petitions filed in this case are available for inspection at the Office of the Director, Division of Trade Adjustment Assistance Employment and Training Administration, U.S. Department of Labor, Room C–5311, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 4th day of February, 2002.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

Chambersburg Engineering Co., Chambersburg, Pennsylvania; Notice of Termination of Investigation

Pursuant to Title V of the North American Free Trade Agreement Implementation Act (Public Law 103–182) concerning transitional adjustment assistance, hereinafter called NAFTA–TAA and in accordance with section 250(a), Subchapter 2, Title II, of the Trade Act of 1974, as amended (19 U.S.C. 2331), an investigation was initiated on February 4, 2002, in response to a petition filed by a company official on behalf of workers at Chambersburg Engineering Co., Chambersburg, Pennsylvania.

The petitioner has requested that the petition be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed in Washington, DC this 22nd day of February, 2002.

Outboard Marine Corporation (OMC), Delavan, WI; Notice of Termination of Investigation

Pursuant to Title V of the North American Free Trade Agreement Implementation Act (Public Law 103–182) concerning transitional adjustment assistance, hereinafter called (NAFTA–TAA), and in accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended (19 U.S.C. 2273), an investigation was initiated on June 20, 2001, in response to a petition filed on behalf of all workers at Outboard Marine Corporation (OMC), Delavan, Wisconsin.

The company filed Chapter 7 bankruptcy for all the locations of the Outboard Marine Corporation, including the subject facility. The trustee was unable to locate the records of the company to provide the Department the information necessary to issue a determination regarding the worker group eligibility requirements under paragraph (a)(1)(A) or (a)(1)(B) of Section 250 of the Trade Act of 1974, as amended. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 5th day of March, 2002.

[Docket No. NAFTA–05682]

Parallax Power Components LLC, Magnetek, Inc., Goodland, IN; Amended Certification Regarding Eligibility To Apply for NAFTA–Transitional Adjustment Assistance

In accordance with section 250(A), subchapter D, chapter 2, Title II, of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification for NAFTA Transitional Adjustment Assistance on January 16, 2002, applicable to workers of Parallax Power Components LLC, Goodland, Indiana. The notice was published in the **Federal Register** on January 31, 1002 (67 FR 4751).

At the request of the company, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of transformers. New information shows that Parallax Power Components purchased the Goodland, Indiana location of MagneTek, Inc., on June 29, 2001.

Information also shows that some workers separated from employment at the subject firm had their wages reported under a separated unemployment insurance (UI) tax account for Parallax Power Components LLC, MagneTek, Inc.

Accordingly, the Department is amending the certification to properly reflect this matter.

The intent of the Department's certification is to include all workers of Parallax Power Components LLC, Goodland, Indiana who were adversely affected by company imports from Mexico and a shift in production of transformers.

The amended notice applicable to NAFTA—05682 is hereby issued as follows:

All workers of Parallax Power Components LLC, MagneTek, Inc., Goodland, Indiana who became totally or partially separated from employment on or after December 14, 2000, through January 16, 2004, are eligible to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974.

Signed at Washington, DC this 6th day of March, 2002.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Pension Welfare Benefits Administration

[Application No: D–10936]

Proposed Amendment to Prohibited Transaction Exemption 96–62 (PTE 96–62) To Permit Certain Authorized Transactions Between Plans and Parties in Interest

AGENCY: Pension and Welfare Benefits Administration, Department of Labor.

ACTION: Notice of proposed amendment to PTE 96–62.

SUMMARY: This document contains a notice of pendency before the Department of a proposed amendment to PTE 96–62 (61 FR 39988, July 31, 1996). PTE 96–62 permits certain prospective transactions between employee benefit plans and parties in interest where such transactions are specifically authorized by the Department and are subject to terms, conditions and representations which are substantially similar to two individual exemptions granted by the Department within the 60 month period ending on the date of filing of a written submission seeking authorization for the transaction. If adopted, the proposed amendment would affect plans, participants and beneficiaries of such plans and certain persons engaging in such transactions.

DATES: Written comments and requests for a public hearing must be received by the Department on or before May 6, 2002.

ADDRESSES: All written comments and requests for a public hearing (preferably, at least three copies) should be addressed to: U.S. Department of Labor, Office of Exemption Determinations, Attention: D–10936, Pension and Welfare Benefits Administration, Room N–5649, 200 Constitution Ave., NW, Washington, DC 20210. Interested persons are also invited to submit comments and/or hearing requests to PWBA via e-mail or fax. Any such comments should be sent either by e-mail to *padamsa@pwba.dol.gov* or by fax at (202) 219–0204 by the end of the scheduled comment period. All comments received will be available for public inspection at the Public Documents Room, Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N–1513, 200 Constitution Ave., NW, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Allison Padams Lavigne, Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, (202) 693–8540 (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of a proposed amendment to PTE 96–62. PTE 96–62 provides relief from a restriction described in sections 406(a) and 406(b) of the Employee Retirement Income Security Act (ERISA or the Act) or a parallel restriction described in section 8477(c)(2) of the Federal Employees' Retirement Systems Act (FERSA), and from the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1986 (the Code), by reason of a parallel provision described in section 4975(c)(1)(A) through (F) of the Code. The Department is proposing this amendment to PTE 96–62, on its own motion pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1990).[1]

Background

The rules set forth in section 406 of ERISA prohibit various transactions between employee benefit plans covered by Title I of ERISA and certain related parties, unless a statutory or administrative exemption applies to the transaction. These related parties, such as plan fiduciaries, sponsoring employers, unions and service providers are defined as parties in interest in section 3(14) of ERISA, and, in the absence of an exemption, may not engage in transactions described in section 406 of ERISA with a plan.

Specifically, section 406(a)(1) prohibits a fiduciary of a plan from causing the plan to engage in a transaction that constitutes a direct or an indirect: sale, exchange or leasing of any property between the plan and a party in interest; lending of money or other extension of credit between the plan and a party in interest; furnishing of goods, services or facilities between the plan and a party in interest; transfer to, or use by or for the benefit of a party in interest of any assets of the plan or acquisition on behalf of the plan of any employer security or real property in violation of section 407(a) of ERISA. Section 406(a)(2) provides that no fiduciary who has authority or discretion to control or manage plan assets shall permit the plan to hold any employer security or employer real property if he knows or should know that holding such security or real property violates section 407(a) of ERISA. Section 406(b) prohibits a fiduciary, with respect to a plan, from dealing with the assets of the plan in his own interest or for his own account; acting in his individual capacity or in any other capacity in any transaction involving the plan on behalf of a party (or representing a party) whose interests are adverse to the interests of the plan or interests of the participants or beneficiaries; and receiving any consideration for his own personal account from any party dealing with such plan in connection with a transaction involving the assets of the plan. In addition, such transactions that involve plans described in section 4975(e)(1) of the Code are generally subject to taxation under section 4975 of the Code. Lastly, the restrictions of section 8477(c)(2) of FERSA parallel section 406(b) of ERISA.

The Department has frequently exercised its statutory authority under section 408(a) of ERISA to grant both individual and class exemptions from the restrictions imposed by section 406 of ERISA where it has been able to find that the statutory criteria have been met.[2] This process has been helpful in providing exemptive relief for transactions which were prohibited, but were otherwise in the interests of the plans, participants and beneficiaries.

The Department has promulgated an exemption procedure[3] which provides, among other things, that an exemption will not be granted until a notice of pendency has been published in the **Federal Register**, and interested persons have been given an opportunity to comment on the proposed transaction. Following consideration of the entire record, the Department then makes its final determination whether to grant the exemption. If the Department contemplates not granting the requested exemption, the procedure also provides an applicant with the right to a conference.

Based on its experience in considering exemption applications, the Department has observed that many of the applications present routine transactions involving terms, conditions and circumstances which are substantially similar to those described

[1] Section 102 of Reorganization Plan No. 4 of 1978 (5 U.S.C. App. 1 (1996)) generally transferred the authority of the Secretary of the Treasury to issue administrative exemptions under section 4975(c)(2) of the Code to the Secretary of Labor.

[2] Section 408(a) of ERISA provides, in part, that the Department may not grant an exemption unless a finding is made that such exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries of such plan and protective of the rights of participants and beneficiaries of such plan.

UMI

in previously granted individual exemptions. In fact, many exemption applicants have made it a practice to consult previously granted exemption files in the preparation of their submissions. Such applicants often submit applications containing nearly identical transactions, terms and conditions to those previously granted. Since the enactment of ERISA, the Department has exempted a large number of recurring transactions, including loans, leases and sales of real property. As a result, standard terms and conditions have developed over time which assure that the transaction is protective of the plan's interest.

The Department granted PTE 96–62 in 1996, in an effort to reduce regulatory burdens associated with processing individual exemptions from the prohibited transaction provisions of ERISA. Effective July 31, 1996, PTE 96–62 provides a mechanism for expediting consideration of those routine transactions which are similar to those that have been previously considered by the Department in prior exemption proceedings, without sacrificing the interests of the plan participants and beneficiaries. Accordingly, the exemption is available to a party proposing to engage in a prohibited transaction, if the party can demonstrate to the Department that such transaction and the material terms, conditions and representations therein are substantially similar to at least two individual exemptions previously granted by the Department.

Section I of PTE 96–62 provides relief from certain of the restrictions described in section 406(a) of ERISA and from the taxes imposed by section 4975(a) and (b) of the Code, by reason of a parallel provision described in section 4975(c)(1)(A) through (D) of the Code, for a transaction between a plan and a party in interest with respect to such plan, provided the conditions of the exemption are met. Under section II, additional relief is provided from certain of the restrictions described in section 406(b) of ERISA and the parallel restrictions described in section 8477(c)(2) of FERSA, as well as from the taxes imposed by section 4975(a) and (b) of the Code, by reason of a parallel provision described in section 4975(c)(1)(E) and (F). Sections I(a) and II(a) require that the transaction be substantially similar (as defined in section IV(a) of PTE 96–62) to transactions described in at least two individual exemptions that were granted by the Department, and which provided relief from the same restrictions as requested by the party, within the 60-month period ending on the date of filing of the written submission.[4]

As a result of the program's success, the number of requests for individual exemptions relating to routine transactions has decreased. Thus, the Department is concerned that, in the near future, parties wishing to seek authorization for transactions pursuant to PTE 96–62 will not be able to find two substantially similar individual exemptions which were granted by the Department within the required 60-month time period.[5] Accordingly, in order to assist parties who in the future wish to utilize the exemptive relief provided by PTE 96–62, the Department is proposing to expand Sections I(a) and II(a) to permit parties to either base their submission on substantially similar transactions described in two individual exemptions granted within the past 60-months; or on one individual exemption granted within the past 120-months and one transaction which received final authorization by the Department under PTE 96–62 within the past 60-months (the Authorized Transaction). The Department believes that the alternate method for satisfying the requirements of sections I(a) and II(a) will continue to ensure that the transactions that the party compares to its proposed transaction reflect the current policies of the Department.

As of November 2001, over 160 transactions have been authorized by the Department under PTE 96–62. The Department maintains, on its website (*www.dol.gov/dol/pwba/public/programs/oed/oednew20.htm*) a list of Authorized Transactions. This list includes the following information: the final authorization numbers, the name of the applicants, a description of the transactions, and the grant numbers and **Federal Register** citations of the exemptions on which the submissions were based. Parties wishing to base their submission on an Authorized Transaction will be able to refer to the submission previously filed by parties under PTE 96–62 and to the two granted individual exemptions identified as substantially similar for additional information regarding the subject transactions.[6]

The Department notes that all other conditions contained in PTE 96–62 must continue to be satisfied with respect to those parties seeking to base their submission on an Authorized Transaction rather than on two substantially similar individual exemptions. Accordingly, these parties should submit, among other things, a comparison of the proposed transaction with the Authorized Transaction and the transaction which was the subject of the individual exemption, including an explanation as to why any differences should not be considered material.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of ERISA and the Code to which the exemption does not expressly apply and the general fiduciary provisions of section 404 of ERISA. Section 404 requires, in part, that a fiduciary discharge his or her duties respecting the plan solely in the interest of participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of ERISA. This exemption, if granted does not affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before any exemption may be granted under section 408(a) of ERISA and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan(s) and of participants and beneficiaries, and protective of the rights of the participants and beneficiaries of the plan(s);

(3) This proposed amendment is supplemental to and not in derogation of any other provisions of ERISA or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) If granted, the proposed amendment will be applicable to a transaction only if the transaction satisfies the conditions specified in the class exemption.

Written Comments and Requests for Hearing

All interested persons are invited to submit written comments or requests for a public hearing on the proposed amendment to the address or the fax number noted above within the time period set forth above. All comments received will made a part of the record of this proceeding and will be available for public inspection.

Proposed Amendment

Under the authority of section 408(a) of ERISA and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR 2570, subpart B (55 FR 32836, August 10, 1990), the Department proposes to amend PTE 96–62 as set forth below:

(1) Section I(a) is amended to read "The transaction is substantially similar (as defined in section IV(a) to transactions described in: (a) At least two individual exemptions that were granted by the Department, and provided relief from the same restriction, within the 60-month period ending on the date of filing of the written submission referred to in section III(a); or (b) one individual exemption that was granted by the Department, and provided relief from the same restriction, within the 120-month period ending on the date of filing the written submission referred to in section III(a), and at least one Authorized Transaction (as defined in section IV(g));"

(2) Section II(a) is amended to read "The transaction is substantially similar (as defined in section IV(a) to transactions described in: (a) At least two individual exemptions that were granted by the Department, and provided relief from the same restriction, within the 60-month period ending on the date of filing of the written submission referred to in section III(a); or (b) one individual exemption that was granted by the Department, and provided relief from the same restriction, within the 120-month period ending on the date of filing the written submission referred to in section III(a), and at least one Authorized Transaction (as defined in section IV(g));"

(3) Section III(a)(4) is amended to read "a comparison of the proposed transaction to at least two substantially similar transactions which were the subject of individual exemptions granted by the Department, or an individual exemption granted by the Department and an Authorized Transaction, and an explanation as to why any differences should not be considered material for purposes of this exemption;"

(4) Section IV(b)(6) is amended to read "the Federal Register citations for the prior exemption(s) and/or the final authorization number of the Authorized Transaction (including the related Federal Register citations for the prior exemptions cited therein)identified by the party as substantially similar to the contemplated transaction."

(5) Section IV(g) is added to read: "The term Authorized Transaction means a transaction that has received final authorization pursuant to PTE 96–62 within a 60-month period ending on the date of the filing of the written submission referred to in section III(a)."

Signed at Washington, DC this 15th day of March 2002.

Ivan L. Strasfeld,

Director, Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 02–6770 Filed 3–19–02; 8:45 am]

BILLING CODE 4520–29–P

[4] Section IV(a) defines the term "substantially similar" to mean alike in all material respects as determined by the Department, in its sola discretion.

[5] In this regard, transactions which are authorized pursuant to PTE 96–62 cannot be relied on by parties wishing to engage in similar transaction pursuant to PTE 96–62 because that exemption is limited to those transactions which were the subject of individual exemptions granted in accordance with the Department's exemption procedure.

[6] All files are available for public inspection at the Public Documents Room, Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N–1513, 200 Constitution Ave., NW, Washington, DC 20210.

MORRIS K. UDALL SCHOLARSHIP AND EXCELLENCE IN NATIONAL ENVIRONMENTAL POLICY FOUNDATION

The United States Institute for Environmental Conflict Resolution; Agency Information Collection Activities; Extension of Currently Approved Information Collection; Comment Request; Application for the National Roster of Environmental Dispute Resolution and Consensus Building Professionals

AGENCY: Morris K. Udall Scholarship and Excellence in National Environmental Policy Foundation, U.S. Institute for Environmental Conflict Resolution.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act and supporting regulations, this document announces that the U.S. Institute for Environmental Conflict Resolution (the Institute), part of the Morris K. Udall Foundation, is planning to submit to the Office of Management and Budget (OMB) a request for an extension for the currently approved information collection (ICR), OMB control Number 2010–0030: Application for the National Roster of Environmental Dispute Resolution and Consensus Building Professionals ("National Roster of ECR Practitioners"), currently operating pursuant to Terms of Clearance issued July 29, 1999. Before submitting the extension to OMB for review and approval, the Institute is soliciting comments regarding the information collection (see section C. below entitled "Questions to Consider in Making Comments"). This document provides information on the continuing need for the Roster of ECR Practitioners Application and the information recorded in the application.

DATES: Comments must be submitted on or before May 20, 2002.

ADDRESSES: Direct comments and requests for information, including copies of the ICR to: Joan C. Calcagno, Roster Manager: U.S. Institute for Environmental Conflict Resolution, 110 South Church Avenue, Suite 3350, Tucson, Arizona 85701. Fax: 520–670–5530. Phone: 520–670–5299. E-mail: *roster@ecr.gov*

FOR FURTHER INFORMATION CONTACT: Joan C. Calcagno, Roster Manager: U.S. Institute for Environmental Conflict Resolution, 110 South Church Avenue, Suite 3350, Tucson, Arizona 85701. Fax: 520–670–5530. Phone: 520–670–5299. E-mail: *roster@ecr.gov*

SUPPLEMENTARY INFORMATION:

A. Title for the Collection of Information

Application for National Roster of Environmental Dispute Resolution and Consensus Building Professionals ("National Roster of ECR Practitioners").

B. Potentially Affected Persons

You are potentially affected by this action if you are a dispute resolution or consensus building professional in the environmental or natural resources field who wishes to be listed on the National Roster of Environmental Dispute Resolution and Consensus Building Professionals.

C. Questions To Consider in Making Comments

The U.S. Institute for Environmental Conflict Resolution requests your comments to any of the following questions related to collecting information for the extension of the Application for the National Roster of ECR Practitioners:

(1) Is the continued use of the application ("collection of information") necessary for the proper performance of the functions of the agency, including whether the information has practical utility?

(2) Is the agency's estimate of the time spent completing the application ("burden of the proposed collection of information") accurate, including the validity of the methodology and assumptions used?

VOL
67
ISS
54
MR
20
2002
UMI

(3) Can you suggest ways to enhance the quality, utility, and clarity of the information collected?

(4) Can you suggest ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology?

D. Abstract

The U.S. Institute for Environmental Conflict Resolution plans to continue collecting information from environmental dispute resolution and consensus building neutral professionals who desire to become members of the National Roster of ECR Practitioners, from which those involved in environmental, natural resource, or public lands disputes may locate providers of neutral services. Responses to the collection of information (the application) are voluntary, but required to obtain a benefit (listing on the National Roster of Environmental Dispute Resolution and Consensus Building Professionals.) An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Background Information: U.S. Institute for Environmental Conflict Resolution

The U.S. Institute for Environmental Conflict Resolution was created in 1998 by the Environmental Policy and Conflict Resolution Act (P.L. 105–156). The U. S. Institute is a federal program established by the U. S. Congress to assist parties in resolving environmental, natural resource, and public lands conflicts. The Institute is part of the Morris K. Udall Foundation, an independent federal agency of the executive branch overseen by a board of trustees appointed by the President. The Institute serves as an impartial, non-partisan institution providing professional expertise, services, and resources to all parties involved in such disputes, regardless of who initiates or pays for assistance. The Institute helps parties determine whether collaborative problem solving is appropriate for specific environmental conflicts, how and when to bring all the parties to the table, and whether a third-party facilitator or mediator might be helpful in assisting the parties in their efforts to reach consensus or to resolve the conflict. In addition, the Institute maintains the National Roster of ECR Practitioners, a roster of qualified facilitators and mediators with substantial experience in environmental conflict resolution, and can help parties in selecting an appropriate neutral. The Institute accomplishes most of its work by partnering, contracting with, or referral to, experienced practitioners.

The Need for and Use of the Information Collected in the Application for the Roster of ECR Practitioners

Roster of ECR Practitioners Application: The application can be viewed on-line from the Institute's website: www.ecr.gov (simply register in the system to access and review an application). A hardcopy application may also be obtained from the Institute for those without web access. (see contact information above.)

Background Information: The information collected in the application for the National Roster of ECR Practitioners is the basis for an on-line database, searchable by a combination of 10 criteria designed to locate appropriate practitioners by matching desired characteristics with the information in the application. The application was first available in September 1999 and remains available on a continuous basis. The Roster of ECR Practitioners first became operational in February 2000 with 60 members and currently includes over 190 members from 40 states, the District of Columbia, and 2 Canadian provinces. They represent a broad cross-section of 31 different professional backgrounds and a broad distribution of case experience across 39 types of case issues. Each member has documented experience which meets the roster entry criteria, and each has experience as a neutral in some or all of the following: mediation, facilitation, consensus building, process design, conflict assessment, system design, neutral evaluation/fact finding, superfund allocation, and/or regulatory negotiation.

The specific entry criteria and applicable definitions are available from the Institute's web site: *www.ecr.gov.* Generally stated, the entry criteria require that an applicant has:

(1) Served as the lead neutral in a collaborative process (e.g., mediation, consensus building, conflict assessment) for at least 200 case hours in two to ten environmental cases, and

(2) Accumulated a total of 60 points across three categories: additional case experience and complex case experience; experience as a trainer or trainee; and substantive work/volunteer/educational experience in fields related to Alternative Dispute Resolution/Environmental Conflict Resolution, such as law, science, public administration.

Use of the National Roster of ECR Practitioners: The roster search and referral service is accessible through the Institute. The Institute uses the roster (specifically the information collected in the application) as a resource when making referrals to those searching for neutral ECR professionals with specific experience, backgrounds, or expertise (external referrals). The Institute also uses the roster as a resource when locating appropriate ECR neutral professionals with whom to partner/sub-contract for projects in which the Institute is involved (internal referrals). The roster referral system is enhanced through cooperation with existing programs and networks of environmental dispute-resolution and consensus-building practitioners familiar with the issues in their respective states and regions. Twenty-one EPA ADR Specialists also have direct, electronic access to search the roster. Next, it is anticipated that other federal agencies will gain direct access over the next year. Eventually, the roster will be available to the public through the internet.

Federal agencies are not required to select from the roster. Professionals not on the roster remain fully eligible to serve as ECR practitioners in disputes involving federal agencies. Finally, being listed on the roster does not guarantee additional work for the practitioner.

Development and Need for the National Roster of ECR Practitioners: The roster was developed with the support of the Environmental Protection Agency (EPA). Based on a 1997 study concerning the potential of a national roster of qualified practitioners, EPA decided to support the development of such a roster through the Institute.

To develop the project, the EPA and the Institute brought together a work group consisting of EPA dispute resolution professionals and contracting officers, state dispute resolution officials, private dispute resolution practitioners and academics. Informed in part by ideas from this group, the EPA and the Institute proposed roster entry qualifications and draft application, which were published in the **Federal Register** in November 1998. Before the entry criteria and application were finalized, the comments received in response to the **Federal Register** notice were reviewed. Outreach continued through meetings and newsletter articles, as well as individual communications to professional associations, state and federal government agencies, dispute resolution firms, individual practitioners, professional associations of attorneys, environmental and citizen groups.

The roster was created, and continues to be needed, for several reasons. The use of Alternative Dispute Resolution (ADR) in the environmental and public policy arena has grown markedly over the last two decades. In this context, ADR processes now include techniques ranging from conflict prevention, such as consensus building and facilitation of public policy dialogues, to specific dispute resolution through assisted negotiations and mediation. The number of environmental conflict resolution (ECR) practitioners has grown as the field has gained prominence and professionals from a variety of disciplines have become attracted to its advantages and opportunities.

An essential step in any dispute resolution process occurs when parties select a practitioner. Parties making the selection rightfully expect that the practitioner will be qualified to provide the service sought and has experience and style matched well to the nature of the issues and to the parties. Thus, the Roster of ECR Practitioners is designed to advance the interests of the growing field of dispute resolution, reflect the evolving standards of best practice, and help direct the expenditure of public funds for quality services.

Over the last fifteen years of using ADR, EPA found that parties to a dispute or controversy will generate a list of desired characteristics, such as experience with specific types of issues, cases or disputes, location, and other factors, that will be used in an attempt to identify the right person to assist them. Locating practitioners meeting these criteria can be a "hit-or-miss" experience depending on the resources, available time, and experience of the parties with locating appropriate neutrals.

Although the EPA operates a national service contract that manages major cases through a list of experienced providers, it is limited in scope and membership, and as a consequence it can be burdensome to use for identifying neutrals for small or localized cases. Most other Federal agencies have no vehicle or information available to assist in this important first step to conducting a good dispute resolution process.

More specifically, the National Roster of ECR Practitioners is necessary for the proper performance of the Institute's goals: to resolve Federal environmental disputes in a timely and constructive manner; to increase the appropriate use of environmental conflict resolution; to improve the ability of Federal agencies and other interested parties to engage in ECR effectively; and to promote collaborative problem-solving and consensus-building during the design and implementation of Federal environmental policies so as to prevent and reduce the incidence of future environmental disputes.

In addition, the U.S. Institute's enabling legislation directs the Institute to work with practitioners located near the conflict whenever practical. Consistent with this mandate, the Institute must be able to identify appropriate experienced dispute resolution and conciseness building professionals in an efficient manner.

Finally, the Administrative Dispute Resolution (AADR@) Act of 1996 (5 U.S.C. 571, et. seq.) authorizes the Federal government to contract with dispute resolution professionals (e.g., facilitators or mediators) to assist it and other parties to disputes or issues in controversy in reaching an agreement, settlement, or consensus. The ADR Act authorizes the government to take steps to make identifying and contracting with neutrals easier (cf. 5 U.S.C. 573(c)).

Thus, the goal of the National Roster of ECR Practitioners and the referral system is to improve access to qualified environmental dispute resolution and consensus building professionals for the Institute and others sponsoring or engaging in environmental conflict resolution processes. The roster expedites the identification of appropriate professionals, shortens the time needed to complete contracting documents, and helps refer parties to practitioners, particularly practitioners in the locale of the dispute.

More specifically, the roster and the referral system provide an efficient, credible and user-friendly source from which to systematically identify experienced environmental neutral professionals; increase the use of collaborative processes by providing a useful tool for locating appropriate practitioners; and provide users with a detailed Practitioner Profiles, reflecting information contained in the application, to be used as a helpful first step in the process of selecting an appropriate neutral.

E. Burden Statement

The application compiles data available from the resumes of dispute resolution and consensus building professionals into a format that is standardized for efficient and fair eligibility review, database searches, and retrievals. A professional needs to complete the form only one time. Once the application is approved, the roster member has continual access to his or her on-line account to update information, on a voluntary basis. The burden includes time spent to review instructions, review resume information, and enter the information in the form.

Likely Respondents: Environmental dispute resolution and consensus building professionals (new respondents); existing roster members (for updating)

Proposed Frequency of Response: one, with voluntary updates approximately once per year.

Estimated Number of New Respondents (first extension year): 30.

Estimated Number of Existing Respondents—for updating (first extension year): 125.

Estimated Number of New Respondents (per year for succeeding year): 30.

Estimated Number of Existing Respondents-for updating (per year for succeeding year): 125.

Respondent Time Burden Estimates

Estimate Time per New Response: 150 minutes (2.5 hours).

Estimated Number of Updates (per year): 1, for 125 existing respondents.

Estimated Time for Update: 15 minutes.

Estimated Total First Extension Year Burden: 4500 minutes (75 hours) (30 new respondents); 1875 minutes (31.25 hours)(125 updates).

Estimated Total Subsequent Year Annual Burden: 4500 minutes (75 hours) (30 new respondents); 1875 minutes (31.25 hours)(125 updates).

Respondent Cost Burden Estimates (at $150. per hour)

No Capital Or Start-Up Costs

Estimated Cost per Respondent (first extension year): $375 (new respondents); 38 (update).

Estimated Cost per Respondent (subsequent year): $375 (new respondents); 38 (update).

Estimated Total First Extension Year Burden: $11,250 (new respondents); $4,750 (updates).

Estimated Total Subsequent Year annual Bur $11,250 (new respondents); $4,750 (updates).

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing

BILLING CODE 6820–FN–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. They authorize the preservation of records of continuing value in the National Archives of the United States and the destruction, after a specified period, of records lacking administrative, legal, research, or other value. Notice is published for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before May 6, 2002. Once the appraisal of the records is completed, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums that contain additional information concerning the records covered by a proposed schedule. These, too, may be requested and will be provided once the appraisal is completed. Requesters will be given 30 days to submit comments.

ADDRESSES: To request a copy of any records schedule identified in this notice, write to the Life Cycle Management Division (NWML), National Archives and Records Administration (NARA), 8601 Adelphi Road, College Park, MD 20740–6001. Requests also may be transmitted by FAX to 301–713–6852 or by e-mail to *records.mgt@nara.gov*. Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports should so indicate in their request.

FOR FURTHER INFORMATION CONTACT: Marie Allen, Director, Life Cycle Management Division (NWML), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001. Telephone: (301) 713–7110. E-mail: *records.mgt@nara.gov*.

SUPPLEMENTARY INFORMATION: Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval, using the Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

No Federal records are authorized for destruction without the approval of the Archivist of the United States. This approval is granted only after a thorough consideration of their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and whether or not they have historical or other value.

Besides identifying the Federal agencies and any subdivisions requesting disposition authority, this public notice lists the organizational unit(s) accumulating the records or indicates agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency. This notice provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction). It also includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it too includes information about the records. Further information about the disposition process is available on request.

Schedules Pending

1. Department of the Air Force, Office of the Secretary (N1-AFU–02–1, 2 items, 1 temporary item). Electronic copies created using electronic mail and word processing of appointment books, daily schedules, and telephone logs of the Secretary of the Air Force, November 1997 to January 2001. Recordkeeping copies of these files are proposed for permanent retention.

2. Department of Defense, Joint Staff and Combatant Commands (N1–218–00–6, 132 items, 59 temporary items). Facilitative records relating to operations, planning, and command and control matters accumulated by the Joint Staff and combatant commands. Included are reports, correspondence, summaries, case files, background papers, drafts, transcripts, publications, minutes of meetings, and other files pertaining to such matters as military readiness, special and regular operations, exercises, plans, codewords, crisis incidents, reconnaissance, surveillance, war games, alerts, strategic weapons failures, space and satellite operations, aerospace, and antiterrorism. Also included are electronic copies of documents created using electronic mail and word processing and electronic systems maintained at combatant commands that feed into systems maintained at higher levels. Recordkeeping copies of such files as operations and readiness policies and reports, directives, lessons learned, crisis incident action books, emergency planning policies and procedures, and publications are proposed for permanent retention.

3. Department of Defense, Joint Staff and Combatant Commands (N1–218–00–7, 51 items, 33 temporary items). Records relating to logistics, supply services, and budget matters accumulated by the Joint Staff and combatant commands. Included are reports, correspondence, case files, background papers, drafts, transcripts, publications, minutes of meetings, and other records pertaining to such matters as routine logistics and mobilization activities, general budget and financial management, payroll, procurement, space management, travel, transportation, and safety and maintenance activities. Also included are electronic copies of documents created using electronic mail and word processing and electronic systems maintained at combatant commands that feed into systems maintained at higher levels. Recordkeeping copies of files relating to such matters as policies and procedures, oversight and assessments, and high-level budget activities are proposed for permanent retention.

4. Department of Defense, Joint Staff and Combatant Commands (N1–218–00–10, 61 items, 46 temporary items). Records relating to general administration and management accumulated by the Joint Staff and combatant commands. Included are such records as reports, correspondence, summaries, case files, background papers, drafts, transcripts, publications, and minutes of meetings. Files pertain to such matters as general office operations, standard operating procedures, the preparation of reports and plans, publications, forms management, investigations, audits and surveys, routine studies, agreements, and records management. Also included are electronic copies of documents created using electronic mail and word processing and electronic systems maintained at combatant commands that feed into systems maintained at higher levels. Recordkeeping copies of such files as indexes to permanent records, official studies, schedules of high officials, significant investigations, audiovisual records, administrative orders, and meeting/conference records are proposed for permanent retention.

5. Department of Defense, Joint Staff and Combatant Commands (N1–218–00–11, 44 items, 43 temporary items). Records relating to information technology accumulated by the Joint Staff and combatant commands. Included are reports, correspondence, directives, plans, memorandums, case files, background papers, drafts, transcripts, publications, minutes of meetings, and other files pertaining to such matters as the planning, procurement, testing, security, operation, and maintenance of information technology systems. Also included are electronic copies of documents created using electronic mail and word processing and electronic systems maintained at combatant commands that feed into systems maintained at higher levels. Recordkeeping copies of technical documentation relating to records scheduled for transfer to the National Archives are proposed for permanent retention.

6. Department of State, Bureau of Human Resources (N1–59–00–12, 12 items, 10 temporary items). Project working papers, legislative files, and labor management case files. Also included are electronic copies of documents created using electronic mail and word processing. Proposed for permanent retention are personnel policy historical files and reports relating to personnel policy and planning.

7. Department of State, Office of the Legal Advisor (N1–59–02–1, 2 items, 1 temporary item). Electronic copies of subject and country files of the Assistant Legal Advisor for Nonproliferation created using electronic mail and word processing. Recordkeeping copies of the files are proposed for permanent retention.

8. Environmental Protection Agency, Office of Prevention, Pollution, and Toxics (N1–412–01–5, 3 items, 2 temporary items). Paper records that relate to reporting information on chemicals or chemical mixtures under Section 8 of the Toxic Substances Control Act and have been microfilmed. Also included are electronic copies of documents created using electronic mail and word processing. Microfilm copies and paper records that have not been filmed, consisting of such documents as health studies, forms, and reports, are proposed for permanent retention.

9. Executive Office of the President, Office of National Drug Control Policy (N1–429–01–1, 43 items, 20 temporary items). Electronic copies of documents created using word processing. Proposed for permanent retention are the recordkeeping copies of such records as subject files of the director, deputy director, and other agency offices, the director's correspondence files and a related tracking system, and audio and video recordings.

10. Inter-American Foundation, Agency-wide (N1–454–02–1, 9 items, 7 temporary items). Records relating to activities of the Board of Directors and the President of the Foundation, including such files as copies of meeting minutes, correspondence, reports, public notices to Congress of grants under consideration by the Foundation, and electronic copies of documents created using electronic mail and word processing. Proposed for permanent retention are recordkeeping copies of minutes of meetings of the Board of Directors and Board of Directors policy files.

11. Inter-American Foundation, Office of the General Counsel (N1–454–02–2, 6 items, 6 temporary items). Records relating to activities of the Office of the General Counsel. Included are grant summaries, records of in-country legal assistance in support of grantees, and records of General Counsel participation in congressional budget hearings. Also included are electronic copies of documents created using electronic mail and word processing.

12. Inter-American Foundation, Office of Programs (N1–454–02–3, 3 items, 3 temporary items). Case files pertaining to grants awarded under the Foundation's Field Research Fellowship Program and U.S. Graduate Study Fellowship Program for Latin American and Caribbean Citizens. Also included are electronic copies of documents created using electronic mail and word processing.

13. Inter-American Foundation, Office of Budget and Financial Controls (N1–454–02–4, 4 items, 3 temporary items). Records relating to the administration of funding received from the Social Progress Trust Fund, including electronic copies of documents created using electronic mail and word processing. Proposed for permanent retention are recordkeeping copies of budget formulation and submission files.

14. Nuclear Regulatory Commission, Regional Offices (N1–431–00–20, 132 items, 96 temporary items). Electronic records in the Commission's Agencywide Document Access and Management System (ADAMS) accumulated by agency Regional Offices, including electronic copies of records created using office automation tools and of records used to create ADAMS portable document format files. Records proposed for disposal include electronic recordkeeping copies of records related to committees and conferences for which the agency is not the sponsor, enforcement case files that lack historical significance, fuel facilities docket case files, routine correspondence accumulated below the regional administrator level, operator licensing examination packages, licensee mismanagement files, nuclear material accountability worksheets, personnel exposure files, and radiation protection program records. Paper copies of these records were previously approved for disposal. Series proposed for permanent retention include recordkeeping copies of such files as emergency planning records, significant enforcement actions, selected fuel facilities docket case files, program correspondence accumulated at the regional administrator level, inspection and enforcement case files, and regulatory history files for proposed and final rulemaking.

15. Office of Personnel Management, Office of Administrative Law Judges (N1–478–02–2, 4 items, 4 temporary items). Electronic copies of administrative law judge qualifications files created using electronic mail and

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Nixon Presidential Historical Materials; Opening of Materials

AGENCY: National Archives and Records Administration.

ACTION: Notice of opening of materials.

SUMMARY: This notice announces the opening of additional files from the Nixon Presidential historical materials. Notice is hereby given that, in accordance with section 104 of Title I of the Presidential Recordings and Materials Preservation Act (PRMPA, 44 U.S. C. 2111 note) and 1275.42(b) of the PRMPA Regulations implementing the Act (36 CFR part 1275), the agency has identified, inventoried, and prepared for public access integral file segments among the Nixon Presidential historical materials.

DATES: The National Archives and Records Administration (NARA) intends to make these materials described in this notice available to the public beginning May 6, 2002. In accordance with 36 CFR 1275.44, any person who believes it necessary to file a claim of legal right or privilege concerning access to these materials should notify the Archivist of the United States in writing of the claimed right, privilege, or defense before April 19, 2002.

ADDRESSES: The materials will be made available to the public at the National Archives at College Park research room, located at 8601 Adelphi Road, College Park, Maryland beginning at 8:45 a.m. Researchers must have a NARA researcher card, which they may obtain when they arrive at the facility.

Petitions asserting a legal or constitutional right or privilege which would prevent or limit access must be sent to the Archivist of the United States, National Archives at College Park, 8601 Adelphi Road, College Park, Maryland 20740–6001.

FOR FURTHER INFORMATION CONTACT: Karl Weissenbach, Director, Nixon Presidential Materials Staff, 301–713–6950.

SUPPLEMENTARY INFORMATION: The integral file segments of textual materials to be opened on May 6, 2002, consist of 54 cubic feet. The White House Central Files Unit is a permanent organization within the White House complex that maintains a central filing and retrieval system for the records of the President and his staff. Some of the materials are from the White House Central Files, Subject Files. The Subject Files are based on an alphanumerical file scheme of 61 primary categories. Listed below are the integral file segments from the White House Central Files, Subject Files in this opening.

Subject Category

Volume: 8 cubic feet.

Federal Government (FG)
FG 93 President's Commission on Income Maintenance Program
FG 94 Commission on Marine Service, Engineering, and Resources
FG 106 District of Columbia
FG 150 Interstate Commerce Commission
FG 151 Joint Commission on Aging
FG 153 National Advisory Commission on Civil Disorders
FG 154 National Advisory Commission on Health Facilities
FG 155 National Advisory Committee on Libraries
FG 156 National Advisory Commission on Low Income Housing
FG 157 National Advisory Council on Adult Basic Education
FG 163 National Advisory Council on Vocational Education
FG 165 National Alliance of Businessmen
FG 222 Tax Court of the United States
FG 223 Temporary Commission on Pennsylvania Avenue
FG 224 Tennessee Valley Authority

In accordance with the provisions of Executive Order 12958, several series within the National Security Council files have been systematically reviewed for declassification and will be made available. In addition, a number of documents which were previously withheld from public access have been re-reviewed for release and or declassified under the provisions of Executive Order 12958, or in accordance with 36 CFR 1275.56 (Public Access Regulations).

National Security Council Files series:

Volume: 45 cubic feet.

A number of documents which were previously withheld from public access have been reviewed and/ or declassified under the Mandatory Review provisions of Executive Order 12958 and will be made available.

Previously restricted materials:

Volume: 1 cubic foot.

Public access to some of the items in the file segments listed in this notice will be restricted as outlined in 36 CFR 1275.50 or 1275.52 (Public Access Regulations).

Dated: March 13, 2002.

John W. Carlin,

Archivist of the United States.

[FR Doc. 02–6635 Filed 3–19–02; 8:45 am]

BILLING CODE 7515–01–P

NATIONAL COUNCIL ON DISABILITY

Advisory Committee Meeting/ Teleconference

AGENCY: National Council on Disability (NCD).

SUMMARY: This notice sets forth the schedule of the forthcoming meeting/ teleconference for NCD's Youth Advisory Committee, Notice of this meeting is required under section 10 (a)(1)(2) of the Federal Advisory Committee Act (Pub L. 92–463).

Youth Advisory Committee: The purposes of NCD's youth Advisory Committee is to provide input into NCD acitivites consistent with the values and goals of the Americans with Disabilities Act.

DATES: April 10, 2002, 4:00 p.m. EDT.

For youth advisory committee information, contact: Gerrie Drake Hawkins, Ph.D., Program Specialist, National Council on Disability, 1331 F Street NW, Suite 850, Washington, DC. 20004; 202–272–20004 (voice), 202–272–2074 (TTY), 202–272–2022 (fax), *ghawkins@ncd.gov* (e-mail).

AGENCY MISSION: The National Council on Disability is an independent federal agency composed of 15 members appointed by the President of the Untied States and confirmed by the U.S. Senate. Its overall purpose is to promote policies, programs, practices, and procedures that guarantee equal opportunity for all people with disabilities to achieve economic self-sufficiency, independent living, and inclusion and integration into all aspects of society.

This committee is necessary to provide advice and recommendations to NCD on disability issues.

We currently have a membership reflecting our nation's diversity and representing a variety of disabling conditions from across the United States.

Open Meeting: This advisory committee meeting/teleconference of the National Council on Disability will be open to the public. Those interested

in participating in the meeting/ teleconference should contact the appropriate staff member listed above. Due to limited resources, only a few telephone lines will be available.

Records will be kept of all Youth Advisory Committee meetings/ teleconferences and will be available after the meeting for public inspection at the National Council on Disaiblity.

Signed in Washington, DC, on March 15, 2002.

Ethel D. Briggs,

Executive Director.

[FR Doc. 02–6737 Filed 3–19–02; 8:45 am]

BILLING CODE 6820–MA–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–286]

Entergy Nuclear Operations, Inc.; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Entergy Nuclear Operations, Inc. (the licensee) to withdraw its February 27, 2001, application for proposed amendment to Facility Operating License No. DPR–64 for the Indian Point Nuclear Generating Unit No. 2 (IP2), located in Westchester County, New York.

The proposed amendment would have revised the Technical Specifications (TSs) to change the mode applicability for certain engineered safety features and auxiliary electrical systems from the point of time when the reactor is made critical to when the average reactor coolant temperature is heated above 350 °F. The amendment would also have changed the associated action that must be taken when the TS conditions cannot be met to require a plant cooldown to below 350 °F.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on April 4, 2001 (66 FR 17965). However, by letter dated February 27, 2002, the licensee withdrew the proposed change.

Further details with respect to this action, see the application for amendment dated February 27, 2001, and the licensee's letter dated February 27, 2002, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, *http://www.nrc.gov/reading-rm.html.*

Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC Public Document Room (PDR) Reference staff by telephone at 1–800–397–4209, 301–415–4737 or by email to *pdr@nrc.gov.*

Dated at Rockville, Maryland, this 13th day of March 2002.

For the Nuclear Regulatory Commission.

Patrick D. Milano,

Sr. Project Manager, Section 1, Project Directorate, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

[FR Doc. 02–6689 Filed 3–19–02; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards: Subcommittee Meeting on Thermal-Hydraulic Phenomena; Notice of Meeting

The ACRS Subcommittee on Thermal-Hydraulic Phenomena will hold a meeting on April 23, 2002, Room T–2B3, 11545 Rockville Pike, Rockville, Maryland.

Portions of the meeting may be closed to public attendance to discuss General Electric proprietary information per 5 U.S.C. 552b(c)(4).

The agenda for the subject meeting shall be as follows: *Tuesday, April 23, 2002—8:30 a.m. until the conclusion of business.*

The Subcommittee will begin review of the application of the Carolina Power and Light Company for a core power uprate for the Brunswick Steam Electric Plant, Units 1 and 2. The purpose of this meeting is to gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman. Written statements will be accepted and made available to the Committee. Electronic recordings will be permitted only during those portions of the meeting that are open to the public, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the Designated Federal Official named below five days prior to the meeting, if possible, so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC staff, the Carolina Power and Light Company, General Electric Nuclear Energy, and other interested persons regarding this review.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been canceled or rescheduled, and the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor, can be obtained by contacting the Designated Federal Official, Mr. Paul A. Boehnert (telephone 301–415–8065) between 7:30 a.m. and 5 p.m. (EST). Persons planning to attend this meeting are urged to contact the above named individual one or two working days prior to the meeting to be advised of any potential changes to the agenda that may have occurred.

Dated: March 14, 2002.

Sher Bahadur,

Associate Director, for Technical Support.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Notice of Availability of Model Application Concerning Technical Specification Improvement To Eliminate Post Accident Sampling Requirements for Boiling Water Reactors Using the Consolidated Line Item Improvement Process

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

SUMMARY: Notice is hereby given that the staff of the Nuclear Regulatory Commission (NRC) has prepared a model application relating to the elimination of post accident sampling requirements for Boiling Water Reactors. The purpose of this model is to permit the NRC to efficiently process amendments that propose to remove requirements for Post Accident Sampling Stations (PASS) from

Technical Specifications (TS). Licensees of nuclear power reactors to which the model applies may request amendments utilizing the model application.

DATES: The NRC staff issued a **Federal Register** Notice (66 FR 66949, December 27, 2001) which provided a model safety evaluation (SE) and a model no significant hazards consideration (NSHC) determination relating to elimination of requirements for PASS for BWRs. The NRC staff hereby announces that the model SE and NSHC determination may be referenced in plant-specific applications to eliminate requirements for post accident sampling. The staff has posted a model application on the NRC web site to assist licensees in using the consolidated line item improvement process (CLIIP) to eliminate PASS-related TS. The NRC staff can most efficiently consider applications based upon the model application if the application is submitted within a year of this **Federal Register** Notice.

FOR FURTHER INFORMATION CONTACT: Robert Dennig, Mail Stop: O–12H4, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone 301–415–1161.

SUPPLEMENTARY INFORMATION:

Background

Regulatory Issue Summary 2000–06, "Consolidated Line Item Improvement Process for Adopting Standard Technical Specification Changes for Power Reactors," was issued on March 20, 2000. The CLIIP is intended to improve the efficiency of NRC licensing processes. This is accomplished by processing proposed changes to the standard technical specifications (STS) in a manner that supports subsequent license amendment applications. The CLIIP includes an opportunity for the public to comment on proposed changes to the STS following a preliminary assessment by the NRC staff and finding that the change will likely be offered for adoption by licensees. The CLIIP directs the NRC staff to evaluate any comments received for a proposed change to the STS and to either reconsider the change or to proceed with announcing the availability of the change for proposed adoption by licensees. Those licensees opting to apply for the subject change to TS are responsible for reviewing the staff's evaluation, referencing the applicable technical justifications, and providing any necessary plant-specific information. Each amendment application made in response to the notice of availability will be processed and noticed in accordance with applicable rules and NRC procedures.

This notice involves the elimination of requirements for PASS and related administrative controls in TS for BWRs. This proposed change was proposed for incorporation into the STS by the BWR Owners Group (BWROG) participants in the Technical Specification Task Force (TSTF) and is designated TSTF–413. TSTF–413 is supported by the NRC staff's SE dated June 12, 2001, for the BWROG topical report NEDO–32991, "Regulatory Relaxation for BWR Post Accident Sampling Stations (PASS)," which was submitted to the NRC on November 30, 2000. The BWROG request followed the staff's approval of similar requests for elimination of PASS requirements from the Combustion Engineering Owners Group (CEOG) and the Westinghouse Owners Group (WOG). TSTF–413 can be viewed on the NRC Web site, www.nrc.gov.

Applicability

This proposed change to remove requirements for PASS from TS (and other elements of the licensing bases) is applicable to BWRs.

To efficiently process the incoming license amendment applications, the staff requests each licensee applying for the changes addressed by TSTF–413 using the CLIIP to address the following plant-specific verifications and regulatory commitments. The CLIIP does not prevent licensees from requesting an alternative approach or proposing the changes without the requested verifications and regulatory commitments. Variations from the approach recommended in this notice may, however, require additional review by the NRC staff and may increase the time and resources needed for the review. In making the requested regulatory commitments, each licensee should address: (1) That the subject capability exists (or will be developed) and will be maintained; (2) where the capability or procedure will be described (*e.g.*, severe accident management guidelines, emergency operating procedures, emergency plan implementing procedures); and (3) a schedule for implementation. The amendment request need not provide details about designs or procedures.

Each licensee should verify that it has, and make a regulatory commitment to maintain (or make a regulatory commitment to develop and maintain):

a. Contingency plans for obtaining and analyzing highly radioactive samples from the reactor coolant system, suppression pool, and containment atmosphere;

b. A capability for classifying fuel damage events at the Alert level threshold (typically this is 300 μCi/ml dose equivalent iodine). This capability may use a normal sampling system or correlations of radiation readings to coolant concentrations; and

c. an I–131 site survey detection capability, including an ability to assess radioactive iodines released to offsite environs, by using effluent monitoring systems or portable sampling equipment.

Public Notices

In a notice in the **Federal Register** dated December 27, 2001 (66 FR 66949), the staff requested comment on the use of the CLIIP to process requests to delete post-accident sampling requirements from BWRs. The staff had previously issued a notice of availability (65 FR 65018, October 31, 2000) on the use of the CLIIP to process requests to delete post-accident sampling requirements from plants with Westinghouse and Combustion Engineering designs. The notice of availability for Westinghouse and Combustion Engineering plants followed the staff's disposition of comments received in response to a notice requesting comment (65 FR 49271, August 11, 2000). Each request to eliminate PASS requirements by licensees for Westinghouse and CE plants using the CLIIP has also included notices prior to issuance of the subject license amendments and upon issuance.

TSTF–413, as well as the NRC staff's safety evaluation and model application, may be examined, and/or copied for a fee, at the NRC/s Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records are accessible electronically from the ADAMS Public Library component on the NRC Web site, (the Electronic Reading Room).

The staff did not receive comments following the notice soliciting comments about modifying the TS requirements regarding post accident sampling for BWRs. The staff has made some minor changes to the model safety evaluation as a result of internal reviews. A specific change involves the paragraph that read:

> The staff notes that redundant, safety-grade, containment hydrogen concentration monitors are required by 10 CFR 50.44(b)(1), are addressed in NUREG–0737 Item II.F.1 and Regulatory Guide 1.97, and are relied upon to meet the data reporting requirements of 10 CFR part 50, Appendix E, Section VI.2.a.(ii)(3). The staff concludes that during the early phases of an accident, the safety-grade hydrogen monitors provide an adequate capability for monitoring containment hydrogen concentration. The staff sees value in maintaining the capability to obtain grab samples for complementing the information from the hydrogen monitors.
> * * *

The revised paragraph reads as follows:

> The staff notes that containment hydrogen concentration monitors are required by 10 CFR 50.44 and are relied upon to meet the data reporting requirements of 10 CFR part 50, Appendix E, Section VI.2.a.(ii)(3). The staff concludes that these hydrogen monitors provide an adequate capability for monitoring containment hydrogen concentration during the early phases of an accident. The staff sees value in maintaining the capability to obtain grab samples for complementing the information from the hydrogen monitors. * * *

The change was made to reflect a likely revision to the requirements in 10 CFR 50.44 and does not significantly affect the technical basis of the staff's findings or revise the verifications and commitments identified in the model SE.

As described in the model application prepared by the staff, licensees may reference in their plant-specific applications to eliminate PASS-related TS the SE (as revised above), NSHC determination, and environmental assessment previously published in the **Federal Register** (66 FR 66949, December 27, 2001).

Dated at Rockville, Maryland, this 13th day of March 2002.

For the Nuclear Regulatory Commission.

William D. Beckner,

Program Director, Operating Reactor Improvements, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation.

[FR Doc. 02–6690 Filed 3–19–02; 8:45 am]

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[File No. 500–1]

A.C.L.N. Ltd.; Order of Suspension of Trading

It appears to the Securities and Exchange Commission ("Commission"), based on information provided to the Commission staff, that there is a lack of adequate and accurate information concerning the management, business practices and results of operations of A.C.L.N. Ltd. ("ACLN"), of Limassol, Cyprus and Antwerp, Belgium. The securities of ACLN are registered with the Commission pursuant to section 12(b) of the Securities Exchange Act of 1934 ("Exchange Act"). Its common stock is listed for trading on the New York Stock Exchange under the symbol ASW, and its options are traded through the Amex system. Information has been provided to the Commission staff raising concerns as to the adequacy and accuracy of ACLN's publicly disseminated information concerning, among other things, the following:

- The bases for ACLN's financial and other disclosure, as contained in its annual report on Form 20–F for the fiscal year ended December 31, 2000 ("2000 Form 20–F"), report on Form 6–K for the quarter ending September 30, 2001 and other public statements, concerning the revenue and income obtained by ACLN from its new car wholesale business, the volume of that business and the source of the cars sold;
- The bases for ACLN's financial and other public disclosure in its 2000 Form 20–F and in its December 21, 2001 press release concerning the ownership of the shipping vessel, the Sea Atef, and the bases under generally accepted accounting principles for claiming it as a $5.5 million asset, even though documents of title indicate that the vessel is jointly owned by persons or entities other than ACLN;
- The bases for ACLN's financial and other disclosure in its report on Form 6–K for the quarter ending September 30, 2001 concerning the revenue and income ACLN obtained from arranging the transportation of used cars, including its reported increase of approximately $60 million in revenue for the first nine months of 2001 over the same period of 2000;
- The bases for the statements in ACLN's February 5, 2002 press release announcing that it had acquired a majority interest in five companies, each of which owns a "pure car and truck carrier vessel;"
- The business relationship and the nature of all financial transactions between ACLN and Matina Forwarding and Trading, also known as MFT;
- The source and subsequent use of funds claimed by ACLN as a corporate asset on its financial statements for the fiscal year ending December 31, 2000 and the fiscal quarter ending September 30, 2001, and deposited at the BNP Paribas Bank, Luxembourg; and
- The bases for the nondisclosure in any Commission filing the warrant issued by Tunisian authorities for the arrest of Abderrazak Labiadh, ACLN's President, CEO, and Managing Director, for allegedly misappropriating funds from a Tunisian company he founded.

The Commission is of the opinion that the public interest and the protection of investors require a suspension of trading in the securities of ACLN.

Therefore, it is ordered that, pursuant to section 12(k) of the Exchange Act, trading in the securities of ACLN is suspended for the period from 9:30 a.m. EST, March 18, 2002, through 11:59 p.m. EST, on April 1, 2002.

The Commission cautions broker-dealers and current and prospective holders of ACLN securities that they should carefully consider the foregoing information along with all other currently available information and any information subsequently issued by ACLN.

Further, brokers and dealers should be aware of the requirements of Rule 15c2–11 under the Exchange Act to the initiation of quotations at the termination of the trading suspension. Any broker or dealer having any questions as to whether or not the rule applies or whether the broker or dealer has complied with the rule should not enter any quotation but immediately contact the staff of the Securities and Exchange Commission in Washington, D.C.

Any broker or dealer uncertain as to what is required by Rule 15c2–11, should refrain from entering quotations relating to the securities of ACLN until such time as that broker or dealer is familiar with the rule and is certain that all of its provisions have been met. If any broker or dealer enters any quotation for the stock of ACLN that is in violation of the rule, the Commission will consider the need for prompt enforcement action.

By the Commission.

Jill M. Peterson,

Assistant Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45543; File No. SR–CBOE–2002–02]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Permanent Adoption of Decimal Pricing and the Establishment of Minimum Price Variations for Quoting in Equity Securities and Options

March 12, 2002.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b-4 thereunder,[2] notice is hereby given that on January

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

14, 2002, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to amend its rules to establish minimum price variations ("MPVs"). The text of the proposed rule change is available at the CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On September 25, 2001, the Commission issued an order requiring the securities exchanges and the NASD to submit their own respective rule filings to establish MPVs for quoting equity securities and options by January 14, 2002.[3] The CBOE now proposes to formally adopt the MPVs currently in place on the Exchange.

As part of the industry conversion to decimal pricing and pursuant to the Decimals Implementation Plan for the Equities and Options Markets submitted to the Commission on July 26, 2000 (the "Plan"),[4] the Exchange adopted the following MPV schedule for quoting: a five cent MPV for option issues quoted under $3 a contract; a ten cent MPV for option issues quoted at $3 a contract or greater; and a one cent MPV for the quoting of CBOE's equity products. The Plan, including the MPVs adopted under the Plan, remains in effect until the Commission approves rules submitted by each exchange and the NASD designating each market's MPVs. The Exchange seeks to designate the MPVs utilized under the Plan as its minimum increments.

The proposed rule change also provides that future changes to the Exchange's MPVs would be handled as they were handled before the conversion to decimal pricing, namely that the CBOE Board of Directors may determine to change the minimum increments and that the Exchange will designate any such change as a stated policy, practice, or interpretation with respect to the administration of the CBOE minimum increment rule for bids and offers (CBOE Rule 6.42) within the meaning of section 19(b)(3)(A) of the Exchange Act[5] and will file a rule change for effectiveness upon filing with the Commission. Lastly, the Exchange also seeks to formally eliminate CBOE Rule 15.11 (Mandatory Year 2000 Testing) and CBOE Rule 15.22 (Mandatory Decimal Pricing Testing), both of which have expired.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act[6] in general, and furthers the objectives of section 6(b)(5) of the Act[7] in particular, in that it should promote just and equitable principles of trade, serve to remove impediments to and perfect the mechanism of a free and open market and a national market system, and protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the Exchange consents, the Commission will:

(A) By order approve such proposed rule change; or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal offices of the Exchange. All submissions should refer to File No. SR–CBOE–2002–02 and should be submitted by April 10, 2002.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45562; File No. SR–MSRB–2001–08]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Order Granting Approval of Proposed Rule Change Relating to Official Communications, Pursuant to MSRB Rules G–15 and G–8

March 14, 2002.

On November 6, 2001, the Municipal Securities Rulemaking Board ("MSRB") filed with the Securities and Exchange Commission ("Commission") a proposed rule change (File No. SR–MSRB–2001–08) (the "proposed rule change") relating to official communications under Rules G–15 and G–8. The MSRB submited the proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Exchange Act") and Rule 19b–4 thereunder.[1]

The Commission published the proposed rule change for comment in the **Federal Register** on February 8, 2001.[2] The Commission received no comment letters regarding the forgoing proposal. This order approves the proposal.

I. Description of the Proposed Rule Change

The MSRB's proposed rule change amended Rule G–15 on confirmation, clearance and settlement of transactions with customers and Rule G–8 on books and records. The proposed rule change requires brokers, dealers and municipal securities dealers (collectively "dealers") that safekeep municipal securities to retransmit official documents about municipal securities issues to their safekeeping clients under certain conditions. The amendment to Rule G–15 provides that, upon request for retransmission, dealers who serve as safekeeping agents must undertake "reasonable efforts" to retransmit "official communications'[3] to their safekeeping clients. For their retransmission efforts, the amendment provides that dealers receive "adequate compensation'.[4] Without an offer of adequate compensation, dealers are not required to effect the retransmission.

The proposed amendment includes a "compensation threshold". For retransmission where the total compensation sought will be less than $500, the dealer should begin retransmitting immediately and ask for the calculated compensation concurrently. For retransmission where the total compensation sought will be greater than $500, the dealer may chose instead to promptly contact the party offering compensation, inform it of the amount of compensation required, obtain specific agreement on the amount of compensation and wait for receipt of such compensation prior to proceeding with the retransmission.

In addition, the amendment allows dealers in certain circumstances to send to the party requesting an official communication retransmission a list of beneficial owners who do not object to the disclosure of their name, contact information and security positions ("non-objecting beneficial owners") in lieu of retransmitting documents. The customer account information amendment to Rule G–8 ensures that dealers retain an official record of a customer's written authorization, if any, as to the customer's status as a non-objecting beneficial owner.

The MSRB realizes that some dealers today retransmit documents to their customers voluntarily, or under specific terms of their safekeeping agreements, and in many cases do so without compensation from the party requesting retransmission. It is not the intent of the proposed rule change to discourage retransmissions of official communications in these cases. Rather, the purpose of the proposed rule change is to ensure that parties needing to transmit official communications to beneficial owners may rely on dealers undertaking reasonable efforts, under the explicit terms of Rules G–15 and G–8, to retransmit such official communications and maintain appropriate records.

II. Discussion

The MSRB believes that the proposed rule filing, relating to official communications, will promote just and equitable principles of trade and fosters an open market for municipal securities. Additionally, the MSRB believes that the proposed rule change will not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act since it applies equally to all dealers in municipal securities.

The Commission must approve a proposed MSRB rule change if the Commission finds that the MSRB's proposal is consistent with the requirements of the Exchange Act and the rules and regulations thereunder that govern the MSRB.[5] The language of Section 15(b)(2)(C) of the Exchange Act requires that the MSRB's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principals of trade, to foster cooperation and coordination with persons engaged in regulating, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national system, and, in general, to protect investors and the public interest.[6]

After careful review, the Commission finds that the MSRB's proposed rule change relating to official communications meets this standard. The Commission believes that this proposed rule change is consistent with the requirements of the Exchange Act, and the rules and regulations thereunder. In particular, the Commission finds that the proposed rule is consistent with the requirements of Section 15B(b)(2)(C) of the Exchange Act, set forth above.

III. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Exchange Act that the proposed rule change (File No. SR–MSRB–2001–08) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

[1] 15 U.S.C. 78s(b)(1) and 17 CFR 240.19b–4 thereunder.

[2] *See* Release No. 34–45363 (January 30, 2002), 67 FR 6067.

[3] The proposed rule change defines an "official communication" as a document or collection of documents addressed to beneficial owners that was prepared or authorized by an issuer of municipal securities, a trustee for an issue of municipal securities, a state or federal tax authority or a custody agent for a stripped coupon municipal securities program in its capacity as custody agent. *See* Release No. 34–45363 (January 30, 2002), 67 FR 6067.

[4] Rule G–15 does not provide specific guidance to define adequate compensation; however, the proposed rule change references the rates of compensation for transmittal of documents detailed in NASD interpretation IM–2260, on Suggested Rates of Reimbursement, relating to forwarding of proxy and other materials. *See id.*; *see also NASD Manual* (CCH) ¶ 4233. As under NASD Rule 2260, compensation under Rule G–15 is intended to reimburse a dealer for its out of pocket expenses, including reasonable clerical expenses, associated with the particular retransmission. *See NASD Manual* (CCH) ¶ 4231.

[5] Additionally, in approving this rule, the Commission notes that it has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45547; File No. SR–NYSE–2002–12]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the New York Stock Exchange, Inc. to Eliminate References to Quoting in Fractions

March 12, 2002.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 5,

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

VOL
67
ISS
54

2002
UMI

2002, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NYSE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NYSE proposes to amend its rules to eliminate references to fractional pricing increments and to make such rules compatible with quoting in decimals. The text of the proposed rule change is available at the NYSE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its rules to change references to fractional pricing increments to decimal pricing of equities as described herein. This submission is in accordance with the Commission's order[3] requiring self-regulatory organizations to submit rule filings regarding decimal pricing pursuant to section 19(b)(2) of the Act.[4] The Commission previously reviewed the Exchange's filing proposing amendments to Exchange rules to accommodate phasing in the quoting of decimals commencing August 28, 2000.[5] The Exchange completed the conversion to quoting all listed stocks in decimals on January 29, 2001.

In SR–NYSE–2000–22,[6] the Exchange proposed a Minimum Price Variation ("MPV") of one cent (0.01) for equities. The Exchange proposes to continue the MPV for equities of one cent (0.01). The rule changes proposed herein, therefore, primarily delete references to quoting in fractions that were retained in Exchange rules to accommodate securities that continued quoting in fractions during the phase in of full decimalization.

Summary of Rule Amendments: Other rules proposed to be amended are summarized below.

Rule 15 (ITS and Pre-Opening Application). The changes to Rule 15 remove references to fractions in the sections dealing with Intermarket Trading System procedures for openings.

Rule 64 (Bonds, Rights and 100 Share-Unit Stocks). Floor Official approval must be obtained for a non-regular way trade that is 2/16 or .10 away from the regular way bid or offer. For trades during the last calendar week of the year, the approval level is ¼ or .25. The fractional references will be removed.

Rule 72(b) (Clean Agency Cross). Decimals will replace fractions used in the two examples.

Rule 79A.30 (Miscellaneous Requirements on Stock and Bond Market Procedures). Examples in fractions will be deleted.

Rule 105 (Guidelines For Specialists' Specialty Stock Option Transactions Pursuant to Rule 105). References to fractions in the example will be deleted.

Rule 123A.30 (Percentage Orders). Percentage orders may be converted on a destabilizing tick if the order meets certain requirements of size (10,000 shares or more or $500,000 in market value) and the execution price of the converted percentage order is no more than ¼ or .25 point away from the last sale. Percentage orders may also be converted on a destabilizing tick to narrow a quotation spread as long as the bid is no more than ⅛ or .10 higher than the last sale. The ⅛ and ¼ parameters will be removed.

Rule 123A.40 (Stop Orders). Floor Official approval must be obtained when a specialist's transaction for his or her own account elects stop orders and the transaction is more than 2/16 or .10 away from the previous transaction. The 2/16 parameter will be removed.

Rule 192 (Part-Paid Securities). Examples in fractions will be deleted.

Rule 440B.15 (Short Sale Rule Interpretations). The examples in the last paragraph that delineate the prices at which short sales may be made are amended to show a one cent MPV for stocks.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of section 6(b)(5) of the Act,[7] which requires an exchange to have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the Exchange consents, the Commission will:

(A) By order approve such proposed rule change; or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal offices of the Exchange. All submissions should refer to File No. SR–NYSE–2002–12 and should be submitted by April 10, 2002.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

SOCIAL SECURITY ADMINISTRATION

The Ticket To Work and Work Incentives Advisory Panel Teleconferences

AGENCY: Social Security Administration (SSA).

ACTION: Notice of Teleconferences.

DATES: Wednesday April 3, 2002 and Tuesday April 9, 2002.

TELECONFERENCES: Wednesday April 3, 2002, 1:30 PM to 3:30 PM and Tuesday April 9, 2002, 1:30 PM to 3:30 PM.

Ticket To Work and Work Incentives Advisory Panel Conference Calls

Call-in number: 888–603–9224.
Pass code: 11212.
Leader/Host: Sarah Wiggins Mitchell.

SUPPLEMENTARY INFORMATION:

Type of meeting: These teleconference meetings are open to the public. The interested public is invited to participate by calling into the teleconference at the number listed above. Public testimony will not be taken.

Purpose: In accordance with section 10(a)(2) of the Federal Advisory Committee Act, the Social Security Administration (SSA) announces this teleconference meeting of the Ticket to Work and Work Incentives Advisory Panel (the Panel). Section 101(f) of Public Law 106–170 establishes the Panel to advise the Commissioner of SSA, the President, and the Congress on issues related to work incentives programs, planning and assistance for individuals with disabilities as provided under section 101(f)(2)(A) of the TWWIIA. The Panel is also to advise the Commissioner on matters specified in section 101(f)(2)(B) of that Act, including certain issues related to the Ticket to Work and Self-Sufficiency Program established under section 101(a) of that Act.

Agenda: The Panel will deliberate on the implementation of TWWIIA and conduct administrative business. Topics of discussion on April 3, 2002 will include a briefing and discussion on issues related to forthcoming regulatory packages on certain provisions of TWWIIA, including Protection & Advocacy, Expedited Reinstatement, Continuing Disability Review Protection and referrals to Vocational Rehabilitation. Topics of discussion on April 9, 2002 and will include deliberations on the Panel's Annual Report and Progress Report on the Ticket to Work Program. The agenda for these meetings will posted on the Internet at *http://www.ssa.gov/work/panel/* one week prior to each teleconference or can be received in advance electronically or by fax upon request.

Contact Information: Records are being kept of all Panel proceedings and will be available for public inspection by appointment at the Panel office. Anyone requiring information regarding the Panel should contact the TWWIIA Panel staff by:

- mail addressed to Ticket to Work and Work Incentives Advisory Panel Staff, Social Security Administration, 400 Virginia Avenue, SW, Suite 700, Washington, DC, 20024;
- telephone contact with Kristen Breland at (202) 358–6430;
- fax at (202) 358–6440;
- or e-mail to *TWWIIAPanel@ssa.gov*

Dated: March 14, 2002.

Deborah M. Morrison,

Designated Federal Officer.

Petitions for Exemption

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption part 11 of Title 14, Code of Federal Regulations (14 CFR), this notice contains a summary of dispositions of petitions previously received. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

FOR FURTHER INFORMATION CONTACT: Denise Emrick (202) 267–5174, Office of Rulemaking (ARM–1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85 and 11.91.

Issued in Washington, DC, on March 14, 2002.

Donald P. Byrne,

Assistant Chief Counsel for Regulation.

Disposition of Petitions

Docket No.: FAA–2002–11494.
Petitioner: Segrave Aviation, Inc.
Section of 14 CFR Affected: 14 CFR § 135.143(c)(2).
Description of Relief Sought/Disposition: To permit Segrave to operate certain aircraft under part 135

Petitioner: Central Copters. Inc.
Section of 14 CFR Affected: 14 CFR § 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit Central Copters to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed on the aircraft.
Grant, 02/14/2002, Exemption No. 7724.

Docket No.: FAA–2002–11497
Petitioner: Eagle Aviation Academy.
Section of 14 CFR Affected: 14 CFR § 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit Eagle Aviation Academy to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed on the aircraft. *Grant, 02/14/2002, Exemption No. 7725.*

Docket No.: FAA–2002–11553.
Petitioner: Air One Express, Inc.
Section of 14 CFR Affected: 14 CFR § 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit Air One to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed on the aircraft.
Grant, 02/14/2002, Exemption No. 7726.

Docket No.: FAA–2002–11560.
Petitioner: Global Air Charter, Inc.
Section of 14 CFR Affected: 14 CFR § 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit Global Air Charter to operate certain aircraft under part 135 without a TSO–C–112 (Mode S) transponder installed on the aircraft.
Grant, 02/14/2002, Exemption No. 7722.

Docket No.: FAA–2002–11499.
Petitioner: Mr. Randy L. Bailey.
Section of 14 CFR Affected: 14 CFR § 91.109 (a) and (b)(3).
Description of Relief Sought/ Disposition: To permit Mr. Bailey to conduct certain flight instruction and simulated instrument flights to meet the recent experience requirements in Beechcraft Bonanza, Baron, and Travel Air airplanes equipped with a functioning throwover control wheel in place of functioning dual controls.
Grant, 02/25/2002, Exemption No. 7734.

Docket No.: FAA–2002–11591.
Petitioner: Aircraft Owners and Pilots Association.
Section of 14 CFR Affected: 14 CFR §§ 135.251, 135.255, and 135.353, and appendixes I and J to part 121.
Description of Relief Sought/ Disposition: To permit Aircraft Owners and Pilots Association member pilots to conduct local sightseeing flights at charity or community events, for compensation or hire, without complying with certain anti-drug and alcohol misuse prevention program requirements of part 135. *Grant, 02/28/2002, Exemption No. 7112B (Previously Docket No. 29648).*

Docket No.: FAA–2001–11090.
Petitioner: Army Aviation Heritage Foundation.
Section of 14 CFR Affected: 14 CFR §§ 91.319, 119.5(g), and 119.25(b).
Description of Relief Sought/ Disposition: To permit the Army Aviation Heritage Foundation to operate its former military UH–1H helicopter that holds an experimental airworthiness certificate for the purpose of carrying passengers on local educational flights. *Grant, 03/04/2002, Exemption No. 7736.*

Docket No.: FAA–2002–11355.
Petitioner: Embry Riddle Aeronautical University.
Section of 14 CFR Affected: 14 CFR § 61.71(a).
Description of Relief Sought/ Disposition: To permit the commercial pilot certification practical tests that two Embry Riddle students successfully completed to be valid although the completion dates of the exams exceeded the required 60-day period from their graduation date due to the flight restrictions put in place after the events that took place on September 11, 2001.
Grant, 02/27/2002, Exemption No. 7733.

Docket No.: FAA–2002–11608.
Petitioner: Palmyra Flying Club, Inc.
Section of 14 CFR Affected: 14 CFR §§ 135.251, 135.251, 135.255, and 135.353, and appendixes I and J to part 121.
Description of Relief Sought/ Disposition: To permit Palmyra to conduct local sightseeing flights at Palmyra Airport for the fly-in breakfast on June 16, 2002, for compensation or hire, without complying with certain anti-drug and alcohol misuse prevention requirements of part 135. *Grant, 02/28/2002, Exemption No. 7730.*

Docket No.: FAA–2002–11504.
Petitioner: DeKalb Peachtree Airport.

Docket No.: FAA–2002–11557.
Petitioner: Bemidji Aviation Services, Inc.
Section of 14 CFR Affected: 14 CFR 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit Bemidji to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed on those aircraft.
Grant, 02/25/2002, Exemption No. 6110C (Previously Docket No. 28173)

Docket No.: FAA–2002–11554.
Petitioner: Adeletom Aviation. LLC.
Section of 14 CFR Affected: 14 CFR 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit Adeletom to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed on those aircraft.
Grant, 02/25/2002, Exemption No. 7201A (Previously Docket No. 29911).

Docket No.: FAA–2002–11508.
Petitioner: Premier Jets, Inc.
Section of 14 CFR Affected: 14 CFR 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit Premier Jets to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed on those aircraft.
Grant, 02/14/2002, Exemption No. 7160A (Previously Docket No. 29195).

Docket No.: FAA–2002–11655.
Petitioner: IHC Health Services, Inc. dba IHC Life Flight.
Section of 14 CFR Affected: 14 CFR 133.45(e)(1).
Description of Relief Sought/ Disposition: To permit IHC to conduct Class D rotorcraft-load combination rescue operations with an Agusta A 109K–2 helicopter certificated in the normal category under 14 CFR part 27.
Grant, 02/25/2002, Exemption No. 7118A (Previously Docket No. 29732).

Docket No.: FAA–2002–11485.
Petitioner: Southwest Airlines Company.
Section of 14 CFR Affected: 14 CFR 121.434(c)(1)(ii).
Description of Relief Sought/ Disposition: To permit Southwest to substitute a qualified and authorized check airman in place of an FAA inspector to observe a qualifying pilot in command (PIC) while that PIC is performing prescribed duties during at least one flight leg that includes a takeoff and landing when completing initial or upgrade training as specified in § 121.424.
Grant, 02/25/2002, Exemption No. 7132A (Previously Docket No. 29836).

Docket No.: FAA–2002–11352.
Petitioner: Continental Micronesia Airlines, Inc.
Section of 14 CFR Affected: 14 CFR 121.291(b)(1) and 121.291(d).
Description of Relief Sought/ Disposition: To permit Continental Micronesia Airlines to operate Boeing 737–800 airplanes without conducting a partial demonstration of emergency evacuation procedures upon the initial introduction of a type and model of airplane into passenger/carrying operations, and without showing by simulated ditching that it has the ability to efficiently carry out its ditching procedures.
Denial, 02/22/2002, Exemption No. 7718.

Docket No.: FAA–2002–11556.
Petitioner: Grant Aviation, Inc.
Section of 14 CFR Affected: 14 CFR 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit Grant to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed on those aircraft.
Grant, 02/19/2002, Exemption No. 7221A (Previously Docket No. 3008)

Docket No.: FAA–2002–11491.
Petitioner: Grant Aircraft Company.
Section of 14 CFR Affected: 14 CFR 91.9(a) and 91.531(a) (1) and (2).
Description of Relief Sought/ Disposition: To permit Cessna to allow certain qualified pilots of Cessna Citation Model 550, S550, 552, or 560 aircraft to operate those aircraft without a pilot who is designated as second in command.
Grant, 02/25/2002, Exemption No. 4050L (Previously Docket No. 23771)

Docket No.: FAA–2001–10555.
Petitioner: DHL Airways, Inc.
Section of 14 CFR Affected: 14 CFR 121.433(c)(1)(iii) and 121.441 (a)(1) and (b)(1), and, appendix F to part 121.
Description of Relief Sought/ Disposition: To permit DHL to combine recurrent flight and ground training and proficiency checks to DHL's flight crewmembers into a single annual training and proficiency evaluation program.
Grant, 02/20/2002, Exemption No. 6727B (Previously Docket No. 28808)

Docket No.: FAA–2002–11458.
Petitioner: Northern Air Fuel, Inc.
Section of 14 CFR Affected: 14 CFR 91.9(a).
Description of Relief Sought/ Disposition: To permit Northern Air Fuel to operate its DC–6A and DC–6B aircraft at a 5 percent increased zero fuel and landing weight for the purpose of operating all-cargo aircraft to provide supplies to people in isolated villages in Alaska.
Grant, 02/25/2002, Exemption No. 7709A

Docket No.: FAA–2002–11563.
Petitioner: Better Living Aviation.
Section of 14 CFR Affected: 14 CFR 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit Better Living Aviation to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed on those aircraft.
Grant, 02/19/2002, Exemption No. 7206A (Previously Docket No. 29956)

Federal Aviation Administration

Government/Industry Aeronautical Charting Forum Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.
ACTION: Notice of public meeting.

SUMMARY: This notice announces a public meeting of the Federal Aviation Administration's Government/Industry Aeronautical Charting Forum to discuss informational content and design of aeronautical charts.

DATES: The meeting will be held from April 29, 2002 to May 2, 2002 from 9 a.m. to 4:30 p.m.

ADDRESSES: The meeting will be held at the National Aeronautical Charting Office, Silver Spring Metro Center, Building 4, 1305 East-West Highway, Silver Spring, Maryland 20910.

FOR FURTHER INFORMATION CONTACT: Richard V. Powell, FAA, Air Traffic Airspace Management, ATA–100, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–8790, fax: (202) 493–4266.

SUPPLEMENTARY INFORMATION: Pursuant to § 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II). notice is hereby given of a meeting of the Government/Industry

Aeronautical Charting Forum to be held from April 29, 2002 to May 2, 2002, from 9 a.m. to 4:30 p.m. at the National Aeronautical Charting Office, Silver Spring Metro Center, Building 4, 1305 East-West Highway, Silver Spring, Maryland 20910. The agenda will include:

1. Opening Remarks.
2. Committee Administration.
3. Old Business—Review minutes of last forum 01–02.
4. Aeronautical Charting Forum working groups reports, project reports.
5. Status of outstanding charting topics.
6. New charting topics.
7. Presentations.
8. Closing remarks.
9. Discussion of future meeting dates, locations, activities and plans.
10. Adjourn

Attendance is open to the interested public, but will be limited to the space available.

The public must make arrangements by April 3, 2002, to present oral statements at the meeting. The public may present written statements to the committee at any time by providing a copy to the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Public statements will only be considered if time permits.

Issued in Washington, DC, on March 14, 2002.

Richard V. Powell,

Chair, Government/Industry, Aeronautical Charting Forum.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Application 02–09–U–00–CLE To Use the Revenue From a Passenger Facility Charge (PFC) at Cleveland Hopkins International Airport (CLE) and Burke Lakefront Airport (BKL), Cleveland, OH

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to use the revenue from a PFC at Cleveland Hopkins International Airport and Burke Lakefront Airport under the provisions of the 49 U.S.C. 40117 and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before April 19, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Federal Aviation Administration, Detroit Airports District Office, Willow Run Airport, East, 8820 Beck Road, Belleville, Michigan 48111.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Michael Konicek, Cleveland Hopkins International Airport at the following address: Cleveland Hopkins International Airport, 5300 Riverside Drive, Cleveland, Ohio 44135.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Cleveland Hopkins International Airport under section 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Ms. Arlene B. Draper, Program Manager, Federal Aviation Administration, Detroit Airports District Office, Willow Run Airport, East, 8820 Beck Road, Belleville, Michigan 48111 (734–487–7283). The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to use the revenue from a PFC at Cleveland Hopkins International Airport and Burke Lakefront Airport under the provisions of the 49 U.S.C. 40117 and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On February 5, 2002, the FAA determined that the application to use the revenue from a PFC submitted by Cleveland Hopkins International Airport was substantially complete within the requirements of section 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, not later than May 31, 2002.

The following is a brief overview of the application.

Actual charge effective date: June 1, 1999.

Estimated charge expiration date: November 1, 2002.

Level of the proposed PFC: $4.50.

Total estimated PFC revenue: $3,410,400.

Brief description of proposed projects: Analex Office Building Demolition (CLE); Installation of Instrument Landing System (ILS) on Runway 6L/24R (BKL).

Class or classes of air carriers which the public agency has requested to be required to collect PFCs: air taxi.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT.**

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Cleveland Hopkins International Airport, 5300 Riverside Drive, Cleveland, Ohio 44135.

Issued in Des Plaines, Illinois on March 12, 2002.

Mark A. McClardy,

Manager, Planning and Programming Branch, Airports Division, Great Lakes Region.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Application To Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Lubbock International Airport, Lubbock, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Intent to Rule on Application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Lubbock International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

DATES: Comments must be received on or before April 19, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate copies to the FAA at the following address: Mr. G. Thomas Wade, Federal Aviation Administration, Southwest Region, Airports Division, Planning and Programming Branch, ASW–611, Fort Worth, Texas 76193–0610.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Mark N. Earle Manager of Lubbock International Airport at the following address: Director of Aviation, Route 3, Box 389, Lubbock, Texas 79403.

Air carriers and foreign air carriers may submit copies of the written comments previously provided to the Airport under Section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Mr. G. Thomas Wade, Federal Aviation Administration, Southwest Region, Airports Division, Planning and Programming Branch, ASW–611, Fort Worth, Texas 76193–0610, (817) 222–5613.

The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Lubbock International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On March 11, 2002, the FAA determined that the application to impose and use the revenue from a PFC submitted by the Airport was substantially complete within the requirements of Section 158.25 of Part 158. The FAA will approve or disapprove the application, in whole or in part, no later than June 19, 2002.

The following in a brief overview of the application.

Level of the proposed PFC: $3.00.

Proposed charge effective date: September 1, 2002.

Proposed charge expiration date: November 1, 2004.

Total estimated PFC revenue: $3,220,308.

PFC application number: 02–04–C–00–LBB.

Brief Description of Proposed Project(s)

Projects To Impose and Use PFC's

1. Construct ARFF Training Facility
2. Upgrade Airside Guidance Signs
3. Acquire 150-Gallon ARFF Vehicle
4. Update Airport Master Plan
5. Improve General Aviation Apron
6. Install Blast Wall

Project To Impose PFC's

1. Acquire Development Land

Projects To Use PFC's

1. Improve Westport Apron
2. Construct Taxiway B–1
3. Acquire ADA Aircraft Access Equipment

Proposed Class or Classes of Air Carriers To Be Exempted From Collecting PFC's

1. FAR Part 135 on demand air Taxi/Commercial Operator (ATCO) reporting on FAA Form 1800–31.
2. Air Carriers Filing RSPA form 298C, Schedule E1 or Schedule T1.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT** and at the FAA regional Airports office located at: Federal Aviation Administration, Southwest Region, Airports Division, Planning and Programing Branch, ASW–610, 2601 Meacham Blvd., Fort Worth, Texas 76137–4298.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at Lubbock International Airport.

Issued in Fort Worth, Texas on March 11, 2002.

William J. Flanagan,

Acting Manager, Airports Division.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Application To Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Louis Armstrong New Orleans International Airport, New Orleans, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Louis Armstrong New Orleans International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

DATES: Comments must be received on or before April 19, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate copies to the FAA at the following address: Mr. G. Thomas Wade, Federal Aviation Administration, Southwest Region, Airports Division, Planning and Programming Branch, ASW–611, Fort Worth, Texas 76193–0610.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Roy A. Williams Manager of Louis Armstrong New Orleans International Airport at the following address: Director of Aviation, P.O. Box 20007, New Orleans, LA 70141.

Air carriers and foreign air carriers may submit copies of the written comments previously provided to the Airport under Section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Mr. G. Thomas Wade, Federal Aviation Administration, Southwest Region, Airports Division, Planning and Programming Branch, ASW–611, Fort Worth, Texas 76193–0610. (817) 222–5613.

The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Louis Armstrong New Orleans International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR part 158).

On March 13, 2002, the FAA determined that the application to impose and use the revenue from a PFC submitted by the Airport was substantially complete within the requirements of Section 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than June 17, 2002.

The following is a brief overview of the application.

Level of the proposed PFC: $4.50.

Proposed charge effective date: April 1, 2005.

Proposed charge expiration date: January 1, 2011.

Total estimated PFC revenue: $148,375,724.

PFC application number: 02–06–C–00–MSY.

Brief Description of Proposed Project(s)

Project to Impose and Use PFC's

1. Acquire Aircraft Loading Bridges
2. Upgrade Airfield Electrical System
3. Airfield Safety Improvements
4. Improve Apron Drainage
5. Conduct Benefit Cost Analysis
6. Reconstruct Concourse C
7. Conduct EIS for New Air Carrier Runway
8. Expand Terminal D
9. Upgrade Access Control and Security System
10. Replace ARFF Facility
11. Rehabilitate Runway 1/19 and Taxiway S
12. Rehabilitate Runway 10/18
13. Relocate Rotating Beacon
14. Acquire Land For Development—Lafon
15. Rehabilitate Terminal Apron
16. Rehabilitate Terminal HVAC
17. Acquire Land For Development—West Cargo Area

Proposed class or classes of air carriers to be exempted from collecting PFC's:

1. FAR Part 135 on demand air Taxi/Commercial Operator (ATCO) reporting on FAA Form 1800–31.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Waukesha County, WI

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Supplemental notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for transportation improvements in the State Trunk Highway (STH) 83 corridor between County Trunk Highway (CTH) "NN" at the north limits of the Village of Mukwonago and STH 16, Waukesha County, Wisconsin. The north terminus was extended since the notice of intent was published in the **Federal Register** on March 26, 2001 (66 FR 16520).

FOR FURTHER INFORMATION CONTACT: Mr. Richard C. Madrzak, Field Operations Engineer, Federal Highway Administration, 567 D'Onofrio Drive, Madison, Wisconsin 53719–2814; telephone: (608) 829–7510. You may also contact Ms. Carol Cutshall, Director, Bureau of Environment, Wisconsin Department of Transportation, P.O. Box 7965, Madison, Wisconsin 53707–7965; telephone: (608) 266–9626.

SUPPLEMENTARY INFORMATION:

Electronic Access

An electronic copy of this document may be downloaded by using a computer, modem and suitable communications software from the Government Printing Offices' Electronic Bulletin Board Service at (202) 512–1661. Internet users may reach the Office of Federal Register's home page at: *http://www.nara.gov/fedreg* and the Government Printing Offices' database at: *http://www.access.gpo.gov/nara.*

Background

The FHWA, in cooperation with the Wisconsin Department of Transportation, will prepare a Draft Environmental Impact Statement (EIS) on a proposal to provide safety, operational and capacity improvements on an approximate 27 kilometer (17 mile) section of STH 83 between CTH "NN" at the north limits of the Village of Mukwonago and STH 16, Waukesha County.

This notice is supplementary to the notice of intent, which was published in the **Federal Register** on March 26, 2001 at 66 FR 16520. The purpose of the supplemental notice of intent is to extend the project limits about 6 kilometers (4 miles) at the north terminus. The previous north terminus was Interstate Highway 94. The revised north terminus is STH 16.

To ensure that the full range of issues related to this proposed action are addressed, and all substantive issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to FHWA or the Wisconsin Department of Transportation at the addresses provided in the caption **FOR FURTHER INFORMATION CONTACT.**

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program).

Authority: 23 U.S.C. 315; 49 CFR 1.48.

Issued on: March 12, 2002.

Philip E. Barnes,

Acting Division Administrator, Federal Highway Administration, Madison, Wisconsin.

[FR Doc. 02–6631 Filed 3–19–02; 8:45 am]

BILLING CODE 4910–22–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration.

Environmental Impact Statement: Weber County, UT

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice of intent to advise the public that an environmental impact statement will be prepared for a proposed highway project in Weber County, Utah.

FOR FURTHER INFORMATION CONTACT: Ms. Sandra Garcia, Federal Highway Administration, 2520 W. 4700 S. Suite 9A, Salt Lake City, Utah 84118–1847, Telephone: (801) 963–0182; E-mail: *sandra.garcia@fhwa.dot.gov.*

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Utah Department of Transportation (UDOT), will prepare an environmental impact statement (EIS) on a proposal to improve Riverdale Road, Utah State Route 26 (SR–26) from I–15 to Washington Boulevard, in Ogden, Utah. The proposed improvement will involve the reconstruction of the existing SR–26 through the cities of Roy, Riverdale, South Ogden and Ogden for a distance of about 5.3 kilometers (3.3 miles).

Improvements to the corridor are considered necessary to provide for the existing and projected traffic demands. Also, included in this proposal is the replacement of the existing Riverdale Road Interchange bridges over I–84 and I–15. Alternatives under consideration include (1) taking no action, (2) using alternate travel modes, (3) traffic signal and lane striping modifications, and (4) widening the existing 4 lane roadway to 6 lanes.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed or are known to have interest in this proposal. A series of public meetings will be held in the proximity of the project starting April 2002. In addition, a public hearing will be held. Public notice will be given of the time and place of the meeting and hearing. The draft EIS will be available for public and agency review and comment prior to the public hearing.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: March 14, 2002.

William R. Gedris,

Structural/Environmental Engineer, Salt Lake City, Utah.

[FR Doc. 02–6685 Filed 3–15–02; 8:45 am]

BILLING CODE 4910–22–M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Programmatic Environmental Impact Statement for Passenger Rail Improvements to the Los Angeles to San Diego Rail Corridor

AGENCY: Federal Railroad Administration, (FRA), Department of Transportation (DOT).

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: FRA is issuing this notice to advise the public that FRA will join the California Department of Transportation (Department) in the preparation of a program level environmental impact statement (EIS) and program environmental impact report (EIR) for passenger rail improvements to the Los Angeles to San Diego (LOSSAN) rail corridor. FRA is also issuing this notice to solicit public and agency input into the development of the scope of the EIR/EIS and to advise the public that outreach activities conducted by the Department and its representatives will be considered in the preparation of the EIR/EIS. Alternatives to be evaluated and analyzed in the Program EIR/EIS include (1) take no action (No-Project or No-Build); (2) construction of passenger rail improvements in the LOSSAN rail corridor; and (3) modal alternatives that would include a combination of air and highway improvements. Possible environmental impacts include displacement of commercial and residential properties; disproportionate impacts to minority and low-income populations; community and neighborhood disruption; increased noise along the rail corridor or at airports and along highways; traffic impacts associated with stations or airports; effects to historic properties or archaeological sites; impacts to parks and recreation resources; visual quality effects; exposure to seismic and flood hazards; impacts to water resources, wetlands, and sensitive biological species and habitat; land use compatibility impacts; energy use; and impacts to agricultural lands.

FOR FURTHER INFORMATION CONTACT: For further information regarding the programmatic environmental review, please contact: Mr. Patrick Merrill, Manager, California Department of Transportation, Division of Rail, MS 74, PO Box 942874, Sacramento, CA 94274–0001, (telephone 916–654–7543) or Mr. David Valenstein, Environmental Program Manager, Office of Passenger Programs, Federal Railroad Administration, 1120 Vermont Avenue (Mail Stop 20), Washington, DC 20590, (telephone 202–493–6368).

SUPPLEMENTARY INFORMATION: The Department has determined that improvements to the existing LOSSAN rail corridor may be necessary to meet the expected growth in population and resulting increases in intercity travel demand between Los Angeles and San Diego. As a result of this growth in travel demand, there will be increases in travel delays from the growing congestion on California's highways and at airports. In terms of passenger volumes, the LOSSAN corridor is the second-busiest intercity rail corridor in the nation, after the Northeast Corridor connecting Washington DC, New York and Boston. Amtrak uses the LOSSAN rail corridor for the Pacific Surfliner Service between Los Angeles and San Diego that is supported by the Department. The Southern California Regional Rail Authority also uses the LOSSAN rail Corridor for their Metrolink commuter rail service between Los Angeles and Oceanside and the North County Transit District uses it for their Coaster commuter rail service between Oceanside and San Diego. Finally, the Burlington Northern Santa Fe also uses the LOSSAN rail corridor for freight service.

The California High Speed Rail Authority (Authority) has designated the LOSSAN rail corridor as a potential component of the proposed statewide high speed rail system that the Authority is studying. FRA and the Authority are preparing a separate program EIR/EIS for the proposed statewide train system. The Authority will be considering shared use of the LOSSAN rail corridor and tracks in the program EIR/EIS for the statewide system. The Department has decided to coordinate the public review of proposed improvements to the LOSSAN rail corridor with the Authority's environmental review of the statewide system. The Authority and the Department will share the results of technical studies related to the LOSSAN rail corridor.

Alternatives

An initial system alternatives evaluation will consider all reasonable system alternatives at a broad level of analysis. This analysis will be followed by a more detailed consideration of the most practical and feasible alternatives in the Program EIR/EIS. The alternatives will include:

No-Build Alternative

The take no action (No-Project or No-Build) alternative is defined to serve as the baseline for comparison of all alternatives. The No-Build Alternative represents the state's transportation system (highway, air, and rail) as it exists, and as it would exist after completion of programs or projects currently being implemented. The No-Build Alternative would draw upon the following sources of information:

- State Transportation Improvement Program (STIP)
- Regional Transportation Plans (RTPs) for all modes of travel
- Airport plans
- Passenger rail plans

Passenger Rail Alternative

The LOSSAN Rail Corridor improvements are incremental rail upgrades to the LOSSAN corridor. The upgrade of the LOSSAN rail corridor was previously studied in the Amtrak 20-Year Passenger Transportation Plan issued in March of 2001, which identified major improvements that could be undertaken between San Juan Capistrano and the Santa Fe Depot in downtown San Diego. The improvements to be discussed in the program EIR/EIS include:

- Completion or substantial completion of a second main track in the LOSSAN corridor;
- The consideration of alternative profiles (e.g. trenches, tunnels, viaducts) and/or deviations from the existing LOSSAN corridor in:
- San Juan Capistrano
- San Clemente
- Encinitas
- Del Mar
- Miramar Hill;
- Curve realignment at the Fullerton Junction, the Orange Junction and Dana Point;
- The increase to four main tracks in the corridor between Commerce and Fullerton; and
- Possible alternative profiles (e.g. trenches, tunnels, viaducts), deviations from the existing LOSSAN corridor and/or additional grade-separations as potential mitigation treatments in Orange-Santa Ana, Oceanside and Carlsbad.

FRA and the Department will consider all stations for the existing State-supported Amtrak Surfliner service in the development of LOSSAN rail corridor improvements. These are:

VOL 67 ISS 54 MR 20 2002 UMI

LA Union Station, Fullerton, Anaheim, Santa Ana Transportation Center, Irvine Transportation Center, San Juan Capistrano, Oceanside Transportation Center, Solana Beach, and San Diego Santa Fe Depot. Additional stations and improvements to existing stations will be determined based on ridership potential, system-wide needs, and local planning constraints/conditions. Station needs will be coordinated with local and regional planning agencies, and seamless connectivity with other modes of travel will be emphasized. Potential new station locations will be evaluated in the Program EIR/EIS including: San Diego Airport, and University Town Center (La Jolla).

Other Modal Alternatives

There are currently three main options for intercity travel between the major urban areas of San Diego and Los Angeles: vehicles on the highway system, commercial air service, and conventional passenger trains (Amtrak). The FRA and the Department will evaluate a set of Modal/System Alternatives consisting of expansion of highways and airports at a similar level of investment serving the markets identified for the Passenger Rail Alternative, with no substantial change to intercity and commuter rail systems. The modal alternatives will be defined by assigning the expected incremental travel demand forecasted for the 20-year horizon to the state's transportation infrastructure, then identifying alternatives for accommodating that travel demand without passenger rail improvements.

Scoping and Comments

FRA encourages broad participation in the EIR/EIS process during scoping and subsequent review of the resulting environmental documents. Comments and suggestions are invited from all interested agencies and the public at large to insure the full range of issues related to the proposed action and all reasonable alternatives are addressed and all significant issues are identified. In particular, FRA is interested in determining whether there are areas of environmental concern where there might be the potential for significant impacts identifiable at a program level. Public agencies with jurisdiction are requested to advise the FRA and the Department of the applicable permit and environmental review requirements of each agency, and the scope and content of the environmental information that is germane to the agency's statutory responsibilities in connection with the proposed improvements.

Scoping meetings will be advertised locally and are planned for the following major cities along the LOSSAN rail corridor at the dates and times indicated:

- *Los Angeles:* April 2, 1:30 to 3:30 pm, MTA Bldg, Union Station Room, One Gateway Plaza
- *San Clemente:* April 2, 6:00 to 8:00 pm, San Clemente Inn, 2600 Avenida de Presidente
- *Anaheim:* April 3, 10:00 am to 12:00 pm, City Hall West, Gordon Hoyt Conference Center, 201 S. Anaheim Blvd.
- *Carlsbad:* April 3, 6:00 to 8:00 pm, Carlsbad Senior Center, 799 Pine Street

Persons interested in providing comments on the scope of the program EIR/EIS should do so by April 17, 2002. Comments can be sent in writing to Mr. David Valenstein at the FRA address identified above. Comments may also be addressed to Mr. Patrick Merrill of the Department at their address identified above. Information regarding the environmental review process will also be made available through the Department's rail services Internet site: *http://www.amtrakcalifornia.com/*. Information and documents regarding technical studies will be made available though the Authority's Internet site: *http://www.cahighspeedrail.ca.gov/*.

Issued in Washington DC, on March 14, 2002.

Mark E. Yachmetz,

Associate Administrator for Railroad Development.

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration Office of Hazardous Materials Safety; Notice of Delays in Processing of Exemption Applications

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of applications delayed more than 180 days.

SUMMARY: In accordance with the requirements of 49 U.S.C. 5117(c), RSPA is publishing the following list of exemption applications that have been in process for 180 days or more. The reason(s) for delay and the expected completion date for action on each application is provided in association with each identified application.

FOR FURTHER INFORMATION CONTACT: J. Suzanne Hedgepath, Director, Office of Hazardous Materials, Exemptions and Approvals, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW, Washington, DC 20590–0001, (202) 366–4535.

Key to "Reasons for Delay"

1. Awaiting additional information from applicant.
2. Extensive public comment under review.
3. Application is technically complex and is of significant impact or precedent-setting and requires extensive analysis.
4. Staff review delayed by other priority issues or volume of exemption applications.

Meaning of Application Number Suffixes

N—New application.

M—Modification request.

PM—Party to application with modification request.

Issued in Washington, DC, on March 13, 2002.

J. Suzanne Hedgepeth,

Director, Office of Hazardous Materials, Exemptions and Approvals.

BILLING CODE 4910–60–M

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Finance Docket No. 34175]

Canadian National Railway Company and Wisconsin Central Ltd.—Trackage Rights Exemption—Wisconsin & Southern Railroad Company

Wisconsin & Southern Railroad Company (WSOR), pursuant to a written trackage rights amendment agreement entered into between WSOR and Canadian National Railway Company (CN) (for CN and on behalf of Wisconsin Central Transportation Corporation (WCTC) and WCTC's wholly owned subsidiary Wisconsin Central Ltd. (WCL)),[1] has agreed to grant

[1] CN has been authorized to control WCTC and WCTC's subsidiaries, which include WCL and Fox Valley & Western Ltd. (FVW). *See Canadian*

Continued

VOL
67

UMI

nonexclusive overhead trackage rights to WCL over WSOR's main line between milepost 115.9 at Slinger, WI, and milepost 93.2 [2] at North Milwaukee, WI, including trackage rights connecting with FVW's main line at DBR Junction milepost 103.1, and connecting with WCL's Plymouth Sub at North Milwaukee (joint trackage), a distance of approximately 22.7 miles.[3]

The transaction was scheduled to be consummated on or soon after March 7, 2002, the effective date of the exemption (7 days after the notice was filed).

The proposed amendment to the trackage rights would grant CN and WCL the right to use the joint trackage for the operation of its freight trains, locomotives, cabooses and rail cars (including business cars) and roadway equipment in its account over the subject line with WSOR and other carriers that may be permitted to use all or any part of the subject line for, among other things, the purpose of interchanging cars between WCL and Canadian Pacific and Union Pacific Railroad Company, and between WCL and FVW, as well as connecting various WCL and FVW lines and trackage rights.

As a condition to this exemption, any employees affected by the trackage rights will be protected by the conditions imposed in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 34175, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423–0001. In addition, a copy of each pleading must be served on Michael J. Barron, Jr., 455 North Cityfront Plaza Drive, Chicago, IL 60211–5317.

Board decisions and notices are available on our website at *WWW.STB.DOT.GOV.*"

Decided: March 13, 2002.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

National Railway Company, Grand Truck Corporation, and WC Merger Sub, Inc.—Control—Wisconsin Central Transportation Corporation, Wisconsin Central Ltd., Fox Valley & Western Ltd., Sault Ste. Marie Bridge Company, and Wisconsin Chicago Link Ltd., STB Finance Docket No. 34000 (STB served Sept. 7, 2001).

[2] This is the point where WSOR ownership ends and Canadian Pacific Railway Company (Canadian Pacific) ownership begins.

[3] The trackage rights amend and expand rights already in place between milepost 112.6 at Rugby Junction and milepost 93.4 at North Milwaukee. *See Wisconsin Central Ltd.—Trackage Rights Exemption—Wisconsin & Southern Railroad Company*, STB Finance Docket No. 33600 (STB served June 2, 1998).

DEPARTMENT OF THE TREASURY

Customs Service

List of Foreign Entities Violating Textile Transshipment and Country of Origin Rules

AGENCY: Customs Service, Department of the Treasury.

ACTION: General notice.

SUMMARY: This document notifies the public of foreign entities which have been issued a penalty claim under section 592 of the Tariff Act of 1930, for certain violations of the customs laws. This list is authorized to be published by section 333 of the Uruguay Round Agreements Act.

DATES: This document notifies the public of the semiannual list for the 6-month period starting March 31, 2002, and ending September 30, 2002.

FOR FURTHER INFORMATION CONTACT: For information regarding any of the operational aspects, contact Gregory Olsavsky, Fines, Penalties and Forfeitures Branch, Office of Field Operations, (202) 927–3119. For information regarding any of the legal aspects, contact Willem A. Daman, Office of Chief Counsel, (202) 927–6900.

SUPPLEMENTARY INFORMATION:

Background

Section 333 of the Uruguay Round Agreements Act (URAA) (Pub. L. 103–465, 108 Stat. 4809) (signed December 8, 1994), entitled Textile Transshipments, amended Part V of title IV of the Tariff Act of 1930 by creating a section 592A (19 U.S.C. 1592a), which authorizes the Secretary of the Treasury to publish in the **Federal Register**, on a semiannual basis, a list of the names of any producers, manufacturers, suppliers, sellers, exporters, or other persons located outside the Customs territory of the United States, when these entities and/or persons have been issued a penalty claim under section 592 of the Tariff Act, for certain violations of the customs laws, provided that certain conditions are satisfied.

The violations of the customs laws referred to above are the following: (1) Using documentation, or providing documentation subsequently used by the importer of record, which indicates a false or fraudulent country of origin or source of textile or apparel products; (2) Using counterfeit visas, licenses, permits, bills of lading, or similar documentation, or providing counterfeit visas, licenses, permits, bills of lading, or similar documentation that is subsequently used by the importer of record, with respect to the entry into the Customs territory of the United States of textile or apparel products;

(3) Manufacturing, producing, supplying, or selling textile or apparel products which are falsely or fraudulently labeled as to country of origin or source; and (4) Engaging in practices which aid or abet the transshipment, through a country other than the country of origin, of textile or apparel products in a manner which conceals the true origin of the textile or apparel products or permits the evasion of quotas on, or voluntary restraint agreements with respect to, imports of textile or apparel products.

If a penalty claim has been issued with respect to any of the above violations, and no petition in response to the claim has been filed, the name of the party to whom the penalty claim was issued will appear on the list. If a petition or supplemental petition for relief from the penalty claim is submitted under 19 U.S.C. 1618, in accord with the time periods established by §§171.2 and 171.61, Customs Regulations (19 CFR 171.2, 171.61) and the petition is subsequently denied or the penalty is mitigated, and no further petition, if allowed, is received within 60 days of the denial or allowance of mitigation, then the administrative action shall be deemed to be final and administrative remedies will be deemed to be exhausted. Consequently, the name of the party to whom the penalty claim was issued will appear on the list. However, provision is made for an appeal to the Secretary of the Treasury by the person named on the list, for the removal of its name from the list. If the Secretary finds that such person or entity has not committed any of the enumerated violations for a period of not less than 3 years after the date on which the person or entity's name was published, the name will be removed from the list as of the next publication of the list.

Reasonable Care Required

Section 592A also requires any importer of record entering, introducing, or attempting to introduce into the commerce of the United States textile or apparel products that were either directly or indirectly produced, manufactured, supplied, sold, exported, or transported by such named person to show, to the satisfaction of the Secretary, that such importer has exercised reasonable care to ensure that the textile or apparel products are accompanied by documentation, packaging, and labeling that are accurate as to its origin. Reliance solely upon information regarding the imported product from a person named on the list is clearly not the exercise of reasonable care. Thus, the textile and apparel importers who have some commercial relationship with one or more of the listed parties must exercise a degree of reasonable care in ensuring that the documentation covering the imported merchandise, as well as its packaging and labeling, is accurate as to the country of origin of the merchandise. This degree of reasonable care must involve reliance on more than information supplied by the named party.

In meeting the reasonable care standard when importing textile or apparel products and when dealing with a party named on the list published pursuant to section 592A of the Tariff Act of 1930, an importer should consider the following questions in attempting to ensure that the documentation, packaging, and labeling is accurate as to the country of origin of the imported merchandise. The list of questions is not exhaustive but is illustrative.

(1) Has the importer had a prior relationship with the named party?

(2) Has the importer had any detentions and/or seizures of textile or apparel products that were directly or indirectly produced, supplied, or transported by the named party?

(3) Has the importer visited the company's premises and ascertained that the company has the capacity to produce the merchandise?

(4) Where a claim of an origin conferring process is made in accordance with 19 CFR 102.21, has the importer ascertained that the named party actually performed the required process?

(5) Is the named party operating from the same country as is represented by that party on the documentation, packaging or labeling?

(6) Have quotas for the imported merchandise closed or are they nearing closing from the main producer countries for this commodity?

(7) What is the history of this country regarding this commodity?

(8) Have you asked questions of your supplier regarding the origin of the product?

(9) Where the importation is accompanied by a visa, permit, or license, has the importer verified with the supplier or manufacturer that the visa, permit, and/or license is both valid and accurate as to its origin? Has the importer scrutinized the visa, permit or license as to any irregularities that would call its authenticity into question?

The law authorizes a semiannual publication of the names of the foreign entities and/or persons. On October 10, 2001, Customs published a Notice in the **Federal Register** (66 FR 51734) which identified 13 (thirteen) entities which fell within the purview of section 592A of the Tariff Act of 1930.

592A List

For the period ending March 30, 2002, Customs has identified 10 (ten) foreign entities that fall within the purview of section 592A of the Tariff Act of 1930. This list reflects no new entities and three removals to the 13 entities named on the list published on October 10, 2001. The parties on the current list were assessed a penalty claim under 19 U.S.C. 1592, for one or more of the four above-described violations. The administrative penalty action was concluded against the parties by one of the actions noted above as having terminated the administrative process.

The names and addresses of the 10 foreign parties which have been assessed penalties by Customs for violations of section 592 are listed below pursuant to section 592A. This list supersedes any previously published list. The names and addresses of the 10 foreign parties are as follows (the parenthesis following the listing sets forth the month and year in which the name of the company was first published in the **Federal Register**):

Austin Pang Gloves & Garments Factory, Ltd., Jade Heights, 52 Tai Chung Kiu Road, Flat G, 19/F, Shatin, New Territories, Hong Kong. (10/99)

Beautiful Flower Glove Manufactory, Kar Wah Industrial Building, 8 Leung Yip Street, Room 10–16, 4/F, Yuen Long, New Territories, Hong Kong. (10/99)

BF Manufacturing Company, Kar Wah Industrial Building, Leung Yip Street, Flat 13, 4/F, Yeun Long, New Territories, Hong Kong. (10/99)

Ease Keep, Ltd., 750 Nathan Road, Room 115, Kowloon, Hong Kong. (10/99)

Everlite Manufacturing Company, P.O. Box 90936, Tsimshatsui, Kowloon, Hong Kong (3/01).

Fabrica de Artigos de Vestuario E-Full, Lda. Rua Um doi Bairro da Concordia, Deificio Industrial Vang Tai, 8th Floor, A–D, Macau. (10/99)

Fabrica de Artigos de Vestuario Fan Wek Limitada, Av. Venceslau de Morais, S/N 14 B–C, Centro Ind. Keck Seng (Torre 1), Macau. (10/99)

Fairfield Line (HK) Co. Ltd., 60–66 Wing Tai Commer., Bldg. 1/F, Sheung Wan, Hong Kong (3/01).

G.P. Wedding Service Centre, Lee Hing Industrial Building, 10 Cheung Yue Street 11th Floor, Cheung Sha Wan, Kowloon, Hong Kong. (10/00)

Lucky Mind Industrial Limited, Lincoln Centre, 20 Yip Fung Street, Flat 11, 5/F, Fan Ling, New Territories, Hong Kong. (10/99)

Any of the above parties may petition to have its name removed from the list. Such petitions, to include any documentation that the petitioner deems pertinent to the petition, should be forwarded to the Assistant Commissioner, Office of Field Operations, United States Customs Service, 1300 Pennsylvania Avenue, NW., Washington, DC 20229.

Additional Foreign Entities

In the October 10, 2001, **Federal Register** notice, Customs also solicited information regarding the whereabouts of 5 foreign entities, which were identified by name and known address, concerning alleged violations of section 592. Persons with knowledge of the whereabouts of those 5 entities were requested to contact the Assistant Commissioner, Office of Field Operations, United States Customs Service, 1300 Pennsylvania Avenue, NW., Washington, DC 20229.

In this document, a new list is being published which contains the names and last known addresses of 3 entities. This reflects the removal of two entities from the list of 5 entities published on October 10, 2001.

Customs is soliciting information regarding the whereabouts of the following 3 foreign entities concerning alleged violations of section 592. Their names and last known addresses are listed below (the parenthesis following the listing sets forth the month and year in which the name of the company was first published in the **Federal Register**):

Au Mi Wedding Dresses Company, Dragon Industry Building, 98, King Law Street, Unit F, 9/F, Lai Chi Kok, Kowloon, Hong Kong. (10/99)

Golden Wheel Garment Factory, Flat A, 10/F, Tontex Industrial Building, 2–4 Sheung Hei Street, San Po

BILLING CODE 4820–02–P

DEPARTMENT OF THE TREASURY

Office of Thrift Supervision

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Office of Thrift Supervision (OTS), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on proposed and continuing information collections, as required by the Paperwork Reduction Act of 1995, 44 U.S.C. 3507. The Office of Thrift Supervision within the Department of the Treasury will submit the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. Today, OTS is soliciting public comments on the proposal.

DATES: Submit written comments on or before May 20, 2002.

ADDRESSES: Send comments, referring to the collection by title of the proposal or by OMB approval number, to Information Collection Comments, Chief Counsel's Office, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552; send a facsimile transmission to (202) 906–6518; or send an e-mail to *infocollection.comments@ots.treas.gov*. OTS will post comments and the related index on the OTS Internet Site at *www.ots.gov*. In addition, interested persons may inspect comments at the Public Reading Room, 1700 G Street, NW., by appointment. To make an appointment, call (202) 906–5922, send an e-mail to *publicinfo@ots.treas.gov*, or send a facsimile transmission to (202) 906–7755.

FOR FURTHER INFORMATION CONTACT: You can request additional information about this proposed information collection from Nadine Washington, Information Systems, Administration & Finance, (202) 906–6706, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: OTS may not conduct or sponsor an information collection, and respondents are not required to respond to an information collection, unless the information collection displays a currently valid OMB control number. As part of the approval process, we invite comments on the following information collection.

Comments should address one or more of the following points:

a. Whether the proposed collection of information is necessary for the proper performance of the functions of OTS;

b. The accuracy of OTS's estimate of the burden of the proposed information collection;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of the information collection on respondents, including through the use information technology.

We will summarize the comments that we receive and include them in the OTS request for OMB approval. All comments will become a matter of public record. In this notice, OTS is soliciting comments concerning the following information collection.

Title of Proposal: Savings and Loan Holding Company Registration Statement—H–(b)10.

OMB Number: 1550–0020.

Form Number: H–(b)10.

Regulation requirement: 12 CFR 584.

Description: This information collection is used to determine a savings and loan holding company's adherence to the statutes, regulations, and conditions of approval to acquire an insured institution and whether any of the holding company's activities would be injurious to the operation of the subsidiary savings association.

Type of Review: Renewal.

Affected Public: Savings Associations.

Estimated Number of Respondents: 72.

Estimated Frequency of Response: Annually.

Estimated Burden Hours per Response: 8 hours.

Estimated Totol Burden: 576 hours.

Clearance Officer: Sally W. Watts, (202) 906–7380, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

OMB Reviewer: Alexander Hunt, (202) 395–7860, Office of Management and Budget, Room 10202, New Executive Office Building, Washington, DC 20503.

Dated: March 13, 2002.

Deborah Dakin,

Deputy Chief Counsel, Regulations and Legislation Division.

DEPARTMENT OF VETERANS AFFAIRS

Veterans' Advisory Committee on Education; Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, Public law 92–463, that a meeting of the Veterans' Advisory Committee on Education, authorized by 38 U.S.C. 3692, will be held March 25 and 26, 2002. The meeting will take place at the offices of the Servicemembers Opportunity Colleges, 1307 New York Avenue, Washington, DC. On Monday, March 25, the meeting will begin at 9 a.m. and end at 4 p.m. On Tuesday, March 26, the meeting will begin at 9 a.m. and end at 12 p.m. The purpose of the Committee is to assist in the evaluation of existing programs and services, and recommend needed programs and services.

On March 25, the meeting will begin with opening remarks and an overview by Dr. Steve Kime, Committee Chairman. The Committee will discuss the Partnership for Veterans' Education and recent legislation, including new standards and guidelines to be created. In the afternoon, the Committee will receive briefings on the Veterans' Claims Processing Task Force's report; GAO Study 02–368, Veterans' Education Benefits Comparison of Federal Assistance Awarded to Veterans and Nonveterans Students; and Access and Technology, Web Portal Concept. On March 26, the Committee will review major issues addressed by the Committee in the past and their current status and any new issues they feel should be introduced. The meeting will conclude with a discussion regarding developing the Committee's report.

The meeting is open to the public. Interested persons may attend, appear before, or file statements with the Committee. Statements, if in written form, may be filed before or within 10 days after the meeting. Oral statements will be heard at 9:30 a.m., Tuesday, March 26, 2002. Those wishing to attend or file written statements should contact Mr. Michael Yunker, Education Strategy Development (224B), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, phone (202) 273–7187.

Dated: March 13, 2002.

By Direction of the Secretary:

Nora E. Egan,

Committee Management Officer.

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Department of Veterans Affairs (VA) intends to continue a recurring computer program matching Social Security Administration (SSA) records with VA pension and parents' dependency and indemnity compensation (DIC) records.

The goal of this match is to compare income and employment status as reported to VA with wage records maintained by SSA.

VA plans to match records of veterans, surviving spouses and children who receive pension, and parents who receive DIC, with SSA income tax return information as it relates to earned income. VA will also match records of veterans receiving disability compensation at the 100 percent rate based on unemployability with SSA income tax return information as it relates to earned income.

VA will use this information to adjust VA benefit payments as prescribed by law. The proposed matching program will enable VA to ensure accurate reporting of income and employment status.

Records To Be Matched: VA records involved in the match are the VA system of records, Compensation, Pension, Education and Rehabilitation Records—VA (58 VA 21/22). The SSA records will come from the Earnings Recording and Self-Employment Income System, SSA/OSR, 60–0059.

This notice is provided in accordance with the provisions of the Privacy Act of 1974 as amended by Public Law 100–503.

DATES: The match will start no sooner than April 19, 2002, and end not more than 18 months after the agreement is properly implemented by the parties. The involved agencies' Data Integrity Boards (DIB) may extend this match for 12 months provided the agencies certify to their DIBs within three months of the ending date of the original match that the matching program will be conducted without change and that the matching program has been conducted in compliance with the original matching program.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to conduct the matching program to the Director, Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Avenue, NW, Room 1154, Washington, DC 20420. All written comments received will be available for public inspection in the Office of Regulations Management, Room 1158, 810 Vermont Avenue, NW, Washington, DC 20420, between 8 a.m. and 4:30 p.m., Monday through Friday except holidays.

FOR FURTHER INFORMATION CONTACT: Paul Trowbridge (212B), (202) 273–7218.

SUPPLEMENTARY INFORMATION: This information is required by Title 5 U.S.C. subsection 552a(e)(12), the Privacy Act of 1974. A copy of this notice has been provided to both Houses of Congress and OMB.

Approved: March 5, 2002.

Anthony J. Principi,

Secretary of Veterans Affairs.

48 CFR Chapter 1

Federal Acquisition Circular 2001–06; Introduction

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Summary presentation of final rules.

SUMMARY: This document summarizes the Federal Acquisition Regulation (FAR) rules agreed to by the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council in this Federal Acquisition Circular (FAC) 2001–06. A companion document, the Small Entity Compliance Guide (SECG), follows this FAC. The FAC, including the SECG, is available via the Internet at *http://www.arnet.gov/far.*

DATES: For effective dates and comment dates, see separate documents which follow.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC 20405, (202) 501–4755, for information pertaining to status or publication schedules. For clarification of content, contact the analyst whose name appears in the table below in relation to each FAR case or subject area. Please cite FAC 2001–06 and specific FAR case number(s). Interested parties may also visit our website at *http://www.arnet.gov/far.*

Item	Subject	FAR Case	Analyst
I	Commercial Items—Standard Form 1449	2000–012	Moss.
II	Definitions for "Contract Action" and "Contracting Action"	2000–402	Moss.
III	Definitions for Sealed Bid and Negotiated Procurements	2000–403	DeStefano.
IV	Procurement Integrity Rewrite	1998–024	DeStefano.
V	Acquisition of Helium	2000–008	Nelson.
VI	HUBZone Program Applicability	2001–003	Cundiff.
VII	Application of Labor Clauses	1999–612	Nelson.
VIII	Technical Amendments.		

SUPPLEMENTARY INFORMATION:
Summaries for each FAR rule follow. For the actual revisions and/or amendments to these FAR cases, refer to the specific item number and subject set forth in the documents following these item summaries.

FAC 2001–06 amends the FAR as specified below:

Item I—Commercial Items SF 1449 (FAR Case 2000–012)

Standard Form 1449, Solicitation/Contract/Order for Commercial Items, is prescribed by the FAR for the acquisition of commercial items. This final rule makes several minor revisions to the form, including the addition of a block to indicate that the acquisition is a HUBZone set-aside, the substitution of a NAICS code for the SIC code, the notation that award is made only on the offeror's items specifically listed in block 29, and the addition of several blocks in the area of the form used as a receiving report by the Government. All of the changes involve blocks that are completed by the Government.

Item II—Definitions for "Contract Action" and "Contracting Action" (FAR Case 2000–402)

This final rule amends the FAR to provide for consistent use of the term "contract action." The rule changes the term "contracting action" to "contract action" throughout the FAR and makes other editorial changes to clarify the text.

Item III—Definitions for Sealed Bid and Negotiated Procurements (FAR Case 2000–403)

This final rule amends the FAR to clarify definitions that are used for sealed bid and negotiated procurements. The final rule—

- Moves the definitions of "bid sample" and "descriptive literature" from FAR Part 14 to FAR 2.101 because the definitions apply to more than one FAR part, *e.g.*, Parts 14 and 15;
- Amends those definitions and the definition of "offer" in accordance with plain language guidelines;
- Revises applicable provisions in FAR Part 52 to conform with the new definitions;
- Adds a new definition for "solicitation" at FAR 2.101; and
- Provides definitions for "bid" and "bidder" in FAR Part 28 because, as used in that part, the terms address sealed bid and negotiated acquisitions.

The rule clarifies terminology used in FAR 15.201(f), 15.609(e), and 35.007(g). Where we mean an entity that is actively seeking a contract, we use the term "prospective offeror." However, those cites describe processes that are set up to ensure fair and open competition. Therefore, any interested party is able to participate, including parties that the Government has not yet identified. Therefore, the rule uses the more general term "potential offeror."

Item IV—Procurement Integrity Rewrite (FAR Case 1998–024)

This final rule amends FAR parts 2, 3, 4, 9, 15, and 52 to rewrite the procurement integrity coverage (the implementation of section 27 of the Office of Federal Procurement Policy Act (41 U.S.C. 423) (more commonly referred to as the Procurement Integrity Act)) in plain language.

FAR 3.104 implements prohibitions, restrictions, and other requirements of the Procurement Integrity Act that are placed on certain agency officials that participate in Federal agency procurements. However, other statutes and regulations also govern the conduct of Government employees. While specific guidance pertaining to the Procurement Integrity Act at FAR 3.104 does not implement these other statutes and regulations, the rule does add guidance to alert these agency officials that they should seek advice from agency ethics officials before engaging in certain activities that could have serious consequences, including criminal prosecution.

These revisions to FAR 3.104 do not change either the requirements of the Procurement Integrity Act or change, in any manner, who is covered by, or the activities covered in, Office of Government Ethics regulations interpreting conflict of interest statutes.

Item V—Acquisition of Helium (FAR Case 2000–008)

This final rule revises FAR Subpart 8.5 and the clause at 52.208–8 to implement the Department of the Interior final rule regarding helium contracts that was published in the **Federal Register** at 63 FR 66760, December 3, 1998. The final rule—

- Changes the definitions;
- Eliminates the requirement for certain contractors and subcontractors to submit helium forecasts; and
- Establishes the requirement that contractors and subcontractors under contracts with a major helium requirement must report purchases of helium from Federal helium suppliers.

Item VI—HUBZone Program Applicability (FAR Case 2001–003)

The HUBZone Act of 1997 expanded the applicability of the HUBZONE Program to all agencies covered by the FAR after September 30, 2000, and is currently reflected in the FAR. This rule amends the FAR to simplify the existing language at FAR Parts 12, 19, and 52.

Item VII—Application of Labor Clauses (FAR Case 1999–612)

This final rule affects all contracting officers who use the FAR. The rule—

- Moves the Prohibition of Segregated Facilities clause from the list at paragraph (b), to the list at paragraph (a), of the clause at 52.213–4 and clarifies the existing requirements of 41 CFR 60–1.8, promulgated by the Department of Labor under E.O. 11246. The Prohibition of Segregated Facilities clause must be included in contracts whenever the Equal Opportunity clause (FAR 52.222–26) is included.
- Moves the Equal Opportunity clause from the list at paragraph (b), to the list at paragraph (a), of the clause at 52.213–4 because the clause must be included in almost all contracts, even those under $10,000, in accordance with the requirements at FAR 22.802(a)(1) and 22.807(b). Even though included, the clause is inapplicable unless the aggregate value of contracts and subcontracts awarded to the contractor exceeds $10,000 in a year.
- Makes other revisions to the clause at FAR 52.222–26, Equal Opportunity, to include a definition of "United States" and incorporate the exception for work performed outside the United States.

Item VIII—Technical Amendments

These amendments update sections and make editorial changes at FAR 1.404, 5.207, 6.302–5, 9.104–3, 31.101, 52.219–19, and 52.219–20.

Dated: March 6, 2002.

Al Matera,

Director, Acquisition Policy Division.

Federal Acquisition Circular

Federal Acquisition Circular (FAC) 2001–06 is issued under the authority of the Secretary of Defense, the Administrator of General Services, and the Administrator for the National Aeronautics and Space Administration.

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 2001–06 are effective April 4, 2002.

Dated: March 4, 2002.

Federal Acquisition Regulation; Commercial Items—Standard Form 1449

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) have agreed on a final rule amending the Federal Acquisition Regulation (FAR) to update Standard Form 1449, Solicitation/Contract/Order for Commercial Items.

DATES: *Effective Date:* April 4, 2002.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC 20405, (202) 501–4755, for information pertaining to status or publication schedules. For clarification of content, contact Ms. Victoria Moss, Procurement Analyst, at (202) 501–4764. Please cite FAC 2001–06, FAR case 2000–012.

SUPPLEMENTARY INFORMATION:

A. Background

Standard Form 1449, Solicitation/Contract/Order for Commercial Items, is prescribed by the FAR for the acquisition of commercial items. This final rule makes several minor revisions to the form, including the addition of a block to indicate that the acquisition is a HUBZone set-aside, the substitution of a NAICS code for the SIC code, the notation that award is made only on the offeror's items specifically listed in block 29, and the addition of several blocks in the area of the form used as a receiving report by the Government. None of the changes involve blocks that are completed by the public.

This is not a significant regulatory action, and therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

This final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577, and publication for public comments is not required. However, the Councils will consider comments from small entities concerning the affected FAR parts 1 and 52 in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 601, *et seq.* (FAC 2001–06, FAR case 2000–012), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because these changes to the FAR do not impose additional information collection requirements to the paperwork burden previously approved under OMB Control Number 9000–0136. The previous edition of the form indicated that the public reporting burden related to the form had been cleared under OMB No. 9000–0136. That statement has been removed from this edition because OMB Clearance 9000–0136 covers information collections unique to commercial item acquisition. It does not cover the information required by this form. This form is primarily completed by the Government. The contractor/offeror fills in only its name, address, and proposed prices. Those pieces of information do not require clearance in the FAR under

VOL

2002
UMI

the Paperwork Reduction Act. Office of Management and Budget Number 9000-0136 remains valid for the other information collection requirements related to the acquisition of commercial items.

List of Subjects in 48 CFR Parts 1 and 53

Government procurement.

Dated: March 6, 2002.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA amend 48 CFR parts 1 and 53 as set forth below:

1. The authority citation for 48 CFR parts 1 and 53 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 1—FEDERAL ACQUISITION REGULATIONS SYSTEM

1.106 [Amended]

2. Amend section 1.106 in the table by removing the FAR segment "SF 1449" and its corresponding OMB Control Number "9000–0136".

PART 53—FORMS

53.212 [Amended]

3. Amend section 53.212 by removing "(*OCT 1995*)" and adding "(Rev. 4/02)" in its place.

53.213 [Amended]

4. Amend section 53.213 in paragraph (a) and the introductory text of paragraph (f) by removing "(*10/95 Ed.*)" and adding "(Rev. *4/02*)" in its place.

5. Revise section 53.301–1449 to read as follows.

53.301–1449 Solicitation/Contract/Order for Commercial Items.

Federal Acquisition Regulation; Definitions for "Contract Action" and "Contracting Action"

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) have agreed to amend the Federal Acquisition Regulation (FAR) to provide for consistent use of the term "contract action" and to make other editorial changes to clarify the text.

DATES: *Effective Date:* April 4, 2002.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC 20405, (202) 501–4755, for information pertaining to status or publication schedules. For clarification of content, contact Ms. Victoria Moss, Procurement Analyst, at (202) 501–4764. Please cite FAC 2001–06, FAR case 2000–402.

SUPPLEMENTARY INFORMATION:

A. Background

This rule amends the FAR to provide for consistent use of the term "contract action." The rule changes the term "contracting action" to "contract action" throughout the FAR and makes other editorial changes to clarify the text.

DoD, GSA, and NASA published a proposed rule in the **Federal Register** on May 31, 2000 (65 FR 34894). One respondent submitted comments on the proposed rule. Based on those comments, the rule was changed to provide for more consistent use of the term "contract action" and to place definitions in the proper FAR sections.

This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because we are not substantively changing procedures for award and administration of contracts. We did not receive any comments regarding this determination as a result of publication of the proposed rule in the **Federal Register** on May 31, 2000 (65 FR 34894).

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose information collection requirements that require Office of Management and Budget approval under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 1, 5, 6, 8, 17, 19, 32, and 52

Government procurement.

Dated: March 6, 2002.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA amend 48 CFR parts 1, 5, 6, 8, 17, 19, 32, and 52 as set forth below:

1. The authority citation for 48 CFR parts 1, 5, 6, 8, 17, 19, 32, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 1—FEDERAL ACQUISITION REGULATIONS SYSTEM

2. Revise section 1.403 to read as follows:

1.403 Individual deviations.

Individual deviations affect only one contract action, and, unless 1.405(e) is applicable, may be authorized by the agency head. The contracting officer must document the justification and agency approval in the contract file.

3. Revise the introductory paragraph of section 1.404 to read as follows:

1.404 Class deviations.

Class deviations affect more than one contract action. When an agency knows that it will require a class deviation on a permanent basis, it should propose a FAR revision, if appropriate. Civilian agencies, other than NASA, must furnish a copy of each approved class deviation to the FAR Secretariat.

* * * * *

1.701 [Amended]

4. Amend the first sentence of section 1.701 by removing the word "contracting" and adding "contract" in its place.

1.703 [Amended]

5. Amend section 1.703 in paragraph (a) by removing the word "contracting" each time it appears (3 times) and adding "contract" in its place.

6. Amend section 1.705 by revising paragraph (b) to read as follows:

1.705 Supersession and modification.

* * * * *

(b) The contracting officer need not cancel the solicitation if the D&F, as modified, supports the contract action.

PART 5—PUBLICIZING CONTRACT ACTIONS

7. Revise section 5.001 to read as follows:

5.001 Definition.

Contract action, as used in this part, means an action resulting in a contract, as defined in subpart 2.1, including actions for additional supplies or services outside the existing contract scope, but not including actions that are within the scope and under the terms of the existing contract, such as contract modifications issued pursuant to the Changes clause, or funding and other administrative changes.

PART 6—COMPETITION REQUIREMENTS

6.502 [Amended]

8. Amend section 6.502 in paragraph (b)(1)(iv) by removing the word "contracting" and adding "contract" in its place.

PART 8—REQUIRED SOURCES OF SUPPLIES AND SERVICES

9. Revise section 8.102 to read as follows:

8.102 Policy.

When practicable, agencies must use excess personal property as the first source of supply for agency and cost-reimbursement contractor requirements. Agency personnel must make positive efforts to satisfy agency requirements by obtaining and using excess personal property (including that suitable for adaptation or substitution) before initiating a contract action.

VOL 67 ISS 54 MR 20 2002 UMI

VOL
67
ISS
54
MR
20
2002
UMI

PART 17—SPECIAL CONTRACTING METHODS

17.104 [Amended]

10. Amend section 17.104 in the second sentence of paragraph (b) by removing the words "contracting action" and adding "contract" in their place.

11. Amend section 17.503 by revising the introductory text of paragraph (b) to read as follows:

17.503 Determinations and findings requirements.

* * * * *

(b) If the Economy Act order requires contract action by the servicing agency, the D&F must also include a statement that at least one of the following circumstances applies:

* * * * *

PART 19—SMALL BUSINESS PROGRAMS

19.302 [Amended]

12. Amend section 19.302 in the first sentence of paragraph (h)(4) by removing the words "contracting action" and adding "contract action" in their place.

13. Amend section 19.505 by revising paragraph (c) to read as follows:

19.505 Rejecting Small Business Administration recommendations.

* * * * *

(c) If the head of the contracting activity agrees that the contracting officer's rejection was appropriate—

(1) Within 1 working day, the SBA procurement center representative may request the contracting officer to suspend action on the acquisition until the SBA Administrator appeals to the agency head (see paragraph (f) of this section); and

(2) The SBA must be allowed 15 working days after making such a written request, within which the Administrator of SBA—

(i) May appeal to the Secretary of the Department concerned; and

(ii) Must notify the contracting officer whether the further appeal has, in fact, been taken. If notification is not received by the contracting officer within the 15-day period, it is deemed that the SBA request to suspend the contract action has been withdrawn and that an appeal to the Secretary was not taken.

* * * * *

PART 32—CONTRACT FINANCING

14. Revise the introductory paragraph of section 32.000 to read as follows:

32.000 Scope of part.

This part prescribes policies and procedures for contract financing and other payment matters. This part addresses—

* * * * *

15. Amend section 32.001 by revising the definition "Contract action" to read as follows:

32.001 Definitions.

* * * * *

Contract action means an action resulting in a contract, as defined in subpart 2.1, including actions for additional supplies or services outside the existing contract scope, but not including actions that are within the scope and under the terms of the existing contract, such as contract modifications issued pursuant to the Changes clause, or funding and other administrative changes.

* * * * *

32.703–2 [Amended]

16. Amend section 32.703–2 in the first sentence of the introductory text of paragraph (a) by removing the words "contracting action" and adding "contract action" in their place; by removing the semicolon after the word "available" and adding a comma in its place; and by removing the comma after the word "provided".

17. Amend section 32.705–1 by revising paragraph (a) to read as follows:

32.705–1 Clauses for contracting in advance of funds.

(a) Insert the clause at 52.232–18, Availability of Funds, in solicitations and contracts if the contract will be chargeable to funds of the new fiscal year and the contract action will be initiated before the funds are available.

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

18. Amend section 52.232–18 by revising the introductory text to read as follows:

52.232–18 Availability of Funds.

As prescribed in 32.705–1(a), insert the following clause:

* * * * *

[FR Doc. 02–5821 Filed 3–19–02; 8:45 am]

BILLING CODE 6820–EP–P

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 2, 3, 14, 15, 28, 35, and 52

[FAC 2001–06; FAR Case 2000–403; Item III]

RIN 9000–AI84

Federal Acquisition Regulation; Definitions for Sealed Bid and Negotiated Procurements

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) have agreed to amend the Federal Acquisition Regulation (FAR) to provide consistent definitions for sealed bids and negotiated procurements.

DATES: *Effective Date:* April 4, 2002.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC 20405, (202) 501–4755, for information pertaining to status or publication schedules. For clarification of content, contact Mr. Ralph De Stefano, Procurement Analyst, at (202) 501–1758. Please cite FAC 2001–06, FAR case 2000–403.

SUPPLEMENTARY INFORMATION:

A. Background

The rule clarifies definitions that are used in the FAR for sealed bid and negotiated procurements. The rule—

- Moves the definitions of "bid sample" and "descriptive literature" from FAR part 14 to FAR 2.101 because the definitions apply to more than one FAR part;
- Amends those definitions and the definition of "offer" in accordance with plain language guidelines;
- Revises applicable provisions in FAR part 52 to conform with the new definitions;
- Adds a new definition for "solicitation" at FAR 2.101; and
- Provides definitions for "bid" and "bidder" in FAR part 28 because, as used in that part, the terms address sealed bid and negotiated acquisitions.

We also reviewed every instance where the terms "offeror," "prospective offeror," and "potential offeror" are used in the FAR. The rule clarifies terminology used in FAR 15.201(f), 15.609(e), and 35.007(g). Where we mean an entity that is actively seeking a contract, we use the term "prospective offeror." However, those cites describe processes that are set up to ensure competition. Therefore, any interested party is able to participate, including parties that the Government has not yet identified. Therefore, the rule uses the more general term "potential offeror."

DoD, GSA, and NASA published a proposed rule in the **Federal Register** at 65 FR 42852, July 11, 2000. Four respondents submitted comments on the proposed rule. The Councils considered all comments in the development of the final rule. A summary of the substantive comments is provided:

- *Comment:* Under 52.214–20, paragraph (c), change the second sentence to read "The Government will reject the bid when the sample fails" for clarity.

Response: Accepted.

- *Comment:* Under FAR 2.101, the definition of an "offer" does not include a "quotation." The definition of a "solicitation" includes a "quotation." Both definitions should be consistent.

Response: Not accepted. The definition of "offer" is not all-inclusive. It does not include "quotations." A quotation is not an offer and, consequently, cannot be accepted by the Government to form a binding contract. See FAR 13.004.

- *Comment:* The proposed language under FAR 14.202–5(e) should cite FAR 14.202–4(f) in lieu of (g).

Response: Accepted.

This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because, while we have made changes for clarity and consistency, we have not substantively changed procedures for award and administration of contracts.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose information collection requirements that require Office of Management and Budget approval under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 2, 3, 14, 15, 28, 35, and 52

Government procurement.

Dated: March 6, 2002.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA amend 48 CFR Parts 2, 3, 14, 15, 28, 35, and 52 as set forth below:

1. The authority citation for 48 CFR Parts 2, 3, 14, 15, 28, 35, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 2—DEFINITIONS OF WORDS AND TERMS

2. Amend section 2.101 by adding, in alphabetical order, the definitions "Bid sample" and "Descriptive literature"; revising the definition "Offer"; and by adding the definition "Solicitation" to read as follows:

2.101 Definitions.

* * * * *

Bid sample means a product sample required to be submitted by an offeror to show characteristics of the offered products that cannot adequately be described by specifications, purchase descriptions, or the solicitation (*e.g.*, balance, facility of use, or pattern).

* * * * *

Descriptive literature means information provided by an offeror, such as cuts, illustrations, drawings, and brochures, that shows a product's characteristics or construction of a product or explains its operation. The term includes only that information needed to evaluate the acceptability of the product and excludes other information for operating or maintaining the product.

* * * * *

Offer means a response to a solicitation that, if accepted, would bind the offeror to perform the resultant contract. Responses to invitations for bids (sealed bidding) are offers called "bids" or "sealed bids"; responses to requests for proposals (negotiation) are offers called "proposals"; however, responses to requests for quotations (simplified acquisition) are "quotations", not offers. For unsolicited proposals, see subpart 15.6.

* * * * *

Solicitation means any request to submit offers or quotations to the Government. Solicitations under sealed bid procedures are called "invitations for bids." *Solicitations* under negotiated procedures are called "requests for proposals." Solicitations under simplified acquisition procedures may require submission of either a quotation or an offer.

* * * * *

PART 3—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

3. Amend section 3.302 by revising the definition "Line item" to read as follows:

3.302 Definitions.

* * * * *

Line item means an item of supply or service, specified in a solicitation, that the offeror must separately price.

PART 14—SEALED BIDDING

4. Amend section 14.201–6 by—

a. Revising paragraph (a);

b. Removing paragraphs (b)(1) and (b)(2) and redesignating paragraphs (b)(3) and (b)(4) as (b)(1) and (b)(2);

c. Revising the introductory text of paragraph (o)(2) and paragraph (o)(3); and

d. Removing from paragraph (p)(3) "14.202–5(e)(2)" and adding "14.202–5(d)(2)" in its place. The revised text reads as follows:

14.201–6 Solicitation provisions.

(a) The provisions prescribed in this subsection apply to preparation and submission of bids in general. See other FAR parts for provisions and clauses related to specific acquisition requirements.

* * * * *

(o)(1) * * *

(2) If it appears that the conditions in 14.202–4(e)(1) will apply and the contracting officer anticipates granting waivers and—

* * * * *

(3) See 14.202–4(e)(2) regarding waiving the requirement for all bidders.

* * * * *

14.202–4 [Amended]

5. Amend section 14.202–4 by removing paragraph (a); redesignating paragraphs (b) through (h) as (a) through (g), respectively; and by removing the word "of" from the heading of newly designated paragraph (g).

6. Revise section 14.202–5 to read as follows:

14.202–5 Descriptive literature.

(a) *Policy.* Contracting officers must not require bidders to furnish descriptive literature unless it is needed before award to determine whether the

VOL
67
ISS
54
MR
20
2002
UMI

products offered meet the specification and to establish exactly what the bidder proposes to furnish.

(b) *Justification.* The contracting officer must document in the contract file the reasons why product acceptability cannot be determined without the submission of descriptive literature, except when the contract specifications require submission.

(c) *Requirements of invitation for bids.* (1) The invitation must clearly state—

(i) What descriptive literature the bidders must furnish;

(ii) The purpose for requiring the literature;

(iii) The extent of its consideration in the evaluation of bids; and

(iv) The rules that will apply if a bidder fails to furnish the literature before bid opening or if the literature provided does not comply with the requirements of the invitation.

(2) If bidders must furnish descriptive literature, see 14.201–6(p).

(d) *Waiver of requirement for descriptive literature.* (1) The contracting officer may waive the requirement for descriptive literature if—

(i) The bidder states in the bid that the product being offered is the same as a product previously or currently being furnished to the contracting activity; and

(ii) The contracting officer determines that the product offered by the bidder complies with the specification requirements of the current invitation for bids. When the contracting officer waives the requirement, see 14.201–6(p)(2).

(2) When descriptive literature is not necessary and a waiver of literature requirements of a specification has been authorized, the contracting officer must include a statement in the invitation that, despite the requirements of the specifications, descriptive literature will not be required.

(3) If the solicitation provides for a waiver, a bidder may submit a bid on the basis of either the descriptive literature furnished with the bid or a previously furnished product. If the bid is submitted on one basis, the bidder may not have it considered on the other basis after bids are opened.

(e) *Unsolicited descriptive literature.* If descriptive literature is furnished when it is not required by the invitation for bids, the procedures set forth in 14.202–4(f) must be followed.

14.404–4 [Amended]

7. Amend section 14.404–4 in the first sentence by removing "14.202–5(a)" and adding "2.101" in its place; and in the last sentence by removing "14.202–5(f)" and adding "14.202–5(e)" in its place.

PART 15—CONTRACTING BY NEGOTIATION

8. Amend section 15.201 by removing the undesignated paragraph at the end of the section and revising paragraph (f) to read as follows:

15.201 Exchanges with industry before receipt of proposals.

* * * * *

(f) General information about agency mission needs and future requirements may be disclosed at any time. After release of the solicitation, the contracting officer must be the focal point of any exchange with potential offerors. When specific information about a proposed acquisition that would be necessary for the preparation of proposals is disclosed to one or more potential offerors, that information must be made available to the public as soon as practicable, but no later than the next general release of information, in order to avoid creating an unfair competitive advantage. Information provided to a potential offeror in response to its request must not be disclosed if doing so would reveal the potential offeror's confidential business strategy, and is protected under 3.104 or subpart 24.2. When conducting a presolicitation or preproposal conference, materials distributed at the conference should be made available to all potential offerors, upon request.

9. Amend section 15.609 by revising paragraph (e) to read as follows:

15.609 Limited use of data.

* * * * *

(e) Use the notice in paragraph (d) of this section solely as a manner of handling unsolicited proposals that will be compatible with this subpart. However, do not use this notice to justify withholding of a record, or to improperly deny the public access to a record, where an obligation is imposed by the Freedom of Information Act (5 U.S.C. 552). An offeror should identify trade secrets, commercial or financial information, and privileged or confidential information to the Government (see paragraph (a) of this section).

* * * * *

PART 28—BONDS AND INSURANCE

10. Revise section 28.000 to read as follows:

28.000 Scope of part.

This part prescribes requirements for obtaining financial protection against losses under contracts that result from the use of the sealed bid or negotiated methods. It covers bid guarantees, bonds, alternative payment protections, security for bonds, and insurance.

11. Amend section 28.001 by adding, in alphabetical order, the definitions "Bid" and "Bidder" to read as follows:

28.001 Definitions.

* * * * *

Bid means any response to a solicitation, including a proposal under a negotiated acquisition. See the definition of "offer" at 2.101.

* * * * *

Bidder means any entity that is responding or has responded to a solicitation, including an offeror under a negotiated acquisition.

* * * * *

PART 35—RESEARCH AND DEVELOPMENT CONTRACTING

12. Amend section 35.007 by revising paragraph (g) to read as follows:

35.007 Solicitations.

* * * * *

(g) The contracting officer should ensure that potential offerors fully understand the details of the work, especially the Government interpretation of the work statement. If the effort is complex, the contracting officer should provide potential offerors an opportunity to comment on the details of the requirements as contained in the work statement, the contract Schedule, and any related specifications. This may be done at a preproposal conference (see 15.201).

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.214–1 [Reserved]

13. Remove and reserve section 52.214–1.

52.214–3 [Amended]

14. Amend section 52.214–3 in the prescription by removing "14.201–6(b)(3)" and adding "14.201–6(b)(1)" in its place.

52.214–4 [Amended]

15. Amend section 52.214–4 in the prescription by removing "14.201–6(b)(4)" and adding "14.201–6(b)(2)" in its place.

16. Amend section 52.214–20 by revising the introductory paragraph, date of the provision, and paragraphs (a), (b), and the introductory text of paragraph (c); and by removing from Alternates I and II "14.202–4(f)(1)" and adding "14.202–4(e)(1)" in its place. The revised text reads as follows:

52.214–20 Bid Samples.

As prescribed in 14.201–6(o)(1), insert the following provision:

Bid Samples (Apr 2002)

(a) *Bid sample* means a product sample required to be submitted by a bidder to show those characteristics of the offered products that cannot adequately be described by specifications, purchase descriptions, or the invitation for bid (e.g., balance, facility of use, or pattern).

(b) Bidders must furnish bid samples as part of the bid. The Government must receive the bid samples by the time specified in the invitation for bids. If the bidder fails to submit samples on time, the Government will reject the bid, except that the Contracting Officer will consider a late sample sent by mail under the Late Submissions, Modifications, and Withdrawals of Bids provision of this solicitation.

(c) The Government will test or evaluate bid samples to determine compliance with all the characteristics listed for examination in this solicitation. The Government will reject the bid when the sample fails to conform to the required characteristics. Products delivered under any resulting contract must conform to—

* * * * *

(End of provision)

* * * * *

17. Revise section 52.214–21 to read as follows:

52.214–21 Descriptive Literature.

As prescribed in 14.201–6(p)(1), insert the following provision:

Descriptive Literature (Apr 2002)

(a) *Descriptive literature,* as used in this provision, means information furnished by a bidder, such as cuts, illustrations, drawings, and brochures, that shows a product's characteristics or construction or explains its operation. The term includes only that information required to evaluate the acceptability of the product and excludes other information for operating or maintaining the product.

(b) Descriptive literature is required to establish, for the purpose of evaluation and award, details of the product offered that are specified elsewhere in the solicitation and pertain to significant elements such as—

(1) Design;

(2) Materials;

(3) Components;

(4) Performance characteristics; and

(5) Methods of manufacture, assembly, construction, or operation.

(c) Descriptive literature, required elsewhere in this solicitation, shall be—

(1) Identified to show the item(s) of the offer to which it applies; and

(2) Received by the time specified in this solicitation.

(d) If the bidder fails to submit descriptive literature on time, the Government will reject the bid, except that late descriptive literature sent by mail may be considered under the Late Submissions, Modifications, and Withdrawals of Bids provision of this solicitation.

(e) If the descriptive literature fails to show that the product offered conforms to the requirements of the solicitation, the Government will reject the bid.

(End of provision)

Alternate I (Apr 2002). As prescribed in 14.201–6(p)(2), add the following paragraphs (f) and (g) to the basic provision:

(f) The Contracting Officer may waive the requirement for furnishing descriptive literature if the offeror has supplied a product that is the same as that required by this solicitation under a prior contract. A bidder that requests a waiver of this requirement shall provide the following information:

Prior contract number _____

Date of prior contract _____

Contract line item number of product supplied _____

Name and address of Government activity to which delivery was made _____

Date of final delivery product supplied _____

(g) Bidders shall submit bids on the basis of required descriptive literature or on the basis of a previously supplied product under paragraph (f) of this provision. A bidder submitting a bid on one of these two bases may not elect to have its bid considered on the alternative basis after the time specified for receipt of bids, The Government will disregard a bidder's request for a waiver under paragraph (f) if that bidder has submitted the descriptive literature requested under this solicitation.

RIN 9000–AI61

Federal Acquisition Regulation; Procurement Integrity Rewrite

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) have agreed on a final rule amending the Federal Acquisition Regulation (FAR) to rewrite procurement integrity coverage in plain language.

DATES: *Effective Date:* April 4, 2002.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC 20405, (202) 501–4755, for information pertaining to status or publication schedules. For clarification of content, contact Mr. Ralph De Stefano, Procurement Analyst, at (202) 501–1758. Please cite FAC 2001–06, FAR case 1998–024.

SUPPLEMENTARY INFORMATION:

A. Background

Section 27 of the Office of Federal Procurement Policy Act (41 U.S.C. 423) is more commonly referred to as the Procurement Integrity Act (hereinafter referred to as the Act). FAR 3.104 implements prohibitions, restrictions, and other requirements of the Act that are placed on certain agency officials that participate in Federal agency procurements.

Other statutes and regulations also govern the conduct of Government employees. In particular, the Office of Government Ethics regulations provide interpretive guidance on the prohibitions in 18 U.S.C. 207 and 208 that also apply to Government employees that participate in procurement activities during the conduct of a Federal agency procurement. While FAR 3.104 does not implement these other statutes and regulations, it is very important for agency employees to be aware, not only of the prohibitions and restrictions in the Act, but also those contained in other statutes and regulations that deal with the same or related prohibited conduct. Criminal and administrative penalties can result if an employee violates the restrictions or otherwise engages in prohibited conduct.

It became apparent that we could improve FAR 3.104 by reorganizing and simplifying the text. Moreover, we clarify 3.104 to alert agency officials that even if their participation does not meet the definition in FAR 3.104 of participating personally and substantially, they are precluded from participating in a Federal agency procurement if they engage in certain conduct otherwise prohibited by other statutes and regulations. We added this guidance in FAR 3.104–2(b), 3.104–3(c), and 3.104–5(a) to alert these agency officials that they should seek advice from agency ethics officials before engaging in certain activities that could have serious consequences, including

VOL
67
ISS
54
MR
20
2002
UMI

criminal prosecution. These revisions to FAR 3.104 do not change either the requirements of the Act or change, in any manner, who is covered by, or the activities covered in, Office of Government Ethics regulations interpreting conflict of interest statutes.

To avoid possible violations of 18 U.S.C. 208, agency employees need to be aware that while their participation in a Federal agency procurement may not be considered "participating personally and substantially in a Federal agency procurement" for purposes of certain requirements in the Act, nevertheless, there will be instances where the employee will be considered to be participating personally and substantially for purposes of 18 U.S.C. 208. We have added these revisions to FAR 3.104 to alert agency officials that, while participating in a Federal agency procurement, they must be aware of and comply with the applicable disqualification requirements of 5 CFR 2635.604 and 2635.606.

These revisions also may assist agency ethics officials in advising agency officials participating in a Federal agency procurement. Certain conduct by an agency official during the conduct of a Federal agency procurement requires the official's disqualification from participation irrespective of whether or not the official's participation meets the definition of participating personally and substantially for purposes of the Act.

A proposed rule was published in the **Federal Register** at 65 FR 16758, March 29, 2000. Seven sources submitted comments in response to the proposed rule. All comments were considered in the development of the final rule. A summary of the substantive comments is provided.

• *Comment:* Additional clarification should be added that merely signing appointment letters for source selection evaluation panels, boards is not "participating personally and substantially participation in a Federal agency procurement."

Response: Not accepted. The definition of "participating personally and substantially in a Federal agency procurement" is already quite detailed and more clarification is unnecessary.

• *Comment:* The standards identified in FAR 3.104–3(d) concerning prohibition on a former official's acceptance of compensation from a contractor that has been awarded a competitive or sole source contract, as an employee, officer, director, or consultant of the contractor should be made more restrictive.

Response: Not accepted. The regulatory coverage tracks the statutory language.

• *Comment:* A definition of "must" should be added.

Response: The definition of "must" was added to FAR 2.101 under another final rule and is currently in the FAR.

• *Comment:* Does the definition of "source selection information" include quotations in FAR Subpart 13.5, Test Program for Certain Commercial Items, that are over the simplified acquisition threshold, normally over $100,000.

Response: No. Bids and proposals are addressed in the Act. Bids and proposals are terms of art to distinguish methods of contracting (bids under sealed bidding and proposals under negotiation). A quotation is not a bid or a proposal.

• *Comment:* The references to "procurement" in the rule should be changed to read "acquisition."

Response: Not accepted. The Act and its implementation in FAR 3.104 apply only to a "Federal agency procurement." The term "Federal agency procurement" is defined in both the Act and FAR 3.104. The definition is different from the definition of "acquisition" in FAR 2.101.

• *Comment:* Head of the contracting activity delegation restrictions in FAR 3.104–7(g) should be relaxed.

Response: Not accepted. The issues being addressed are very significant, *i.e.*, violations or possible violations of the Act; therefore, relaxation of the restriction is not appropriate.

• *Comment:* Informing acquisition employees that some post-employment restrictions are not tied to "personal and substantial participation" should be added in the rule.

Response: Accepted. See discussion under Supplementary Information, Background, above.

• *Comment:* Suggest retaining current FAR definition at FAR 3.104–1, "Participating personally and substantially in a Federal agency procurement," as applied to the OMB Circular A–76, paragraph (4). The proposed rule contains an expanded definition.

Response: Accepted. The 1996 amendments to the Act limit the application of the post-employment restrictions to designated positions; therefore, the participation of most personnel in these activities would not place them at risk of losing any right of first refusal. See paragraph (4)(iv) of FAR 3.104–1, "Participating substantially".

• *Comment:* Clarify what constitutes a "contact" under the Act. Response: An explanation of "contact" was added to the rule at FAR 3.104–3(c)(2). The addition gives the suggested guidance.

• *Comment:* A clarification that employment contacts through agents are subject to disqualification needs to be added at FAR 3.104–5(a).

Response: Accepted. The added language makes a clear statement that an employment contact through agents is subject to disqualification under this final rule.

• *Comment:* The number of individuals required to receive the disqualification notice directly from the agency official disqualifying herself/himself should be reduced.

Response: Partially accepted. The requirement for a notice of disqualification to the head of the contracting activity was deleted, but the requirements for notice to the contracting officer, source selection official, and immediate supervisor were retained. In an attempt to reduce the number of officials required to be notified, it was determined that the head of the contracting activity could be deleted. The Act places an affirmative responsibility on the agency official to disqualify herself/himself.

• *Comment:* Clarify that satisfying the requirement of 18 U.S.C 208 does not automatically authorize the disqualified official to resume participation in the procurement.

Response: The wording of the first sentence of 3.104–5(c) was revised to clarify that the conditions for resumption of participation in 3.104–3(c)(1)(ii) are statutorily mandated and that reinstatement is not necessarily automatic after those conditions have been met.

This is not a significant regulatory action, and therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the clarification only applies to individuals that are Government officials.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 2, 3, 4, 9, 15, and 52

Government procurement.

Dated: March 6, 2002.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA amend 48 CFR parts 2, 3, 4, 9, 15, and 52 as set forth below:

1. The authority citation for 48 CFR parts 2, 3, 4, 9, 15, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 2—DEFINITIONS OF WORDS AND TERMS

2. Amend section 2.101 by adding, in alphabetical order, the definitions "Offeror" and "Source selection information" to read as follows:

2.101 Definitions.

* * * * *

Offeror means offeror or bidder.

* * * * *

Source selection information means any of the following information that is prepared for use by an agency for the purpose of evaluating a bid or proposal to enter into an agency procurement contract, if that information has not been previously made available to the public or disclosed publicly:

(1) Bid prices submitted in response to an agency invitation for bids, or lists of those bid prices before bid opening.

(2) Proposed costs or prices submitted in response to an agency solicitation, or lists of those proposed costs or prices.

(3) Source selection plans.

(4) Technical evaluation plans.

(5) Technical evaluations of proposals.

(6) Cost or price evaluations of proposals.

(7) Competitive range determinations that identify proposals that have a reasonable chance of being selected for award of a contract.

(8) Rankings of bids, proposals, or competitors.

(9) Reports and evaluations of source selection panels, boards, or advisory councils.

(10) Other information marked as "Source Selection Information—See FAR 2.101 and 3.104" based on a case-by-case determination by the head of the agency or the contracting officer, that its disclosure would jeopardize the integrity or successful completion of the Federal agency procurement to which the information relates.

* * * * *

PART 3—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

3. Remove sections 3.104–10 and 3.104–11 and revise sections 3.104 through 3.104–9 to read as follows:

3.104 Procurement integrity.

3.104–1 Definitions.

As used in this section—

Agency ethics official means the designated agency ethics official described in 5 CFR 2638.201 or other designated person, including—

(1) Deputy ethics officials described in 5 CFR 2638.204, to whom authority under 3.104–6 has been delegated by the designated agency ethics official; and

(2) Alternate designated agency ethics officials described in 5 CFR 2638.202(b).

Compensation means wages, salaries, honoraria, commissions, professional fees, and any other form of compensation, provided directly or indirectly for services rendered. Compensation is indirectly provided if it is paid to an entity other than the individual, specifically in exchange for services provided by the individual.

Contractor bid or proposal information means any of the following information submitted to a Federal agency as part of or in connection with a bid or proposal to enter into a Federal agency procurement contract, if that information has not been previously made available to the public or disclosed publicly:

(1) Cost or pricing data (as defined by 10 U.S.C. 2306a(h)) with respect to procurements subject to that section, and section 304A(h) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 254b(h)), with respect to procurements subject to that section.

(2) Indirect costs and direct labor rates.

(3) Proprietary information about manufacturing processes, operations, or techniques marked by the contractor in accordance with applicable law or regulation.

(4) Information marked by the contractor as "contractor bid or proposal information" in accordance with applicable law or regulation.

(5) Information marked in accordance with 52.215–1(e).

Decision to award a subcontract or modification of subcontract means a decision to designate award to a particular source.

Federal agency procurement means the acquisition (by using competitive procedures and awarding a contract) of goods or services (including construction) from non-Federal sources by a Federal agency using appropriated funds. For broad agency announcements and small business innovative research programs, each proposal received by an agency constitutes a separate procurement for purposes of the Act.

In excess of $10,000,000 means—

(1) The value, or estimated value, at the time of award, of the contract, including all options;

(2) The total estimated value at the time of award of all orders under an indefinite-delivery, indefinite-quantity, or requirements contract;

(3) Any multiple award schedule contract, unless the contracting officer documents a lower estimate;

(4) The value of a delivery order, task order, or an order under a Basic Ordering Agreement;

(5) The amount paid or to be paid in settlement of a claim; or

(6) The estimated monetary value of negotiated overhead or other rates when applied to the Government portion of the applicable allocation base.

Official means—

(1) An officer, as defined in 5 U.S.C. 2104;

(2) An employee, as defined in 5 U.S.C. 2105;

(3) A member of the uniformed services, as defined in 5 U.S.C. 2101(3); or

(4) A special Government employee, as defined in 18 U.S.C. 202.

Participating personally and substantially in a Federal agency procurement means—

(1) Active and significant involvement of an official in any of the following activities directly related to that procurement:

(i) Drafting, reviewing, or approving the specification or statement of work for the procurement.

(ii) Preparing or developing the solicitation.

(iii) Evaluating bids or proposals, or selecting a source.

(iv) Negotiating price or terms and conditions of the contract.

(v) Reviewing and approving the award of the contract.

(2) *Participating personally* means participating directly, and includes the direct and active supervision of a subordinate's participation in the matter.

(3) *Participating substantially* means that the official's involvement is of significance to the matter. Substantial participation requires more than official responsibility, knowledge, perfunctory

involvement, or involvement on an administrative or peripheral issue. Participation may be substantial even though it is not determinative of the outcome of a particular matter. A finding of substantiality should be based not only on the effort devoted to a matter, but on the importance of the effort. While a series of peripheral involvements may be insubstantial, the single act of approving or participating in a critical step may be substantial. However, the review of procurement documents solely to determine compliance with regulatory, administrative, or budgetary procedures, does not constitute substantial participation in a procurement.

(4) Generally, an official will not be considered to have participated personally and substantially in a procurement solely by participating in the following activities:

(i) Agency-level boards, panels, or other advisory committees that review program milestones or evaluate and make recommendations regarding alternative technologies or approaches for satisfying broad agency-level missions or objectives.

(ii) The performance of general, technical, engineering, or scientific effort having broad application not directly associated with a particular procurement, notwithstanding that such general, technical, engineering, or scientific effort subsequently may be incorporated into a particular procurement.

(iii) Clerical functions supporting the conduct of a particular procurement.

(iv) For procurements to be conducted under the procedures of OMB Circular A–76, participation in management studies, preparation of in-house cost estimates, preparation of "most efficient organization" analyses, and furnishing of data or technical support to be used by others in the development of performance standards, statements of work, or specifications.

Source selection evaluation board means any board, team, council, or other group that evaluates bids or proposals.

3.104–2 General.

(a) This section implements section 27 of the Office of Federal Procurement Policy Act (the Procurement Integrity Act) (41 U.S.C. 423) referred to as "the Act"). Agency supplementation of 3.104, including specific definitions to identify individuals who occupy positions specified in 3.104–3(d)(1)(ii), and any clauses required by 3.104 must be approved by the senior procurement executive of the agency, unless a law establishes a higher level of approval for that agency.

(b) Agency officials are reminded that there are other statutes and regulations that deal with the same or related prohibited conduct, for example—

(1) The offer or acceptance of a bribe or gratuity is prohibited by 18 U.S.C. 201 and 10 U.S.C. 2207. The acceptance of a gift, under certain circumstances, is prohibited by 5 U.S.C. 7353 and 5 CFR part 2635;

(2) Contacts with an offeror during the conduct of an acquisition may constitute "seeking employment,"(see subpart F of 5 CFR part 2636 and 3.104–3(c)(2)). Government officers and employees (employees) are prohibited by 18 U.S.C. 208 and 5 CFR part 2635 from participating personally and substantially in any particular matter that would affect the financial interests of any person with whom the employee is seeking employment. An employee who engages in negotiations or is otherwise seeking employment with an offeror or who has an arrangement concerning future employment with an offeror must comply with the applicable disqualification requirements of 5 CFR 2635.604 and 2635.606. The statutory prohibition in 18 U.S.C. 208 also may require an employee's disqualification from participation in the acquisition even if the employee's duties may not be considered "participating personally and substantially," as this term is defined in 3.104–1;

(3) Post-employment restrictions are covered by 18 U.S.C. 207 and 5 CFR parts 2637 and 2641, that prohibit certain activities by former Government employees, including representation of a contractor before the Government in relation to any contract or other particular matter involving specific parties on which the former employee participated personally and substantially while employed by the Government. Additional restrictions apply to certain senior Government employees and for particular matters under an employee's official responsibility;

(4) Parts 14 and 15 place restrictions on the release of information related to procurements and other contractor information that must be protected under 18 U.S.C. 1905;

(5) Release of information both before and after award (see 3.104–4) may be prohibited by the Privacy Act (5 U.S.C. 552a), the Trade Secrets Act (18 U.S.C. 1905), and other laws; and

(6) Using nonpublic information to further an employee's private interest or that of another and engaging in a financial transaction using nonpublic information are prohibited by 5 CFR 2635.703.

3.104–3 Statutory and related prohibitions, restrictions, and requirements.

(a) *Prohibition on disclosing procurement information (subsection 27(a) of the Act).* (1) A person described in paragraph (a)(2) of this subsection must not, other than as provided by law, knowingly disclose contractor bid or proposal information or source selection information before the award of a Federal agency procurement contract to which the information relates. (See 3.104–4(a).)

(2) Paragraph (a)(1) of this subsection applies to any person who—

(i) Is a present or former official of the United States, or a person who is acting or has acted for or on behalf of, or who is advising or has advised the United States with respect to, a Federal agency procurement; and

(ii) By virtue of that office, employment, or relationship, has or had access to contractor bid or proposal information or source selection information.

(b) *Prohibition on obtaining procurement information (subsection 27(b) of the Act).* A person must not, other than as provided by law, knowingly obtain contractor bid or proposal information or source selection information before the award of a Federal agency procurement contract to which the information relates.

(c) *Actions required when an agency official contacts or is contacted by an offeror regarding non-Federal employment (subsection 27(c) of the Act).* (1) If an agency official, participating personally and substantially in a Federal agency procurement for a contract in excess of the simplified acquisition threshold, contacts or is contacted by a person who is an offeror in that Federal agency procurement regarding possible non-Federal employment for that official, the official must—

(i) Promptly report the contact in writing to the official's supervisor and to the agency ethics official; and

(ii) Either reject the possibility of non-Federal employment or disqualify himself or herself from further personal and substantial participation in that Federal agency procurement (see 3.104–5) until such time as the agency authorizes the official to resume participation in that procurement, in accordance with the requirements of 18 U.S.C. 208 and applicable agency regulations, because—

(A) The person is no longer an offeror in that Federal agency procurement; or

(B) All discussions with the offeror regarding possible non-Federal employment have terminated without an agreement or arrangement for employment.

(2) A contact is any of the actions included as "seeking employment" in 5 CFR 2635.603(b). In addition, unsolicited communications from offerors regarding possible employment are considered contacts.

(3) Agencies must retain reports of employment contacts for 2 years from the date the report was submitted.

(4) Conduct that complies with subsection 27(c) of the Act may be prohibited by other criminal statutes and the Standards of Ethical Conduct for Employees of the Executive Branch. See 3.104–2(b)(2).

(d) *Prohibition on former official's acceptance of compensation from a contractor (subsection 27(d) of the Act).* (1) A former official of a Federal agency may not accept compensation from a contractor that has been awarded a competitive or sole source contract, as an employee, officer, director, or consultant of the contractor within a period of 1 year after such former official—

(i) Served, at the time of selection of the contractor or the award of a contract to that contractor, as the procuring contracting officer, the source selection authority, a member of a source selection evaluation board, or the chief of a financial or technical evaluation team in a procurement in which that contractor was selected for award of a contract in excess of $10,000,000;

(ii) Served as the program manager, deputy program manager, or administrative contracting officer for a contract in excess of $10,000,000 awarded to that contractor; or

(iii) Personally made for the Federal agency a decision to—

(A) Award a contract, subcontract, modification of a contract or subcontract, or a task order or delivery order in excess of $10,000,000 to that contractor;

(B) Establish overhead or other rates applicable to a contract or contracts for that contractor that are valued in excess of $10,000,000;

(C) Approve issuance of a contract payment or payments in excess of $10,000,000 to that contractor; or

(D) Pay or settle a claim in excess of $10,000,000 with that contractor.

(2) The 1-year prohibition begins on the date—

(i) Of contract award for positions described in paragraph (d)(1)(i) of this subsection, or the date of contractor selection if the official was not serving in the position on the date of award;

(ii) The official last served in one of the positions described in paragraph (d)(1)(ii) of this subsection; or

(iii) The official made one of the decisions described in paragraph (d)(1)(iii) of this subsection.

(3) Nothing in paragraph (d)(1) of this subsection may be construed to prohibit a former official of a Federal agency from accepting compensation from any division or affiliate of a contractor that does not produce the same or similar products or services as the entity of the contractor that is responsible for the contract referred to in paragraph (d)(1) of this subsection.

3.104–4 Disclosure, protection, and marking of contractor bid or proposal information and source selection information.

(a) Except as specifically provided for in this subsection, no person or other entity may disclose contractor bid or proposal information or source selection information to any person other than a person authorized, in accordance with applicable agency regulations or procedures, by the agency head or the contracting officer to receive such information.

(b) Contractor bid or proposal information and source selection information must be protected from unauthorized disclosure in accordance with 14.401, 15.207, applicable law, and agency regulations.

(c) Individuals unsure if particular information is source selection information, as defined in 2.101, should consult with agency officials as necessary. Individuals responsible for preparing material that may be source selection information as described at paragraph (10) of the "source selection information" definition in 2.101 must mark the cover page and each page that the individual believes contains source selection information with the legend "Source Selection Information—See FAR 2.101 and 3.104." Although the information in paragraphs (1) through (9) of the definition in 2.101 is considered to be source selection information whether or not marked, all reasonable efforts must be made to mark such material with the same legend.

(d) Except as provided in paragraph (d)(3) of this subsection, the contracting officer must notify the contractor in writing if the contracting officer believes that proprietary information, contractor bid or proposal information, or information marked in accordance with 52.215–1(e) has been inappropriately marked. The contractor that has affixed the marking must be given an opportunity to justify the marking.

(1) If the contractor agrees that the marking is not justified, or does not respond within the time specified in the notice, the contracting officer may remove the marking and release the information.

(2) If, after reviewing the contractor's justification, the contracting officer determines that the marking is not justified, the contracting officer must notify the contractor in writing before releasing the information.

(3) For technical data marked as proprietary by a contractor, the contracting officer must follow the procedures in 27.404(h).

(e) This section does not restrict or prohibit—

(1) A contractor from disclosing its own bid or proposal information or the recipient from receiving that information;

(2) The disclosure or receipt of information, not otherwise protected, relating to a Federal agency procurement after it has been canceled by the Federal agency, before contract award, unless the Federal agency plans to resume the procurement;

(3) Individual meetings between a Federal agency official and an offeror or potential offeror for, or a recipient of, a contract or subcontract under a Federal agency procurement, provided that unauthorized disclosure or receipt of contractor bid or proposal information or source selection information does not occur; or

(4) The Government's use of technical data in a manner consistent with the Government's rights in the data.

(f) This section does not authorize—

(1) The withholding of any information pursuant to a proper request from the Congress, any committee or subcommittee thereof, a Federal agency, the Comptroller General, or an Inspector General of a Federal agency, except as otherwise authorized by law or regulation. Any release containing contractor bid or proposal information or source selection information must clearly identify the information as contractor bid or proposal information or source selection information related to the conduct of a Federal agency procurement and notify the recipient that the disclosure of the information is restricted by section 27 of the Act;

(2) The withholding of information from, or restricting its receipt by, the Comptroller General in the course of a protest against the award or proposed award of a Federal agency procurement contract;

(3) The release of information after award of a contract or cancellation of a procurement if such information is

VOL 67 ISS 54 MR 20 2002 UMI

VOL
67
ISS
54
MR
20
2002
UMI

contractor bid or proposal information or source selection information that pertains to another procurement; or

(4) The disclosure, solicitation, or receipt of bid or proposal information or source selection information after award if disclosure, solicitation, or receipt is prohibited by law. (See 3.104–2(b)(5) and subpart 24.2.)

3.104–5 Disqualification.

(a) *Contacts through agents or other intermediaries.* Employment contacts between the employee and the offeror, that are conducted through agents, or other intermediaries, may require disqualification under 3.104–3(c)(1). These contacts may also require disqualification under other statutes and regulations. (See 3.104–2(b)(2).)

(b) *Disqualification notice.* In addition to submitting the contact report required by 3.104–3(c)(1), an agency official who must disqualify himself or herself pursuant to 3.104–3(c)(1)(ii) must promptly submit written notice of disqualification from further participation in the procurement to the contracting officer, the source selection authority if other than the contracting officer, and the agency official's immediate supervisor. As a minimum, the notice must—

(1) Identify the procurement;

(2) Describe the nature of the agency official's participation in the procurement and specify the approximate dates or time period of participation; and

(3) Identify the offeror and describe its interest in the procurement.

(c) *Resumption of participation in a procurement.* (1) The official must remain disqualified until such time as the agency, at its sole and exclusive discretion, authorizes the official to resume participation in the procurement in accordance with 3.104–3(c)(1)(ii).

(2) After the conditions of 3.104–3(c)(1)(ii)(A) or (B) have been met, the head of the contracting activity (HCA), after consultation with the agency ethics official, may authorize the disqualified official to resume participation in the procurement, or may determine that an additional disqualification period is necessary to protect the integrity of the procurement process. In determining the disqualification period, the HCA must consider any factors that create an appearance that the disqualified official acted without complete impartiality in the procurement. The HCA's reinstatement decision should be in writing.

(3) Government officer or employee must also comply with the provisions of 18 U.S.C. 208 and 5 CFR part 2635 regarding any resumed participation in a procurement matter. Government officer or employee may not be reinstated to participate in a procurement matter affecting the financial interest of someone with whom the individual is seeking employment, unless the individual receives—

(i) A waiver pursuant to 18 U.S.C. 208(b)(1) or (b)(3); or

(ii) An authorization in accordance with the requirements of subpart F of 5 CFR part 2635.

3.104–6 Ethics advisory opinions regarding prohibitions on a former official's acceptance of compensation from a contractor.

(a) An official or former official of a Federal agency who does not know whether he or she is or would be precluded by subsection 27(d) of the Act (see 3.104–3(d)) from accepting compensation from a particular contractor may request advice from the appropriate agency ethics official before accepting such compensation.

(b) The request for an advisory opinion must be in writing, include all relevant information reasonably available to the official or former official, and be dated and signed. The request must include information about the—

(1) Procurement(s), or decision(s) on matters under 3.104–3(d)(1)(iii), involving the particular contractor, in which the individual was or is involved, including contract or solicitation numbers, dates of solicitation or award, a description of the supplies or services procured or to be procured, and contract amount;

(2) Individual's participation in the procurement or decision, including the dates or time periods of that participation, and the nature of the individual's duties, responsibilities, or actions; and

(3) Contractor, including a description of the products or services produced by the division or affiliate of the contractor from whom the individual proposes to accept compensation.

(c) Within 30 days after receipt of a request containing complete information, or as soon thereafter as practicable, the agency ethics official should issue an opinion on whether the proposed conduct would violate subsection 27(d) of the Act.

(d)(1) If complete information is not included in the request, the agency ethics official may ask the requester to provide more information or request information from other persons, including the source selection authority, the contracting officer, or the requester's immediate supervisor.

(2) In issuing an opinion, the agency ethics official may rely upon the accuracy of information furnished by the requester or other agency sources, unless he or she has reason to believe that the information is fraudulent, misleading, or otherwise incorrect.

(3) If the requester is advised in a written opinion by the agency ethics official that the requester may accept compensation from a particular contractor, and accepts such compensation in good faith reliance on that advisory opinion, then neither the requester nor the contractor will be found to have knowingly violated subsection 27(d) of the Act. If the requester or the contractor has actual knowledge or reason to believe that the opinion is based upon fraudulent, misleading, or otherwise incorrect information, their reliance upon the opinion will not be deemed to be in good faith.

3.104–7 Violations or possible violations.

(a) A contracting officer who receives or obtains information of a violation or possible violation of subsection 27(a), (b), (c), or (d) of the Act (see 3.104–3) must determine if the reported violation or possible violation has any impact on the pending award or selection of the contractor.

(1) If the contracting officer concludes that there is no impact on the procurement, the contracting officer must forward the information concerning the violation or possible violation and documentation supporting a determination that there is no impact on the procurement to an individual designated in accordance with agency procedures.

(i) If that individual concurs, the contracting officer may proceed with the procurement.

(ii) If that individual does not concur, the individual must promptly forward the information and documentation to the HCA and advise the contracting officer to withhold award.

(2) If the contracting officer concludes that the violation or possible violation impacts the procurement, the contracting officer must promptly forward the information to the HCA.

(b) The HCA must review all information available and, in accordance with agency procedures, take appropriate action, such as—

(1) Advise the contracting officer to continue with the procurement;

(2) Begin an investigation;

(3) Refer the information disclosed to appropriate criminal investigative agencies;

(4) Conclude that a violation occurred; or

(5) Recommend that the agency head determine that the contractor, or someone acting for the contractor, has engaged in conduct constituting an offense punishable under subsection 27(e) of the Act, for the purpose of voiding or rescinding the contract.

(c) Before concluding that an offeror, contractor, or person has violated the Act, the HCA may consider that the interests of the Government are best served by requesting information from appropriate parties regarding the violation or possible violation.

(d) If the HCA concludes that section 27 of the Act has been violated, the HCA may direct the contracting officer to—

(1) If a contract has not been awarded—

(i) Cancel the procurement;

(ii) Disqualify an offeror; or

(iii) Take any other appropriate actions in the interests of the Government.

(2) If a contract has been awarded—

(i) Effect appropriate contractual remedies, including profit recapture under the clause at 52.203–10, Price or Fee Adjustment for Illegal or Improper Activity, or, if the contract has been rescinded under paragraph(d)(2)(ii) of this subsection, recovery of the amount expended under the contract;

(ii) Void or rescind the contract with respect to which—

(A) The contractor or someone acting for the contractor has been convicted for an offense where the conduct constitutes a violation of subsection 27(a) or (b) of the Act for the purpose of either—

(*1*) Exchanging the information covered by the subsections for anything of value; or

(*2*) Obtaining or giving anyone a competitive advantage in the award of a Federal agency procurement contract; or

(B) The agency head has determined, based upon a preponderance of the evidence, that the contractor or someone acting for the contractor has engaged in conduct constituting an offense punishable under subsection 27(e)(1) of the Act; or

(iii) Take any other appropriate actions in the best interests of the Government.

(3) Refer the matter to the agency suspending or debarring official.

(e) The HCA should recommend or direct an administrative or contractual remedy commensurate with the severity and effect of the violation.

(f) If the HCA determines that urgent and compelling circumstances justify an award, or award is otherwise in the interests of the Government, the HCA, in accordance with agency procedures, may authorize the contracting officer to award the contract or execute the contract modification after notifying the agency head.

(g) The HCA may delegate his or her authority under this subsection to an individual at least one organizational level above the contracting officer and of General Officer, Flag, Senior Executive Service, or equivalent rank.

3.104–8 Criminal and civil penalties, and further administrative remedies.

Criminal and civil penalties, and administrative remedies, may apply to conduct that violates the Act (see 3.104–3). See 33.102(f) for special rules regarding bid protests. See 3.104–7 for administrative remedies relating to contracts.

(a) An official who knowingly fails to comply with the requirements of 3.104–3 is subject to the penalties and administrative action set forth in subsection 27(e) of the Act.

(b) An offeror who engages in employment discussion with an official subject to the restrictions of 3.104–3, knowing that the official has not complied with 3.104–3(c)(1), is subject to the criminal, civil, or administrative penalties set forth in subsection 27(e) of the Act.

(c) An official who refuses to terminate employment discussions (see 3.104–5) may be subject to agency administrative actions under 5 CFR 2635.604(d) if the official's disqualification from participation in a particular procurement interferes substantially with the individual's ability to perform assigned duties.

3.104–9 Contract clauses.

In solicitations and contracts for other than commercial items that exceed the simplified acquisition threshold, insert the clauses at—

(a) 52.203–8, Cancellation, Rescission, and Recovery of Funds for Illegal or Improper Activity; and

(b) 52.203–10, Price or Fee Adjustment for Illegal or Improper Activity.

3.704 [Amended]

4. Amend section 3.704 in paragraph (c)(1) by removing "3.104–10" and adding "3.104–7" in its place.

PART 4—ADMINISTRATIVE MATTERS

5. Amend section 4.802 in paragraphs (a)(1), (a)(2), and (a)(3) by removing ", which shall document" and adding "that documents" in their place; in the introductory text of paragraph (c) by removing "shall" the first time it appears and adding "must" in its place, and removing "shall" the second time it appears; in the first sentence of paragraph (d) by removing "shall" and adding "must" in its place; and by revising paragraph (e) to read as follows:

4.802 Contract files.

* * * * *

(e) Contents of contract files that are contractor bid or proposal information or source selection information as defined in 2.101 must be protected from disclosure to unauthorized persons (see 3.104–4).

* * * * *

PART 9—CONTRACTOR QUALIFICATIONS

9.105–3 [Amended]

6. Amend section 9.105–3 in paragraph (c) by removing "and/or" and adding "or" in its place, and by removing "3.104–3" and adding "3.104–4" in its place.

9.505 [Amended]

7. Amend section 9.505 in paragraph (b)(2) by removing "3.104–3" and adding "2.101" in its place.

PART 15—CONTRACTING BY NEGOTIATION

8. Amend section 15.404–2 by revising paragraph (a)(5) to read as follows:

15.404–2 Information to support proposal analysis.

(a) * * *

(5) Field pricing information and other reports may include proprietary or source selection information (see 2.101). This information must be appropriately identified and protected accordingly.

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.203–8 [Amended]

9. Amend section 52.203–8 in the introductory paragraph by removing "in solicitations and contracts".

[FAC 2001–06; FAR Case 2000–008; Item V]

RIN 9000–AJ09

Federal Acquisition Regulation; Acquisition of Helium

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) have agreed on a final rule amending the Federal Acquisition Regulation (FAR) to implement the Helium Privatization Act of 1996 (Pub. L. 104–273) and associated changes to the Department of the Interior's regulations regarding its helium program.

DATES: *Effective Date:* April 4, 2002.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC 20405, (202) 501–4755, for information pertaining to status or publication schedules. For clarification of content, contact Ms. Linda Nelson, Procurement Analyst, at (202) 501–1900. Please cite FAC 2001–06, FAR case 2000–008.

SUPPLEMENTARY INFORMATION:

A. Background

This final rule revises FAR Subpart 8.5 and the clause at 52.208–8 to implement the Department of Interior final rule regarding helium contracts that was published in the **Federal Register** at 63 FR 66760, December 3, 1998. The final rule—

- Changes the definitions;
- Eliminates the requirement for certain contracts and subcontractors to submit helium forecasts; and
- Establishes the requirement that contractors and subcontractors under contracts with a major helium requirement must report purchases of helium from Federal helium suppliers.

DoD, GSA, and NASA published a proposed rule in the **Federal Register** at 66 FR 2752, January 11, 2001. One source, the Department of Interior, submitted a comment in response to the proposed rule, recommending that the Councils add "Amarillo Field Office" to the address provided in the definition of "Bureau of Land Management" at FAR 8.501 and the clause at 52.208–8(a). The Councils concurred with the change and included it in the final rule.

This is not a significant regulatory action, and therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule eliminates the information requirement for submitting helium forecasts and replaces it with a similar information requirement to report helium purchases. We estimate that the net change is zero.

C. Paperwork Reduction Act

The Paperwork Reduction Act does apply; however, these changes to the FAR do not impose additional information collection requirements to the paperwork burden previously approved under OMB Control Number 9000–0113.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA amend 48 CFR parts 8 and 52 as set forth below:

1. The authority citation for 48 CFR parts 8 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 8—REQUIRED SOURCES OF SUPPLIES AND SERVICES

2. Revise subpart 8.5, consisting of sections 8.500 through 8.505, to read as follows:

Subpart 8.5—Acquisition of Helium

8.500 Scope of subpart.

This subpart implements the requirements of the Helium Act (50 U.S.C. 167, *et seq.*) concerning the acquisition of liquid or gaseous helium by Federal agencies or by Government contractors or subcontractors for use in the performance of a Government contract (also see 43 CFR part 3195).

8.501 Definitions.

As used in this subpart—

Bureau of Land Management means the Department of the Interior, Bureau of Land Management, Amarillo Field Office, Helium Operations, 801 South Fillmore Street, Suite 500, Amarillo, TX 79101–3545.

Federal helium supplier means a private helium vendor that has an in-kind crude helium sales contract with the Bureau of Land Management (BLM) and that is on the BLM Amarillo Field Office's Authorized List of Federal Helium Suppliers available via the Internet at *http://www.nm.blm.gov/www/amfo/amfo_home.html.*

Major helium requirement means an estimated refined helium requirement greater than 200,000 standard cubic feet (scf) (measured at 14.7 pounds per square inch absolute pressure and 70 degrees Fahrenheit temperature) of gaseous helium or 7510 liters of liquid helium delivered to a helium use location per year.

8.502 Policy.

Agencies and their contractors and subcontractors must purchase major helium requirements from Federal helium suppliers, to the extent that supplies are available.

8.503 Exception.

The requirements of this subpart do not apply to contracts or subcontracts in which the helium was acquired by the contractor prior to award of the contract or subcontract.

8.504 Procedures.

The contracting officer must forward the following information to the Bureau of Land Management within 45 days of the close of each fiscal quarter:

(a) The name of any company that supplied a major helium requirement.

(b) The amount of helium purchased.

(c) The delivery date(s).

(d) The location where the helium was used.

8.505 Contract clause.

Insert the clause at 52.208–8, Required Sources for Helium and Helium Usage Data, in solicitations and contracts if it is anticipated that performance of the contract involves a major helium requirement.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

3. Revise the clause heading and section 52.208–8 to read as follows:

52.208–8 Required Sources for Helium and Helium Usage Data.

As prescribed in 8.505, insert the following clause:

Required Sources for Helium and Helium Usage Data (Apr 2002)

(a) *Definitions.*

Bureau of Land Management, as used in this clause, means the Department of the Interior, Bureau of Land Management, Amarillo Field Office, Helium Operations, located at 801 South Fillmore Street, Suite 500, Amarillo, TX 79101–3545.

Federal helium supplier means a private helium vendor that has an in-kind crude helium sales contract with the Bureau of Land Management (BLM) and that is on the BLM Amarillo Field Office's Authorized List of Federal Helium Suppliers available via the Internet at http://www.nm.blm.gov/www/amfo/amfo_home.html.

Major helium requirement means an estimated refined helium requirement greater than 200,000 standard cubic feet (scf) (measured at 14.7 pounds per square inch absolute pressure and 70 degrees Fahrenheit temperature) of gaseous helium or 7510 liters of liquid helium delivered to a helium use location per year.

(b) *Requirements*—(1) Contractors must purchase major helium requirements from Federal helium suppliers, to the extent that supplies are available.

(2) The Contractor shall provide to the Contracting Officer the following data within 10 days after the Contractor or subcontractor receives a delivery of helium from a Federal helium supplier—

(i) The name of the supplier;

(ii) The amount of helium purchased;

(iii) The delivery date(s); and

(iv) The location where the helium was used.

(c) *Subcontracts.* The Contractor shall insert this clause, including this paragraph (c), in any subcontract or order that involves a major helium requirement.

(End of clause)

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 12, 19, and 52

[FAC 2001–06; FAR Case 2001–003; Item VI]

RIN 9000–AJ32

Federal Acquisition Regulation; HUBZone Program Applicability

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) have agreed on a final rule that amends the Federal Acquisition Regulation (FAR) to simplify current FAR language that expands the applicability of the HUBZone Program to all agencies covered by the FAR after September 30, 2000.

DATES: *Effective Date:* April 4, 2002.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC 20405, (202) 501–4755, for information pertaining to status or publication schedules. For clarification of content, contact Ms. Rhonda Cundiff, Procurement Analyst, at (202) 501–0044. Please cite FAC 2001–06, FAR case 2001–003.

SUPPLEMENTARY INFORMATION:

A. Background

This final rule amends and simplifies language at FAR Parts 12, 19, and 52. Current FAR language expands the applicability of the HUBZone Program to all agencies covered by the FAR after September 30, 2000. Initially, procurements under the HUBZone Program applied to a limited list of Federal agencies. Under Section 602(b) of the HUBZone Act of 1997 (Title VI of Pub. L. 105–135), this initial limited applicability expired on September 30, 2000.

The purpose of the program is to provide Federal contracting assistance for qualified small business concerns located in historically underutilized business zones in an effort to increase employment opportunities, investment, and economic development in these areas. The program provides for set-asides, sole-source awards, and price evaluation preferences for HUBZone small business concerns and establishes goals for awards to such concerns.

This is not a significant regulatory action, and therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

This final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577, and publication for public comments is not required. However, the Councils will consider comments from small entities concerning the affected FAR Parts 12, 19, and 52 in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 601, *et seq.* (FAC 2001–06, FAR case 2001–003), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 12, 19, and 52

Government procurement.

Dated: March 6, 2002.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA amend 48 CFR parts 12, 19, and 52 as set forth below:

1. The authority citation for 48 CFR parts 12, 19, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 12—ACQUISITION OF COMMERCIAL ITEMS

2. Amend section 12.301 by revising the introductory text of paragraph (b) and (b)(2) to read as follows:

12.301 Solicitation provisions and contract clauses for the acquisition of commercial items.

* * * * *

(b) Insert the following provisions in solicitations for the acquisition of commercial items, and clauses in solicitations and contracts for the acquisition of commercial items:

* * * * *

(2) *The provision at 52.212–3, Offeror Representations and Certifications—Commercial Items.* This provision provides a single, consolidated list of certifications and representations for the acquisition of commercial items and is attached to the solicitation for offerors to complete and return with their offer. This provision may not be tailored except in accordance with Subpart 1.4. Use the provision with its Alternate I in solicitations issued by DoD, NASA, or the Coast Guard that are expected to exceed the threshold at 4.601(a). Use the provision with its Alternate II in solicitations for acquisitions for which small disadvantaged business procurement mechanisms are authorized on a regional basis;

UMI

PART 19—SMALL BUSINESS PROGRAMS

19.307 [Amended]

3. Amend section 19.307 by removing paragraph (a)(2); by redesignating paragraph (a)(3) as (a)(2); in the newly designated paragraph (a)(2) by removing "Alternate II" and adding "Alternate I" in its place; and in paragraph (c) by removing "and contracts".

4. Revise section 19.1302 to reads as follows:

19.1302 Applicability.

The procedures in this subpart apply to all Federal agencies that employ one or more contracting officers.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

5. Amend section 52.212–3 by revising the date of the provision; by adding paragraph (c)(10); by revising the introductory text of Alternate I; by redesignating paragraph (c)(10) of Alternate I as (c)(11); and by removing Alternate III. The revised and added text reads as follows:

52.212–3 Offeror Representations and Certifications—Commercial Items.

* * * * *

Offeror Representations and Certifications—Commercial Items (Apr 2002)

* * * * *

(c) * * *

(10) *HUBZone small business concern.* [Complete only if the offeror represented itself as a small business concern in paragraph (c)(1) of this provision.] The offeror represents, as part of its offer, that—

(i) It [ ] is, [ ] is not a HUBZone small business concern listed, on the date of this representation, on the List of Qualified HUBZone Small Business Concerns maintained by the Small Business Administration, and no material change in ownership and control, principal place of ownership, or HUBZone employee percentage has occurred since it was certified by the Small Business Administration in accordance with 13 CFR part 126; and

(ii) It [ ] is, [ ] is not a joint venture that complies with the requirements of 13 CFR part 126, and the representation in paragraph (c)(10)(i) of this provision is accurate for the HUBZone small business concern or concerns that are participating on the joint venture. [*The offeror shall enter the name or names of the HUBZone small business concern or concerns that are participating in the joint venture:*_____.] Each HUBZone small business concern participating in the joint venture shall submit a separate signed copy of the HUBZone representation.

* * * * *

Alternate I (Apr 2002). As prescribed in 12.301(b)(2), add the following paragraph (c)(11) to the basic provision:

* * * * *

6. Amend section 52.219–1 by revising the date of the provision; by adding paragraph (b)(6); by removing Alternate I and redesignating Alternate II as Alternate I; and by revising the introductory text of the newly designated Alternate I to read as follows:

52.219–1 Small Business Program Representations.

* * * * *

Small Business Program Representations (Apr 2002)

* * * * *

(b) * * *

(6) [*Complete only if the offeror represented itself as a small business concern in paragraph (b)(1) of this provision.*] The offeror represents, as part of its offer, that—

(i) It [ ] is, [ ] is not a HUBZone small business concern listed, on the date of this representation, on the List of Qualified HUBZone Small Business Concerns maintained by the Small Business Administration, and no material change in ownership and control, principal office, or HUBZone employee percentage has occurred since it was certified by the Small Business Administration in accordance with 13 CFR part 126; and

(ii) It [ ] is, [ ] is not a joint venture that complies with the requirements of 13 CFR part 126, and the representation in paragraph (b)(6)(i) of this provision is accurate for the HUBZone small business concern or concerns that are participating in the joint venture. [*The offeror shall enter the name or names of the HUBZone small business concern or concerns that are participating in the joint venture:*_____.] Each HUBZone small business concern participating in the joint venture shall submit a separate signed copy of the HUBZone representation.

* * * * *

Alternate I (Apr 2002). As prescribed in 19.307(a)(2), add the following paragraph (b)(7) to the basic provision:

* * * * *

BILLING CODE 6820–EP–P

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 52

[FAC 2001–06; FAR Case 1999–612; Item VII]

RIN 9000–AI95

Federal Acquisition Regulation; Application of Labor Clauses

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) have agreed on a final rule amending the Federal Acquisition Regulation (FAR) by revising the clause, Terms and Conditions—Simplified Acquisitions (Other Than Commercial Items), to clarify the application of labor clauses below the simplified acquisition threshold. The Councils also revised the Equal Opportunity clause to incorporate the exception for work performed outside the United States.

DATES: *Effective Date:* April 4, 2002.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC 20405, (202) 501–4755, for information pertaining to status or publication schedules. For clarification of content, contact Ms. Linda Nelson, Procurement Analyst, at (202) 501–1900. Please cite FAC 2001–06, FAR case 1999–612.

SUPPLEMENTARY INFORMATION:

A. Background

This final rule—

1. Moves the Prohibition of Segregated Facilities clause from the list at paragraph (b), to the list at paragraph (a), of the clause at 52.213–4 and clarifies the existing requirements of 41 CFR 60–1.8, promulgated by the Department of Labor under E.O. 11246. The Prohibition of Segregated Facilities clause must be included in contracts whenever the Equal Opportunity clause (FAR 52.222–26) is included.

2. Moves the Equal Opportunity clause from the list at paragraph (b), to the list at paragraph (a), of the clause at 52.213–4 because the clause must be included in almost all contracts, even those under $10,000, in accordance with the requirements at FAR 22.802(a)(1) and 22.807(b). Even though included, the clause is inapplicable unless the aggregate value of contracts and subcontracts awarded to the contractor exceeds $10,000 in a year.

3. Makes other revisions to paragraphs (b)(1)(i), (b)(1)(v), and (b)(1)(vii) of the clause at FAR 52.213–4, and paragraph (a) of the clause at FAR 52.222–26, relating to geographic applicability of labor clauses, to comply with the current regulations at FAR 22.603, 22.807(b)(2), 22.1001, 22.1003–2, and 22.1408(a)(1).

DoD, GSA, and NASA published a proposed rule in the **Federal Register** at 65 FR 64298, October 26, 2000. Two respondents submitted public comments. One respondent is in favor of the rule, while the other commenter believes the 52.222–36 clause change creates a double standard, strongly favoring Americans, while making non-Americans working outside the United States susceptible to abuses by contractors. The Councils believe that the comment is outside the scope of the rule. The clause at 52.222–36 does not apply to employees recruited outside the United States for work performed outside the United States. This has been in the FAR since this FAR subpart was written in 1984. It is in the Department of Labor regulation which is the source of the FAR subpart (see 41 CFR 60–741.4(a)(4)). The concept is that the country in which the work is performed has the sovereignty to write its own laws regarding affirmative action of those disabled workers. This case confirms that this long-standing exception applies to items whether commercial or noncommercial. Accordingly, the comments resulted in no change to the rule.

This is not a significant regulatory action, and therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because this rule only clarifies the existing requirements.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 52

Government procurement.

Dated: March 6, 2002.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA amend 48 CFR part 52 as set forth below:

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

1. The authority citation for 48 CFR part 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Amend section 52.213–4 by—

a. Revising the date of the clause;

b. Redesignating paragraphs (a)(1)(ii) and (a)(1)(iii) as (a)(1)(iv) and (a)(1)(v), respectively, and adding new paragraphs (a)(1)(ii) and (a)(1)(iii);

c. Removing paragraphs (b)(1)(ii) and (b)(1)(iii), and redesignating paragraphs (b)(1)(iv) through (b)(1)(xiii) as (b)(1)(ii) through (b)(1)(xi), respectively; and

d. Revising paragraph (b)(1)(i) and newly designated paragraphs (b)(1)(iii) and (b)(1)(v).

The added and revised text reads as follows:

52.213–4 Terms and Conditions Simplified Acquisitions (Other Than Commercial Items).

* * * * *

Terms and Conditions—Simplified Acquisitions (Other Than Commercial Items) (Apr 2002)

(a) * * *

(1) * * *

(ii) 52.222–21, Prohibition of Segregated Facilities (Feb 1999) (E.O. 11246).

(iii) 52.222–26, Equal Opportunity (Apr 2002) (E.O. 11246).

* * * * *

(b) * * *

(1)

(i) 52.222–20, Walsh-Healey Public Contracts Act (Dec 1996) (41 U.S.C. 35–45) (Applies to supply contracts over $10,000 in the United States, Puerto Rico, or the U.S. Virgin Islands).

* * * * *

(iii) 52.222–36, Affirmative Action for Workers with Disabilities (June 1998) (29 U.S.C. 793). (Applies to contracts over $10,000, unless the work is to be performed outside the United States by employees recruited outside the United States.) (For purposes of this clause, *United States* includes the 50 States, the District of Columbia, Puerto Rico, the Northern Mariana Islands, American Samoa, Guam, the U.S. Virgin Islands, and Wake Island.)

* * * * *

(v) 52.222–41, Service Contract Act of 1965, As Amended (May 1989) (41 U.S.C. 351, *et seq.*) (Applies to service contracts over $2,500 that are subject to the Service Contract Act and will be performed in the United States, District of Columbia, Puerto Rico, the Northern Mariana Islands, American Samoa, Guam, the U.S. Virgin Islands, Johnston Island, Wake Island, or the outer continental shelf lands).

* * * * *

3. Amend section 52.222–26 by—

a. Revising the date of the clause;

b. Removing the paragraph designation and the introductory text of paragraph (b);

c. Redesignating paragraph (a) as paragraph (b) and revising the introductory text; and

d. Adding a new paragraph (a).

The added and revised text reads as follows:

52.222–26 Equal Opportunity.

* * * * *

Equal Opportunity (Apr 2002)

(a) *Definition. United States,* as used in this clause, means the 50 States, the District of Columbia, Puerto Rico, the Northern Mariana Islands, American Samoa, Guam, the U.S. Virgin Islands, and Wake Island.

(b) If, during any 12-month period (including the 12 months preceding the award of this contract), the Contractor has been or is awarded nonexempt Federal contracts and/or subcontracts that have an aggregate value in excess of $10,000, the Contractor shall comply with paragraphs (b)(1) through (b)(11) of this clause, except for work performed outside the United States by employees who were not recruited within the United States. Upon request, the Contractor shall provide information necessary to determine the applicability of this clause.

List of Subjects in 48 CFR Parts 1, 5, 6, 9, 31, and 52

Government procurement.

Dated: March 6, 2002.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA amend 48 CFR parts 1, 5, 6, 9, and 52 as set forth below:

1. The authority citation for 48 CFR parts 1, 5, 6, 9, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 1—FEDERAL ACQUISITION REGULATIONS SYSTEM

1.404 [Amended]

2. Amend section 1.404 in paragraph (c) by removing "Associate" and adding "Assistant" in its place.

PART 5—PUBLICIZING CONTRACT ACTIONS

5.207 [Amended]

3. Amend section 5.207(c)(4) in paragraph 6. of "Format Item and Explanation/Description of Entry" by removing "5.207(g)" and adding "5.207(h)" in its place.

PART 6—COMPETITION REQUIREMENTS

6.302–5 [Amended]

4. Amend section 6.302–5 in paragraph (b)(2) by removing the word "Handicapped" and adding "Disabled" in its place.

PART 9—CONTRACTOR QUALIFICATIONS

9.104–3 [Amended]

5. Amend section 9.104–3 in paragraph (c) by removing "(see *Affiliates* and *Concerns* in 19.101)" and adding "(see *Concern* in 19.001 and *Affiliates* in 19.101)" in its place.

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

31.101 [Amended]

6. Amend section 31.101 in the next-to-the-last sentence by removing "Associate" and adding "Assistant" in its place.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.219–19 [Amended]

7. Amend section 52.219–19 in the introductory text by removing "19.1007(a)" and adding "19.1008(a)" in its place.

52.219–20 [Amended]

8. Amend section 52.219–20 in the introductory text by removing "19.1007(b)" and adding "19.1008(b)" in its place.

48 CFR Chapter 1

Federal Acquisition Regulation; Small Entity Compliance Guide

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Small Entity Compliance Guide.

SUMMARY: This document is issued under the joint authority of the Secretary of Defense, the Administrator of General Services and the Administrator for the National Aeronautics and Space Administration. This *Small Entity Compliance Guide* has been prepared in accordance with Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121). It consists of a summary of rules appearing in Federal Acquisition Circular (FAC) 2001–06 which amend the FAR. An asterisk (*) next to a rule indicates that a Regulatory Flexibility Analysis has been prepared in accordance with 5 U.S.C. 604. Interested parties may obtain further information regarding these rules by referring to FAC 2001–06 which precedes this document. These documents are also available via the Internet at *http://www.arnet.gov/far.*

FOR FURTHER INFORMATION CONTACT: Laurie Duarte, FAR Secretariat, (202) 501–4225. For clarification of content, contact the analyst whose name appears in the table below.

LIST OF RULES IN FAC 2001–06

Item	Subject	FAR case	Analyst
I	Commercial Items—Standard Form 1449	2000–012	Moss.
II	Definitions for "Contract Action" and "Contracting Action"	2000–402	Moss.
III	Definitions for Sealed Bid and Negotiated Procurements	2000–403	DeStefano.
IV	Procurement Integrity Rewrite	1998–024	DeStefano.
V	Acquisition of Helium	2000–008	Nelson.
VI	HUBZone Program Applicability	2001–003	Cundiff.
VII	Application of Labor Clauses	1999–612	Nelson.
VIII	Technical Amendments.		

Item I—Commercial Items—SF 1449 (FAR Case 2000–012)

Standard Form 1449, Solicitation/Contract/Order for Commercial Items, is prescribed by the FAR for the acquisition of commercial items. This final rule makes several minor revisions to the form, including the addition of a block to indicate that the acquisition is a HUBZone set-aside, the substitution of a NAICS code for the SIC code, the notation that award is made only on the offeror's items specifically listed in block 29, and the addition of several blocks in the area of the form used as a receiving report by the Government. All of the changes involve blocks that are completed by the Government..

Item II—Definitions for "Contract Action" and "Contracting Action" (FAR Case 2000–402)

This final rule amends the FAR to provide for consistent use of the term "contract action." The rule changes the term "contracting action" to "contract action" throughout the FAR and makes other editorial changes to clarify the text.

Item III—Definitions for Sealed Bid and Negotiated Procurements (FAR Case 2000–403)

This final rule amends the FAR to clarify definitions that are used for sealed bid and negotiated procurements. The final rule—

- Moves the definitions of "bid sample" and "descriptive literature" from FAR Part 14 to FAR 2.101 because the definitions apply to more than one FAR part, e.g., parts 14 and 15;
- Amends those definitions and the definition of "offer" in accordance with plain language guidelines;
- Revises applicable provisions in FAR Part 52 to conform with the new definitions;
- Adds a new definition for "solicitation" at FAR 2.101; and
- Provides definitions for "bid" and "bidder" in FAR Part 28 because, as used in that part, the terms address sealed bid and negotiated acquisitions.

The rule clarifies terminology used in FAR 15.201(f), 15.609(e), and 35.007(g). Where we mean an entity that is actively seeking a contract, we use the term "prospective offeror." However, those cites describe processes that are set up to ensure fair and open competition. Therefore, any interested party is able to participate, including parties that the Government has not yet identified. Therefore, the rule uses the more general term "potential offeror."

Item IV—Procurement Integrity Rewrite (FAR Case 1998–024)

This final rule amends FAR parts 2, 3, 4, 9, 15, and 52 to rewrite the procurement integrity coverage (the implementation of section 27 of the Office of Federal Procurement Policy Act (41 U.S.C. 423) (more commonly referred to as the Procurement Integrity Act)) in plain language.

FAR 3.104 implements prohibitions, restrictions, and other requirements of the Procurement Integrity Act that are placed on certain agency officials that participate in Federal agency procurements. However, other statutes and regulations also govern the conduct of Government employees. While specific guidance pertaining to the Procurement Integrity Act at FAR 3.104 does not implement these other statutes and regulations, the rule does add guidance to alert these agency officials that they should seek advice from agency ethics officials before engaging in certain activities that could have serious consequences, including criminal prosecution.

These revisions to FAR 3.104 do not change either the requirements of the Procurement Integrity Act or change, in any manner, who is covered by, or the activities covered in, Office of Government Ethics regulations interpreting conflict of interest statutes.

Item V—Acquisition of Helium (FAR Case 2000–008)

This final rule revises FAR Subpart 8.5 and the clause at 52.208–8 to implement the Department of the Interior final rule regarding helium contracts that was published in the **Federal Register** at 63 FR 66760, December 3, 1998. The final rule—

- Changes the definitions;
- Eliminates the requirement for certain contractors and subcontractors to submit helium forecasts; and
- Establishes the requirement that contractors and subcontractors under contracts with a major helium requirement must report purchases of helium from Federal helium suppliers.

Item VI—HUBZone Program Applicability (FAR Case 2001–003)

The HUBZone Act of 1997 expanded the applicability of the HUBZONE Program to all agencies covered by the FAR after September 30, 2000, and is currently reflected in the FAR. This rule amends the FAR to simplify the existing language at FAR parts 12, 19, and 52.

Item VII—Application of Labor Clauses (FAR Case 1999–612)

This final rule affects all contracting officers who use the FAR. The rule—

- Moves the Prohibition of Segregated Facilities clause from the list at paragraph (b), to the list at paragraph (a), of the clause at 52.213–4 and clarifies the existing requirements of 41 CFR 60–1.8, promulgated by the Department of Labor under E.O. 11246. The Prohibition of Segregated Facilities clause must be included in contracts whenever the Equal Opportunity clause (FAR 52.222–26) is included.
- Moves the Equal Opportunity clause from the list at paragraph (b), to the list at paragraph (a), of the clause at 52.213–4 because the clause must be included in almost all contracts, even those under $10,000, in accordance with the requirements at FAR 22.802(a)(1) and 22.807(b). Even though included, the clause is inapplicable unless the aggregate value of contracts and subcontracts awarded to the contractor exceeds $10,000 in a year.
- Makes other revisions to the clause at FAR 52.222–26, Equal Opportunity, to include a definition of "United States" and incorporate the exception for work performed outside the United States.

Item VIII—Technical Amendments

These amendments update sections and make editorial changes at FAR 1.404, 5.207, 6.302–5, 9.104–3, 31.101, 52.219–19, and 52.219–20.

Dated: March 6, 2002.

RIN: 9000–AJ33

Federal Acquisition Regulation; Miscellaneous Cost Principles

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) are proposing to amend the Federal Acquisition Regulation (FAR) to delete the cost principle concerning transportation costs, and to revise the cost principles concerning cost of money, other business expenses, and deferred research and development costs.

DATES: Interested parties should submit comments in writing on or before May 20, 2002 to be considered in the formulation of a final rule.

ADDRESSES: Submit written comments to: General Services Administration, FAR Secretariat (MVP), 1800 F Street, NW, Room 4035, ATTN: Laurie Duarte, Washington, DC 20405.

Submit electronic comments via the Internet to: *farcase.2001–029@gsa.gov*. Please submit comments only and cite FAR case 2001–029 in all correspondence related to this case.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC, 20405, at (202) 501–4755 for information pertaining to status or publication schedules. For clarification of content, contact Jeremy Olson, at (202) 501–3221. Please cite FAR case 2001–029.

SUPPLEMENTARY INFORMATION:

A. Background

The Councils are proposing the following changes related to the cost principles at FAR 31.205–10, Cost of money; FAR 31.205–28, Other business expenses; FAR 31.205–45, Transportation costs; and FAR 31.205–48, Deferred research and development costs:

1. *Cost of money.* Revise the cost principle by deleting—

a. Portions of the current FAR 31.205–10(a)(i) and (a)(ii) that duplicate 48 CFR 9904.414, Cost Accounting Standard-Cost of Money as an Element of the Cost of Facilities Capital;

b. FAR 31.205–10(a)(2)(ii), (a)(3), and (b)(3), because these paragraphs duplicate the recordkeeping requirements at 31.201–2(d); and

c. The definitions of "Cost of capital committed to facilities" and "facilities capital" from FAR 31.001, Definitions, since these terms are not used elsewhere in the FAR. In addition, add a definition to FAR 2.101, Definitions, for the term "facilities capital cost of money" which is used in several places in the FAR.

2. *Other business expenses.* Delete the term "when allocated on an equitable basis" from FAR 31.205–28. It is unnecessary to repeat the requirement for allocation in this cost principle since it is already addressed at FAR 31.201–4, Determining allocability; FAR 31.202, Direct costs; and FAR 31.203, Indirect costs.

3. *Transportation.* Delete this cost principle in its entirety since an affirmative statement of allowability is unnecessary, and the allocation statement is already addressed at FAR 31.201–4, 31.202, and 31.203.

4. *Deferred research and development.* Delete the word "deferred" from the title to provide a more accurate description of the scope of this cost principle. Costs that are unallowable under this cost principle are unallowable regardless of whether they are charged in the current accounting period or deferred to a future accounting period.

This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The Councils do not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because most—contracts awarded to small entities use simplified acquisition procedures or are awarded on a competitive, fixed-price basis, and do not require application of the cost principles discussed in this rule. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. We invite comments from small businesses and other interested parties. The Councils will consider comments from small entities concerning the affected FAR Parts 2, 31, 47, and 52 in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 601, *et seq.* (FAR case 2001–029), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 2, 31, 47, and 52

Government procurement.

Dated: March 8, 2002.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA propose amending 48 CFR parts 2, 31, 47, and 52 as set forth below:

1. The authority citation for 48 CFR parts 2, 31, 47, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 2—DEFINITIONS OF WORDS AND TERMS

2. In section 2.101 add the definition, in alphabetical order, "Facilities capital cost of money" to read as follows:

2.101 Definitions.

* * * * *

Facilities capital cost of money means "cost of money as an element of the cost of facilities capital" as used at 48 CFR 9904.414, Cost accounting standard-cost of money as an element of the cost of facilities capital.

* * * * *

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

31.001 [Amended]

3. In section 31.001, remove the definitions "Cost of capital committed to facilities" and "facilities capital."

4. Revise section 31.205–10 to read as follows:

31.205–10 Cost of money.

(a) *General.* Cost of money—

(1) Is an imputed cost that is not a form of interest on borrowings (see 31.205–20);

(2) Is an "incurred cost" for cost-reimbursement purposes under applicable cost-reimbursement contracts and for progress payment purposes under fixed-price contracts; and

(3) Refers to—

(i) Facilities capital cost of money (48 CFR 9904.414); and

(ii) Cost of money as an element of the cost of capital assets under construction (48 CFR 9904.417).

(b) Cost of money is allowable provided—

(1) It is measured, assigned, and allocated to contracts in accordance with 48 CFR 9904.414 or 48 CFR 9904.417, as applicable;

(2) The requirements of 31.205–52, which limit the allowability of cost of money, are followed; and

(3) The estimated facilities capital cost of money is specifically identified and proposed in cost proposals relating to the contract under which the cost is to be claimed.

(c) Actual interest cost in lieu of the calculated imputed cost of money is unallowable.

5. In section 31.205–28, revise the introductory text to read as follows:

31.205–28 Other business expenses.

The following types of recurring costs are allowable:

* * * * *

31.205–45 [Reserved]

6. Remove and reserve section 31.205–45.

31.205–48 Research and development costs.

7. Revise the section heading of section 31.205–48, as set forth above; and remove "section" and add "subsection" in its place.

PART 47—TRANSPORTATION

8. In section 47.300, revise the introductory text of paragraph (b) to read as follows:

47.300 Scope of subpart.

* * * * *

(b) If a special requirement exists for application of any of these terms and conditions to other types of contracts; *e.g.*, cost-reimbursement contracts, for which transportation arrangements are normally the responsibility of the contractor and transportation costs are allowable, the contracting officer must use the terms and conditions prescribed in this subpart as a guide for—

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

9. In section 52.215–16, revise the date of the provision and paragraph (a) to read as follows:

52.215–16 Facilities Capital Cost of Money.

* * * * *

Facilities Capital Cost of Money (May 2002)

(a) Facilities capital cost of money will be an allowable cost under the contemplated contract, if the criteria for allowability in FAR 31.205–10(b) are met. One of the allowability criteria requires the prospective contractor to propose facilities capital cost of money in its offer.

* * * * *

RIN 9000–AJ34

Federal Acquisition Regulation; Contract Terms and Conditions Required To Implement Statute or Executive Orders—Commercial Items

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) are proposing to amend the Federal Acquisition Regulation (FAR) to update the clause regarding contract terms and conditions required to implement statute or Executive orders—commercial items.

DATES: Interested parties should submit comments in writing on or before May 20, 2002 to be considered in the formulation of a final rule.

ADDRESSES: Submit written comments to: General Services Administration, FAR Secretariat (MVP), 1800 F Street, NW. Room 4035, ATTN: Laurie Duarte, Washington, DC 20405.

Submit electronic comments via the Internet to: *farcase.2000–009@gsa.gov*. Please submit comments only and cite FAR case 2000–009 in all correspondence related to this case.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC., 20405, at (202) 501–4755 for information pertaining to status or publication schedules. For clarification of content, contact Ms. Victoria Moss, Procurement Analyst, at (202) 501–4764. Please cite FAR case 2000–009.

SUPPLEMENTARY INFORMATION:

A. Background

Federal Acquisition Regulation Part 12, Acquisition of Commercial Items, was developed to implement Title VIII of the Federal Acquisition Streamlining Act of 1994 (FASA) (Pub. L. 103–355). The regulations became effective on October 1, 1995. Several areas have been identified that need updating and clarification. This rule addresses some of those changes.

The list of contract terms and conditions required to implement statutes or Executive orders in the clause at FAR 52.212–5 is amended to ensure that required statutes enacted subsequent to FASA that contain civil or criminal penalties or specifically cite their applicability to commercial items are included on the list, and to ensure that any post-FASA items that did not meet this criteria are deleted from the list. In addition, the pre-FASA clauses and alternates that were inadvertently left off the list are added. The date of each clause is added to the list to identify what revision of the listed clause applies when this clause is added to a contract.

This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The Councils do not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule merely clarifies existing language and does not change existing policy. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. We invite comments from small businesses and other interested parties. The Councils will consider comments from small entities concerning the affected FAR Part 52 in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 601, *et seq.* (FAR case 2000–009), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 52

Government procurement.

Dated: March 13, 2002.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA propose amending 48 CFR part 52 set forth below:

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

1. The authority citation for 48 CFR part 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Amend section 52.212–5 by revising the date of the clause and paragraphs (a), (b), (c), and (e) to read as follows:

52.212–5 Contract Terms and Conditions Required to Implement Statutes or Executive Orders—Commercial Items.

* * * * *

Contract Terms and Conditions Required To Implement Statutes or Executive Orders Commercial Items (Date)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause, which is incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items: 52.233–3, Protest After Award (AUG 1996) (31 U.S.C. 3553).

(b) The Contractor agrees to comply with the FAR clauses in this paragraph (b) that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

[*Contracting Officer check as appropriate.*]

__ (1) 52.203–6, Restrictions on Subcontractor Sales to the Government (Jul 1995), with Alternate I (Oct 1995) (41 U.S.C. 253g and 10 U.S.C. 2402).
__ (2) 52.219–3, Notice of Total HUBZone Set-Aside (Jan 1999) (15 U.S.C. 657a).
__ (3) 52.219–4, Notice of Price Evaluation Preference for HUBZone Small Business Concerns (Jan 1999) (if the offeror elects to waive the preference, it shall so indicate in its offer) (15 U.S.C. 657a).
__ (4)(i) 52.219–5, Very Small Business Set-Aside (Mar 1999) (Pub. L. 103–403, section 304, Small Business Reauthorization and Amendments Act of 1994).

__ (ii) Alternate I to 52.225–3 (Feb 2000).
__ (iii) Alternate II to 52.225–3 (Feb 2000).
__ (23) 52.225–5, Trade Agreements (Feb 2002) (19 U.S.C. 2501, *et seq.*, 19 U.S.C. 3301 note).
__ (24) 52.225–13, Restriction on Certain Foreign Purchases (Jul 2000) (E.O. 12722, 12724, 13059, 13067, 13121, and 13129).
__ (25) 52.225–15, Sanctioned European Union Country End Products (Feb 2000) (E.O. 12849).
__ (26) 52.225–16, Sanctioned European Union Country Services (Feb 2000) (E.O. 12849).
__ (27) 52.232–29, Terms for Financing of Purchases of Commercial Items (Feb 2002) (41 U.S.C. 255(f), 10 U.S.C. 2307(f)).
__ (28) 52.232–30, Installment Payments for Commercial Items (Oct 1995) (41 U.S.C. 255(f), 10 U.S.C. 2307(f)).
__ (29) 52.232–33, Payment by Electronic Funds Transfer—Central Contractor Registration (May 1999) (31 U.S.C. 3332).
__ (30) 52.232–34, Payment by Electronic Funds Transfer Other than Central Contractor Registration (May 1999) (31 U.S.C. 3332).
__ (31) 52.232–36, Payment by Third Party (May 1999) (31 U.S.C. 3332).
__ (32) 52.239–1, Privacy or Security Safeguards (Aug 1996) (5 U.S.C. 552a).
__ (33)(i) 52.247–64, Preference for Privately Owned U.S.-Flag Commercial Vessels (Jun 2000) (46 U.S.C. Appx 1241).
__ (ii) Alternate I to 52.247–64 (Apr 1984).

(c) The Contractor agrees to comply with the FAR clauses in this paragraph (c), applicable to commercial services, that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

Contracting Officer check as appropriate.

__ (1) 52.222–41, Service Contract Act of 1965, as Amended (May 1989) (41 U.S.C. 351, *et seq.*).
__ (2) 52.222–42, Statement of Equivalent Rates for Federal Hires (May 1989) (29 U.S.C. 206 and 41 U.S.C. 351, *et seq.*).
__ (3) 52.222–43, Fair Labor Standards Act and Service Contract Act—Price Adjustment (Multiple Year and Option Contracts) (May 1989) (29 U.S.C. 206 and 41 U.S.C. 351, *et seq.*).
__ (4) 52.222–44, Fair Labor Standards Act and Service Contract Act—Price Adjustment (Feb 2002) (29 U.S.C. 206 and 41 U.S.C. 351, *et seq.*).
__ (5) 52.222–47, SCA Minimum Wages and Fringe Benefits Applicable to Successor Contract Pursuant to Predecessor Contractor Collective Bargaining Agreements (CBA) (May 1989) (41 U.S.C. 351, *et seq.*).

* * * * *

(e) The following clauses must be included in subcontracts:

(1) 52.219–8, Utilization of Small Business Concerns (Oct 2000) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $500,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219–8 in lower tier subcontracts that offer subcontracting opportunities.

(2) 52.222–26, Equal Opportunity (Feb 1999) (E.O. 11246).

(3) 52.222–35, Equal Opportunity for Disabled Special Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (Dec 2001) (38 U.S.C. 4212(a)).

(4) 52.222–36, Affirmative Action for Workers with Disabilities (Jun 1998) (29 U.S.C. 793).

(5) 52.222–41, Service Contract Act of 1965, as Amended (May 1989) (41 U.S.C. 351, *et seq.*).

(6) 52.247–64, Preference for Privately Owned U.S.-Flag Commercial Vessels (Jun 2000) (46 U.S.C. Appx 1241) (flowdown not required for subcontracts awarded beginning May 1, 1996).

While not required, a prime contractor may include in its subcontracts a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

[FAR Case 2001–015]

RIN: 9000–AJ35

Federal Acquisition Regulation; Prohibited Sources

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) are proposing to amend the Federal Acquisition Regulation (FAR) to implement Executive Order 13192, Lifting and Modifying Measures With Respect to the Federal Republic of Yugoslavia (Serbia and Montenegro), and other regulations of the Department of the Treasury that enforce economic sanctions imposed by the President.

DATES: Interested parties should submit comments in writing on or before May 20, 2002 to be considered in the formulation of a final rule.

ADDRESSES: Submit written comments to: General Services Administration, FAR Secretariat (MVP), 1800 F Street, NW., Room 4035, ATTN: Laurie Duarte, Washington, DC 20405.

Submit electronic comments via the Internet to: *farcase.2001–015@gsa.gov*. Please submit comments only and cite FAR case 2001–015 in all correspondence related to this case.

FOR FURTHER INFORMATION CONTACT: The FAR Secretariat, Room 4035, GS Building, Washington, DC, 20405, at (202) 501–4755 for information pertaining to status or publication schedules. For clarification of content, contact Ms. Cecelia Davis, Procurement Analyst, at (202) 219–0202. Please cite FAR case 2001–015.

SUPPLEMENTARY INFORMATION:

A. Background

This rule amends FAR Subpart 25.7 and the clause at 52.225–13, Restrictions on Certain Foreign Purchases, to implement Executive Order 13192, Lifting and Modifying Measures With Respect to the Federal Republic of Yugoslavia (Serbia and Montenegro), and other regulations of the Department of the Treasury that enforce economic sanctions imposed by the President.

This proposed rule removes Serbia from the list of prohibited sources at FAR 25.701; slightly modifies the restrictions relating to acquisition of supplies or services from Cuba, Iran, Iraq, Libya, North Korea, Sudan, and the territory of Afghanistan controlled by the Taliban; and requires authorization by the Department of the Treasury for any exceptions to these prohibitions, even when purchased overseas for use overseas. In addition, the rule expands the prohibition against acquisition from entities controlled by the Government of Iraq or other specially designated nationals to include all blocked persons, and provides the Department of Treasury website for access to the list of Specially Designated Nationals and Blocked Persons.

This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The Councils do not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the proposed amendments will only affect acquisitions from prohibited sources. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. We invite comments from small businesses and other interested parties. The Councils will consider comments from small entities concerning the affected FAR Parts 25 and 52 in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 601; *et seq.* (FAR case 2001–015), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 25 and 52

Government procurement.

Dated: March 13, 2002.

Al Matera,

Director, Acquisition Policy Division.

Therefore, DoD, GSA, and NASA propose amending 48 CFR parts 25 and 52 as set forth below:

1. The authority citation for 48 CFR parts 25 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 25—FOREIGN ACQUISITION

2. Revise section 25.701 to read as follows:

25.701 Restrictions.

(a) Except as authorized by the Office of Foreign Assets Control (OFAC) in the Department of the Treasury, agencies and their contractors and subcontractors must not acquire any supplies or services, if any Executive order administered by OFAC, or the Foreign Assets Control regulations set forth at 31 CFR chapter V would prohibit such a transaction by a person subject to the jurisdiction of the United States.

(b) Most transactions involving Cuba, Iran, Iraq, Libya, Sudan and the Taliban-controlled regions of Afghanistan are prohibited, as are most imports into the United States from North Korea. In addition, lists of proscribed entities and individuals are included in OFAC's list of Specially Designated Nationals and Blocked Persons. More information about these restrictions is available in the Foreign Assets Control regulations at 31 CFR chapter V and on OFAC's website at *http://www.treas.gov/ofac.*

25.702 [Amended]

3. Amend section 25.702 by removing "622–2520" and adding "622–2490" in its place.

25.1103 [Amended]

4. Amend section 25.1103 in paragraph (a) by removing "with a value exceeding $2,500".

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.212–5 [Amended]

5. Amend section 52.212–5 by redesignating paragraph (b)(20) as (b)(21) and redesignating paragraph (b)(21) as (b)(20), and in newly designated paragraph (b)(21) by removing "13121,".

52.213–4 [Amended]

6. Amend section 52.213–4 in paragraph (a)(1)(ii) by removing "13121,".

7. Amend section 52.225–13 by revising the date of the clause and paragraphs (a) and (b) to read as follows:

52.225–13 Restrictions on Certain Foreign Purchases.

* * * * *

Restrictions on Certain Foreign Purchases (Date)

(a) Except as authorized by the Office of Foreign Assets Control in the Department of the Treasury, the Contractor shall not acquire, for use in the performance of this contract, any supplies or services, if any Executive order administered by the Office of Foreign Assets Control, or the Foreign Assets Control regulations set forth at 31 CFR chapter V would prohibit such a transaction by a person subject to the jurisdiction of the United States.

(b) Most transactions involving Cuba, Iran, Iraq, Libya, Sudan and the Taliban-controlled regions of Afghanistan are prohibited, as are most imports into the United States from North Korea. Lists of proscribed entities and individuals are included in OFAC's list of Specially Designated Nationals and Blocked Persons. More information about these restrictions is available in the Foreign Assets Control regulations at 31 CFR chapter V and on OFAC's website at http://www.treas.gov/ofac.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at *http://www.nara.gov/fedreg/plawcurr.html*.

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at *http://www.access.gpo.gov/nara/nara005.html*. Some laws may not yet be available.

S.J. Res. 32/P.L. 107–152

Congratulating the United States Military Academy at West Point on its bicentennial anniversary, and commending its outstanding contributions to the Nation. (Mar. 14, 2002; 116 Stat. 77)

Last List March 14, 2002

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, go to *http://hydra.gsa.gov/archives/publaws-l.html* or send E-mail to **listserv@listserv.gsa.gov** with the following text message:

SUBSCRIBE PUBLAWS-L Your Name.

Note: This service is strictly for E-mail notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

Microfiche Editions Available...

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512–1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $699, or $764 for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $264. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $10.00 for each issue, or $10.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 67 FR 12345.

Printed on recycled paper.

Rules and Regulations

Federal Register
Vol. 67, No. 55
Thursday, March 21, 2002

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. 02–018–1]

Citrus Canker; Removal of Quarantined Area

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: We are amending the citrus canker regulations by removing a portion of Hillsborough County, FL, from the list of quarantined areas. The regulations require that an area be free from citrus canker for a period of at least 2 years before it may be removed from the list of quarantined areas. Surveys have shown that the quarantined area in Hillsborough County, FL, has been free of citrus canker since December 1999. This rule removes restrictions on the interstate movement of regulated articles from that portion of Hillsborough County, FL.

DATES: This interim rule is effective March 21, 2002. We will consider all comments we receive that are postmarked, delivered, or e-mailed by May 20, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comment (an original and three copies) to: Docket No. 02–018–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 02–018–1. If you use e-mail, address your comment to *regulations@aphis.usda.gov*. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and "Docket No. 02–018–1" on the subject line.

You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html*.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen Poe, Operations Officer, Surveillance and Emergency Programs Planning and Coordination, PPQ, APHIS, 4700 River Road Unit 134, Riverdale, MD 20737–1231; (301) 734–8899.

SUPPLEMENTARY INFORMATION:

Background

Citrus canker is a plant disease that affects plants and plant parts, including fresh fruit, of citrus and citrus relatives (Family *Rutaceae*). Citrus canker can cause defoliation and other serious damage to the leaves and twigs of susceptible plants. It can also cause lesions on the fruit of infected plants, which render the fruit unmarketable, and cause infected fruit to drop from the trees before reaching maturity. The aggressive A (Asiatic) strain of citrus canker can infect susceptible plants rapidly and lead to extensive economic losses in commercial citrus-producing areas.

The regulations to prevent the interstate spread of citrus canker are contained in 7 CFR 301.75–1 through 301.75–16 (referred to below as the regulations). The regulations restrict the interstate movement of regulated articles from and through areas quarantined because of citrus canker and provide for the designation of survey areas around quarantined areas. Survey areas undergo close monitoring by Animal and Plant Health Inspection Service (APHIS) and State inspectors for citrus canker and serve as buffer zones against the disease.

Under § 301.75–4(c) of the regulations, any State or portion of a State where an infestation is detected will be designated as a quarantined area and will retain that designation until the area has been free from citrus canker for 2 years.

A portion of Hillsborough County, FL, has been free of citrus canker since December 1999, and has thus met the requirement for declaration of eradication—that an area be free from citrus canker for a period of at least 2 years. In this case, regular and complete surveys have been conducted on an approximately monthly basis since the infestation was first detected, including surveys of all citrus trees located in both commercial groves and at residential properties. In addition, any wild citrus present in the area has also been surveyed.

Therefore, we are amending the citrus canker regulations by removing the portion of Hillsborough County, FL, from the list of quarantined areas. This action removes restrictions on the interstate movement of regulated articles from the portion of Hillsborough County, FL, that we are removing from the list of quarantined areas. With the removal of this area, there are no longer any quarantined areas within Hillsborough County, FL.

Immediate Action

Immediate action is warranted to remove restrictions on the interstate movement of regulated articles from the portion of Hillsborough County, FL, that we are removing from the list of quarantined areas based on its freedom from citrus canker for a period of at least 2 years. Under these circumstances, the Administrator has determined that prior notice and opportunity for public comment are contrary to the public interest and that there is good cause under 5 U.S.C. 553 for making this action effective less than 30 days after publication in the **Federal Register**.

We will consider comments we receive during the comment period for this interim rule (see **DATES** above). After the comment period closes, we will publish another document in the **Federal Register**. The document will include a discussion of any comments we receive and any amendments we are making to the rule as a result of the comments.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required by Executive Order 12866.

We are amending the citrus canker regulations by removing a portion of Hillsborough County, FL, from the list of quarantined areas. The regulations require that an area be free from citrus canker for a period of at least 2 years before it may be removed from the list of quarantined areas. Surveys have shown that the quarantined area in Hillsborough County, FL, has been free of citrus canker since December 1999. This rule removes restrictions on the interstate movement of regulated articles from that portion of Hillsborough County, FL.

Commercial citrus production in Hillsborough County accounts for only a small portion of the total citrus production in the State of Florida (see table 1 below).

TABLE 1.—HILLSBOROUGH COUNTY CITRUS PRODUCTION, 2000–2001 SEASON

	Boxes of citrus	Percentage of Florida total
All Round Oranges	8,759,000	3.9
All Grapefruit	224,000	0.48
All Citrus	9,179,000	3.3

While producers in the area that we are removing from the list of quarantined areas will benefit from removal of movement restrictions, it is unlikely that the benefit will be big enough to measure statistically. This action does not impose any costs on producers or on government entities.

The Regulatory Flexibility Act requires agencies to consider the economic impacts of their rules on small entities. The entities most likely to be affected by this rule are citrus producers in and around the area in Hillsborough County, FL, that we are removing from the list of quarantined areas. The Small Business Administration defines a firm engaged in agriculture as "small" if it has less than $750,000 in annual receipts. All of the four citrus grove firms in Hillsborough County, FL, qualify as small entities.

Citrus producers in the area that we are removing from the list of quarantined areas will benefit from having a greater choice of where to market their fruit. It is unlikely, however, that producer income or expenses would be affected in a measurable way.

It is difficult to quantify the benefits of removing an area from quarantine. While producers will have greater choice of where to market their citrus crops, most of the trees in the quarantined area have been destroyed. It is unlikely that the removal of the quarantine will have any measurable effect on producers or consumers.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

Accordingly, we are amending 7 CFR part 301 as follows:

PART 301—DOMESTIC QUARANTINE NOTICES

1. The authority citation for part 301 continues to read as follows:

Authority: 7 U.S.C. 166, 7711, 7712, 7714, 7731, 7735, 7751, 7752, 7753, and 7754; 7 CFR 2.22, 2.80, and 371.3.

Section 301.75–15 also issued under Sec. 204, Title II, Pub. L. 106–113, 113 Stat. 1501A–293; sections 301.75–15 and 301.75–16 also issued under Sec. 203, Title II, Pub. L. 106–224, 114 Stat. 400 (7 U.S.C. 1421 note).

§ 301.75–4 [Amended]

2. In § 301.75–4, paragraph (a), the entry for Hillsborough County is removed.

Done in Washington, DC, this 18th day of March 2002.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

7 CFR Part 800

[Docket No. FGIS–2001–003a]

RIN 0580–AA79

Fees for Official Inspection and Official Weighing Services

AGENCY: Grain Inspection, Packers and Stockyards Administration, USDA.

ACTION: Final rule.

SUMMARY: The Federal Grain Inspection Service (FGIS) of the Grain Inspection, Packers and Stockyards Administration (GIPSA) is increasing certain fees by approximately 4.6 percent; i.e., contract and non-contract hourly rates, certain unit rates, and the administrative tonnage fee. These fees apply only to official inspection and weighing services performed by GIPSA in the United States under the United States Grain Standards Act (USGSA), as amended. These increases are needed to cover increased operational costs resulting from the approximate 4.6 percent January 2002 Federal pay increase. GIPSA anticipates the increase in the user fees will generate approximately $703,000 in additional revenue.

EFFECTIVE DATE: April 22, 2002.

FOR FURTHER INFORMATION CONTACT: David Orr, Director, Field Management Division, at his E-mail address: *Dorr@gipsadc.usda.gov*, or telephone him at (202) 720–0228.

SUPPLEMENTARY INFORMATION:

Executive Order 12866, Regulatory Flexibility Act, and the Paperwork Reduction Act

This rule has been determined to be nonsignificant for the purpose of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

Also, pursuant to the requirements set forth in the Regulatory Flexibility Act, it has been determined that this final rule will not have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

GIPSA regularly reviews its user-fee-financed programs to determine if the fees are adequate. GIPSA has and will continue to seek out cost saving opportunities and implement appropriate changes to reduce costs. Such actions can provide alternatives to fee increases. However, even with these efforts, GIPSA's existing fee schedule will not generate sufficient revenues to cover program costs while maintaining an adequate reserve balance. Retained earnings balances are adjusted to reflect prior year revenue and obligations realized in the year reported. In FY 1999, GIPSA's operating costs were $23,176,643 with revenue of $22,971,204, resulting in a negative margin of $205,440. In FY 2000, GIPSA's operating costs were $24,146,428 with revenue of $23,150,188 that resulted in a negative margin of $996,240 and a negative reserve balance of $938,147. GIPSA's FY 2001 operating costs were $25,670,126 with revenue of $23,977,240 that resulted in a negative margin of $1,692,886. Using the most current financial data available for FY 2002, December 2001, GIPSA's operating costs were $6,923,247 with revenue of $7,131,883 that resulted in a positive margin of $208,247. However, the current reserve negative balance of $2,882,270 is well below the desired 3–month reserve of approximately $6 million. Employee salaries and benefits are major program costs that account for approximately 84 percent of GIPSA's total operating budget. The approximate general and locality salary increase averages 4.6 percent for GIPSA employees, effective January 2002, will increase GIPSA's costs by approximately $703,000.

GIPSA has reviewed the financial position of the inspection and weighing program based on the increased salary and benefit costs, along with the revised projected FY 2002 workload of 79 million metric tons. Based on the review, GIPSA has concluded that the approximate 4.6 percent salary increase will have to be recovered through increases in fees.

The fee increase primarily applies to entities engaged in the export of grain. Under the provisions of the USGSA, grain exported from the United States must be officially inspected and weighed. Mandatory inspection and weighing services are provided by GIPSA on a fee basis at 32 export facilities. All of these facilities are owned and managed by multi-national corporations, large cooperatives, or public entities that do not meet the criteria for small entities established by the Small Business Administration.

Some entities that request nonmandatory official inspection and weighing services at other than export locations could be considered small entities. The impact on these small businesses is similar to any other business; that is, an average 4.6 percent increase in the cost of official inspection and weighing services. This increase should not significantly affect any business requesting official inspection and weighing services. Furthermore, any of these small businesses that wish to avoid the fee increase may elect to do so by using an alternative source for inspection and weighing services. Such a decision should not prevent the business from marketing its products.

There would be no additional reporting or recordkeeping requirements imposed by this action. In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the information collection and recordkeeping requirements in Part 800 have been previously approved by the Office of Management and Budget under control number 0580–0013. GIPSA has not identified any other Federal rules which may duplicate, overlap, or conflict with this final rule.

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This action is not intended to have a retroactive effect. The USGSA provides in § 87g that no subdivision may require or impose any requirements or restrictions concerning the inspection, weighing, or description of grain under the Act. Otherwise, this final rule will not preempt any State or local laws, regulations, or policies unless they present irreconcilable conflict with this final rule. There are no administrative procedures that must be exhausted prior to any judicial challenge to the provisions of this final rule.

Background

On January 2, 2002, GIPSA proposed in the **Federal Register** (67FR25) to increase fees for official inspection and weighing services performed under the USGSA (7 U.S.C. 71 *et seq.*) by approximately 4.6 percent. The USGSA authorizes GIPSA to provide official grain inspection and weighing services and to charge and collect reasonable fees for performing these services. The fees collected are to cover, as nearly as practicable, GIPSA's costs for performing these services, including related administrative and supervisory costs. The current USGSA fees were published in the **Federal Register** on July 9, 2001 (66 FR 35751), and became effective on August 8, 2001. GIPSA regularly reviews its user-fee-financed programs to determine if the fees are adequate. GIPSA has and will continue to seek out cost-saving opportunities and implement appropriate changes to reduce costs. Such actions can provide alternatives to fee increases. However, even with these efforts, GIPSA's existing fee schedule will not generate sufficient revenues to cover program costs while maintaining an adequate reserve balance. Retained earnings balances are adjusted to reflect prior year revenue and obligations realized in the year reported. In FY 1999, GIPSA's operating costs were $23,176,643 with revenue of $22,971,204, resulting in a negative margin of $205,440. In FY 2000, GIPSA's operating costs were $24,146,428 with revenue of $23,150,188 that resulted in a negative margin of $996,240 and a negative reserve balance of $938,147. GIPSA's FY 2001 operating costs were $25,670,126 with revenue of $23,977,240 that resulted in a negative margin of $1,692,886. Using the most current financial data available for FY 2002, December 2001, GIPSA's operating costs were $6,923,247 with revenue of $7,131,883 that resulted in a positive margin of $208,247. However, the current reserve negative balance of $2,882,270 is well below the desired 3–month reserve of approximately $6 million. Employee salaries and benefits costs, which account for approximately 84 percent of GIPSA's total operating budget, have risen significantly over the years. GIPSA's average cost per hour in FY 1996 was $20.83 and has risen to $26.60 in FY 2001, a 27.7 percent

increase. Since FY 1996, GIPSA has increased fees six times to recover the Congressionally mandated salary increases each year as well as other pay and benefit increases such as longevity pay. The six fee increases have raised fees by approximately 22 percent over the FY 1996 levels.

While individual salary and benefit costs have increased since 1996, GIPSA has reduced overall salary and benefits costs by 12.8 percent through greater utilization of part-time and intermittent employees and improved program efficiencies. GIPSA has also reduced non-employee costs such as rent, utilities, and Departmental overhead by 1.4 percent.

The January 2002 salary increase averaged 4.6 percent for GIPSA employees, which equates to an estimated $703,000 increase. GIPSA has reviewed the financial position of the inspection and weighing program and concluded that fee increases are necessary to recover the estimated $703,000 increase in program costs. An average increase of 4.6 percent to hourly, certain unit fees, and the administrative tonnage fee is needed.

The current hourly fees are:

	Monday to Friday (6 a.m. to 6 p.m.)	Monday to Friday (6 p.m. to 6 a.m.)	Saturday, Sunday, and Overtime	Holidays
1–year contract	$27.40	$29.80	$38.60	$46.40
6–month contract	30.20	32.00	41.00	53.00
3–month contract	34.40	35.60	44.60	55.40
Non-contract	40.00	42.00	51.00	62.60

GIPSA has also identified certain unit fees, for services not performed at an applicant's facility, which contain direct labor costs and require a fee increase. Further, GIPSA has identified those costs associated with salaries and benefits that are covered by the administrative metric tonnage fee. The 4.6 percent cost-of-living increase to salaries and benefits covered by the administrative tonnage fee results in an overall increase of an average of 4.6 percent to the administrative tonnage fee.

Comment Review

GIPSA received 1 comment during the 30–day comment period from a grain trade association. The trade association stated that it consists of 1,000 grain, feed, processing, and grain-related companies, 70 percent of which are small entities. The commentor did not support the proposed rule. A summary of the comment and GIPSA's response is as follows:

The commentor opposed the fee increase and suggested that the proposed fee increase be offset through improved operating efficiencies and additional reductions in overhead. In addition, the commentor suggested GIPSA aggressively seek ways to reduce direct employee expenses through increased automation and contracting for official services so future mandated Federal pay increases will have less impact on the cost of providing official services. The commentor also stated that the agency should determine what programs could be terminated, scaled back, or consolidated to reduce administrative overhead.

The USGSA requires GIPSA to maintain a workforce of sufficient size and experience to meet the inspection and weighing needs of its applicants. GIPSA views its employees as valuable resources that facilitate the marketing of grain. Whenever possible, GIPSA has replaced vacant full-time permanent positions with part-time and intermittent employees to reduce administrative overhead costs related to employee salaries and benefits. Since FY 1996, GIPSA has decreased headquarters paid hours of overhead by 14.44 percent and other obligations by 1.4 percent. However, these reductions have not been enough to offset the increases in salaries and benefits. Further, GIPSA is constantly reviewing the inspection and weighing programs to assess service delivery and demand. Whenever, possible, available employees are used for temporary duty assignments within other Federal programs to further reduce administrative overhead costs. This action allows GIPSA the ability to temporarily downsize while maintaining an experienced workforce available for duty when service demands increase. GIPSA is continuing to review the issue of contracting for official services when appropriate. Efforts to contain and reduce costs have and will continue to be a high priority issue with GIPSA. GIPSA has and will continue to take action to reduce inspection and weighing costs whenever possible.

Final Action

Accordingly, GIPSA is applying an approximate 4.6 percent increase to certain hourly rates, certain unit rates, and the administrative tonnage fee, as proposed in 7 CFR 800.71: Table 1–Fees for Official Services Performed at an Applicant's Facility in an Onsite FGIS Laboratory; Table 2–Services Performed at Other Than an Applicant's Facility in an FGIS Laboratory; and Table 3, Miscellaneous Services.

List of Subjects in 7 CFR Part 800

Administrative practice and procedure, Grain.

For the reasons set out in the preamble, 7 CFR Part 800 is amended as follows:

PART 800—GENERAL REGULATIONS

1. The authority citation for part 800 continues to read as follows:

Authority: Pub. L. 94–582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

2. Section 800.71 is amended by revising Schedule A in paragraph (a) to read as follows:

§ 800.71 Fees assessed by the Service.

(a) * * *

Schedule A.—Fees for Official Inspection and Weighing Services Performed in the United States

TABLE 1.—FEES FOR OFFICIAL SERVICES PERFORMED AT AN APPLICANT'S FACILITY IN AN ONSITE FGIS LABORATORY[1]

	Monday to Friday (6 a.m. to 6 p.m.)	Monday to Friday (6 p.m. to 6 a.m.)	Saturday, Sunday, and overtime[2]	Holidays
(1) Inspection and Weighing Services Hourly Rates (per service representative)				
1–year contract	$28.60	$31.20	$40.40	$48.60
6–month contract	31.60	33.40	42.80	56.00
3–month contract	36.00	37.20	46.60	58.00
Non-contract	41.80	44.00	53.40	65.40
(2) Additional Tests (cost per test, assessed in addition to the hourly rate)[3]				
(i) Aflatoxin (other than Thin Layer Chromatography)				$8.50
(ii) Aflatoxin (Thin Layer Chromatography method)				20.00
(iii) Corn oil, protein, and starch (one or any combination)				1.50
(iv) Soybean protein and oil (one or both)				1.50
(v) Wheat protein (per test)				1.50
(vi) Sunflower oil (per test)				1.50
(vii) Vomitoxin (qualitative)				12.50
(viii) Vomitoxin (quantitative)				18.50
(ix) Waxy corn (per test)				1.50
(x) Fees for other tests not listed above will be based on the lowest noncontract hourly rate.				
(xi) Other services				
(a) Class Y Weighing (per carrier)				
(1) Truck/container				.30
(2) Railcar				1.25
(3) Barge				2.50
(3) Administrative Fee (assessed in addition to all other applicable fees, only one administrative fee will be assessed when inspection and weighing services are performed on the same carrier).				
(i) All outbound carriers (per-metric-ton)[4]				
(a) 1–1,000,000				$0.1152
(b) 1,000,001–1,500,000				0.1051
(c) 1,500,001–2,000,000				0.0568
(d) 2,000,001–5,000,000				0.0420
(e) 5,000,001–7,000,000				0.0230
(f) 7,000,001 +				0.0105

[1] Fees apply to original inspection and weighing, reinspection, and appeal inspection service and include, but are not limited to, sampling, grading, weighing, prior to loading stowage examinations, and certifying results performed within 25 miles of an employee's assigned duty station. Travel and related expenses will be charged for service outside 25 miles as found in § 800.72 (a).

[2] Overtime rates will be assessed for all hours in excess of 8 consecutive hours that result from an applicant scheduling or requesting service beyond 8 hours, or if requests for additional shifts exceed existing staffing.

[3] Appeal and reinspection services will be assessed the same fee as the original inspection service.

[4] The administrative fee is assessed on an accumulated basis beginning at the start of the Service's fiscal year (October 1 each year).

TABLE 2.—SERVICES PERFORMED AT OTHER THAN AN APPLICANT'S FACILITY IN AN FGIS LABORATORY[1] [2]

(1) Original Inspection and Weighing (Class X) Services	
(i) Sampling only (use hourly rates from Table 1)	
(ii) Stationary lots (sampling, grade/factor, & checkloading)	
(a) Truck/trailer/container (per carrier)	$19.25
(b) Railcar (per carrier)	28.90
(c) Barge (per carrier)	185.00
(d) Sacked grain (per hour per service representative plus an administrative fee per hundredweight) (CWT)	0.02
(iii) Lots sampled online during loading (sampling charge under (i) above, plus):	
(a) Truck/trailer container (per carrier)	9.95
(b) Railcar (per carrier)	19.25
(c) Barge (per carrier)	110.00
(d) Sacked grain (per hour per service representative plus an administrative fee per hundredweight) (CWT)	0.02
(iv) Other services	
(a) Submitted sample (per sample—grade and factor)	11.50
(b) Warehouseman inspection (per sample)	19.50
(c) Factor only (per factor—maximum 2 factors)	5.15
(d) Checkloading/condition examination (use hourly rates from Table 1, plus an administrative fee per hundredweight if not previously assessed) (CWT)	0.02
(e) Reinspection (grade and factor only. Sampling service additional, item (i) above)	12.80
(f) Class X Weighing (per hour per service representative)	55.00
(v) Additional tests (excludes sampling)	
(a) Aflatoxin (per test—other than TLC method)	29.00
(b) Aflatoxin (per test—TLC method)	110.00
(c) Corn oil, protein, and starch (one or any combination)	8.80
(d) Soybean protein and oil (one or both)	8.80
(e) Wheat protein (per test)	8.80

TABLE 2.—SERVICES PERFORMED AT OTHER THAN AN APPLICANT'S FACILITY IN AN FGIS LABORATORY[1] [2]—Continued

(f) Sunflower oil (per test)	8.80
(g) Vomitoxin (qualitative)	30.50
(h) Vomitoxin (quantitative)	37.50
(i) Waxy corn (per test)	10.00
(j) Canola (per test—00 dip test)	10.00
(k) Pesticide Residue Testing [3].	
(1) Routine Compounds (per sample)	210.00
(2) Special Compounds (per service representative)	110.00
(l) Fees for other tests not listed above will be based on the lowest noncontract hourly rate from Table 1..	
(2) Appeal inspection and review of weighing service.[4]	
(i) Board Appeals and Appeals (grade and factor)	79.50
(a) Factor only (per factor—max 2 factors)	41.80
(b) Sampling service for Appeals additional (hourly rates from Table 1).	
(ii) Additional tests (assessed in addition to all other applicable fees)	
(a) Aflatoxin (per test, other than TLC)	29.50
(b) Aflatoxin (TLC)	118.00
(c) Corn oil, protein, and starch (one or any combination)	16.80
(d) Soybean protein and oil (one or both)	16.80
(e) Wheat protein (per test)	16.80
(f) Sunflower oil (per test)	16.80
(g) Vomitoxin (per test—qualitative)	40.00
(h) Vomitoxin (per test—quantitative)	45.00
(i) Vomitoxin (per test—HPLC Board Appeal)	136.00
(j) Pesticide Residue Testing[3].	
(1) Routine Compounds (per sample)	210.00
(2) Special Compounds (per service representative)	110.00
(k) Fees for other tests not listed above will be based on the lowest noncontract hourly rate from Table 1..	
(iii) Review of weighing (per hour per service representative)	79.20
(3) Stowage examination (service-on-request)[3]	
(i) Ship (per stowage space) (Minimum $255.00 per ship).	51.00
(ii) Subsequent ship examinations (same as original) (Minimum $153.00 per ship)	
(iii) Barge (per examination)	41.00
(iv) All other carriers (per examination)	16.00

[1] Fees apply to original inspection and weighing, reinspection, and appeal inspection service and include, but are not limited to, sampling, grading, weighing, prior to loading stowage examinations, and certifying results performed within 25 miles of an employee's assigned duty station. Travel and related expenses will be charged for service outside 25 miles as found in § 800.72 (a).

[2] An additional charge will be assessed when the revenue from the services in Schedule A, Table 2, does not cover what would have been collected at the applicable hourly rate as provided in § 800.72 (b).

[3] If performed outside of normal business, 1–1/2 times the applicable unit fee will be charged.

[4] If, at the request of the Service, a file sample is located and forwarded by the Agency for an official agency, the Agency may, upon request, be reimbursed at the rate of $2.50 per sample by the Service.

TABLE 3.—MISCELLANEOUS SERVICES[1]

(1) Grain grading seminars (per hour per $55.00 service representative)[2]	$55.00
(2) Certification of diverter-type mechanical samplers (per hour per service representative)[2]	55.00
(3) Special weighing services (per hour per service representative)[2]	
(i) Scale testing and certification	55.00
(ii) Evaluation of weighing and material handling systems	55.00
(iii) NTEP Prototype evaluation (other than Railroad Track Scales)	55.00
(iv) NTEP Prototype evaluation of Railroad Track Scales (plus usage fee per day for test car)	55.00 110.00
(v) Mass standards calibration and reverification	55.00
(vi) Special projects	55.00
(4) Foreign travel (per day per service representative)	490.00
(5) Online customized data EGIS service	
(i) One data file per week for 1 year	500.00
(ii) One data file per month for 1 year	300.00
(6) Samples provided to interested parties (per sample)	2.60
(7) Divided-lot certificates (per certificate)	1.50
(8) Extra copies of certificates (per certificate)	1.50
(9) Faxing (per page)	1.50
(10) Special mailing (actual cost)	
(11) Preparing certificates onsite or during other than normal business hours (use hourly rates from Table 1)	

[1] Any requested service that is not listed will be performed at $55.00 per hour.

[2] Regular business hours-Monday through Friday-service provided at other than regular hours charged at the applicable overtime hourly rate.

Gerald E. Grinnell,
Acting Administrator, Grain Inspection, Packers and Stockyards Administration.

BILLING CODE 3410–EN–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2000–NE–14–AD; Amendment 39–12676; AD 2002–03–09 R1]

RIN 2120–AA64

Airworthiness Directives; Honeywell International Inc. (formerly AlliedSignal Inc. and Textron Lycoming) LTS101 Series Turboshaft and LTP101 Series Turboprop Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment revises an existing airworthiness directive (AD), that is applicable to Honeywell International Inc. (formerly AlliedSignal Inc. and Textron Lycoming) LTS101 series turboshaft and LTP101 series turboprop engines. The existing AD will become effective on March 27, 2002, and requires a one-time visual inspection for surface finish and a one-time fluorescent penetrant inspection for cracks of certain impellers installed on LTS101 series turboshaft and LTP101 series turboprop engines. This amendment requires the same inspections, and in addition, allows installation of impellers that pass those inspections. This revision to the existing AD is prompted by an inadvertent omission in the existing AD to include allowance of installation of impellers that pass inspections required by the AD. The actions specified by this AD are intended to prevent impeller failure from cracks in the impeller back face area, which could result in an uncontained engine failure.

DATES: Effective March 27, 2002. The incorporation by reference of certain publications listed in the rule was approved by the Director of the Federal Register as of March 27, 2002.

Comments for inclusion in the Rules Docket must be received on or before May 20, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of the Regional Counsel, Attention: Rules Docket No. 2000–NE–14–AD, 12 New England Executive Park, Burlington, MA 01803–5299. Comments may be inspected at this location, by appointment, between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Comments may also be sent via the Internet using the following address: *9-ane-adcomment@faa.gov*. Comments sent via the Internet must contain the docket number in the subject line.

The service information referenced in this AD may be obtained from Honeywell International Inc. Aerospace Services Attn.: Data Distribution, M/S 64–3/2101–201, PO Box 29003, Phoenix, AZ 85038–9003; telephone (602) 365–2493, fax (602) 365–5577. This information may be examined, by appointment, at the FAA, New England Region, Office of the Regional Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Robert Baitoo, Aerospace Engineer, Los Angeles Aircraft Certification Office, FAA, Transport Airplane Directorate, 3960 Paramount Blvd., Lakewood, CA 90712–4137; telephone (562) 627–5245, fax (562) 627–5210.

SUPPLEMENTARY INFORMATION: On February 5, 2002, the FAA issued AD 2002–03–09, Amendment 39–12650 (67 FR 7609, February 20, 2002), to require a one-time visual inspection for surface finish and a one-time fluorescent penetrant inspection for cracks of certain impellers installed on LTS101 series turboshaft and LTP101 series turboprop engines. That action was prompted by a report of a machining discrepancy that may have occurred during manufacture of the affected impellers. That AD will become effective on March 27, 2002.

In this revision the FAA has added to paragraph (c) the authority to allow the reinstallation of impellers P/N's 4–101–052–57 or 4–101–052–62 that pass the required inspections. In all other respects, the AD remains the same as currently published. The FAA is therefore making this revision effective on March 27, 2002, in order to reduce the paperwork burden on operators.

Manufacturer's Service Information

Honeywell International Inc. (formerly AlliedSignal Inc. and Textron Lycoming) has issued AlliedSignal Service Bulletin (SB) LT 101–72–30–0186, dated October 1, 1999, and Honeywell International SB LT 101–72–30–0186, Revision 1, dated April 25, 2000, that specify a one-time visual inspection for surface finish and a one-time fluorescent penetrant inspection for cracks of certain impellers.

Differences Between This AD and the Manufacturer's Service Bulletins

To assure that the unsafe condition is addressed in a timely fashion, this amendment will require a one-time visual inspection for surface finish and a one-time fluorescent penetrant inspection for cracks of impellers part numbers (P/N's) 4–101–052–57/–62 within 900 gas generator (Ng) cycles after the effective date of this AD.

FAA's Determination of an Unsafe Condition and Required Actions

Since an unsafe condition has been identified that is likely to exist or develop on other Honeywell International Inc. (formerly AlliedSignal Inc. and Textron Lycoming) LTS101 series turboshaft and LTP101 series turboprop engines of the same type design, this AD is being issued to prevent impeller failure from cracks in the impeller back face area, which could result in an uncontained engine failure.

Immediate Adoption of This AD

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are unnecessary, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before

VOL 67 ISS 55 MR 21 2002 UMI

and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2000–NE–14–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Analysis

This final rule does not have federalism implications, as defined in Executive Order 13132, because it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, the FAA has not consulted with state authorities prior to publication of this final rule.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Amendment 39–12650 (67 FR 7609, February 20, 2002) and by adding a new airworthiness directive, Amendment 39–12676, to read as follows:

2002–03–09 R1 Honeywell International Inc. (formerly AlliedSignal Inc. and Textron Lycoming): Amendment 39–12676. Docket No. 2000–NE–14–AD. Revises AD 2002–03–09, Amendment 39–12650.

Applicability

This airworthiness directive (AD) is applicable to Honeywell International Inc. (formerly AlliedSignal Inc. and Textron Lycoming) LTS101 series turboshaft and LTP101 series turboprop engines with the following centrifugal compressor impeller part numbers (P/N's) installed: 4–101–052–57 and 4–101–052–62, except those with a P/N or serial number (SN) listed in paragraphs 1.A.(1) through 1.A.(3) of AlliedSignal Service Bulletin (SB) LT 101–72–30–0186, dated October 1, 1999, or Honeywell International Inc. SB LT 101–72–30–0186, Revision 1, dated April 25, 2000. These engines are installed on, but not limited to Aerospatiale AS350, Eurocopter MBB–BK117 and HH–65A, Bell 222, Air Tractor AT–302, Piaggio P.166–DL3, Riley International R421, and Pacific Aero 08–600 aircraft.

Note 1: This AD applies to each engine identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For engines that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance

Compliance with this AD is required as indicated, unless already done.

To prevent impeller failure from cracks in the impeller back face area, which could result in an uncontained engine failure, do the following:

(a) Within 900 gas generator (Ng) cycles after the effective date of this AD, conduct a one-time visual inspection for surface finish and fluorescent penetrant inspection of impellers P/N 4–101–052–57 and 4–101–052–62 for cracks in accordance with paragraphs 3.A through 3.F. of the Accomplishment Instructions of AlliedSignal SB LT 101–72–30–0186, dated October 1, 1999, or Honeywell International Inc. SB LT 101–72–30–0186, Revision 1, dated April 25, 2000.

(b) Replace all impellers that exceed the acceptable limits of the Accomplishment Instructions of AlliedSignal Service Bulletin (SB) LT 101–72–30–0186, dated October 1, 1999, or Honeywell International Inc. SB LT 101–72–30–0186, Revision 1, dated April 25, 2000, with a serviceable impeller.

(c) After the effective date of this AD, do not install impeller P/N's 4–101–052–57 or 4–101–052–62, except those with an impeller P/N or SN listed in paragraphs 1. A.(1) through 1. A.(3) of AlliedSignal SB LT 101–72–30–0186, dated October 1, 1999, or Honeywell International Inc. SB LT 101–72–30–0186, Revision 1, dated April 25, 2000, and except those impellers that pass the inspection requirements of paragraph (a) of this AD.

Alternative Methods of Compliance

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angles Aircraft Certification Office (LAACO). Operators must submit their request through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, LAACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the LAACO.

Special Flight Permits

(e) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the aircraft to a location where the requirements of this AD can be done.

Documents That Have Been Incorporated By Reference

(f) The inspections must be done in accordance with the following SB's:

Document No.	Pages	Revision	Date
AlliedSignal SB LT 101–72–30–0186	All	Original	Oct. 1, 1999.
Total pages: 7			
Honeywell International Inc., SB LT 101–72–30–0186	1	Original	Oct. 1, 1999.
	2	1	Apr. 25, 2000.
	3–6	Original	Oct. 1, 1999.
	7	1	Apr. 25, 2000.
Total pages: 7			

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Honeywell International Inc. Aerospace Services Attn.: Data Distribution, M/S 64–3/2101–201, PO Box 29003, Phoenix, AZ 85038–9003; telephone (602) 365–2493, fax (602) 365–5577. Copies may be inspected, by appointment, at the FAA, New England Region, Office of the Regional Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC.

Effective Date

(g) This amendment becomes effective on March 27, 2002.

Issued in Burlington, Massachusetts, on March 8, 2002.

Jay J. Pardee,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF COMMERCE

Bureau of Export Administration

15 CFR Part 774

[Docket No. 020308050–2050–01]

RIN 0694–AC59

License Exception CIV Eligibility for Certain "Microprocessors" Controlled by ECCN 3A001

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Export Administration (BXA) maintains the Commerce Control List (CCL), which identifies those items subject to Department of Commerce export licensing requirements based on their characteristics. Consistent with technological changes, this final rule makes License Exception CIV available for certain microprocessors controlled by Export Control Classification Number (ECCN) 3A001 when they have a composite theoretical performance (CTP) of equal to or greater than 6,500 million theoretical operations per second (MTOPS), but less than or equal to 12,000 MTOPS. License Exception CIV authorizes exports and reexports to civil end-users for civil end-uses in Country Group D:1, except North Korea. CIV may not be used for exports or reexports to military end-users or end-uses.

This revision will decrease the number of license applications submitted to the Department of Commerce, which will decrease the burden to both the exporting community and the Department of Commerce.

DATES: This rule is effective March 21, 2002.

FOR FURTHER INFORMATION CONTACT: Bernie Kritzer, Acting Director, Office of Strategic Trade and Foreign Policy Controls, Bureau of Export Administration, Telephone: (202) 482–5953.

SUPPLEMENTARY INFORMATION:

Background: This rule implements the announcement made by President Bush on January 2, 2002 that the license exception level for exports of general purpose microprocessors would be raised from 6,500 MTOPS to 12,000 MTOPS. Such microprocessors are controlled in subsection a.3.a. of Export Control Classification Number (ECCN) 3A001 on the Commerce Control List, Supplement No. 1 to part 774 of the Export Administration Regulations (EAR). This rule amends ECCN 3A001 to provide that microprocessors in subsection a.3.a. with a composite theoretical performance up to 12,000 MTOPS are eligible for License Exception CIV (section 740.5 of the EAR). License Exception CIV authorizes exports and reexports to civil end-users for civil end-uses in Country Group D:1 (see Supplement No. 1 to part 740), except North Korea.

Although the Export Administration Act expired on August 20, 2001, the President, through Executive Order 13222 of August 17, 2001 (66 FR 44025 (August 22, 2001)), has continued the Export Administration Regulations in effect under the International Emergency Economic Powers Act.

Rulemaking Requirements

1. This final rule has been determined to be not significant for purposes of E.O. 12866.

2. Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act (PRA), unless that collection of information displays a currently valid OMB Control Number. This rule involves collections of information subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) These collections have been approved by the Office of Management and Budget under control numbers 0694–0106, "Reporting and Recordkeeping Requirements under the Wassenaar Arrangement," which carries a burden hour estimate of 5 minutes to record the information for each export and 1 minute to submit the report twice a year to BXA; and 0694–0088, "Multi-Purpose Application," which carries a burden hour estimate of 40 minutes to prepare and submit electronically and 45 minutes to submit manually on form BXA–748P. Send comments regarding these burden estimates or any other aspect of these collections of information, including suggestions for reducing the burden, to OMB Desk Officer, New Executive Office Building, Washington, DC 20503; and to the Regulatory Policy Division, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

3. This rule does not contain policies with Federalism implications as this term is defined in Executive Order 13132.

4. The provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a military and foreign affairs function of the United States (Sec. 5 U.S.C. 553(a)(1)). Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this final rule. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule under 5 U.S.C. or by any other law, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) are not applicable.

List of Subjects in 15 CFR part 774

Exports, Foreign trade.

Accordingly, part 774 of the Export Administration Regulations (15 CFR parts 730 through 799) is amended as follows:

1. The authority citation for part 774 continues to read as follows:

Authority: 50 U.S.C. app. 2401 *et seq.*; 50 U.S.C. 1701 *et seq.*; 10 U.S.C. 7420; 10 U.S.C. 7430(e); 18 U.S.C. 2510 *et seq.*; 22 U.S.C. 287c, 22 U.S.C. 3201 *et seq.*, 22 U.S.C. 6004; 30 U.S.C. 185(s), 185(u); 42 U.S.C. 2139a; 42 U.S.C. 6212; 43 U.S.C. 1354; 46 U.S.C. app. 466c; 50 U.S.C. app. 5; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, August 22, 2001.

PART 774—AMENDED

Supplement No. 1 to Part 774—Amended

2. In Supplement No. 1 to part 774 (the Commerce Control List), Category 3—Electronics, Export Control Classification Number (ECCN) 3A001 is

amended by revising the License Exceptions section to read as follows:

3A001 Electronic Components, as Follows (see List of Items Controlled)

* * * * *

License Exceptions

LVS: N/A for MT
Yes for:
$1500: 3A001.c
$3000: 3A001.b.1, b.2, b.3, .d, .e and .f
$5000: 3A001.a, and .b.4 to b.7
GBS: Yes for 3A001.a.1.b, a.2 to a.12, b.2, and b.8.
CIV: Yes for 3A001.a.3.a (for processors with a CTP less than or equal to 12,000 MTOPS), a.3.b, a.3.c, a.4, a.7, and a.11.

Customs Service

19 CFR Part 141

[T.D. 02–7]

RIN 1515–AD03

Andean Trade Preference Act

AGENCY: Customs Service, Department of the Treasury.

ACTION: Temporary rule; correction.

SUMMARY: On February 15, 2002, a temporary rule was published in the **Federal Register** as T.D. 02–07 (67 FR 7070–7071). Effective on February 15, 2002, this temporary rule permits importers of eligible articles that, but for the expiration of the ATPA, would have been entitled to duty-free treatment under the ATPA, the option to defer the payment of estimated Customs duties and fees after entry of those articles until May 16, 2002. The purpose of this document is to correct and clarify the wording of two sentences in the preamble of the temporary rule document. The substantive text of the temporary rule is unchanged.

EFFECTIVE DATE: This temporary rule remains effective on February 15, 2002, and expires on May 16, 2002.

FOR FURTHER INFORMATION CONTACT: Leon Hayward, Office of Field Operations, 202–927–3271.

SUPPLEMENTARY INFORMATION:

Background

On February 15, 2002, a temporary rule was published in the **Federal Register** (67 FR 7070–7071) as T.D. 02–07. Effective on February 15, 2002, this temporary rule permits importers of eligible articles that, but for the expiration of the ATPA, would have been entitled to duty-free treatment under the ATPA, the option to defer the payment of estimated Customs duties and fees after entry of those articles until May 16, 2002. This document corrects and clarifies the wording of two sentences in the preamble of the temporary rule document. The substantive text of the temporary rule is unchanged.

Corrections

The document published in the **Federal Register** as T.D. 02–7 on February 15, 2002 (67 FR 7070) is corrected as set forth below:

1. Beginning on page 7070, on the bottom of the third column, and continuing on page 7071 in the first column, the last sentence of the first paragraph of the "Summary" is removed and the following two sentences are added in its place to read as follows:

The Administration anticipates that the duty-free treatment accorded to merchandise under the provisions of the ATPA will be restored and made retroactive to the date of the initial termination of such duty-free treatment (December 4, 2001). There will be no extension of this extraordinary action.

2. On page 7071, in the "Background" portion of the document, in the second column, in the fourth paragraph, the last sentence is corrected to read as follows:

Accordingly, a one-time interim deferral of estimated duties and fees in anticipation of Congressional re-enactment of ATPA within the next 90 days is appropriate to further the national security interest in combating narcotic production and trafficking and related criminal and terrorist activities.

Approved: March 15, 2002.

Douglas M. Browning,

Acting Assistant Commissioner, Office of Regulations and Rulings.

BILLING CODE 4820–02–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 80

[FRL–7161–2]

RIN 2060–AJ80

Relaxation of Summer Gasoline Volatility Standard for the Denver/Boulder Area

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: EPA published a direct final rule on January 24, 2002, to relax the federal gasoline volatility standard that applies to gasoline supplied to the Denver/Boulder area from June 1st to September 15th (the ozone control season) of each year. However, we received an adverse comment during the 30 day comment period and are now withdrawing that direct final rule.

DATES: As of March 21, 2002, EPA withdraws the direct final rule published at 67 FR 3435, on January 24, 2002.

FOR FURTHER INFORMATION CONTACT: Richard Babst at (202) 564–9473.

SUPPLEMENTARY INFORMATION: Because EPA received adverse comment, we are withdrawing the direct final rule for "Relaxation of Summer Gasoline Volatility Standard for the Denver/Boulder Area." We published the direct final rule on January 24, 2002 (67 FR 3435), that would have approved the State of Colorado's request to relax the federal Reid Vapor Pressure ("RVP") gasoline standard that applies to gasoline supplied to the Denver/Boulder area from June 1st to September 15th (the ozone control season) of each year. That action would have amended our regulations to change the summertime RVP standard for the Denver area from 7.8 pounds per square inch ("psi") to 9.0 psi. We stated in that **Federal Register** document that if we received adverse comment by February 25, 2002, we would publish a timely notice of withdrawal in the **Federal Register**. We subsequently received an adverse comment. We will address the comment in a subsequent final action based on the parallel proposal also published on January 24, 2002 (67 FR 3468). As stated in the parallel proposal, we will not institute a second comment period on this action.

Dated: March 15, 2002.

Robert Brenner,

Acting Assistant Administrator for Office of Air and Radiation.

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 206

Extension of Application Period for Temporary Housing Assistance

CFR Correction

In Title 44 of the Code of Federal Regulations, revised as of October 1, 2001, on page 411, in § 206.101, paragraph (e)(1) is revised to read as follows:

§ 206.101 Temporary housing assistance.

* * * * *

(e) * * *

(1) *Application period.* The standard FEMA application period is the 60 days following the date the President declares an incident a major disaster or an emergency. The Regional Director may, however, extend the application period, when we anticipate that we need more time to collect applications from the affected population or to establish the same application deadline for contiguous Counties or States. After the application period has ended, FEMA will accept and process applications for an additional 60 days only from persons who can provide an acceptable explanation (and documentation to substantiate their explanation) for why they were not able to contact FEMA before the application period ended.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 54

[CC Docket No. 96-45; FCC 99-396]

Federal-State Joint Board on Universal Service

AGENCY: Federal Communications Commission.

ACTION: Correcting amendments.

SUMMARY: This document contains corrections to the final regulations (47 CFR 54.313) published in the **Federal Register** on December 30, 1999 (64 FR 73427). *See* FR Doc. 99-33766. The regulation related to the state certification of support for universal service funds. Inadvertently, two paragraphs were removed from 47 CFR 54.313. This document corrects that error.

DATES: Effective March 21, 2002.

FOR FURTHER INFORMATION CONTACT: Sharon Webber, Assistant Division Chief, Accounting Policy Division, Common Carrier Bureau, (202) 418-7400.

SUPPLEMENTARY INFORMATION:

Background

On December 30, 1999, the Federal Communications Commission (FCC) published in the **Federal Register** (64 FR 73427), a document amending § 54.313(c) of its rules. Inadvertently, paragraphs (c)(2) and (c)(3) were removed from that section. Subsequently, the Commission adopted a new rule, which added a new paragraph (b) and redesignated paragraphs (b) and (c) as paragraphs (c) and (d) of § 54.313. *See* FR Doc. 01-14008 (66 FR 30080). Because of the revision of this rule, the affected paragraph is now paragraph (d) of § 54.313. This document now corrects paragraph (d) of that rule.

Accordingly, 47 CFR part 54 is corrected by making the following correcting amendments:

PART 54—UNIVERSAL SERVICE

1. The authority citation for part 54 continues to read as follows

Authority: 47 U.S.C. 1, 4(I), 201, 205, 214, and 254 unless otherwise noted.

2. Revise paragraph (d) of § 54.313 to read as follows:

* * * * *

(d) *Filing Deadlines.* In order for a non-rural incumbent local exchange carrier in a particular State, and/or an eligible telecommunications carrier serving lines in the service area of a non-rural incumbent local exchange carrier, to receive federal high-cost support, the State must file an annual certification, as described in paragraph (c) of this section, with both the Administrator and the Commission. Support shall be provided in accordance with the following schedule:

(1) *First Program Year (January 1, 2000–December 31, 2000).* During the first program year (January 1, 2000–December 31, 2000), a carrier in a particular State shall receive support pursuant to § 54.311. If a State files the certification described in this section during the first program year, carriers eligible for support pursuant to § 54.309 shall receive such support pursuant to the following schedule:

(i) *Certifications filed on or before April 1, 2000.* Carriers subject to certifications that apply to the first and second quarters of 2000, and are filed on or before April 1, 2000, shall receive support pursuant to § 54.309 for the first and third quarters of 2000 in the third quarter of 2000, and support for the second and fourth quarters of 2000 in the fourth quarter of 2000. Such support shall be net of any support provided pursuant to section 54.311 for the first or second quarters of 2000.

(ii) *Certifications filed on or before July 1, 2000.* Carriers subject to certifications filed on or before July 1, 2000, shall receive support pursuant to § 54.309 for the fourth quarter of 2000 in the fourth quarter of 2000.

(iii) *Certifications filed after July 1, 2000.* Carriers subject to certifications filed after July 1, 2000, shall not receive support pursuant to § 54.309 in 2000.

(2) *Second program year (January 1, 2001–December 31, 2001).* During the second program year (January 1, 2001–December 31, 2001), a carrier in a particular State shall not receive support pursuant to §§ 54.309 or 54.311 until such time as the State files the certification described in this section. Upon the filing of the certification described in this section, support shall be provided pursuant to the following schedule:

(i) *Certifications filed on or before October 1, 2000.* Carriers subject to certifications filed on or before October 1, 2000 shall receive support pursuant to §§ 54.309 or 54.311, whichever is applicable, in the first, second, third, and fourth quarters of 2001.

(ii) *Certifications filed on or before January 1, 2001.* Carriers subject to certifications filed on or before January 1, 2001 shall receive support pursuant to §§ 54.309 or 54.311, whichever is applicable, in the second, third, and fourth quarters of 2001. Such carriers shall not receive support pursuant to §§ 54.309 or 54.311, whichever is applicable, in the first quarter of 2001.

(iii) *Certifications filed on or before April 1, 2001.* Carriers subject to certifications filed on or before April 1, 2001 shall receive support pursuant to §§ 54.309 or 54.311, whichever is applicable, in the third and fourth quarters of 2001. Such carriers shall not receive support pursuant to §§ 54.309 or 54.311, whichever is applicable, in the first or second quarters of 2001.

(iv) *Certifications filed on or before July 1, 2001.* Carriers subject to certifications filed on or before July 1, 2001 shall receive support pursuant to §§ 54.309 or 54.311, whichever is applicable, in the fourth quarter of 2001. Such carriers shall not receive support pursuant to §§ 54.309 or 54.311, whichever is applicable, in the first, second, or third quarters of 2001.

(v) *Certifications filed after July 1, 2001.* Carriers subject to certifications filed after July 1, 2001 shall not receive support pursuant to §§ 54.309 or 54.311, whichever is applicable, in 2001.

(3) *Subsequent program years (January 1–December 31).* During the program years subsequent to the second program year (January 1, 2001–December 31, 2001), a carrier in a particular State shall not receive support pursuant to § 54.309 or § 54.311 until such time as the State files the certification described in this section. Upon the filing of the certification described in this section, support shall be provided pursuant to the following schedule:

(i) *Certifications filed on or before October 1.* Carriers subject to certifications filed on or before October 1 shall receive support pursuant to § 54.309 or § 54.311, whichever is applicable, in the first, second, third, and fourth quarters of the succeeding year.

(ii) *Certifications filed on or before January 1.* Carriers subject to certifications filed on or before January 1 shall receive support pursuant to § 54.309 or § 54.311, whichever is applicable, in the second, third, and fourth quarters of that year. Such carriers shall not receive support pursuant to § 54.309 or § 54.311, whichever is applicable, in the first quarter of that year.

(iii) *Certifications filed on or before April 1.* Carriers subject to certifications filed on or before April 1 shall receive support pursuant to § 54.309 or § 54.311, whichever is applicable, in the second, third, and fourth quarters of that year. Such carriers shall not receive support pursuant to § 54.309 or § 54.311, whichever is applicable, in the first or second quarters of that year.

(iv) *Certifications filed on or before July 1.* Carriers subject to certifications filed on or before July 1 shall receive support pursuant to § 54.309 or § 54.311, whichever is applicable, beginning in the fourth quarter of that year. Such carriers shall not receive support pursuant to § 54.309 or § 54.311, whichever is applicable, in the first, second, or third quarters of that year.

(v) *Certifications filed after July 1.* Carriers subject to certifications filed after July 1 shall not receive support pursuant to § 54.309 or § 54.311, whichever is applicable, in that year.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

CFR Correction

In Title 49 of the Code of Federal Regulations, Parts 100 to 185, revised as of October 1, 2001, on page 83, in § 171.8, the definitions of *Psi*, *Psia*, and *Psig* are revised to read as follows:

§ 171.8 Definitions and abbreviations.

* * * * *

Psi means pounds per square inch.

Psia means pounds per square inch absolute.

Psig means pounds per square inch gauge.

RIN 1018-AH73

Endangered and Threatened Wildlife and Plants; Re-opening of Comment Period on the Sacramento Splittail Final Rule

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule; re-opening of comment period.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the re-opening of the comment period for the final rule on the Sacramento splittail (*Pogonichthys macrolepidotus*). Comments previously submitted need not be resubmitted as they will be incorporated into the public record as part of this re-opened comment period, and will be fully considered in the final rule. We are re-opening the comment period to invite comments and to obtain peer review on the statistical analysis completed by us to re-analyze the available splittail abundance data. We are also inviting additional comments on the status of and factors affecting the species, as first solicited in the January 12, 2001 (66 FR 2828), comment period and re-solicited in the May 8, 2001 (66 FR 23181), and August 17, 2001 (66 FR 43145), re-openings of same.

DATES: We will accept public comments until October 15, 2002.

ADDRESSES: *Comment Submission:* If you wish to comment, you may submit your comments and materials concerning this proposal by any one of several methods:

1. You may submit written comments and information by mail to the Field Supervisor, Sacramento Fish and Wildlife Office, U.S. Fish and Wildlife Service, 2800 Cottage Way, Suite W-2605, Sacramento, California 95825.

2. You may hand-deliver comments to our Sacramento Fish and Wildlife Office, during normal business hours, at the address given above.

Comments and materials received will be available for inspection, by appointment, during normal business hours at the address under (1) above.

FOR FURTHER INFORMATION CONTACT: For general information, Susan Moore, at the above address (telephone 916/414-6600; facsimile 916/414-6713).

SUPPLEMENTARY INFORMATION:

Background

The Sacramento splittail (hereafter splittail) represents the only extant species in its genus in North America. For a detailed description of the species, see the Recovery Plan for the Sacramento/San Joaquin Delta Native Fishes (Service 1996), references within that plan, and Moyle *et al.* (2001 in prep.).

Splittail are endemic to certain waterways in California's Central Valley, where they were once widely distributed (Moyle 1976). Splittail presently occur in Suisun Bay, Suisun Marsh, the San Francisco Bay-Sacramento-San Joaquin River Estuary (Estuary), the Estuary's tributaries (primarily the Sacramento and San Joaquin rivers), the Cosumnes River, the Napa River and Marsh, and the Petaluma River and Marsh. The splittail no longer occurs throughout a significant portion of its former range.

Pursuant to the Endangered Species Act of 1973, as amended (Act), the splittail was listed as a threatened species on February 8, 1999 (64 FR 5963). In this previous listing determination, we found that changes in water flows and water quality resulting from export of water from the Sacramento and San Joaquin rivers, periodic prolonged drought, loss of shallow water habitat, and the effects of agricultural and industrial pollutants were significant factors in the splittail's decline.

Subsequent to the publication of the final rule, plaintiffs in the cases *San Luis & Delta-Mendota Water Authority* v. *Anne Badgley, et al.* and *State Water Contractors, et al.* v. *Michael Spear, et al.* commenced action in Federal Eastern District Court of California, challenging the listing of the splittail as threatened, alleging various violations of the Act and of the Administrative Procedure Act (5 U.S.C. 551 *et seq.*). We, as directed by the court, and pursuant to the Act, provided notice of the opening of a comment period regarding the threatened status for the splittail, from January 12, 2001, to February 12, 2001 (66 FR 2828). In addition, we re-opened the comment period on two additional occasions; from May 8, 2001, to June 7, 2001 (66 FR 23181), and from August 17, 2001, to October 1, 2001 (66 FR 43145). We are now re-opening the comment period for a fourth time to obtain peer-review and public comment on the statistical analysis used to analyze the abundant data available for splittail, and to seek public comment on the status of the species (as first solicited in 66 FR 2828). Upon the close of this comment period, we will make our determination whether the splittail warrants the continued protection of the Act.

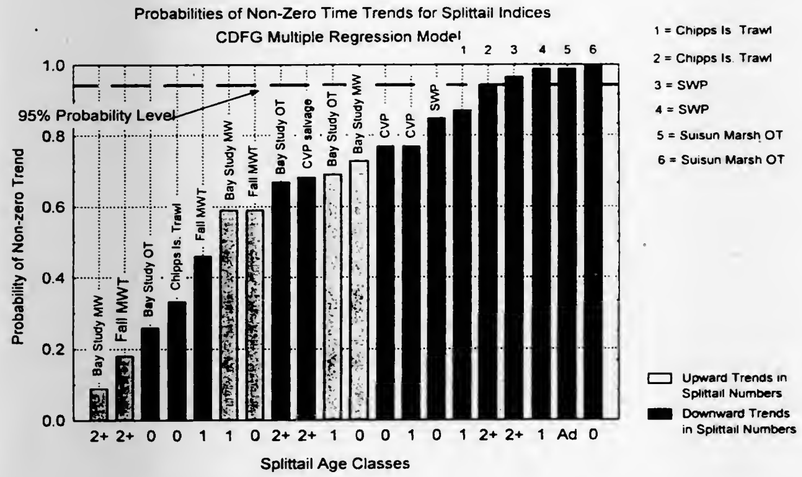
The approach currently used by us to analyze the best scientifically and commercially available splittail abundance data differs from methods employed previously. In the February 8, 1999, final rule and the January 12, 2001, and May 8, 2001, re-openings of the comment periods, we relied primarily on the unstratified Mann-Whitney U-test approach utilized by Meng and Moyle (1995), first published in the *Transactions of the American Fisheries Society*. See 66 FR 2828 for a complete description of the Meng and Moyle (1995) method. In the August 17, 2001, re-opening of the comment period, we employed permutation-based exact calculations of p-values for stratified Mann-Whitney U-tests to analyze data derived from the Meng and Moyle (1995), Sommer *et al.* (1997), and California Department of Fish and Game (CDFG) methodologies. We also employed a polynomial regression model and a crude exponential decay analysis in the August 17, 2001, comment period. See 66 FR 43145 for a complete description of the revised methods.

Statistical Analysis of Multiple Linear Regression Model

We have carefully considered all comments and responses. In regard to the analysis of splittail population trends, we now employ a statistical analysis of an abundance index and Multiple Linear Regression (MLR) model jointly developed and submitted by the CDFG (Rempel 2001) and the United States Bureau of Reclamation (USBR) (Michny 2001). The model is hereafter referred to as the CDFG/USBR MLR model and provides the most sound basis, to date, for statistically evaluating temporal trends of splittail abundance data.



The CDFG/USBR MLR model includes HYDROLOGY and TIME (year) as independent variables and ABUNDANCE INDICES as the dependent variable. It also incorporates corrected splittail abundance data (Rempel 2001). We consider this statistical approach superior to the previous practice of using unstratified Mann-Whitney U-tests (Meng and Moyle 1995; Sommer *et al.* 1997) because it does not require arbitrarily dividing an inherently continuous data set into "before" and "after" categories (see previous discussion of this issue in 66 FR 43145). We also consider the CDFG/USBR MLR model superior to the permutation-based, exact calculations of p-values for stratified Mann-Whitney U-tests discussed in 66 FR 43145 because of substantive scientific issues raised by Rempel (2001), Michny (2001) and others, specifically, that such an analysis inappropriately combines results from differing survey methods (i.e. midwater trawl, otter trawl, beach seine, salvage) and considers primarily adult age class splittail. We further consider the CDFG/USBR MLR model superior to the polynomial regression model presented in 66 FR 43145 because existing abundance index monitoring programs have not been conducted for a sufficient duration to provide for reasonably conclusive application of the polynomial model (as concluded in 66 FR 43145). We also support use of the CDFG/USBR MLR model because of the facility with which it can be applied to all sets of splittail age class data from all seven abundance monitoring data sets (a total of 20 discrete sets of age-specific abundance monitoring data). Lastly, we have omitted the exponential decay model found in 66 FR 43145 because: (1) It was found by respondents to be insufficient to describe interactions in a complex aquatic ecosystem; and (2) the CDFG Mann-Whitney U-test results upon which the exponential decay calculation was based have since been superceded by the CDFG/BOR MLR model.

The CDFG/USBR MLR model explicitly controls for potential confounding effects of hydrological year type, the factor that is nearly unanimously viewed as the single strongest predictor of splittail year class strengths (e.g., Moyle *et al.* 2001 in prep.), by utilizing the number of days total delta inflow (DAYFLOW, California Department of Water Resources) exceeds 1,558 cubic meters per second (cms) (55,000 cubic feet per second (cfs)) during the February through May spawning/rearing period as a predictor (independent variable). This is conceptually comparable, yet superior, to the stratified Mann-Whitney U-tests presented in 66 FR 43145, which also controlled for hydrological year type. There is, however, one potentially important assumption associated with the CDFG/USBR MLR model that remains untested: The assumption that there is a lack of interaction between the HYDROLOGY and TIME variables. The CDFG/USBR MLR model assumes that the long term probabilities of high and low Delta inflow years are not systematically changing over time. If in fact those probabilities are systematically changing over time (due to either changing climate or changing water management policy), the coefficients for the TIME variable would be incapable of detecting the influence of the potentially changing HYDROLOGY component of splittail abundance trends. We believe this assumption can and should be tested against existing longitudinal hydrological data bases, with future changes to be determined once: (1) Sufficient splittail abundance data exist to ensure conclusive application of the polynomial model (i.e. multiple peaks and troughs); and (2) the cumulative expected hydrologic effects of potential large-scale water resource projects (i.e. potential projects such as the Folsom Dam reoperation and height increase, Shasta Dam height increase, Sites Reservoir, Colusa Basin off stream storage, increased pumping at export facilities, etc.) are more clearly understood. These potential future actions, and possibly long term climate changes, may appreciably change the timing, duration, magnitude and/or frequency of floodplain inundation within the splittail's range, thus influencing future population trends.

Discussion of CDFG/USBR MLR Model Results

The TIME variable captures temporal trends in the population index data. Its regression coefficient will be negative if splittail abundance is trending downward over time and positive if splittail abundance is trending upward over time. The probabilities of any given coefficient reflecting a true nonzero time trend are 1-p, where p is the standard statistical probability for the null hypothesis (of a zero trend). Thus, a "p-value" of 0.05 would be the same as a 95 percent probability that the corresponding TIME coefficient reflects a true nonzero downward or upward trend in splittail abundance. Results of the CDFG/USBR MLR model as presented by Rempel (2001: Table 3) for CDFG and Michny (2001: Table 1) for USBR reveal that 14 of 20 abundance monitoring data sets for splittail show downward trends (i.e., have negative coefficients for the TIME variable). In addition to a high frequency of negative coefficients that would be highly unlikely by chance alone (exact one tailed p = 0.0577; binomial test, H_0=0.50, N_1=6, N_2=14)(StatXact 4: CYTEL Software Corp. 2000), the median (middle value) probability of nonzero negative trends (0.81 or 81 percent) is also clearly greater than the median probability of nonzero positive trends (0.59 or 59 percent) (Figure 1 below), to an extent that would be highly unlikely by chance alone (exact one tailed p= 0.0303, Wilcoxon-Mann-Whitney test).

Figure 1.

All four coefficients for the TIME variable that exceed a 95 percent probability (classic 0.05 alpha level statistical significance criterion) for a true nonzero trend are negative. A fifth negative TIME variable coefficient is nearly statistically significant (p=0.057). Due to the very limited statistical power associated with the abundance monitoring data sets for splittail (see discussion of this topic in 66 FR 43145) there is substantive bias in favor of type II statistical error, i.e., failing to correctly reject the null hypothesis (of no time trends). Low statistical power is not unique to the splittail data sets. Due to the inherent high variability in fisheries and wildlife abundance data, for applied purposes (such as detecting oil spill impacts on marine bird populations) it has become "customary" to use an alpha level of 0.20 (i.e., an 80 percent probability of true nonzero trends) for statistical tests of population trends over time (Day *et al.* 1997; Murphy *et al.* 1997; Irons *et al.* 2000; Wiens *et al.* 2001). Wiens *et al.* (2001:890) further state that even using an alpha level of 0.20, "* * * there remains the question of how blindly one should follow the results of statistical (significance) testing." Furthermore, Taylor and Gerrodette (1993) persuasively argue that because of the low statistical power that is so often characteristic of abundance monitoring data sets for rare species, "* * * detection of a [statistically significant] decline should not be a necessary criterion for enacting conservation measures * * *." Referring to the management of a rare species of porpoise, the vaquita, Taylor and Gerrodette (1993) caution that due to the low statistical power of abundance monitoring data, "* * * if we were to wait for a statistically significant decline before instituting stronger protective measures, the vaquita would probably go extinct first." Although splittail are not as rare as vaquita, the "boom-or-bust" reproductive biology of splittail results in such high-variance abundance monitoring data that the limitations on statistical power are as severe as Taylor and Gerrodette (1993) encountered with the vaquita. We must therefore take into consideration the issue of statistical power when interpreting the splittail abundance data. We accomplish this by evaluating all trends, not just the trends that meet traditional (p=0.05) criteria for statistical significance. Those traditional criteria assume a much higher standard of statistical power than the splittail data are able to meet. The inherent difficulty in effectively surveying splittail is likely to result in considerable scientific uncertainty and low statistical power to detect actions' effects. Recent studies indicate that these constituents, and the uncertainty and risk associated with them, favor a precautionary approach (Thompson *et al.* 2000, Slooten *et al.* 2000). Under such circumstances, and given the intrinsically precautionary nature of section 4 of the Act, we must consider the preponderance of the data, including both statistically significant and insignificant trends. Of 14 negative coefficients, 7 have a probability of 80 percent or greater (p=0.20) to reflect true nonzero downward trends in splittail abundance. Of 6 positive coefficients, 0 (none) have a probability of 80 percent or greater to reflect true nonzero upward trends in splittail abundance. This asymmetry in the results is highly significant (exact one tailed p=0.022, Fisher's exact test, "mid p" corrected) (StatXact 4: CYTEL Software Corp. 2000) and clearly indicates a preponderance of data consistent with an "apparent" declining trend in splittail abundance.

The four highest, statistically significant (at traditional levels) probabilities of a nonzero downward splittail population trend are exhibited by the Suisun Marsh survey (Age-0 and adult) and in the data collected via fish salvage operations at the State Water Project (SWP) Skinner Delta Fish Protective Facility (Age-1, and Age-2 and greater). The decline evident in the Chipps Island Trawl (Age-2 and greater) is nearly statistically significant at traditional levels (94.3 percent probability). Two additional probabilities of a nonzero downward splittail population trend are evident at the 80 percent probability level; Chipps Island Trawl (Age-1) and SWP (Age-0).

We fully concur with the statements of various respondents that abundance monitoring data for splittail have

methodological weaknesses of one sort or another; none of the surveys were designed specifically to rigorously estimate splittail population numbers (see Moyle et al. 2001 in prep.; Meng and Moyle 1995; and Sommer et al. 1997 for descriptions of surveys). However, existing data sets do constitute best available scientific information for the species.

Public Comments Solicited

We will accept written comments during this re-opened comment period, and comments should be submitted to the Sacramento Fish and Wildlife Office as found in the **ADDRESSES** section.

RIN 0648–AP91

Sea Turtle Conservation; Restrictions to Fishing Activities

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Interim final rule; request for comments.

SUMMARY: NMFS is enacting a seasonally-adjusted gear restriction by closing the Mid-Atlantic Exclusive Economic Zone (EEZ) waters to fishing with gillnets with a mesh size larger than 8 inch (20.3 cm) stretched mesh, starting on March 15, 2002. The purpose of this action is to reduce the impact of the large-mesh gillnet fisheries on endangered and threatened species of sea turtles primarily from the monkfish fishery which has previously demonstrated a high sea turtle bycatch and mortality rate. The areas restricted to fishing with gillnets larger than 8 inch stretched mesh and the times are as follows: Waters north of 33°51.0′ N (North Carolina/South Carolina border at the coast) and south of 35°46.0′ N (Oregon Inlet)—at all times; waters north of 35°46.0′ N (Oregon Inlet) and south of 36°22.5′ N (Currituck Beach Light, NC)—from March 16 through January 14; waters north of 36°22.5′ N (Currituck Beach Light, NC) and south of 37°34.6′ N (Wachapreague Inlet, VA)—from April 1 through January 14; waters north of 37° 34.6′ N (Wachapreague Inlet, VA) and south of 37°56.0′ N (Chincoteague, VA)—from April 16 through January 14. Waters north of 37°56.0′ N (Chincoteague, VA) will not be affected by this rule. NMFS also intends to publish a permanent rule establishing these seasonal restrictions and is seeking comments on this interim final rule.

DATES: This interim final rule is effective on March 15, 2002 through 240 days after March 15, 2002. Comments on this interim final rule are requested and must be postmarked or transmitted by facsimile by 5 p.m., Eastern Standard Time, on June 19, 2002. Comments transmitted via e-mail or the Internet will not be accepted.

ADDRESSES: Send written comments on this interim final rule to the Chief, Endangered Species Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910. Comments may also be sent via fax to 301–713–0376, Attn: Chief, Endangered Species Division. Comments will not be accepted if submitted via e-mail or the Internet. Copies of the Environmental Assessment (EA) prepared for this interim final rule may also be requested at the same address.

FOR FURTHER INFORMATION CONTACT: David M. Bernhart (ph. 727–570–5312, fax 727–570–5517, e-mail *David.Bernhart@noaa.gov*), or Barbara A. Schroeder (ph. 301–713–1401, fax 301–713–0376, e-mail *Barbara.Schroeder@noaa.gov*).

SUPPLEMENTARY INFORMATION: All sea turtles that occur in U.S. waters are listed as either endangered or threatened under the Endangered Species Act of 1973 (ESA). The Kemp's ridley (*Lepidochelys kempii*), leatherback (*Dermochelys coriacea*), and hawksbill (*Eretmochelys imbricata*) are listed as endangered. Loggerhead (*Caretta caretta*) and green (*Chelonia mydas*) turtles are listed as threatened, except for populations of green turtles in Florida and on the Pacific coast of Mexico, which are listed as endangered.

Under the ESA and its implementing regulations, taking sea turtles—even incidentally—is prohibited, with exceptions for threatened species identified in 50 CFR 223.206. The incidental take of endangered species may be authorized only by an incidental take statement provided or an incidental take permit issued pursuant to section 7 or 10 of the ESA.

Background

Beginning in 1995, sea turtle strandings off North Carolina dramatically increased during April and May, particularly near the area between Hatteras Inlet and Oregon Inlet. This new stranding pattern continued and intensified throughout the rest of the 1990's, and North Carolina sea turtle strandings grew to record levels. Increasing strandings coincided with increasing effort in the monkfish gillnet fishery, which first began off North Carolina in 1995. In April and May 2000, the largest-ever fisheries-related stranding event occurred: 280 sea turtles, 275 of them threatened loggerhead sea turtles, stranded in two short periods. Four of the carcasses were still entangled in gillnet gear with a larger than 8 inch stretched mesh size. Three fisheries were active in offshore waters the week prior to the strandings: Hook-and-line fishing for mackerel, bluefish gillnetting, and monkfish gillnetting. The mesh sizes of the gear recovered with the stranded turtles were only consistent with gillnets for monkfish. There was no evidence that the turtles had been hooked, and the nature of the strandings were not consistent with other possible causes. Satellite sea surface temperature information allowed NMFS to reconstruct the likely times and locations of the sea turtle mortality. Gillnetting for dogfish and monkfish was occurring in those times and places.

These fisheries deploy thousands of yards/meters of gillnets with larger than 8 inch stretched mesh and have very long soak times, ranging from overnight to several days. In order to prevent further sea turtle deaths, on May 12, 2000, NMFS restricted an area along eastern North Carolina and Virginia to fishing with large-mesh gillnets with a stretched mesh size of 6 inches (15.24 cm) or greater for a 30-day period through a temporary rule (65 FR 31500, May 18, 2000). After the large mesh closure was in effect, no additional mass stranding events occurred in North Carolina. However, the monkfish fishery in North Carolina was over by the time the closure went into effect.

The closure also reduced the monkfish gillnetting effort off the coast of Virginia, and there was a large reduction in strandings in 2000 (Mansfield et al., 2001). Due to the large-mesh gillnet closure, as well as the new

trip limits imposed by the FMP on May 1, 2000, there was also a reduction in fisheries landings reported within this region.

Monkfish gillnets—12-inch mesh, tied-down, anchored gillnets; up to 4 nautical miles of net per boat; and soak times from 24 to 120 hours—pose a lethal threat to sea turtles, if they are fished in times and places where turtles occur. In the early spring, sea turtles, particularly loggerheads, mass along warm-water fronts off the North Carolina coast and migrate northward as warming water temperatures allow. Based on the information regarding fishing activity prior to the strandings, large mesh gillnets set along these warm-water fronts were the most likely cause of the catastrophic levels of sea turtle mortality seen in North Carolina in 2000. Even with the high level of strandings, the great majority of turtle carcasses probably never stranded due to the strong offshore currents of the Gulf Stream, and the actual turtle mortality was much higher than the strandings suggest.

2001 Events

NMFS considered implementing closures of the monkfish gillnet fishery in the Mid-Atlantic in 2001 to prevent the same level of turtle mortality from recurring. Implementation of the Year 2 Monkfish Fishery Management Plan (FMP) measures as of May 1, 2000, limited monkfish gillnet vessels in the Southern Fishery Management Area to a trip limit of 300 lb (tail weight) per Day-at-Sea (DAS). In addition, NMFS placed observers on nearly 100 percent of the monkfish gillnet trips out of North Carolina and Virginia ports in spring 2001. Further, NMFS published a rule (66 FR 28842, May 25, 2001) that provided authority to close the monkfish gillnet fishery if the observers documented turtle takes greater than the authorized level in the incidental take statement (ITS) issued with the December 21, 1998, biological opinion on the monkfish fishery.

NMFS, in the meantime, had also reinitiated consultation (pursuant to section 7 of the ESA) on the FMP, primarily as the result of concerns over right whale takes in fixed gear. Consultation was also reinitiated because the ITS for sea turtles was exceeded in 1999. NMFS also analyzed the information on sea turtle strandings and the effect of the FMP's daily landings limits and limitations on total days at sea (DAS). Beginning May 1, 2000, for the area off North Carolina and Virginia, monkfish gillnet vessels were limited to 300 pounds of tails landed per day and 40 DAS per year. Beginning May 1, 2002, the DAS would be reduced to zero (i.e., no directed gillnet fishing for monkfish), but up to ten unused DAS could be carried over. NMFS issued a new biological opinion on the fishery on June 14, 2001, concluding that the fishery, as managed under the FMP, was not likely to jeopardize the continued existence of any species of sea turtle. Incidental take was authorized, with a reduced take level after April, 2002 and zero take anticipated after April, 2003. The opinion expressly considered the reduction in daily landings limits and DAS and considered that the FMP's restrictions would greatly reduce the effort off North Carolina and Virginia, because vessels from northern ports would have little incentive to travel to the south for the limited fishing opportunity.

The June 14, 2001 biological opinion's analysis of the fishery's behavior in spring 2001 proved to be correct: Only seven sink gillnet vessels targeting monkfish fished off North Carolina in 2001, compared to 33 sink gillnet vessels that landed monkfish in North Carolina in 2000. The sea turtle mortality was also greatly reduced: there were only 11 turtle strandings in eastern North Carolina (zone 35) for April and May, total, compared to the close to 300 turtles that stranded in April and May 2000. Four sea turtle takes were observed in the monkfish gillnet fishery off North Carolina and Virginia in spring 2001. Not only were there fewer vessels fishing gillnets in 2001, those vessels apparently fished farther to the north and in colder water, compared to 2000, and thus avoided sea turtle takes.

Changes to the FMP

On August 14, 2001, the U.S. District Court for the District of Rhode Island found the provisions in the FMP that established the trip limits for gillnetters to be unlawful. NMFS filed a motion with the court, asking for reconsideration and asking that the FMP's trip limits remain in place until a new FMP could be developed. The U.S. District Court denied this motion on February 15, 2002. The effect of this ruling is that the gillnet daily limits have now increased from 300 pounds to 1500 or 1000 pounds (based on permit type). In addition, the New England and Mid-Atlantic Fishery Management Councils voted on February 8, 2002, to reverse the FMP's elimination of gillnet DAS after April, 2002, allowing continued gillnetting with a 550 or 450 pounds of tails per DAS (based on permit type). NMFS is reviewing this council action for possible approval. Note that all trip limits discussed in this interim rule, and any past changes to those trip limits are specific only to the Southern Fishery Management Area of the monkfish fishery. The Northern Fishery Management Area has no trip limits and these have not been changed by the court order or new Council action. The reinitiation of ESA Section 7 consultation on the monkfish fishery is underway.

Threat to Sea Turtles

The fishery off North Carolina will be closed from February 15 through March 15, under provisions of the Mid-Atlantic Harbor Porpoise Take Reduction Plan. However, because of the recent court ruling, if no turtle protective measures are in place in the fishery and effort returns to 2000 levels, there is every reason to believe that sea turtle mortality off the southern Mid-Atlantic will return to the very high levels of the late 1990's and possibly the disastrous levels of 2000. The court's ruling and the Council's action undo the effort limitation measures that were important factors in the June 14, 2001 no-jeopardy biological opinion. Under a 1500- or 1000-pound daily limit, NMFS believes that effort off North Carolina will return to the levels seen in 2000. In 2000, there were no trip limits, but the average landings per trip were only 764 pounds, so the 1500- or 1000-pound limit will have little to no effect in reducing effort, and, based on past effort, vessels from other states are expected to travel to North Carolina to target monkfish. The other protective measures of 2001 are no longer in place. The temporary framework rule that depended on 100 percent observer coverage, with closure after the observers documented take greater than that authorized in the ITS, has expired. NMFS does not have funds or observers to achieve 100 percent coverage again, certainly not at the much higher levels of fishing effort that are anticipated. The level of incidental take authorized in the June 14, 2001 opinion is very low (6 loggerheads, 1 green, 1 Kemp's ridley, 1 leatherback sea turtle) and would probably be exceeded quickly if monkfish gillnets are set near warm water boundaries when turtles are making their northward migration. NMFS believes that emergency action is warranted to prevent the violation of the incidental take statement of the opinion and to reduce the potential for a serious impact to turtle populations. The 275 loggerheads that stranded in North Carolina in spring 2000 were probably disproportionately made up of individuals from the northern subpopulation of loggerheads, a subpopulation that has been of

2002
UMI

particular concern, for example, in the 2001 Biological Opinion on the Atlantic pelagic longline fishery management plan, that concluded that fishery was likely to jeopardize loggerhead and leatherback sea turtles.

Seasonally-Adjusted Closure of Large-Mesh Gillnet Fishing in the Mid-Atlantic

By this interim final rule, NMFS is enacting, effective immediately, seasonally-adjusted gear restrictions by closing the Mid-Atlantic EEZ waters to fishing with gillnets with a mesh size larger than 8 inch (20.3 cm) stretched mesh to protect migrating sea turtles. Although the monkfish gillnet fishery currently uses 12 inch (30.5 cm) stretched mesh as their primary gear type, the potential exists for the utilization of smaller mesh gillnets for monkfish. The 8 inch cutoff size as mentioned above is, therefore, being enacted in this rule. NMFS considered banning smaller mesh sizes but fishing for monkfish with gillnets with less than 8 inch mesh is impractical and banning smaller mesh sizes would interfere with the prosecution of other fisheries that have been shown to have minimal impact on sea turtles.

The areas restricted to fishing with gillnets larger than 8 inch stretched mesh and the times are as follows: waters north of 33°51.0′ N (North Carolina/South Carolina border at the coast) and south of 35°46.0′ N (Oregon Inlet)—at all times; waters north of 35°46.0′ N (Oregon Inlet) and south of 36°22.5′ N (Currituck Beach Light, NC)—from March 16 through January 14; waters north of 36°22.5′ N (Currituck Beach Light, NC) and south of 37°34.6′ N (Wachapreague Inlet, VA)—from April 1 through January 14; waters north of 37°34.6′ N (Wachapreague Inlet, VA) and south of 37°56.0′ N (Chincoteague, VA)—from April 16 through January 14. Waters north of 37°56.0′ N (Chincoteague, VA) will not be affected by this rule. NMFS also intends to publish a permanent rule establishing these seasonal restrictions and is seeking comments on this interim final rule. The restricted areas include all EEZ waters within the stated boundaries. Because of the evidence from past stranding events, particularly the large stranding event in April and May 2000, NMFS concludes that the large mesh gillnet fishery in the Mid-Atlantic takes, including to capture and kill, numerous endangered and threatened sea turtles during their spring migration. NMFS is taking this action to prevent further mortalities and other takes of listed species in this fishery. The timing of the restrictions is based upon an analysis of sea surface temperatures for the above areas. Sea turtles are known to migrate into and through these waters when the sea surface temperature is 11 degrees Celsius or greater. The January 15 date for the reopening of the areas north of Oregon Inlet (35°46.0′ N) to the large-mesh gillnet fishery is also based upon the 11 degree Celsius threshold and is consistent with the seasonal boundary established for the summer flounder fishery-sea turtle protection area (50 CFR 223.206(d)(2) (iii)(A)).

The actions implemented by this interim final rule are expected to impact approximately 20–25 monkfish gillnet vessel owners and operators. Five alternatives were evaluated in the EA prepared for this interim final rule, including a status quo or "no action" alternative. For a description and analysis of the alternatives, readers should refer to the EA available at the address listed above.

The total cost to the monkfish fishery is expected to be minimal. The primary effect of this interim final rule will be to establish restrictions in an area which is not heavily utilized by the fishery and to set required dates for the northward movement of the fishery up through 37°56.0′ N (Chincoteague, VA) in order to avoid sea turtle interactions. However, based on vessel trip reporting (VTR) data from May 1998 through April 2001, the Virginia and North Carolina trips make up a small part of the total effort in the monkfish sink gillnet fishery. Together they represent 5.1 percent of the monkfish tail weight, 0.9 percent of the liver weight, and 4.1 percent of the total gillnet trips. The fishery normally migrates northward anyway as it follows the monkfish movements. This rule does not prevent or limit fishermen from moving north of 37°56.0′ N (Chincoteague, VA) to prosecute the fishery, although the small number of vessels in this fishery that are based in North Carolina and Virginia would have extra fuel costs that would impact profitability. This rule does not impact the available DAS or catch limits established under previous regulations.

Request for Comments

NMFS is considering issuing these seasonally-adjusted gear restrictions as a final rule. Written public comments on this interim final rule must be postmarked or transmitted by facsimile by 5 p.m., Eastern Standard Time, on June 19, 2002.

Classification

This action has been determined to be not significant for purposes of Executive Order 12866.

The Assistant Administrator has determined that this interim final rule is necessary to respond to the emergency created by the changes to the federal monkfish fishery, changes which may lead to unauthorized takes in violation of the terms and conditions of the June 14, 2001 Biological Opinion. This interim final rule is consistent with the ESA and other applicable laws. Section 4(b)(7) of the ESA provides that the requirements of 5 U.S.C. 553 of the Administrative Procedure Act do not apply to regulations when there is an emergency posing a significant risk to wildlife (16 U.S.C. 1533(b)(7)).

This interim final rule will be effective for 240 days. If NMFS determines to adopt this interim final rule permanently, NMFS will publish the rule in the **Federal Register** by winter 2002. If significant changes to this interim final rule are needed, NMFS will first publish a proposed rule and seek additional public comment. If NMFS determines that the rule is no longer necessary, NMFS will withdraw this interim final rule. NMFS is providing notice of these regulations to the states of North Carolina and Virginia, as required by section 4(b)(7)(B) of the ESA. NMFS regulations, which were developed and adopted after full notice and comment, give the Assistant Administrator the authority to take emergency actions when the need arises. 50 CFR 223.206(d)(4).

The AA also finds good cause to waive the requirements for prior notice and an opportunity for public comment, for this interim final rule, pursuant to 5 U.S.C. 553(b)(B), as such procedures would be impracticable and contrary to the public interest. The recent court ruling, described above, increased gillnet DAS limits from 300 pounds to either 1500 or 1000 pounds, based upon permit type. It is expected that, in light of these higher trip limits, the level of fishing effort occurring after March 16, 2002, when the fishery off North Carolina will open, until May 1, 2002, when gillnet DAS will be reduced to zero under the FMP, will cause a significant increase in risk of mortality to sea turtles. As such, any delay in implementation of this interim final rule would prevent NMFS from meeting its obligations under the ESA to prevent such harm.

The New England and Mid-Atlantic Fishery Management Councils have voted to reverse the FMP's elimination of gillnet DAS after April, 2002, and to allow continued gillnetting with a 550 or 450 pounds of tails per DAS (based on permit type). Should NMFS decide to follow the recommendation of the Council, emergency protection for sea turtles would remain necessary after May 1, 2002. However, should NMFS not follow the recommendation of the Council, NMFS will consider this in determining whether to adopt the interim final rule as a final rule.

This interim final rule will be effective for 240 days. If NMFS determines to adopt this interim final rule permanently, NMFS will publish the rule in the **Federal Register** by winter 2002. If significant changes to this interim final rule are needed, NMFS will first publish a proposed rule and seek additional public comment. If NMFS determines that the rule is no longer necessary, NMFS will withdraw this interim final rule.

For the reasons stated above, the AA finds good cause under both section 4(b)(7) of the ESA and 5 U.S.C. 553(d)(3) not to delay the effective date of this rule for 30 days. This restriction has been announced on the NOAA weather channel, in newspapers, and other media.

As prior notice and an opportunity for public comment are not required to be provided for this notification by 5 U.S.C. 553, or by any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, are inapplicable.

The AA has prepared an Environmental Assessment for this interim final rule. Copies of the EA are available (see **ADDRESSES**).

List of Subjects in 50 CFR Part 223

Administrative practice and procedure, Endangered and threatened species, Exports, Imports, Reporting and record-keeping requirements.

Dated: March 15, 2002.

Rebecca Lent,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries.

For the reasons set out in the preamble, 50 CFR parts 222 and 223 are amended to read as follows:

PART 222—GENERAL ENDANGERED AND THREATENED MARINE SPECIES

1. The authority citation for part 222 continues to read as follows:

Authority: 16 U.S.C. § 1531 *et seq.*; 16 U.S.C. § 742a *et seq.*; 31 U.S.C. § 9701 *et seq.*

2. In § 222.102, Definitions, add after the definition for "Four-seam, tapered-wing trawl" and before the definition for "Gulf Area", the following regulatory definition to read as follows:

§ 222.102 Definitions.

* * * * *

Gillnet means a panel of netting, suspended vertically in the water by floats along the top and weights along the bottom, to entangle fish that attempt to pass through it.

* * * * *

PART 223—THREATENED MARINE AND ANADROMOUS SPECIES

1. The authority citation for part 223 continues to read as follows:

Authority: 16 U.S.C. 1531 *et seq.*

2. In § 223.206, paragraph (d) introductory text is suspended and paragraph (d)(8) and (e) are added to read as follows:

§ 223.206 Exceptions to prohibitions relating to sea turtles.

* * * * *

(d) * * *

(8) *Restrictions applicable to large-mesh gillnet fisheries in the mid-Atlantic region.* No person may fish (including, but not limited to, setting, hauling back, or leaving in the ocean) with, or possess any gillnet with a stretched mesh size larger than 8 inches (20.3 cm), unless all gillnets are covered with canvas or other similar material and lashed or otherwise securely fastened to the deck or the rail, and all buoys larger than 6 inches (15.24 cm) in diameter, high flyers, and anchors are disconnected. This restriction is effective starting on March 15, 2002, in the Atlantic Exclusive Economic Zone (as defined in 50 CFR 600.10) during the following time periods and in the following areas:

(i) Waters north of 33°51.0′ N (North Carolina/South Carolina border at the coast) and south of 35°46.0′ N (Oregon Inlet) at any time;

(ii) Waters north of 35°46.0′ N (Oregon Inlet) and south of 36°22.5′ N (Currituck Beach Light, NC) from March 16 through January 14;

(iii) Waters north of 36°22.5′ N (Currituck Beach Light, NC) and south of 37°34.6′ N (Wachapreague Inlet, VA) from April 1 through January 14; and

(iv) Waters north of 37°34.6′ N (Wachapreague Inlet, VA) and south of 37°56.0′ N (Chincoteague, VA) from April 16 through January 14.

* * * * *

(e) *Exception for incidental taking.* The prohibitions against taking in § 223.205(a) do not apply to the incidental take of any member of a threatened species of sea turtle (i.e., a take not directed toward such member) during fishing or scientific research activities, to the extent that those involved are in compliance with all applicable requirements of paragraphs (d)(1) through (d)(8) of this section, or in compliance with the terms and conditions of an incidental take permit issued pursuant to paragraph (a)(2) of this section.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 011218304–1304–01; I.D. 031802A]

Fisheries of the Exclusive Economic Zone Off Alaska; Pollock in Statistical Area 630 of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NationalOceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Modification of a closure.

SUMMARY: NMFS is opening directed fishing for pollock in Statistical Area 630 of the Gulf of Alaska (GOA) for 24 hours. This action is necessary to fully use the second seasonal apportionment of the total allowable catch of pollock specified for this area.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), March 19, 2002, until 1200 hrs, A.l.t., March 20, 2002.

FOR FURTHER INFORMATION CONTACT: Mary Furuness, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

NMFS closed the directed fishery for pollock in Statistical Area 630 of the GOA pursuant to § 679.20(d)(1)(iii) on March 11, 2002 (67 FR 10847, March 11, 2002). As of March 15, 2002, 532 metric tons (mt) of pollock remain in the second seasonal directed fishing allowance of the pollock TAC in Statistical Area 630 of the GOA. Therefore, NMFS is terminating the previous closure and is opening

VOL
67
ISS
55
MR
21
2002
UMI

directed fishing for pollock in Statistical Area 630 of the GOA. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that the directed fishing allowance will be reached after 24 hours. Consequently, NMFS is prohibiting directed fishing for pollock in Statistical Area 630 of the GOA effective 1200 hrs, A.l.t., March 20, 2002.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, finds that the need to immediately implement this action to allow full use of the amount of the 2002 B season pollock TAC specified for Statistical Area 630 of the GOA constitutes good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(3)(B) and 50 CFR 679.20(b)(3)(iii)(A), as such procedures would be unnecessary and contrary to the public interest. Similarly, the need to implement these measures in a timely fashion to allow full use of the amount of the 2002 B season pollock TAC specified for Statistical Area 630 of the GOA constitutes good cause to find that the effective date of this action cannot be delayed for 30 days. Accordingly, under 5 U.S.C. 553(d), a delay in the effective date is hereby waived.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 18, 2002.

Bruce Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Vol. 67, No. 55

Thursday, March 21, 2002

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 352

[Docket No. 01–073–1]

Untreated Citrus from Mexico Transiting the United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the plant quarantine safeguard regulations to remove Brownsville and Hidalgo, TX, as ports of entry for untreated Mexican oranges, tangerines, and grapefruit transiting the United States for export to another country. We are also proposing to remove Brownsville, TX, as an authorized port for the exportation by water of shipments of untreated Mexican oranges, tangerines, and grapefruit. We are proposing these actions because neither port has been used for these purposes in over 20 years. These actions would update the regulations so that they accurately reflect the ports used for the importation and exportation by water of untreated citrus from Mexico.

DATES: We will consider all comments we receive that are postmarked, delivered, or e-mailed by May 20, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comment (an original and three copies) to: Docket No. 01–073–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 01–073–1. If you use e-mail, address your comment to *regulations@aphis.usda.gov*. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and "Docket No. 01–073–1" on the subject line.

You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html*.

FOR FURTHER INFORMATION CONTACT: Ms. Pam Byrne, Senior Operations Officer, Port Operations, PPQ, APHIS, 4700 River Road Unit 60, Riverdale, MD 20737–1231; (301) 734–5242.

SUPPLEMENTARY INFORMATION:

Background

The plant quarantine safeguard regulations in 7 CFR part 352 relieve restrictions for certain plants, plant products, plant pests, soil, and other products and articles that are classified as prohibited or restricted in other regulations in title 7, chapter III. Such plant products include fruits and vegetables that are moved into the United States for: (1) A temporary stay where unloading or landing is not intended; (2) unloading or landing for transshipment and exportation; (3) unloading or landing for transportation and exportation; or (4) unloading and entry at a port other than the port of arrival. Fruits and vegetables that are moved into the United States under these circumstances are subject to inspection and must be handled in accordance with conditions assigned under the safeguard regulations to prevent the introduction and spread of plant pests.

The regulations in § 352.30 address the movement into or through the United States of untreated oranges, tangerines, and grapefruit from Mexico that transit the United States en route to foreign countries. The regulations currently allow untreated oranges, tangerines, and grapefruit from Mexico to enter the United States at the ports of Nogales, AZ, or Brownsville, Eagle Pass, El Paso, Hidalgo, or Laredo, TX. The fruit may then be moved, under certain conditions, by truck or railcar to seaports at Brownsville and Galveston, TX, for export by water to another country.

In this document, we are proposing to remove Brownsville and Hidalgo, TX, as ports of entry for untreated oranges, tangerines, and grapefruit from Mexico. In addition, we are also proposing to remove Brownsville, TX, as an authorized port for the exportation by water of such fruit. We are proposing these actions because it has been more than 20 years since any shipments of untreated citrus from Mexico have been imported into the United States through either port. Additionally, the port of Hidalgo, TX, no longer handles cargo; that port now handles only pedestrians and passenger vehicles. It has also been more than 20 years since Brownsville, TX, has been used for the export of untreated Mexican citrus by water to another country.

Removing Brownsville and Hidalgo, TX, as ports of entry for untreated citrus from Mexico and removing Brownsville, TX, as an authorized port of export for such fruit would update the regulations in § 352.30 so that they accurately reflect the ports that are used for those purposes.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required by Executive Order 12866.

We are proposing to amend the plant quarantine safeguard regulations to remove Brownsville and Hidalgo, TX, as ports of entry for untreated Mexican oranges, tangerines, and grapefruit transiting the United States for export to another country. We are also proposing to remove Brownsville, TX, as an authorized port for the exportation by water of shipments of untreated Mexican oranges, tangerines, and grapefruit. We are proposing these actions because neither port has been used for these purposes in over 20 years. These actions would update the regulations so that they accurately reflect the ports used for the importation and exportation by water of untreated citrus from Mexico.

VOL
67
ISS
55
MR
21
2002
UMI

Since the ports of Brownsville and Hidalgo, TX, have not been used for any shipments of untreated citrus from Mexico in over 20 years, this proposed action would have no economic effect on any entity. Small entities located at or around the ports of Brownsville and Hidalgo, TX, will not be affected by this proposed rule for the same reason that no economic entity of any size will be affected.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This proposed rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 7 CFR Part 352

Customs duties and inspection, Imports, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

Accordingly, we propose to amend 7 CFR part 352 as follows:

PART 352—PLANT QUARANTINE SAFEGUARD REGULATIONS

1. The authority citation for part 352 would continue to read as follows:

Authority: 7 U.S.C. 2260, 7711–7714, 7731, and 7734; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

§ 352.30 [Amended]

2. Section 352.30 would be amended as follows:

a. In paragraph (b)(2), by removing the words "Brownsville," and "Hidalgo,".

b. In paragraph (b)(3)(iii), by removing the words "Brownsville or".

c. In paragraph (c)(1), by removing the words "Brownsville, or".

d. In paragraph (c)(3), in the paragraph heading and in paragraphs (c)(3)(i) and (c)(3)(ii), by removing the words "Brownsville or" each time they appear.

Done in Washington, DC, this 18th day of March 2002.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–U

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 928

[Docket No. FV02–928–2]

Papayas Grown in Hawaii; Continuance Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Order to terminate and reschedule referendum.

SUMMARY: This document directs that the continuance referendum scheduled to be held March 4 through March 22, 2002 among eligible growers of Hawaii papayas be terminated and rescheduled for May 6 through May 31, 2002. Rescheduling is necessary due to complications encountered with timely delivery of ballots by mail. Rescheduling will ensure that eligible growers receive their ballots with time to review them and vote. A referendum is necessary to determine whether eligible growers of Hawaii papayas favor continuance of the marketing order regulating the handling of papayas grown in the production area.

DATES: The rescheduled referendum will be conducted from May 6, through May 31, 2002. To vote in this referendum, growers must have been producing Hawaii papayas during the period July 1, 2000, through June 30, 2001.

ADDRESSES: Copies of the marketing order may be obtained from the office of the referendum agent at 2202 Monterey Street, Suite 102 B, Fresno, California, 93721, or the Office of the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Programs, Agricultural Marketing Service (AMS), US Department of Agriculture (USDA), 1400 Independence Avenue SW., Stop 0237, Washington, DC 20250–0237.

FOR FURTHER INFORMATION CONTACT: J. Terry Vawter, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, at 2202 Monterey Street, Suite 102 B, Fresno, California 93721; telephone (559) 487–5901; or Melissa Schmaedick, Marketing Order Administration Branch, Fruit & Vegetable Programs, AMS, USDA, 1400 Independence Avenue SW., Stop 0237, Washington, DC 20250–0237; telephone (202) 720–2491.

SUPPLEMENTARY INFORMATION: Pursuant to Marketing Order No. 928 (7 CFR part 928), hereinafter referred to as the "order" and the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act," it is hereby directed that the March 4 through March 22, 2002 referendum be terminated and that a rescheduled referendum be conducted from May 6 through May 31, 2002 to ascertain whether continuance of the order is favored by producers. Only growers that were engaged in the production of Hawaii papayas during the period of July 1, 2000, through June 30, 2001, may participate in the rescheduled continuance referendum.

A continuance referendum to be conducted among growers of papayas in Hawaii had been scheduled for the period March 4, through March 22, 2002. Notice of this referendum order was issued on January 31, 2002 and published in the February 6, 2002 issue of the **Federal Register** (67 FR 5526). Termination of this referendum is necessary due to complications encountered with timely delivery of ballots by mail. Given this delay, we can no longer ensure that adequate time will be given to all eligible voters to fully review, contemplate and cast their ballots within the allotted referendum period. All ballots pertaining to the March referendum period will be considered invalid.

The USDA has determined that a rescheduled referendum to determine if growers of papayas in the production area favor continuance of their marketing order will be held from May 6 through May 31, 2002. Rescheduling of the referendum period will ensure proper distribution and ample review for all eligible growers voting in the referendum. New ballots and voting instruction will be issued to all growers of record subsequent to this Notice.

The USDA has determined that continuance referenda are an effective means for ascertaining whether growers favor continuation of marketing order programs. The USDA would continue the order if either two-thirds of the growers voting in the referendum or growers of two-thirds of the volume of Hawaii papayas represented in the referendum favor continuance. In evaluating the merits of continuance versus termination, the USDA will consider the results of the referendum and other relevant information regarding operation of the order. The USDA will evaluate the order's relative benefits and disadvantages to growers, handlers, and consumers to determine whether continuing the order would tend to effectuate the declared policy of the Act.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the ballot materials used in the referendum herein ordered have been submitted to and approved by the Office of Management and Budget (OMB) and have been assigned OMB No. 0581–0102 for Hawaii papayas. It has been estimated that it will take an average of 20 minutes for each of the approximately 400 growers of Hawaii papayas to cast a ballot. Participation is voluntary. Ballots postmarked after May 31, 2002, will not be included in the vote tabulation.

J. Terry Vawter and Martin Engeler of the California Marketing Field Office, Fruit and Vegetable Programs, AMS, USDA, are hereby designated as the referendum agents of the Department to conduct such referendum. The procedure applicable to the referendum shall be the "Procedure for the Conduct of Referenda in Connection With Marketing Orders for Fruits, Vegetables, and Nuts Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (7 CFR 900.400—900.407).

Ballots will be mailed to all growers of record and may also be obtained from the referendum agents and from their appointees.

List of Subjects in 7 CFR Part 928

Marketing agreements, Papayas, Reporting and recordkeeping requirements.

Authority: 7 U.S.C. 601–674.

Dated: March 19, 2002.

A.J. Yates,

Administrator, Agricultural Marketing Service.

Animal and Plant Health Inspection Service

9 CFR Part 94

[Docket No. 01–059–1]

Change in Disease Status of Greece With Regard to Foot-and-Mouth Disease

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the regulations to add Greece to the list of regions that are considered free of rinderpest and foot-and-mouth disease. We are taking this action because we have determined that Greece is now free of foot-and-mouth disease. We are also proposing to add Greece to the list of regions that are subject to certain import restrictions on meat or meat products because of their proximity to or trading relationships with rinderpest- or foot-and-mouth-disease-affected regions. These actions would update the disease status of Greece with regard to foot-and-mouth disease while continuing to protect the United States from an introduction of this disease by providing additional requirements for any meat and meat products imported into the United States from Greece.

DATES: We will consider all comments we receive that are postmarked, delivered, or e-mailed by May 20, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comment (an original and three copies) to: Docket No. 01–059–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 01–059–1. If you use e-mail, address your comment to *regulations@aphis.usda.gov*. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and "Docket No. 01–059–1" on the subject line.

You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html*.

FOR FURTHER INFORMATION CONTACT: Dr. Anne Goodman, Senior Staff Microbiologist, Regionalization Evaluation Services Staff, VS, APHIS, 4700 River Road Unit 38, Riverdale, MD 20737–1231; (301) 734–4356.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 94 (referred to below as the regulations) govern the importation of certain animals and animal products into the United States in order to prevent the introduction of various diseases, including rinderpest, foot-and-mouth disease (FMD), African swine fever, hog cholera, and swine vesicular disease. These are dangerous and destructive communicable diseases of ruminants and swine. Section 94.1 lists regions of the world that are declared to be free of rinderpest or free of both rinderpest and FMD. The Animal and Plant Health Inspection Service (APHIS) considers rinderpest or FMD to exist in all parts of the world not listed. Section 94.11 of the regulations lists regions of the world that APHIS has determined to be free of rinderpest and FMD, but that are subject to certain restrictions because of their proximity to or trading relationships with rinderpest- or FMD-affected regions.

Greece is currently listed in § 94.1(a)(3) of the regulations as a region free of rinderpest. On June 25, 1999, we published in the **Federal Register** (64 FR 34155–34168, Docket No. 98–090–1) a proposal to amend § 94.1 to recognize Greece as a region free of FMD. However, in July 2000, FMD was diagnosed in cattle in the Evros Prefecture in Greece. This and subsequent outbreaks meant that we were unable to declare Greece free of FMD based on that proposal.

Since September 2000, there have been no additional outbreaks of FMD in Greece. APHIS representatives conducted a site visit to Greece in January 2001 to obtain evidence regarding the FMD status of Greece. Documentation of the control and eradication procedures used during the FMD outbreaks in Greece is provided in the site visit report, which may be viewed on the Internet at *http://www.aphis.usda.gov/vs/reg-request.html*. Briefly summarized, the disease outbreak was eradicated by applying a stamping out/nonvaccination policy. Controls over the movement of animals and animal products from regions of higher risk, such as along Greece's border with Turkey, were applied. In addition, Greece continues to conduct an established surveillance program to detect and control any future incursions of FMD or other diseases. Greece continues to work with Turkey to address risk factors associated with the presence of FMD in Turkey.

VOL
67
ISS
55
MR
21
2002
UMI

Consistent with the guidelines of the Office International des Epizooties (OIE)—i.e., at least 12 months have elapsed since the last outbreak of FMD in Greece—and the findings of our site visit and review of the supporting documentation provided by Greece, we are proposing to recognize Greece as free of FMD. In addition, we are proposing to add Greece to the list of rinderpest- and FMD-free regions whose exports of ruminant and swine meat and meat products to the United States are subject to certain restrictions to ensure against the introduction of those diseases into this country.

Based on the information submitted to us by the Government of Greece, we have reviewed and analyzed the animal health status of Greece relative to FMD. This review and analysis was conducted in light of the risk factors identified in 9 CFR 92.2, "Application for recognition of the animal health status of a region," which are used to determine the level of risk associated with importing animals or animal products into the United States from a given region. Based on the information submitted to us, we have concluded the following:

Veterinary infrastructure. The veterinary services authorities in Greece have the legal authority, organization, and infrastructure to detect, control, and eradicate FMD. The official veterinary force of Greece includes approximately 810 veterinarians, 70 veterinary laboratories, and 190 lay assistants organized under the State Veterinary Service. The field force is dispersed among 51 Local Disease Control Centers, each of which reports to the National Disease Control Center in Athens. In the event of an animal disease emergency, the State Veterinary Service has the authority to call upon police and local authorities to provide support and assistance in depopulating infected premises, disposing of animal carcasses, controlling and restricting animal movements, and closing markets and slaughterhouses.

Greece's veterinary infrastructure has been strengthened by financial contributions from the European Union for activities relating to specific diseases. In the case of FMD, financial support has been provided for diagnostic laboratory equipment, data management equipment, and surveillance activities.

Disease history and surveillance. The first outbreak of FMD virus serotype Asia 1 in Greece occurred in July 2000, and the last in September 2000. A total of 14 FMD outbreaks occurred in 6 epidemiological episodes. There were three primary outbreaks in the Prefecture of Evros. The remaining outbreaks were secondary, caused by spread from the primary outbreaks. The virus is believed to have come from Turkey, an FMD-affected country with which Greece shares a border.

Routine surveillance for targeted diseases is carried out in specified areas of Greece under the Epidemio-Vigilance Rotational System (EVROS). This program, launched in 2000 with the support of the European Commission, is an integrated system of active surveillance for incursions of targeted diseases, including FMD, designed to provide early warning and effective control. The program is established in the border areas with Turkey that are primarily at risk for incursions of FMD virus.

Diagnostic capabilities. This factor was evaluated by APHIS in the context of the proposed rule published in 1999 and found to be acceptable. No significant changes have occurred since that time, so no further evaluation is necessary.

Vaccination status. No vaccination was used in control of the outbreak of FMD virus type Asia 1 in 2000 or type O1 in 1996. Vaccination has not been used to control type Asia 1 in Greece since 1961.

Disease status of adjacent regions. Following is a brief discussion of the disease status of those countries with which Greece shares a land border:

- *Turkey.* FMD is endemic in the Anatolia region of Turkey and causes significant economic losses. The disease is being controlled using vaccination, quarantine, movement controls, and surveillance and monitoring. Turkey has increased its efforts to control FMD in recent years. Asia 1 and subtypes of FMD virus serotype A remain potential risks for Turkey, however, and also for Europe. Although Turkey should be considered a high-risk area regarding the transmission of the disease to Greece and the rest of Europe, APHIS considers existing controls in Greece to be sufficient to reduce the risk.
- *Bulgaria.* There were no outbreaks of FMD reported to the OIE by Bulgaria in 2000 and through June 2001.
- *Macedonia.* There were no outbreaks of FMD reported to the OIE by the Former Yugoslav Republic of Macedonia in 2000. No data are available for 2001.
- *Albania.* There were no outbreaks of FMD reported to the OIE by Albania in 2000. No data are available for 2001.

Degree of separation from adjacent regions. The Evros River defines the border between Greece and Turkey. However, it is possible that persons and animals may still cross the river undetected, thus posing a risk of transmitting FMD from Turkey. However, Greece has the laws, policies, and infrastructure to detect, respond to, and eliminate any occurrence of FMD.

There are several Greek islands that lie in the Aegean Sea directly to the south of the Evros delta off the Turkish mainland. Greece has special surveillance programs in effect on these islands to prevent the transmission of FMD from Turkey to Greece via these islands.

Greece's borders with Bulgaria, Macedonia, and Albania are generally mountainous, concentrating movements in the river valleys but making the mountainous part of the borders more difficult to monitor. This is not considered to be a significant source of risk.

Movement across borders. The movement of animals and animal products from non-European Union (EU) countries is regulated according to EU legislation. These regulations prohibit the entry of live susceptible animals and risky products from regions of higher risk, including Turkey. In general, these movements are well controlled through established border posts. The border between Greece and Turkey is well protected by military and other control points.

Livestock demographics and marketing practices. The area where the outbreak occurred in 2000 is located in the Evros delta, immediately adjacent to the border with Turkey. The Evros delta lies entirely within Greek territory. The entire delta area is a wildlife sanctuary protected by the Ramsar Convention and thus is not inhabited. Arable land within the delta is cultivated with various crops, such as corn, alfalfa, cotton, and tobacco. The marshland along the river and the crop fields after harvest provide year-round pasture for cattle, sheep, and goats. The delta can sustain more than 5,000 cattle and approximately 2,000 sheep and goats. The majority of the cattle are free-grazing beef cattle that move freely throughout the area. All cattle and most sheep and goats inside the delta are individually identified using unique ear tags. As outlined in the EVROS program, all animal movements in the prefecture of Evros, including the delta area, are controlled via permits.

Detection and eradication of disease. FMD has been effectively controlled and eradicated from Greece and is not known to exist in Greece at this time. Greece maintains a surveillance system capable of rapidly detecting FMD should the disease be introduced into the country, with more intense scrutiny in the Evros delta bordering Turkey. The animal health status of the Greek Evros prefecture will continue to be closely monitored. Greece has the laws, policies, and infrastructure to detect, respond to, and eliminate any occurrence of FMD and is working closely with neighboring countries and EU Member States to address risk factors presented by those potential sources.

These findings are described in further detail in a qualitative evaluation that may be obtained by contacting the person listed under **FOR FURTHER INFORMATION CONTACT** and may be viewed on the Internet at *http://www.aphis.usda.gov/vs/reg-request.html* by following the link for current requests and supporting documentation. The evaluation documents the factors that have led us to conclude that Greece is free of FMD. Therefore, we are proposing to recognize Greece as free of FMD and add Greece to the list in § 94.1(a)(2) of regions that are considered free of FMD and rinderpest. We would also remove Greece from the list in § 94(a)(3) of countries that are free of rinderpest only.

These proposed actions would relieve certain restrictions due to FMD and rinderpest on the importation into the United States of certain live animals and animal products from Greece. However, because Greece shares common land borders with countries not considered free of rinderpest and FMD, the importation of meat and other products from ruminants and swine into the United States from Greece would continue to be subject to certain restrictions.

Specifically, we are proposing to add Greece to the list in § 94.11(a) of regions declared free of rinderpest and FMD but that are subject to special restrictions on the importation of their meat and other animal products into the United States. The regions listed in § 94.11(a) are subject to these special restrictions because they: (1) Supplement their national meat supply by importing fresh (chilled or frozen) meat of ruminants or swine from regions that are designated in § 94.1(a) as regions where rinderpest or FMD exists, (2) have a common land border with regions where rinderpest or FMD exists, or (3) import ruminants or swine from regions where rinderpest or FMD exists under conditions less restrictive than would be acceptable for importation into the United States.

Greece has a common land border with Turkey, a country not considered free of FMD. As a result, there is some risk that the meat and other animal products produced by Greece could be commingled with the fresh (chilled or frozen) meat of animals from a region in which FMD exists and present an undue risk of introducing FMD into the United States if imported without restriction.

Under § 94.11, meat and other animal products of ruminants and swine, including ship stores, airplane meals, and baggage containing these meat or animal products, may not be imported into the United States except in accordance with § 94.11 and the applicable requirements of the U.S. Department of Agriculture's Food Safety and Inspection Service at 9 CFR chapter III.

Section 94.11 generally requires that the meat and other animal products of ruminants and swine be: (1) Prepared in an inspected establishment that is eligible to have its products imported into the United States under the Federal Meat Inspection Act; and (2) accompanied by an additional certificate, issued by a full-time salaried veterinary official of the national government of the exporting region, assuring that the meat or other animal products have not been commingled with or exposed to meat or other animal products originating in, imported from, transported through, or that have otherwise been in a region where rinderpest or FMD exists.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required by Executive Order 12866.

We are proposing to amend the regulations to add Greece to the list of regions that are considered free of rinderpest and FMD. We are taking this action because we have determined that Greece is now free of FMD. We are also proposing to add Greece to the list of regions that are subject to certain restrictions because of their proximity to or trading relationships with rinderpest- or FMD-affected countries. These actions would update the disease status of Greece with regard to FMD while continuing to protect the United States from an introduction of rinderpest and FMD by providing additional requirements for any meat and meat products imported into the United States from Greece.

The following analysis addresses the potential economic effects of this proposed rule as required by the Regulatory Flexibility Act.

From an economic standpoint, the proposed rule would have little or no impact on U.S. animal stock and commodities. There are two reasons. First, the proposed rule would not remove other disease-based restrictions on the importation of ruminants or swine (and certain meat and other products from those animals) from Greece into the United States. Because bovine spongiform encephalopathy is considered to exist in Greece, the importation of ruminants and meat, meat products, and certain other products of ruminants that have been in Greece is prohibited. Furthermore, because hog cholera (also known as classical swine fever) and swine vesicular disease are also considered to exist in Greece, the importation of swine from that region into the United States is prohibited, and the importation of pork and pork products is subject to restrictions.

Second, it appears unlikely that the volume of animals and animal products that would be eligible for importation into the United States from Greece would be sufficient to have a significant impact on the U.S. market. In 2000, Greece produced 287,765 metric tons of beef, veal, mutton, lamb, and pig meat, representing less than 1.5 percent of the comparable U.S. production that year. Similarly, Greece's production of whole, fresh cow milk was 770,000 metric tons, only 1 percent of the comparable U.S. production during that period. Finally, in 1999, live cattle and pig stock in Greece was 1,510,000 head, less than 1 percent of the comparable stock in the United States that year.[1]

Besides cow milk, Greece also produces sheep and goat milk. In 2000, Greece produced 670,000 metric tons of sheep milk and 450,000 metric tons of goat milk. However, there appears to be no significant market in the United States for those commodities, or products made from them, such as cheese, as evidenced by the fact that no sheep or goat milk or cheese is commercially produced in the United States, and U.S. imports of those commodities are relatively minor. In 1999, for example, U.S. imports of cheese made from sheep and goat milk from all countries totaled 32,505 metric tons, less than 1 percent of the total U.S. cheese production.

In 1999, the stock of live sheep and goats in Greece was 14,276,000 head, or 66 percent more than the comparable stock in the United States that year. Here again, however, there appears to be no significant market in the United States for those animals, as evidenced by the fact that the United States imported only 53,165 live sheep and goats from all countries in 1999, which represents less than 1 percent of the sheep and goat stock in the United States that year and less than 1 percent

[1] Food and Agricultural Organization of the United Nations.

2002
UMI

of U.S. imports of all live animals from all countries in 1999.[2]

Entities potentially affected by this proposed rule include U.S. import brokers, agents, and others involved in the sale of animals or animal products from Greece that would no longer be prohibited, or that could be imported under less restrictive conditions, if Greece is declared free of FMD. The number and size of entities that might be directly involved in the importation and sale of such animals or animal products from Greece is unknown, but it is likely that these entities would be small, based on the U.S. Small Business Administration's (SBA) size standards.[3] Given the disease-based restrictions discussed previously that would remain in place and the minimal level of U.S. imports of animals and animal products that would be eligible for importation from Greece, we expect that declaring Greece free of FMD would have only a negligible effect on U.S. entities, large or small.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This proposed rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Lists of Subjects in 9 CFR Part 94

Animal diseases, Imports, Livestock, Meat and meat products, Milk, Poultry and poultry products, Reporting and recordkeeping requirements.

Accordingly, we are proposing to amend 9 CFR part 94 as follows:

[2] Food and Agricultural Organization of the United Nations.

[3] The overwhelming majority of U.S. business entities are small under the SBA's standards.

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), EXOTIC NEWCASTLE DISEASE, AFRICAN SWINE FEVER, HOG CHOLERA, AND BOVINE SPONGIFORM ENCEPHALOPATHY: PROHIBITED AND RESTRICTED IMPORTATIONS

1. The authority citation for part 94 would continue to read as follows:

Authority: 7 U.S.C. 450, 7711, 7712, 7713, 7714, 7751, and 7754; 19 U.S.C. 1306; 21 U.S.C. 11, 114a, 134a, 134b, 134c, 134f, 136, and 136a; 31 U.S.C. 9701; 42 U.S.C. 4331 and 4332; 7 CFR 2.22, 2.80, and 371.4.

§ 94.1 [Amended]

2. Section 94.1 would be amended as follows:

a. In paragraph (a)(2), by adding, in alphabetical order, the word "Greece,".

b. In paragraph (a)(3), by removing the words "Greece and the" and adding the word "The" in their place.

§ 94.11 [Amended]

3. In § 94.11, paragraph (a), the first sentence would be amended by adding, in alphabetical order, the word "Greece,".

Done in Washington, DC, this 18th day of March 2002.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 02–6837 Filed 3–20–02; 8:45 am]

RIN 3245–AE71

Small Business Size Regulations; 8(a) Business Development/Small Disadvantaged Business Status Determinations; Rules of Procedure Governing Cases Before the Office of Hearings and Appeals

AGENCY: Small Business Administration.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects the Regulatory Information Number (RIN) to the proposed rule published in the **Federal Register** on March 12, 2002. The rule proposes to amend its regulations governing proceedings before the Office of Hearings and Appeals and to make conforming changes to several sections of the regulations governing the Small Business Size Determination program and the 8(a) Business Development (8(a) BD) program. This document corrects the RIN.

FOR FURTHER INFORMATION CONTACT: Michael J. Wolter, 202–401–1420.

Correction

The Small Business Administration published a document in the **Federal Register** on March 12, 2002, 67 FR 11057, mistakenly referring to RIN 3245-AE92. This correction provides the correct RIN.

In proposed rule FR Doc. 02–5613 published on March 12, 2002 (67 FR 11057) make the following correction. On page 11057, in the first column, remove "RIN: 3245–AE92" and replace with "RIN: 3245–AE71."

Dated: March 15, 2002.

Gloria E. Blazsik,

Acting Assistant Administrator for Office of Hearings and Appeals.

14 CFR Part 39

[Docket No. 2001–NM–69–AD]

RIN 2120–AA64

Airworthiness Directives; Bombardier Model DHC–8–100, –200, and –300 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Bombardier Model DHC–8–100, -200, and "300 series airplanes. This proposal would require revision of the applicable maintenance program manual, repetitive inspections for corrosion or cracking of the hook roller shafts of the flap carriage, and eventual replacement of the hook roller shafts with new or serviceable hook roller shafts. This replacement would extend the interval for the repetitive inspections. This action is necessary to prevent cracking of the hook roller shafts of the flap carriage and consequent reduced structural integrity of the flap, which could result in jamming of the flap. This action is intended to address the identified unsafe condition.

DATES: Comments must be received by April 22, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2001–NM–69–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-nprmcomment@faa.gov*. Comments sent via fax or the Internet must contain "Docket No. 2001–NM–69–AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in the proposed rule may be obtained from Bombardier, Inc., Bombardier Regional Aircraft Division, 123 Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, New York Aircraft Certification Office, 10 Fifth Street, Third Floor, Valley Stream, New York.

FOR FURTHER INFORMATION CONTACT: Dan Parrillo, Aerospace Engineer, Airframe and Propulsion Branch, ANE–172, FAA, New York Aircraft Certification Office, 10 Fifth Street, Third Floor, Valley Stream, New York 11581; telephone (516) 256–7505; fax (516) 568–2716.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the proposed AD is being requested.
- Include justification (e.g., reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2001–NM–69–AD." The postcard will be date-stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2001–NM–69–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

Transport Canada Civil Aviation (TCCA), which is the airworthiness authority for Canada, notified the FAA that an unsafe condition may exist on certain Bombardier Model DHC–8–100, –200, and –300 series airplanes. TCCA advises that corroded hook roller shafts have been found on the flap carriages of several in-service airplanes. During its investigation, the airplane manufacturer has identified discrepancies in the manufacturing process that may have resulted in inadequate corrosion protection on some hook roller shafts. This condition, if not corrected, could cause cracking of the hook roller shafts of the flap carriage and consequent reduced structural integrity of the flap, which could result to jamming of the flap.

Explanation of Relevant Service Information

Bombardier, Inc., has issued De Havilland Inc. Dash 8 Airworthiness Limitations List Temporary Revisions (TRs) AWL–75 and AWL–76 (for Model DHC–8–100 series airplanes), AWL 2–19 (for Model DHC–8–200 series airplanes), and AWL 3–83 (for Model DHC–8–300 series airplanes), all dated July 14, 2000. Those TRs specify new thresholds and repetitive intervals for existing structural inspections of the hook roller shafts of the flap carriage according to De Havilland Inc. Dash 8 Maintenance Program Manual PSM 1–8–7 (for Model DHC–8–100 series airplanes), PSM 1–82–7 (for Model DHC–8–200 series airplanes), or PSM 1–83–7 (for Model DHC–8–300 series airplanes), as applicable. TCCA classified these TRs as mandatory and issued Canadian airworthiness directive CF–1999–10R2, dated September 12, 2000, in order to assure the continued airworthiness of these airplanes in Canada. Canadian airworthiness directive CF–1999–10R2 also requires replacement of existing hook roller shafts with new or serviceable hook roller shafts.

FAA's Conclusions

This airplane model is manufactured in Canada and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, TCCA has kept the FAA informed of the situation described above. The FAA has examined the findings of the TCCA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require revision of De Havilland Inc. Dash 8 Maintenance Program Manual PSM 1–8–7 (for Model DHC–8–100 series airplanes), PSM 1–82–7 (for Model DHC–8–200 series airplanes), or PSM 1–83–7 (for Model DHC–8–300 series airplanes), as applicable, repetitive detailed inspections for corrosion or cracking of the hook roller shafts of the flap carriage, and eventual replacement of the hook roller shafts with new or serviceable hook roller shafts. This replacement would extend the interval for the repetitive inspections. The inspections would be required to be accomplished according to the applicable De Havilland Inc. Dash 8 Maintenance Program Manual and at the compliance times specified in the TRs described previously. The replacement of the hook roller shafts would be required to be accomplished in accordance with certain sections of the applicable De Havilland Inc. Dash 8 Aircraft Maintenance Manual.

Differences Between the Proposed Rule and Service Information

The service information identifies the inspection described previously only as

VOL
67
ISS
55
MR
21
2002
UMI

a "structural inspection." For clarity, this proposed AD refers to that structural inspection as a "detailed inspection." Note 2 of this proposed AD defines such an inspection.

Cost Impact

The FAA estimates that 183 airplanes of U.S. registry would be affected by this proposed AD.

It would take approximately 4 work hours per airplane to accomplish the proposed inspection, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the proposed inspection on U.S. operators is estimated to be $43,920, or $240 per airplane, per inspection cycle.

It would take approximately 4 work hours per airplane to accomplish the proposed replacement, at an average labor rate of $60 per work hour. Required parts would cost approximately $460 per airplane. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $128,100, or $700 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this proposed AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Bombardier, Inc. (Formerly de Havilland, Inc.): Docket 2001–NM–69–AD.

Applicability: Model DHC–8–100, –200, and "300 series airplanes; serial numbers 3 through 555 inclusive; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent cracking of the hook roller shafts of the flap carriage and consequent reduced structural integrity of the flap, which could result in jamming of the flap, accomplish the following:

Revision of Maintenance Program Manual

(a) Within 30 days after the effective date of this AD, accomplish paragraph (a)(1), (a)(2), or (a)(3) of this AD, as applicable.

(1) For Model DHC–8–100 series airplanes: Insert De Havilland Inc. Dash 8 Airworthiness Limitations List Temporary Revisions (TRs) AWL–75 and AWL–76, both dated July 14, 2000, into De Havilland Inc. Dash 8 Series 100 Maintenance Program Manual PSM 1–8–7.

(2) For Model DHC–8–200 series airplanes: Insert De Havilland Inc. Airworthiness Limitations List TR AWL 2–19, dated July 14, 2000, into De Havilland Inc. Dash 8 Series 200 Maintenance Program Manual PSM 1–82–7.

(3) For Model DHC–8–300 series airplanes: Insert De Havilland Inc. Airworthiness Limitations List TR AWL 3–83, dated July 14, 2000, into De Havilland Inc. Dash 8 Series 300 Maintenance Program Manual PSM 1–83–7.

Repetitive Inspections

(b) Do a detailed inspection for corrosion or cracking of the hook roller shafts of the flap carriage, at the times specified in paragraph (b)(1), (b)(2), or (b)(3) of this AD, as applicable, and according to the service information in paragraph (b)(1), (b)(2), or (b)(3) of this AD, as applicable.

Note 2: For the purposes of this AD, a detailed inspection is defined as: "An intensive visual examination of a specific structural area, system, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at intensity deemed appropriate by the inspector. Inspection aids such as mirror, magnifying lenses, etc., may be used. Surface cleaning and elaborate access procedures may be required."

(1) For Model DHC–8–100 series airplanes: For Pre Mod 8Q101103 roller shafts having part number (P/N) 85750362–103 or 85750362–105, do the initial inspection at the compliance time specified in the "Threshold" column of the table in De Havilland Inc. Airworthiness Limitations List TRs AWL–75 and AWL–76, both dated July 14, 2000, or within 12 months after the effective date of this AD, whichever occurs later, according to De Havilland Inc. Dash 8 Series 100 Maintenance Program Manual PSM 1–8–7. Thereafter, repeat the inspection at the applicable interval specified in the "Initial Interval" column of the table in TR AWL–75 and AWL–76, until the airplane reaches the applicable threshold listed in the "Repeat Cut-In" column of the table in TR AWL–75 and AWL–76. Thereafter, repeat the inspections at the applicable interval listed in the "Repeat Interval" column of the table in TR AWL–75 and AWL–76, until paragraph (c) of this AD has been accomplished on all affected hook roller shafts. Where the TR specifies compliance intervals in "flights," for the purposes of this AD, "flights" means "flight cycles."

(2) For Model DHC–8–200 series airplanes: For Pre Mod 8Q101103 hook roller shafts having part number (P/N) 85750362–103 or 85750362–105, do the initial inspection at the compliance time specified in the "Threshold" column of the table in De Havilland Inc. Airworthiness Limitations List TR AWL 2–19, dated July 14, 2000, or within 12 months after the effective date of this AD, whichever occurs later, according to De Havilland Inc. Dash 8 Series 200 Maintenance Program Manual PSM 1–82–7. Thereafter, repeat the inspection at the applicable interval specified in the "Initial Interval" column of the table in TR AWL 2–19, until the airplane reaches the applicable threshold listed in the "Repeat Cut-In" column of the table in TR AWL 2–19. Thereafter, repeat the inspections at the applicable interval listed in the "Repeat Interval" column of the table in TR AWL 2–19, until paragraph (c) of this AD has been accomplished on all affected hook roller shafts. Where the TR specifies compliance intervals in "flights," for the purposes of this AD, "flights" means "flight cycles."

(3) For Model DHC–8–300 series airplanes: For Pre Mod 8Q101103 hook roller shafts having part number (P/N) 85750362–103 or 85750362–105, do the initial inspection at the compliance time specified in the "Threshold" column of the table in De Havilland Inc. Airworthiness Limitations List TR AWL 3–83, or within 12 months after the effective date of this AD, whichever occurs later, according to De Havilland Inc. Dash 8 Series 300 Maintenance Program Manual PSM 1–83–7. Thereafter, repeat the inspection at the applicable interval specified in the "Initial Interval" column of the table in TR AWL 3–83, until the airplane reaches the applicable threshold listed in the "Repeat Cut-In" column of the table in TR AWL 3–83. Thereafter, repeat the inspections at the applicable interval listed in the "Repeat Interval" column of the table in TR AWL 3–83 until paragraph (c) of this AD has been accomplished on all affected hook roller shafts. Where the TR specifies compliance intervals in "flights," for the purposes of this AD, "flights" means "flight cycles."

Replacement

(c) At the applicable time specified in paragraph (c)(1) or (c)(2) of this AD, replace hook roller shafts having P/N 85750362–103 or 85750362–105 with new or serviceable hook roller shafts having P/N 85750362–107, according to Sections 57–50–44 and 57–50–53 of the De Havilland Inc. Dash 8 Aircraft Maintenance Manual, as applicable. Replacement of all hook roller shafts, P/N 85750362–103 or 85750362–105, with new hook roller shafts, P/N 85750362–107, ends the repetitive inspections at the intervals required by paragraph (a) of this AD.

(1) For hook roller shafts on which any corrosion or crack is found during any inspection per paragraph (b) of this AD: Do the replacement before further flight.

(2) For uncracked or uncorroded hook roller shafts: Do the replacement within 20,000 flight cycles or 5 years after the effective date of this AD, whichever is first.

Post-Replacement Inspections

(d) Following the replacement of hook roller shafts according to paragraph (c) of this AD, do the Structural Inspection Program for the hook roller shafts of the flap carriage, as specified in paragraph (d)(1), (d)(2), or (d)(3) of this AD, as applicable.

(1) For Model DHC–8–100 series airplanes: Using the criteria for Mod 8Q101103 hook roller shafts having P/N 85750362–107, do the initial inspection at the compliance time specified in the "Threshold" column of the table in De Havilland Inc. Airworthiness Limitations List TR AWL–75 and AWL "76, both dated July 14, 2000, according to De Havilland Inc. Dash 8 Series 100 Maintenance Program Manual PSM 1–8–7. Thereafter, repeat the inspection at the applicable interval specified in the "Initial Interval" column of the table in TRs AWL–75 and AWL –76, until the airplane reaches the applicable threshold listed in the "Repeat Cut-In" column of the table in TRs AWL–75 and AWL–76. Thereafter, repeat the inspections at the applicable interval listed in the "Repeat Interval" column of the table in TRs AWL–75 and AWL–76. Where the TR specifies compliance intervals in "flights," for the purposes of this AD, "flights" means "flight cycles."

(2) For Model DHC–8–200 series airplanes: Using the criteria for Mod 8Q101103 hook roller shafts having P/N 85750362–107, do the initial inspection at the compliance time specified in the "Threshold" column of the table in De Havilland Inc. Airworthiness Limitations List TR AWL 2–19, dated July 14, 2000, according to De Havilland Inc. Dash 8 Series 200 Maintenance Program Manual PSM 1–82–7. Thereafter, repeat the inspection at the applicable interval specified in the "Initial Interval" column of the table in TR AWL 2–19, until the airplane reaches the applicable threshold listed in the "Repeat Cut-In" column of the table in TR AWL 2–19. Thereafter, repeat the inspections at the applicable interval listed in the "Repeat Interval" column of the table in TR AWL 2–19. Where the TR specifies compliance intervals in "flights," for the purposes of this AD, "flights" means "flight cycles."

(3) For Model DHC–8–300 series airplanes: Using the criteria for Mod 8Q101103 hook roller shafts having P/N 85750362–107, do the initial inspection at the compliance time specified in the "Threshold" column of the table in De Havilland Inc. Airworthiness Limitations List TR AWL 3–83, according to De Havilland Inc. Dash 8 Series 300 Maintenance Program Manual PSM 1–83–7. Thereafter, repeat the inspection at the applicable interval specified in the "Initial Interval" column of the table in TR AWL 3–83, until the airplane reaches the applicable threshold listed in the "Repeat Cut-In" column of the table in TR AWL 3–83. Thereafter, repeat the inspections at the applicable interval listed in the "Repeat Interval" column of the table in TR AWL 3–83. Where the TR specifies compliance intervals in "flights," for the purposes of this AD, "flights" means "flight cycles."

Alternative Methods of Compliance

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, New York ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

Special Flight Permits

(f) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 4: The subject of this AD is addressed in Canadian airworthiness directive CF–1999–10R2, dated September 12, 2000.

Issued in Renton, Washington, on March 14, 2002.

Ali Bahrami,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2001–NM–130–AD]

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Model MD–90–30 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking; reopening of comment period.

SUMMARY: This document revises an earlier proposed airworthiness directive (AD), applicable to certain McDonnell Douglas Model MD–90–30 airplanes, that would have required installation of two arcing protection brackets below and behind the circuit breakers located in the generator control rack in the electrical/electronics compartment. This new action revises the proposed rule by adding certain airplanes and removing certain other airplanes from the applicability. The actions specified by this new proposed AD are intended to prevent arcing between circuit breaker terminals and adjacent equipment and structure located in the generator control rack in the electrical/electronics compartment, which, if not corrected, could result in possible electrical shock to maintenance personnel during maintenance operations. This action is intended to address the identified unsafe condition.

DATES: Comments must be received by May 6, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2001–NM–130–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the proposed AD is being requested.
- Include justification (e.g., reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2001–NM–130–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2001–NM–130–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to add an airworthiness directive (AD), applicable to certain McDonnell Douglas Model MD–90–30 airplanes, was published as a notice of proposed rulemaking (NPRM) in the **Federal Register** on August 29, 2001 (66 FR 45655). That NPRM would have required installation of two arcing protection brackets below and behind the circuit breakers located in the generator control rack in the electrical/electronics compartment. That condition, if not corrected, could result in arcing between circuit breaker terminals and adjacent equipment and structure located in the generator control rack in the electrical/electronics compartment, which, if not corrected, could result in possible electrical shock to maintenance personnel during maintenance operations.

Comments

Due consideration has been given to the comments received in response to the NPRM.

Support for the Proposed Rule

One commenter mentions that it generally supports the proposed rule.

Request to Add Additional Service Information

One commenter advises that Boeing has revised Service Bulletin MD90–24–007 by issuing Revision 01, dated August 31, 2000, and Revision 02, dated July 16, 2001. The commenter notes that Revision 01 and Revision 02 add certain airplanes and delete certain other airplanes from the effectivity of the original service bulletin. Since the procedures described in the original service bulletin did not change in the revised service bulletins, the commenter requests that credit also be given for the accomplishment of Revision 01 or 02 of the service bulletin.

The FAA agrees that the procedures described in the original service bulletin are the same as those described in Revision 01 and Revision 02 of the original service bulletin. Since Boeing Service Bulletin MD90–24–007, Revision 02, dated July 16, 2001, contains the correct airplane effectivity, we have revised the applicability of this proposed rule to specify Revision 02. We have also added a new "Note 2" that provides credit for those procedures accomplished per the original service bulletin and Revision 01 of the service bulletin.

Conclusion

Since these changes expand the scope of the originally proposed rule, the FAA has determined that it is necessary to reopen the comment period to provide additional opportunity for public comment.

Cost Impact

There are approximately 26 Model MD–90–30 airplanes of the affected design in the worldwide fleet. The FAA estimates that 13 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 2 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Required parts would cost approximately $200 per airplane. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $4,160, or $320 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this proposed AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

McDonnell Douglas: Docket 2001–NM–130–AD.

Applicability: Model MD–90–30 airplanes, certificated in any category; as identified in Boeing Service Bulletin MD90–24–007, Revision 02, dated July 16, 2001.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent arcing between circuit breaker terminals and adjacent equipment and structure located on the generator control rack in the electrical/electronics compartment, and consequent electrical shock to maintenance personnel during maintenance operations, accomplish the following:

Installation

(a) Within one year after the effective date of this AD, install two arcing protection brackets below and behind the circuit breakers located in the generator control rack in the electrical/electronics compartment per the Accomplishment Instructions of McDonnell Douglas Service Bulletin MD90–24–007, Revision 02, dated July 16, 2001.

Note 2: Installation of two arcing protection brackets below and behind the circuit breakers located in the generator control rack in the electrical/electronics compartment per the Accomplishment Instructions of Boeing Service Bulletin MD90–24–007, dated February 7, 1996, or Revision 01, dated August 31, 2000, is considered acceptable for compliance with the requirements of this AD.

Alternative Methods of Compliance

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

Special Flight Permit

(c) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 14, 2002.

Ali Bahrami,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

14 CFR Parts 200 and 212

[Docket OST–2002–11741]

Standards for Approving International Charter Flights; Petition of the National Air Carrier Association for Rulemaking

AGENCY: Office of the Secretary, DOT.

ACTION: Petition for rulemaking; request for comments.

SUMMARY: The Department is inviting comments on the petition for rulemaking filed by the National Air Carrier Association (NACA) to add, delete and amend certain provisions of 14 CFR Parts 200 and 212 of the Department's Regulations. In its petition, NACA proposes, among other things, changes in the definitions and standards the Department uses in determining whether to grant or deny foreign air carrier requests to conduct certain types of international charter flights. In order that we may have a complete record on which to base our decision on NACA's petition, we solicit the views of all interested persons and entities, including direct air carriers (both U.S. and foreign), indirect air carriers (both U.S. and foreign), trade associations, labor unions, travel agents, shippers, communities, and the general public, on the proposals set forth in that petition. The proposal is in OST Docket 2002–11741 and can be accessed via the internet by searching Docket 11741 at the DOT Docket website (*http://dms.dot.gov*). Hard copies may also be obtained by calling the contact person listed below.

DATES: Comments to the Petition for Rulemaking are due May 6, 2002. If comments are filed, reply comments are due June 4, 2002.

ADDRESSES: To make sure your comments and related material are not entered more than once in the docket, please submit them (marked with docket number OST–2002–11741) by only one of the following means:

(1) By mail to the Docket Management Facility, U.S. Department of Transportation, Room PL–401, 400 Seventh Street SW., Washington, DC 20590.

(2) By hand delivery to room PL–401 on the Plaza level of the Nassif Building, 400 Seventh Street SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

(3) Electronically through the Web Site for the Docket Management System at http://dms.dot.gov. Comments must be filed in Docket OST–2002–11741, U.S. Department of Transportation, 400 7th St. SW., Washington, DC 20590. Late filed comments will be considered to the extent possible. Due to security procedures in effect since October 2001 on mail deliveries, mail received through the Postal Service may be subject to delays. Commenters should consider using an express mail firm to ensure the timely filing of any

BILLING CODE 4910–62–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR PART 1308

[DEA–225P]

Schedule of Controlled Substances: Proposed Rule: Rescheduling of Buprenorphine From Schedule V to Schedule III

AGENCY: Drug Enforcement Administration (DEA), Department of Justice.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule is issued by the Administrator of the Drug Enforcement Administration (DEA) to increase the regulatory controls placed on buprenorphine by rescheduling buprenorphine from a Schedule V narcotic to a Schedule III narcotic. This proposed action is based on a formal rescheduling recommendation by the Department of Health and Human Services (DHHS) and a DEA review indicating that buprenorphine meets the definition of a Schedule III narcotic. If finalized, this action will impose the regulatory controls and criminal sanctions of a Schedule III narcotic on those person who handle buprenorphine or products containing buprenorphine.

DATES: Comments must be received by April 22, 2002.

ADDRESSES: Comments should be submitted to the Administrator, Drug Enforcement Administration, Washington, DC 20537; Attention: DEA Federal Register Representative/CCR.

FOR FURTHER INFORMATION CONTACT: Frank Sapienza, Chief, Drug and Chemical Evaluation Section, Drug Enforcement Administration, Washington, DC 20537, (202) 307–7183.

SUPPLEMENTARY INFORMATION:

What Is Buprenorphine?

Buprenorphine is a derivative of thebaine, a major constituent of opium, presently marketed in the United States as an injectable formulation under the brand name of Buprenex® for the treatment of pain. It is classified as a narcotic agonist-antagonist, or partial agonist, with an analgesic potency far greater than morphine (generally reported to be about 20 to 30 times that of morphine sulfate in humans). DEA placed buprenorphine in Schedule V of the Controlled substances Act (CSA) in 1985 (50 FR 8104).

Buprenorphine has also been investigated for the treatment of narcotic addiction. Two New Drug Applications (NDA) have been submitted to the Food and Drug Administration (FDA) for this indication. Applications for marketing approval for these high-dose sublingual tablet products remain pending at FDA. However, approvable letters have been issued for both products and they are likely to receive final marketing approval in 2002.

Why Is DEA Issuing This Notice?

As part of the NDA review process for the high-dose sublingual tablet formulations for buprenorphine, the FDA reviewed and evaluated the scientific and medical data relating to scheduling under the CSA pursuant to 21 U.S.C. 811(b), (c), and (f). Since the original review conducted by the FDA in the early 1980s (prior to the marketing of Buprenex®), a substantial amount of human experience with buprenorphine products as well as a number of scientific studies have provided new information. These data have prompted a reevaluation of buprenorphine's status under the CSA. The eight factors used to determine the appropriate placement of buprenorphine under the CSA include:

(1) Its actual or relative potential for abuse;

(2) Scientific evidence of its pharmacological effects;

(3) The state of current scientific knowledge regarding the drug;

(4) Its history and current pattern of abuse;

(5) The scope, duration, and significance of abuse;

(6) What, if any, risk there is to the public health;

(7) Its physic or physiological dependence liability; and

(8) Whether the substance is an immediate precursor of a substance already controlled under this subchapter.

On December 4, 2001, the Assistant Surgeon General and Acting Principal Deputy Assistant Secretary for Health, Department of Health and Human Services (DHHS), Arthur J. Lawrence, signed and forwarded a letter to the DEA recommending that buprenorphine be rescheduled as a Schedule III substance. This recommendation was based on FDA's scientific and medical evaluation. After considering the FDA's evalaution and the DHHS scheduling recommendation and reviewing all the available relevant data regarding the eight factors determinative of control (21 U.S.C. 811(b)(c)), the DEA concludes that buprenorphine should be placed in Schedule III of the CSA.

Why Did DEA Conclude That Buprenorphine Should Be Placed in Schedule III of the Controlled Substances Act?

The DEA found that buprenorphine met the definition of a Schedule III substance. In accordance with 21 U.S.C. 812(b):

1. Buprenorphine has a potential for abuse less than the drugs or other substances in Schedule I or II.

Buprenorphine is a long-acting partial agonist with a high affinity for and slow dissociation from opioid receptors.

Buprenorphine produces effects similar to other pure mu agonists (like morphine or hydromorphone) including euphoria, drug liking, respiratory depression, pupillary constriction and sedation. It is recognized as morphine or heroin-like by experienced narcotic abusers.

Little abuse or diversion of buprenorphine has been noted in the U.S. (reflecting very limited prescription, distribution and product formulation: only low-dose injectable buprenorphine has been marketed). However, significant abuse of buprenorphine has been reported in many countries where it has been more available and other formulations have been marketed. In those countries, buprenorphine has been abused via the intravenous, sublingual, intransasal and inhalation routes by many abuser populations. Buprenorphine products have been diverted from legitimate channels through theft, doctor shopping and fraudulent prescriptions. Significant amounts of buprenorphine have been trafficked across international borders and law enforcement authorities have seized large amounts of buprenorphine involved in these activities.

The above data suggest that the abuse potential of buprenorphine is high and closely resembles other narcotics in Schedule II. However, buprenorphine effects are less dose-dependent than pure mu agonists and a "ceiling effect" has been demonstrated for many of the actions of buprenorphine. This attenuation in effects at high doses may have a blunting effect on the continued escalation in dose to obtain greater reinforcing effects. Although buprenorphine is capable of producing significant respiratory depression and numerous deaths have been associated with injection and abuse of high-dose sublingual tablets in combination with other psychoactive drugs in France, buprenorphine is a safer drug in overdose than other schedule II narcotics. Therefore, buprenorphine appears to have somewhat less abuse potential than Schedule I or II narcotic substances but more abuse potential than partial agonists in Schedule IV. Schedule IV partial agonists are less potent, less likely to produce pure mu agonists effects over a wide range of doses and are generally not recognized as heroin-like by experienced opioid abusers.

2. Buprenorphine has a currently accepted medical use in treatment in the United States.

Buprenex®, a low-dose (0.3 mg/m1) buprenorphine product, is approved for use as a parenteral narcotic analgesic for pain management. Subutex® and Subozone®, high-dose (2 and 8 mg) sublingual tablets for the treatment of narcotic addiction, have not, as yet, received final marketing approval in the U.S. If/When final approval is granted, they will have current accepted medical use in the United States.

3. Abuse of buprenorphine may lead to moderate or low physical dependence or high psychological dependence.

Data from a number of studies indicate that chronic use of buprenorphine is associated with a withdrawal syndrome that is of less intensity and, often, of longer duration than other opioids in Schedule I or II. The withdrawal effects have been characterized as mild to moderate. In addition, about 20 percent of babies born to mothers in treatment with buprenorphine substitution for opioid dependence have exhibited an abstinence syndrome severe enough to require treatment. Drug craving after discontinuation of buprenorphine use has been reported. Buprenorphine-dependent patients can easily return to heroin use and vice versa. These data suggest that buprenorphine produces low to moderate physical dependence and high psychological dependence.

It is likely that the approval and marketing of high-dose buprenorphine sublingual tables (and any other buprenorphine products that may be marketed in the future) will increase the availability of buprenorphine in the United States. The Schedule V controls presently in effect for buprenorphine are insufficient to prevent the diversion and abuse of buprenorphine that is likely to occur with its increased availability. Both foreign data on buprenorphine and the U.S. experience with other drugs like buprenorphine have been viewed by both the DHHS and the DEA as significant and relevant to the control of buprenorphine under the CSA.

According to the United Nations International Narcotics Control Board (UN/INCB), worldwide usage and availability of buprenorphine has increased substantially in recent years. Buprenorphine production has grown from 35 kg in 1980 to 460 kg in 1998. In France, imports increased from 5 kg in 1994 to 159 kg in 1998. The increased availability of buprenorphine in France coincides with the marketing of high-dose sublingual tablets and has been accompanied by increased diversion and abuse and over 100 buprenorphine-related deaths.

In the United States, expansion in the use of mixed agonists-antagonists or partial agonists has been accompanied by significant increases in their diversion, abuse and public health risks. For example, both pentazocine (Talwin®) and butorphanol (Stadol®) were initially marketed as injectable solutions for analgesia. The use of these products were limited and very few abuse-related problems were identified. However, when pentazocine became available in a table formulation and a butorphanol nasal spray was introduced, these fewer formulations greatly increased the availability of these substances. Significant abuse and diversion of these products resulted in their control under the CSA.

What Is the Effect of This Notice?

This proposed rule, if finalized, would specifically list buprenorphine as a Schedule III narcotic. All products containing buprenorphine or salts or buprenorphine would be subject to Schedule III narcotic regulatory requirements. The Schedule III placement will not prevent any future buprenorphine products approved by the FDA for the treatment of narcotic addiction from being used in office based treatment of narcotic addiction in accordance with the Drug Addiction Treatment Act of 2000 (Pub. L. 106–310). This Act amended the CSA to allow qualified physicians, under certification by the DHHS, to prescribe Schedule III–V narcotic drugs (FDA-approved for the indication of narcotic addiction treatment) to narcotic addicts outside the context of clinic-based narcotic treatment programs. The DEA recognizes the need to expand narcotic treatment and this factor was a consideration in proposing Schedule III placement for buprenorphine. However, buprenorphine's abuse potential and psychological dependence profile may result in significant abuse and diversion of the sublingual tablets once they are available for use in the U.S. Should this occur, the DEA will initiate action to further increase the regulatory controls on buprenorphine.

This notice also provides an opportunity for interested persons to comment, in writing, with regard to any information they feel may have a bearing on this matter. Requests for a hearing should state, with particularity, the issues concerning which the person desires to be heard. All correspondence regarding this matter should be submitted to the Administrator, Drug Enforcement Administration, Washington, DC 20537. In the event that comments, objections, or requests for a hearing raise one or more questions that the Administrator finds warrants a hearing, the Administrator shall publish a hearing notice in the **Federal Register** summarizing the issues to be heard and setting the time for the hearing.

What Regulatory Requirements Will Be Applied to Handlers of Buprenorphine?

Persons currently involved with the manufacture or handling of this substance are not expected to comply with DEA regulations applicable to a schedule III narcotic substance until such time as a final rule is published in the **Federal Register.** If/When a final rule is published in the **Federal Register**, persons who are currently engaged in manufacturing, distributing, dispensing, importing, exporting, storing or conducting research with buprenorphine will be provided with delayed dates for compliance with Federal regulation in order to avoid imposing any special hardship.

Regulatory Certifications

Regulatory Flexibility Act

The Administrator hereby certifies that this rulemaking has been drafted in a manner consistent with the principles of the Regulatory Flexibility Act (5 U.S.C. 605(b)). It will not have a significant economic impact on a substantial number of small business entities. Buprenorphine is already controlled under the CSA. Individuals who are currently engaged in activities with buprenorphine are already registered to handle controlled substances and are subject to the regulatory requirements of the CSA.

Executive Order 12866

In accordance with the provisions of the CSA (21 U.S.C. 811(a)), this action is a formal rulemaking "on the record after opportunity for a hearing." Such proceedings are conducted pursuant to the provisions of 5 U.S.C. 556 and 557. The Administrator certifies that this proposed rulemaking has been drafted in accordance with the principles in Executive Order 12866, Section 1(b). DEA has determined that this is not a significant rulemaking action. Therefore, this action has not been reviewed by the Office of Management and Budget. Buprenorphine is already controlled under the CSA. Individuals who are currently engaged in activities with buprenorphine are already registered to handle controlled substances and are subject to the regulatory requirements of the CSA.

Executive Order 12988

This proposed regulation meets the applicable standards set forth in Sections 3(a) and 3(b)(2) of the Executive Order 12988 Civil Justice Reform.

Executive Order 13132

This proposed rulemaking does not preempt or modify any provision of state law; nor does it impose enforcement responsibilities on any state; nor does it diminish the power of any state to enforce its own laws. Accordingly, this rulemaking does not have federalism implications warranting the application of Executive Order 13132.

Unfunded Mandates Reform Act of 1995

This proposed rule will not result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any one year, and will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996

This proposed rule is not a major rule as defined by section 804 of the Small Business Regulatory Enforcement Fairness Act of 1996. This rule will not result in an annual effect on the economy of $100,000,000 or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

Under the authority vested in the Attorney General by section 201(a) of the CSA (21 U.S.C. 811(a)), and delegated to the Administrator of the DEA by the Department of Justice regulations (21 CFR 0.100), the Administrator hereby proposes that 21 CFR part 1308 be amended as follows:

PART 1308—[AMENDED]

1. The authority citation for 21 CFR part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871(b) unless otherwise noted.

2. Section 1308.13 is proposed to be amended by revising paragraph (e) to read as follows:

§ 1308.13 Schedule III.

* * * * *

(e) Narcotic drugs. Unless specifically excepted or unless listed in another schedule:

(1) Any material, compound, mixture, or preparation containing any of the following narcotic drugs, or their salts calculated as the free anhydrous base or alkaloid, in limited quantities as set forth below:

(i) Not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkaloid of opium 9803

(ii) Not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9804

(iii) Not more than 300 milligrams of dihydrocodeinone (hydrocodone) per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium 9805

(iv) Not more than 300 milligrams of dihydrocodeinone (hydrocodone) per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts 9806

(v) Not more than 1.8 grams of dihydrocodeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts 9807

(vi) Not more than 300 milligrams of ethylmorphine per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9808

(vii) Not more than 500 milligrams of opium per 100 milliliters or per 100 grams or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9809

(viii) Not more than 50 milligrams of morphine per 100 milliliters or per 100 grams, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9810

(2) Any material, compound, mixture, or preparation containing any of the following narcotic drugs or their salts, as set forth below:

(i) Buprenorphine 9064

(ii) [Reserved.]

* * * * *

3. Section 1308.15 (b) introductory text is proposed to be revised and paragraph (b) (1) is proposed to be removed and reserved to read as follows:

§ 1308.15 Schedule V.

* * * * *

(b) Narcotic drugs. Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing any of the following narcotic drugs and their salts, as set forth below:

(1) [Reserved]

* * * * *

Dated: March 11, 2002.

Asa Hutchinson,

Administrator.

Safety Standards In Shipyard Employment for Scaffolds; Welding, Cutting, and Heating; Access and Egress; and Fall Protection

AGENCY: Occupational Safety and Health Administration (OSHA), Department of Labor.

ACTION: Withdrawal of proposed rules.

SUMMARY: OSHA is withdrawing its proposed rules for Scaffolds in Shipyard Employment, Subpart N, Welding, Cutting and Heating in Shipyard Employment, Subpart D, Access and Egress in Shipyards, Subpart E, and Fall Protection for Shipyard Employment, Subpart M.

DATES: This withdrawal is effective on March 21, 2002.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph V. Daddura, OSHA Office of Maritime Standards, N–3609, 200 Constitution Ave., NW, Washington, DC 20210, telephone (202) 693–2086.

SUPPLEMENTARY INFORMATION:

Background

On November 29, 1988, OSHA published proposed rules for Scaffolds in Shipyard Employment, Subpart N (53 FR 48182), Welding, Cutting and Heating in Shipyard Employment, Subpart D (53 FR 48111), Access and Egress in Shipyards, Subpart E (53 FR 48130), and Fall Protection for Shipyard Employment, Subpart M (53 FR 48168). The proposed rules intended to consolidate coverage of various shipyard hazards into one vertical standard.

The proposed rule on scaffolds included general requirements for scaffold construction and use, updated requirements for fall protection and falling object protection, and provided specific requirements for certain types of scaffolds. OSHA received 14 comments in response to this proposed rule. See Exhibit 6 (Docket S–047). On April 12, 1994, OSHA reopened the rulemaking record to consider some additional issues, including the appropriateness of replacing the term "capable person" in the proposed rule with "qualified person," the requirements for interior hung scaffolds, and the qualifications for persons performing scaffold inspections. 59 FR 17290 (April 12, 1994). OSHA received 8 comments in response to this notice. See Ex. 9 (Docket S–047a).

The proposed rule for welding, cutting, and heating included general requirements for engineering controls, work practices, and personal protective equipment. It also established general requirements for welding, cutting, and heating in hazardous environments such as hollow metal spaces and confined spaces. In addition, the proposal included specific requirements for oxyfuel gas welding and cutting, arc welding and cutting, and resistance welding. OSHA received 8 comments in response to this proposed rule. See Ex. 6 (Docket S–043).

The proposed rule for access and egress included general requirements for means of access and egress, as well as specific requirements for access and egress on vessels, drydocks, cargo spaces, and other structures. OSHA received 5 comments in response to this proposed rule. See Ex. 6 (Docket S–044).

The proposed rule for fall protection specified instances where fall protection systems would be required in the shipyard environment. It also set forth requirements for fall protection systems criteria, including requirements for guardrail systems, and safety net systems. OSHA received 13 comments in response to this proposed rule. See Ex. 6 (Docket S–046).

Reasons for Withdrawal of Proposed Rules

OSHA is withdrawing the proposed rules for the following reasons. First, OSHA is devoting its resources to higher priority shipyard standards. These important rulemakings include proposed standards for Fire Protection in Shipyard Employment, Subpart P, and General Working Conditions for Shipyard Employment, Subpart F. See OSHA Regulatory Agenda at 66 FR 61872 (Dec. 3, 2001).

Second, there are technologies and developments in shipyard employment that have emerged over the last 14 years that are not reflected in the proposed rules and supporting economic analyses. For example, since 1988 the use of interior hung scaffolds in the shipyard industry has increased greatly. OSHA did not contemplate such widespread use of these scaffolds when it published the proposed rule on scaffolds in 1988. Indeed, the proposed rule on scaffolds only provides minimum requirements for the erection of interior hung scaffolds; it does not address the dismantling of such scaffolds or certain work practices that may affect the structural integrity of the scaffolds. In addition, the manner in which ships and other vessels are constructed has changed dramatically since 1988, especially in small shipyards. Most ships are now constructed in component parts and assembled in one location. This method of construction reduces the need for certain work practices, such as piece-by-piece welding. It also reduces the need for multiple craft work at a single location. OSHA did not envision such a change throughout the entire shipyard industry when it published the proposed rules. This change affects the need for the requirements in the proposed rules, as well as necessitating changes to the supporting economic analyses.

Third, the rulemaking records for these proposed rules are particularly sparse. OSHA received only a few comments in response to each proposal. While most of these comments were helpful and informative, OSHA believes there is insufficient information in the rulemaking records upon which to regulate the specific conditions the proposals were intended to address.

Accordingly, the proposed rules for (1) Scaffolds in Shipyard Employment, Subpart N, (2) Welding, Cutting and Heating in Shipyard Employment, Subpart D, (3) Access and Egress in Shipyards, Subpart E, and (4) Fall Protection for Shipyard Employment, Subpart M are withdrawn.

Authority: This notice was prepared under the direction of John L. Henshaw, Assistant Secretary for Occupational Safety and Health. It is issued under sections 6 and 8 of the Occupational Safety and Health Act (29 U.S.C. 655, 657), 29 CFR 1911.11, and 29 CFR 1911.18.

Issued at Washington, DC, this 11 day of March, 2002.

John L. Henshaw,

Assistant Secretary of Labor.

[FR Doc. 02–6805 Filed 3–20–02; 8:45 am]

BILLING CODE 4510–26–M

[1] These RIN numbers correspond to the proposed rules for Scaffolds in Shipyard Employment, Subpart N and Access and Egress in Shipyards, Subpart E respectively. The proposed rules for Welding, Cutting and Heating in Shipyard Employment, Subpart D, and Fall Protection for Shipyard Employment, Subpart M no longer appear in OSHA's Semi-Annual Regulatory Agenda. These proposed rules were formally assigned RIN numbers 1218–AA73 and 1218–AA66 respectively.

LEGAL SERVICES CORPORATION

45 CFR Part 1611

Eligibility; 1611 Negotiated Rulemaking Working Group Meeting

AGENCY: Legal Services Corporation.

VOL
67
ISS
55
MR
21
2002
UMI

ACTION: Regulatory negotiation working group meeting.

SUMMARY: LSC is conducting a Negotiated Rulemaking to consider revisions to its eligibility regulations at 45 CFR Part 1611. This document announces the dates, times, and address of the next meeting of the working group, which is open to the public.

DATES: The Legal Services Corporation's 1611 Negotiated Rulemaking Working Group will meet on April 11–12, 2002. The meeting will begin at 9 a.m. on April 11, 2002. It is anticipated that the meeting will end by 3:30 p.m. on April 12, 2002.

ADDRESSES: The meeting will be held at the offices of the Center for Law and Social Policy, 1015 15th Street, NW., Suite 400, Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Mattie C. Condray, Senior Assistant General Counsel, Legal Services Corporation, 750 First St., NE., 11th Floor, Washington, DC 20001; (202) 336–8817 (phone); (202) 336–8952 (fax); *mcondray@lsc.gov*.

SUPPLEMENTARY INFORMATION: LSC is conducting a Negotiated Rulemaking to consider revisions to its eligibility regulations at 45 CFR Part 1611. The working group will hold its next meeting on the dates and at the location announced above. The meeting is open to public observation. Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments. Individuals who have a disability and need an accommodation to attend the meeting may notify Ms. Condray.

Victor M. Fortuno,

Vice President for Legal Affairs, General Counsel & Corporate Secretary.

BILLING CODE 7050–01–P

FEDERAL MARITIME COMMISSION

46 CFR Parts 502, 503, 515, 520, 530, 535, 540, 550, 551, 555, and 560

[Docket No. 02–05]

Update of Existing and Addition of New Filing and Service Fees

AGENCY: Federal Maritime Commission.

ACTION: Proposed rule.

SUMMARY: The Federal Maritime Commission ("Commission") proposes to revise its existing fees for filing petitions and complaints; various public information services, such as record searches, document copying, and admissions to practice; filing ocean transportation intermediary applications; applications for special permission; service contracts; agreements; and passenger vessel performance and casualty certificate applications. These revised fees reflect current costs to the Commission. In addition, the Commission adds a new fee for the provision of a database report on effective carrier agreements, makes nomenclature changes in certain CFR units with respect to Commission bureau designations, and makes section reference changes in certain CFR units to reflect numbering changes made in a previous rulemaking. The Commission also is republishing a fee requirement that was previously inadvertently omitted.

DATES: Submit an original and 15 copies of comments (paper), or e-mail comments as an attachment in WordPerfect 8, Microsoft Word 97, or earlier versions of these applications, no later than April 22, 2002.

ADDRESSES: Address comments to: Bryant L. VanBrakle, Secretary, Federal Maritime Commission, 800 North Capitol Street, N.W., Washington, D.C. 20573–0001, *E-mail: secretary@fmc.gov*.

FOR FURTHER INFORMATION CONTACT: JoAnn Baca, Special Assistant to the Executive Director, Office of the Executive Director, Federal Maritime Commission, 800 North Capitol Street, N.W., Washington, D.C. 20573–0001, (202)523–5800, E-mail: joannb@fmc.gov.

SUPPLEMENTARY INFORMATION: The Commission is authorized under the Independent Offices Appropriation Act ("IOAA"), 31 U.S.C. 9701 (1983), to establish fees for services and benefits that it provides to specific recipients. The IOAA provides that each service or thing of value provided by an agency to a person be self-sustaining to the extent possible, and that each charge shall be fair and based on the costs to the Government, the value of the service or thing to the recipient, policy or interest served, and other relevant facts. 31 U.S.C. 9701.

The primary guidance for implementation of IOAA is Office of Management and Budget ("OMB") Circular A–25, as revised July 8, 1993. OMB Circular A–25 requires that a reasonable charge be made to each recipient for a measurable unit or amount of Government service from which the recipient derives a benefit, in order that the Government recover the full cost of rendering that service.

OMB Circular A–25 further provides that costs be determined or estimated from the best available records in the agency, and that cost computations shall cover the direct and indirect costs to the Government of carrying out the activity, including but not limited to:

(A) Direct and indirect personnel costs, including salaries and fringe benefits such as medical insurance and retirement.

(B) Physical overhead, consulting, and other indirect costs including material and supply costs, utilities, insurance, travel and rent.

(C) The management and supervisory costs.

(D) The costs of enforcement, collection, research, establishment of standards and regulations, including any required environmental impact statements.

OMB Circular A–25, paragraphs 6.d.1.(a), (b), (c) and (d).

OMB Circular A–25 also calls for a periodic reassessment of costs, with related adjustment of fees, if necessary, and the establishment of new fees where none exist.

The Commission's current filing and service fees have been in effect since 1998, and are no longer representative of the Commission's actual costs for providing such services. Accordingly, the Commission proposes to revise its fees so as to reflect costs attendant to providing the involved services. Fee increases primarily reflect increases in salary and indirect (overhead) costs. For some services, the increase in processing or review time accounts in part for the increase in the level of proposed fees. For other services, proposed fees are lower than current fees due to overall reduced costs to provide those services.

The Commission is instituting a new user fee for provision of a database report on effective carrier agreements. Also, in promulgating new rules governing the filing of service contracts to implement the Ocean Shipping Reform Act of 1998, Public Law 105–158, 112 Stat. 1902, in Docket No. 99–12, *Termination of Dial-Up Service Contract Filing System*, 64 FR 41041 (July 29, 1999), we inadvertently failed to carry over § 514.7 into part 530. That section was a permission process to correct clerical or administrative errors in the essential terms of a filed service contract, and included an attendant user fee. We are therefore republishing it.

The Commission has reviewed its current fees and developed data on the time and cost involved in providing particular services to arrive at the updated direct labor costs for those services. The direct labor costs include clerical, professional, supervisory, and executive time expended on an activity, plus a check processing cost of $1.70. The indirect costs include Government overhead costs, which are fringe benefits and other wage-related Government contributions contained in OMB Circular A–76; [1] Commission general and administrative expenses; [2] and office general and administrative overhead expenses.[3] The sum of these indirect cost components gives an indirect cost factor that is added to the direct labor costs of an activity to arrive at the fully distributed cost.

A detailed summary of the data used to arrive at the proposed fees is available from the Secretary of the Commission upon written or e-mail request.

The Commission intends to update its fees biennially in keeping with OMB guidance. In updating its fees, the Commission will incorporate changes in the salaries of its employees into direct labor costs associated with its services, and recalculate its indirect costs (overhead) based on current level of costs.

The Chairman of the Federal Maritime Commission hereby certifies that these proposed fees will not have a significant economic impact on a substantial number of small entities. The Commission recognizes that these proposed revisions may have some impact on the shipping industry. Fees collected from the general public for Commission information recover the cost to the Commission for providing specific services. Commission regulations provide for waiver of fees for those entities that can make the required showing of undue hardship (46 CFR 503.41).

This Rule also makes nomenclature changes in certain CFR units to reflect a change in a relevant Commission bureau name since these CFR units were last revised. Additionally, this Rule makes section reference changes in certain CFR units to reflect numbering changes made in a previous rulemaking.

This Rule does not contain any collection of information requirements as defined by the Paperwork Reduction Act of 1980, as amended. Therefore, OMB review is not required.

[1] These include leave and holidays, retirement, worker's compensation, awards, health and life insurance, and Medicare. These are expressed as a percentage of basic pay.

[2] These costs include all salaries and overhead, such as rent, utilities, supplies, and equipment, allocated to the Offices of the Commissioners, Executive Director (including administrative offices) and General Counsel. The percentage of these costs to the total agency budget is allocated across all Commission programs.

[3] These expenses are limited to the overhead expenses allocated to those bureaus and offices involved in the fee-generating activities, and is derived from dividing allocated overhead expenses by the total funding for these fee-generated offices.

List of Subjects

46 CFR Part 502

Administrative practice and procedure, Claims, Equal access to justice, Investigations, Lawyers, Maritime carriers, Penalties, Reporting and recordkeeping requirements.

46 CFR Part 503

Classified information, Freedom of information, Privacy, Sunshine Act.

46 CFR Part 515

Exports, Freight forwarders, Non-vessel-operating common carriers, Ocean transportation intermediaries, Licensing requirements, Financial responsibility requirements, Reporting and recordkeeping requirements.

46 CFR Part 520

Common carrier, Freight, Intermodal transportation, Maritime carriers, Reporting and recordkeeping requirements.

46 CFR Part 530

Freight, Maritime carriers, Reporting and recordkeeping requirements.

46 CFR Part 535

Administrative practice and procedure, Maritime carriers, Reporting and recordkeeping requirements.

46 CFR Part 540

Insurance, Maritime carriers, Penalties, Reporting and recordkeeping requirements, Surety bonds.

46 CFR Part 550

Administrative practice and procedure, Maritime carriers.

46 CFR Part 551

Administrative practice and procedure, Maritime carriers.

46 CFR Part 555

Administrative practice and procedure, Investigations, Maritime carriers.

46 CFR Part 560

Administrative practice and procedure, Maritime carriers.

For the reasons set forth above, the Federal Maritime Commission proposes to amend 46 CFR parts 502, 503, 515, 520, 530, 535, 540, 550, 551, 555, and 560 as follows:

PART 502—RULES OF PRACTICE AND PROCEDURE

1. The authority citation for part 502 continues to read as follows:

Authority: 5 U.S.C. 504, 551, 552, 553, 556(c), 559, 561–569, 571–596; 5 U.S.C. 571–584; 12 U.S.C. 1141j(a); 18 U.S.C. 207; 26 U.S.C. 501(c)(3); 28 U.S.C. 2112(a); 31 U.S.C. 9701; 46 U.S.C. app. 817d, 817e, 1114(b), 1705, 1707–1711, 1713–1716; E.O. 11222 of May 8, 1965, 30 FR 6469, 3 CFR, 1964–1965 Comp. P. 306; 21 U.S.C. 853a; Pub. L. 105–258, 112 Stat. 1902.

Subpart D—Rulemaking

2. The fourth sentence of § 502.51(a) is revised to read as follows:

§ 502.51 Initiation of procedure to issue, amend, or repeal a rule.

(a) * * * Petitions shall be accompanied by remittance of a $228 filing fee.* * *

* * * * *

Subpart E—Proceedings; Pleadings; Motions; Replies

3. Section 502.62(g) is revised to read as follows:

§ 502.62 Complaints and fee.

* * * * *

(g) The complaint shall be accompanied by remittance of a $209 filing fee.

* * * * *

4. Section 502.68(a)(3) is revised to read as follows:

§ 502.68 Declaratory orders and fee.

(a) * * *

(3) Petitions shall be accompanied by remittance of a $228 filing fee.

* * * * *

5. Section 502.69(b) is revised to read as follows:

§ 502.69 Petitions—General and fee.

* * * * *

(b) Petitions shall be accompanied by remittance of a $228 filing fee. [Rule 69.]

Subpart K—Shortened Procedure

6. The last sentence of § 502.182 is revised to read as follows:

§ 502.182 Complaint and memorandum of facts and arguments and filing fee.

* * * The complaint shall be accompanied by remittance of a $209 filing fee. [Rule 182.]

Subpart Q—Refund or Waiver of Freight Charges

7. § 502.271(d)(5) is revised to read as follows:

§ 502.271 Special docket application for permission to refund or waive freight charges.

* * * * *

(d) * * *

VOL
67
ISS
55
MR
21
2002
UMI

(5) Applications must be accompanied by remittance of a $81 filing fee.

* * * * *

Subpart S—Informal Procedure for Adjudication of Small Claims

8. The last sentence of § 502.304(b) is revised to read as follows:

§ 502.304 Procedure and filing fee.

* * * * *

(b) * * * Such claims shall be accompanied by remittance of a $63 filing fee.

* * * * *

PART 503—PUBLIC INFORMATION

9. The authority citation for part 503 continues to read as follows:

Authority: 5 U.S.C. 552, 552a, 552b, 553; 31 U.S.C. 9701; E.O. 12958 of April 20, 1995 (60 FR 19825), sections 5.2(a) and (b).

10. In § 503.43, paragraphs (c)(1) (i) and (ii), the first sentence of paragraph (c)(2), paragraph (c)(3)(ii) and (iii), paragraph (c)(4), paragraph (d) and paragraph (e) are revised to read as follows:

§ 503.43 Fees for services.

* * * * *

(c) * * *

(1) * * *

(i) Search will be performed by clerical/administrative personnel at a rate of $20.00 per hour and by professional/executive personnel at a rate of $40.00 per hour.

(ii) Minimum charge for record search is $20.00.

(2) Charges for review of records to determine whether they are exempt from disclosure under § 503.35 shall be assessed to recover full costs at the rate of $75.00 per hour. * * *

(3) * * *

(ii) By Commission personnel, at the rate of five cents per page (one side) plus $20.00 per hour.

(iii) Minimum charge for copying is $5.00.

* * * * *

(4) The certification and validation (with Federal Maritime Commission seal) of documents filed with or issued by the Commission will be available at $86.00 for each certification.

(d) To have one's name and address placed on the mailing list of a specific docket as an interested party to receive all issuances pertaining to that docket: $10 per proceeding.

(e) Applications for admission to practice before the Commission for persons not attorneys at law must be accompanied by a fee of $95 pursuant to § 502.27 of this chapter.

Subpart G—Access to Any Record of Identifiable Personal Information

11. In § 503.69, paragraph (b)(2) is revised to read as follows:

§ 503.69 Fees.

* * * * *

(b) * * *

(2) The certification and validation (with Federal Maritime Commission seal) of documents filed with or issued by the Commission will be available at $86 for each certification.

* * * * *

PART 515—LICENSING, FINANCIAL RESPONSIBILITY REQUIREMENTS, AND GENERAL DUTIES FOR OCEAN TRANSPORTATION INTERMEDIARIES

12. The authority citation for part 515 continues to read as follows:

Authority: 5 U.S.C. 553; 31 U.S.C. 9701; 46 U.S.C. app. 1702, 1707, 1709, 1710, 1712, 1714, 1716, and 1718; Pub. L. 105–383, 112 Stat. 3411; 21 U.S.C. 862.

Subpart A—General

13. In § 515.5, paragraphs (a), (b)(1), (b)(2), and (b)(3) are revised to read as follows:

§ 515.5 Forms and Fees.

(a) *Forms.* License form FMC–18 Rev., and financial responsibility forms FMC–48, FMC–67, FMC–68, FMC–69 may be obtained from the Commission's website at *http://www.fmc.gov*, the Director, Bureau of Consumer Complaints and Licensing, Federal Maritime Commission, Washington, D.C. 20573, or from any of the Commission's area representatives.

(b) * * *

(1) Application for license as required by § 515.12(a): $799;

(2) Application for status change or license transfer as required by §§ 515.18(a) and 515.18(b): $506; and

(3) Supplementary investigations required by § 515.25(a): $225.

Subpart D—Duties and Responsibilities of Ocean Transportation Intermediaries; Reports to Commission

14. The second sentence of § 515.34 is revised to read as follows:

§ 515.34 Regulated Persons Index.

* * * The database may be purchased for $103 by contacting the Bureau of Consumer Complaints and Licensing, Federal Maritime Commission, Washington, DC 20573. * * *

§ 515.12, 515.18, 515.22, 515.25, Appendix A to Subpart C, Appendix B to Subpart C, Appendix D to Subpart C [Amended]

15. In addition to the amendments set forth above, in 46 CFR part 515 remove the words "Bureau of Tariffs, Certification and Licensing" and add, in their place, the words "Bureau of Consumer Complaints and Licensing" in the following places:

a. Section 515.12(a)(1);
b. Section 515.18(a);
c. Section 515.22(e);
d. Section 515.25(a);
e. Appendix A to Subpart C;
f. Appendix B to Subpart C; and
g. Appendix D to Subpart C.

PART 520—CARRIER AUTOMATED TARIFFS

16. The authority citation for part 520 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 1701–1702, 1707–1709, 1712, 1716; and sec. 424 of Pub. L. 105–383, 112 Stat. 3411.

Subpart B—Filing Requirements

17. The last sentence of § 520.14(c)(1) is revised to read as follows:

§ 520.14 Special permission.

(c) * * *

(1) * * * Every such application shall be submitted to the Bureau of Consumer Complaints and Licensing and be accompanied by a filing fee of $172.

* * * * *

§ 520.2, 520.3, 520.7 [Amended]

18. In addition to the amendments set forth above, in 46 CFR part 520 remove the words "Bureau of Tariffs, Certification and Licensing" and add, in their place, the words "Bureau of Consumer Complaints and Licensing" and remove the acronym "BTCL" and add, in its place, the acronym "BCCL" in the following places:

a. Section 520.2;
b. Section 520.3(d); and
c. Section 520.7(b).

PART 530—SERVICE CONTRACTS

19. The authority citation for part 530 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. App. 1704, 1705, 1707, 1716.

Subpart B—Service Contracts

20. Section 530.10(c), introductory text, is revised to read as follows:

§ 530.10 Amendment, correction, and cancellation.

* * * * *

(c) * * * Requests shall be filed, in duplicate, with the Commission's Office

of the Secretary within forty-five (45) days of the contract's filing with the Commission, accompanied by remittance of a $276 service fee, and shall include:

* * * * *

PART 535—AGREEMENTS BY OCEAN COMMON CARRIERS AND OTHER PERSONS SUBJECT TO THE SHIPPING ACT OF 1984

21. The authority citation for part 535 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 1701–1707, 1709–1710, 1712 and 1714–1718; Pub. L. 105–383, 112 Stat. 3411.

Subpart D—Filing of Agreements

22–23. In § 535.401, paragraph (f) is revised and paragraph (g) is added to read as follows:

§ 535.401 General requirements.

* * * * *

(f) *Fees.* The filing fee is $1,834 for new class A/B agreements requiring Commission review and action; $931 for class A/B agreement modifications requiring Commission review and action; $442 for agreements processed under delegated authority (for types of agreements that can be processed under delegated authority, see § 501.26(e) of this chapter); and $145 for carrier and terminal exempt agreements.

(g) The fee for the Commission's agreement database report is $32.

PART 540—PASSENGER VESSEL FINANCIAL RESPONSIBILITY

24. The authority citation for part 540 continues to read as follows:

Authority: 5 U.S.C. 552, 553; 31 U.S.C. 9701; secs. 2 and 3, Pub. L. 89–777, 80 Stat. 1356–1358; 46 U.S.C. app. 817e, 817d; 46 U.S.C. 1716.

Subpart A—Proof of Financial Responsibility, Bonding and Certification of Financial Responsibility for Indemnification of Passengers for Nonperformance of Transportation

25. The last two sentences in § 540.4(b) are revised to read as follows:

§ 540.4 Procedure for establishing financial responsibility.

* * * * *

(b) * * * An application for a Certificate (Performance), excluding an application for the addition or substitution of a vessel to the applicant's fleet, shall be accompanied by a filing fee remittance of $2,549. An application for a Certificate (Performance) for the addition or substitution of a vessel to the applicant's fleet shall be accompanied by a filing fee remittance of $1,276.

* * * * *

Subpart B—Proof of Financial Responsibility, Bonding and Certification of Financial Responsibility to Meet Liability Incurred for Death or Injury to Passengers or Other Persons on Voyages

26. The last two sentences in § 540.23(b) are revised to read as follows:

§ 540.23 Procedure for establishing financial responsibility.

* * * * *

(b) * * * An application for a Certificate (Casualty), excluding an application for the addition or substitution of a vessel to the applicant's fleet, shall be accompanied by a filing fee remittance of $1,111. An application for a Certificate (Casualty) for the addition or substitution of a vessel to the applicant's fleet shall be accompanied by a filing fee remittance of $557.

* * * * *

PART 550—REGULATIONS TO ADJUST OR MEET CONDITIONS UNFAVORABLE TO SHIPPING IN THE FOREIGN TRADE OF THE UNITED STATES

27. The authority citation for part 550 continues to read as follows:

Authority: 5 U.S.C. 553; sec. 19(a)(2), (e), (f), (g), (h), (i), (j), (k) and (l) of the Merchant Marine Act, 1920, 46 U.S.C. app. 876(a)(2), (e), (f), (g), (h), (i), (j), (k) and (l), as amended by Pub. L. 105–258; Reorganization Plan No. 7 of 1961, 75 Stat 840; and sec. 10002 of the Foreign Shipping Practices Act of 1988, 46 U.S.C. app. 1710a.

Subpart B—Production of Information

28. Section 550.203(b) is revised to read as follows:

§ 550.203 Failure to provide information.

* * * * *

(b) The Commission may, when there is a failure to produce any information ordered produced under § 550.201, make appropriate findings of fact and inferences, including the inference that conditions unfavorable to shipping in the foreign trade of the United States do exist.

Subpart D—Petitions for Section 19 Relief

29. Section 550.402 is revised to read as follows:

§ 550.402 Filing of petitions.

All requests for relief from conditions unfavorable to shipping in the foreign trade shall be by written petition. An original and fifteen copies of a petition for relief under the provisions of this part shall be filed with the Secretary, Federal Maritime Commission, Washington, DC 20573. The petition shall be accompanied by remittance of a $228 filing fee.

Subpart F—Corrective Actions

30. Section 550.601(d) is revised to read as follows:

§ 550.601 Actions to correct unfavorable conditions.

* * * * *

(d) Suspend, in whole or in part, an ocean common carrier's right to operate under an agreement, including any agreement authorizing preferential treatment at terminals or preferential terminal leases, whether filed with the Commission or not filed with the Commission pursuant to the exemptions granted in 46 CFR part 535; or any agreement filed with the Commission authorizing space chartering, or pooling of cargo or revenues with other ocean common carriers;

* * * * *

PART 551—ACTION TO ADJUST OR MEET CONDITIONS UNFAVORABLE TO SHIPPING IN THE U.S. FOREIGN TRADE

31. The authority citation for part 551 continues to read as follows:

Authority: 46 U.S.C. app. 876(1)(b); 46 U.S.C. app 876 (5) through (12); 46 CFR part 550; Reorganization Plan No. 7 of 1961, 26 FR 7315 (August 12, 1961).

32. Section 551.1 is revised to read as follows:

§ 551.1 Actions to adjust or meet conditions unfavorable to shipping in specific trades.

Whenever the Commission determines that conditions unfavorable to shipping exist in the United States foreign trade with any nation and issues rules to adjust or meet such conditions, pursuant to section 19(1)(b) of the Merchant Marine Act, 1920, 46 U.S.C. app. 876(1)(b) and 46 CFR part 551, such rules shall be published in the **Federal Register** and added to this part.

PART 555—ACTIONS TO ADDRESS ADVERSE CONDITIONS AFFECTING U.S.-FLAG CARRIERS THAT DO NOT EXIST FOR FOREIGN CARRIERS IN THE UNITED STATES

33. The authority citation for part 555 continues to read as follows:

Authority: 5 U.S.C. 553; sec. 10002 of the Foreign Shipping Practices Act of 1988 (46 U.S.C. app. 1710a), as amended by Pub. L. 105–258.

34. In § 555.4, paragraphs (a) and (b)(9) are revised to read as follows:

§ 555.4 Petitions.

(a) A petition for investigation to determine the existence of adverse conditions as described in § 555.3 may be submitted by any person, including any common carrier, shipper, shippers' association, ocean freight forwarder, or marine terminal operator, or any branch, department, agency, or other component of the Government of the United States. Petitions for relief under this part shall be in writing, and filed in the form of an original and fifteen copies with the Secretary, Federal Maritime Commission, Washington, DC 20573. The petition shall be accompanied by remittance of a $228 filing fee.

* * * * *

(b) * * *

(9) A recommended action, including any of those enumerated in § 555.8, the result of which will, in the view of the petitioner, address the conditions complained of.

* * * * *

35. In § 555.5, the first sentence of paragraph (a) and the last sentence of § 555.5(c) are revised to read as follows:

§ 555.5 Investigations.

(a) An investigation to determine the existence of adverse conditions as described in § 555.3 may be initiated by the Commission on its own motion or on the petition of any person pursuant to § 555.4. * * *

* * * * *

(c) * * * Persons who receive information requests from the Commission pursuant to § 555.6 of this part are not precluded from filing additional voluntary submissions in accordance with this paragraph.

* * * * *

36. The first sentence of § 555.6(c) is revised to read as follows:

§ 555.6 Information demands and subpoenas.

* * * * *

(c) The Commission may, in its discretion, determine that any information submitted to it in response to a request (including a subpoena) under this section, or accompanying a petition under § 555.4, or voluntarily submitted by any person pursuant to § 555.5(c), shall not be disclosed to the public. * * *

37. The first sentence of § 555.7 is revised to read as follows:

§ 555.7 Notification to Secretary of State.

Upon publication of a petition in the **Federal Register**, or on its own motion should it determine to initiate an investigation pursuant to § 555.5, the Commission will notify the Secretary of State of same, and may request action to seek resolution of the matter through diplomatic channels. * * *

§ 555.5, 555.8 [Amended]

38. In addition to the amendments set forth above, in 46 CFR part 555 remove the references to the term "§ 588.3" and add, in its place, the term "§ 555.3" in the following places:

a. Section 555.5 (b);
b. Section 555.8 (a); and
c. Section 555.8 (a) (7).

PART 560—ACTIONS TO ADDRESS CONDITIONS UNDULY IMPAIRING ACCESS OF U.S.-FLAG VESSELS TO OCEAN TRADE BETWEEN FOREIGN PORTS

39. The authority citation for part 560 continues to read as follows:

Authority: 5 U.S.C. 553; secs. 13(b)(6), 15 and 17 of the Shipping Act of 1984, 46 U.S.C. app. 1712(b)(6), 1714 and 1716, as amended by Pub. L. 105–258; sec. 10002 of the Foreign Shipping Practices Act of 1988 (46 U.S.C. app. 1710a), as amended by Pub. L. 105–258.

40. Section 560.3(a)(2) is revised to read as follows:

§ 560.3 Petitions for relief.

(a) * * *

(2) An original and fifteen copies of such a petition including any supporting documents shall be filed with the Secretary, Federal Maritime Commission, Washington, DC 20573. The petition shall be accompanied by remittance of a $228 filing fee.

* * * * *

41. In § 560.4, paragraphs (a) and (b)(2) are revised to read as follows:

§ 560.4 Proceeding.

(a) Upon the Commission's own motion or upon the filing of a petition which meets the requirements of § 560.3, when there are indications that conditions unduly impairing the access of a U.S. flag vessel to trade between foreign ports may exist, the Commission will institute a proceeding pursuant to this part.

(b) * * *

(2) Interested or adversely affected persons will be allowed a period of time to reply to the petition by the submission of written data, views or legal arguments pursuant to § 560.5 of this part. Factual submissions shall be in affidavit form.

* * * * *

42. Section 560.7(b)(6) is revised to read as follows:

§ 560.7 Decision; sanctions; effective date.

* * * * *

(b) * * *

(6) A request to the collector of customs at any port or place of destination in the United States to refuse the clearance required by section 4197 of the Revised Statutes, 46 U.S.C. app. 91, to any vessel of a foreign carrier which is or whose government is identified as contributing to the conditions described in § 560.2 of this part;

* * * * *

43. Section 560.8 is revised to read as follows:

§ 560.8 Submission of decision to the President.

Concurrently with the submission of any decision imposing sanctions to the **Federal Register** pursuant to § 560.7(d)(1), the Commission shall transmit that decision to the President of the United States who may, within ten days after receiving the decision, disapprove it if the President finds that disapproval is required for reasons of the national defense or the foreign policy of the United States.

44. Section 560.9(b) is revised to read as follows:

§ 560.9 Postponement, discontinuance, or suspension of action.

* * * * *

(b) The Commission shall postpone, discontinue or suspend any action provided for in its final decision if so directed by the President for reasons of national defense or foreign policy of the United States as provided in § 560.8.

By the Commission*.

Bryant L. VanBrakle,

Secretary.

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AH96

Endangered and Threatened Wildlife and Plants; Reopening of Public Comment Period on Proposed Designation of Critical Habitat for the Northern Great Plains Breeding Population of the Piping Plover

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; reopening of public comment period.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), provide notice of the reopening of the public comment period for the proposal to designate critical habitat for the northern Great Plains population of the piping plover (*Charadrius melodus*), and the associated draft environmental assessment and economic analysis, to allow all interested parties to comment. Comments previously submitted via regular or express postal mail need not be resubmitted as they have already been incorporated into the public record and will be fully considered in the final rule. Please resubmit comments via regular or express mail that were sent to us by electronic mail since December 2001. We have not received your comments because the Service's internet electronic mail has not been available due to a court order in an unrelated case.

DATES: The comment period is opened and will close on May 20, 2002. Any comments that are received after the closing date may not be considered in the final decision on this proposal.

ADDRESSES: You may submit written comments and information to Piping Plover Comments, South Dakota Ecological Services Field Office, U.S. Fish and Wildlife Service, 420 South Garfield Avenue, Suite 400, Pierre, SD 57501, or by facsimile to 605–224–9974.

You may hand-deliver written comments to our South Dakota Field Office at the address given above.

Copies of the draft economic analysis, draft environmental assessment, and proposed rule for designation of critical habitat for the northern Great Plains breeding population of the piping plover are available from the above address or on the Internet at *http://mountain-prairie.fws.gov/pipingplover*. Please note that at the time this notice was prepared the Service's web pages and electronic mail were not available because of a court order in an unrelated case. If you are unable to access the above website please contact the South Dakota Field Office by telephone or regular mail at the above address.

You may view comments and materials received, as well as supporting documentation used in the preparation of this proposed rule, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Nell McPhillips, Fish and Wildlife Biologist, at the above address or at 605–224–8693, extension 32.

SUPPLEMENTARY INFORMATION:

Background

We published a proposed rule to designate critical habitat for the northern Great Plains breeding population of the piping plover in the **Federal Register** on June 12, 2001 (66 FR 31760). Section 4(b)(2) of the Endangered Species Act (Act) requires that we designate or revise critical habitat based upon the best scientific and commercial data available and after taking into consideration the economic impacts, and any other relevant impact, of specifying any particular area as critical habitat. We may exclude an area from critical habitat if we determine that the benefits of excluding the area outweigh the benefits of including the area as critical habitat, provided such exclusion will not result in the extinction of the species.

The proposed designation includes 11 areas of prairie alkali wetlands, inland and reservoir lakes in 5 counties in Montana, 18 counties in North Dakota, and 1 county at Lake-of-the-Woods, Minnesota, totaling approximately 196,576.5 acres (79,553.1 hectares). It also includes five areas of portions of four rivers in the States of Montana, North Dakota, South Dakota, and Nebraska, totaling approximately 1,338 miles (2,152.9 kilometers) of river. If this proposal is made final, section 7 of the Act would prohibit destruction or adverse modification of critical habitat by any activity funded, authorized, or carried out by any Federal agency.

We reopened the comment period on the proposed critical habitat and provided a notice of availability for the economic analysis in the **Federal Register** on December 28, 2001 (66 FR 67165). However, prior to that reopening the Service's web sites and electronic mail were disconnected in response to a court order in an unrelated lawsuit. Persons who have submitted electronic comments to the Service on this proposal since December 28, 2001, should resubmit those comments directly to the office listed in the **ADDRESSES** section above via regular or express mail or facsimile.

Public Comments Solicited

We solicit public comment on the proposal to designate critical habitat for the northern Great Plains breeding population of the piping plover, as well as the associated draft environmental assessment and draft economic analysis. We will accept written comments and information during this comment period. Previous written comments and information submitted during the comment period need not be resubmitted; however, comments submitted by electronic mail since December 28, 2001, should be resubmitted by regular or express mail or facsimile (see **ADDRESSES** section).

Comments and materials received, as well as supporting documentation used in preparation of the proposal to designate critical habitat, will be available for public inspection, by appointment, during normal business hours at the South Dakota Field Office (see **ADDRESSES** section). Our practice is to make all comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home addresses from the rulemaking record; we will honor these requests to the extent allowed by law. In some circumstances, we would withhold from the rulemaking record a respondent's identity, allowed by law. If you wish us to withhold your name or address, you must state this prominently at the beginning of your comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Author

The primary authors of this notice are the South Dakota Field Office staff (see **ADDRESSES** section).

Authority: The authority for this action is the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*).

Dated: March 13, 2002.

Craig Manson,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 6335–01–P

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Advisory Committees

AGENCY: Bureau of the Census, Department of Commerce.

ACTION: Notice of public meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, 5 U.S.C. Appendix 2, section 10(a)(b), the Bureau of the Census (Census Bureau) is giving notice of a joint meeting followed by separate and concurrently held meetings of the Census Advisory Committees (CACs) on the African American Population, the American Indian and Alaska Native Populations, the Asian Population, the Hispanic Population, and the Native Hawaiian and Other Pacific Islander Populations. The Committees will address issues related to 2010 decennial planning, development, and testing, as well as the American Community Survey and other related decennial programs. The five CACs on Race and Ethnicity will meet separately on April 29 and May 1 and in plenary and concurrent sessions on April 30. Last-minute changes to the schedule are possible, which could prevent us from giving advance notification.

DATES: April 29–May 1, 2002. On April 29, the meeting will begin approximately 9 a.m. and end approximately 4:30 p.m. On April 30, the meeting will begin approximately 8:30 a.m. and end approximately 5:30 p.m. On May 1, the meeting will begin approximately 9 a.m. and end approximately 1 p.m.

ADDRESSES: The meetings will be held in the Francis Amasa Walker Conference Center, at the U.S. Census Bureau, 4700 Silver Hill Road, Federal Office Building 3, Suitland, MD 20746.

FOR FURTHER INFORMATION CONTACT: Jeri Green, Committee Liaison Officer, Department of Commerce, U.S. Census Bureau, Room 3627, Federal Office Building 3, Washington, DC 20233, telephone 301–457–2075, TDD 301–457–2540.

SUPPLEMENTARY INFORMATION: The CACs on the African American Population, the American Indian and Alaska Native Populations, the Asian Population, the Hispanic Population, and the Native Hawaiian and Other Pacific Islander Populations are comprised of nine members each. The Committees provide an organized and continuing channel of communication between the representative race and ethnic populations and the Census Bureau. The Committees provide an outside user perspective about how research and design plans for the 2010 decennial census, the American Community Survey, and other related programs realize goals and satisfy needs associated with these communities. They also assist the Census Bureau on ways that census data can best be disseminated to diverse race and ethnic populations and other users.

All meetings are open to the public. A brief period will be set aside on May 1 for public comment and questions. Individuals with extensive questions or statements must submit them in writing to the Committee Liaison Officer, named above, at least three days before the meeting. Seating is available to the public on a first-come, first-served basis.

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Committee Liaison Officer.

Dated: March 14, 2002.

William G. Barron, Jr.,

Acting Director, U.S. Census Bureau.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 17–2002]

Foreign-Trade Zone 126, Reno, Nevada Request for Manufacturing Authority (Personal Computers)

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Economic Development Authority of Western Nevada, grantee of FTZ 126, requesting, on behalf of Dell Computer Corporation (Dell), authority to manufacture personal computers under zone procedures within Site 5 (725 Waltham Way, McCarran, Nevada) of FTZ 126 (Reno Customs port of entry). The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on March 14, 2002.

VOL
67
ISS
55
MR
21
2002
UMI

Dell intends to share a 330,000 square-foot facility within FTZ 126 (110 employees projected) for the manufacture of personal computers, including servers and workstations. Dell is already authorized to manufacture such computers under zone procedures within Foreign-Trade Zone 78, Foreign Trade Zone 183, and Subzone 183A. This proposal involves an increase in the overall level of production under FTZ procedures for Dell.

The specific finished products for which Dell seeks authority to produce under FTZ procedures are various types of computers (desktop and notebook computers, workstations, and network servers) and data storage products. All of these products fall into HTSUS classifications which are duty free. The imported components for which Dell is seeking authority for inverted tariff benefits are cables, batteries, and carrying cases (leather only). Duty rates on these specific items range from 2.6% to 4.5% *ad valorem*, and components purchased from foreign sources currently comprise up to 48 percent of the finished product's value.

This application requests authority to allow Dell to conduct its activity under FTZ procedures, which it says would help improve the international competitiveness of Dell's Reno facility. According to Dell's application, the principal tangible benefit is that, on its domestic sales, the company would be able to choose the duty rate that applies to finished computers (duty free) for the foreign components noted above. The company also anticipates "procedural benefits" through the use of FTZ procedures.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at one of the following addresses:

1. Submissions *via Express/Package Delivery Services:* Foreign-Trade-Zones Board, U.S. Department of Commerce, Franklin Court Building—Suite 4100W, 1099 14th St. NW., Washington, DC 20005; or

2. Submissions *via the U.S. Postal Service:* Foreign-Trade-Zones Board, U.S. Department of Commerce, FCB—Suite 4100W, 1401 Constitution Ave. NW., Washington, DC 20230.

The closing period for their receipt is May 20, 2002. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to June 4, 2002.

A copy of the application and accompanying exhibits will be available for public inspection at the Office of the Foreign-Trade Zones Board's Executive Secretary at address Number 1 listed above, and at the U.S. Department of Commerce Export Assistance Center, 1755 East Plumb Lane, Suite 152, Reno, NV 89502.

Dated: March 14, 2002.

Dennis Puccinelli,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Coastal Zone Management: Federal Consistency Appeal by Stora Enso North America (Formerly Known as Consolidated Papers, Inc. and Niagara Paper of Wisconsin) From an Objection by Wisconsin Department of Administration

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Dismissal of appeal.

On May 5, 1997, Stora Enso North America (formerly known as Consolidated Papers, Inc. and Niagara Paper of Wisconsin) (Appellant), appealed the Wisconsin Department of Administration's (State) objection to the federal hydropower license for the Little Quinnesec Falls project. Action on this appeal stayed pending the resolution of judicial proceedings before the Court of Appeals for the 7th Circuit and negotiations between the Parties.

At the Appellant's request, the Assistant General Counsel for Ocean Services granted several stays of the consistency appeal, which were not opposed by the State. The State and the Appellant have reached an agreement on Appellant's proposed project and the State has determined that the activity is now consistent with the State's Coastal Management Program. By letter to Appellant, the State withdrew its objection to the project. Accordingly, the Appellant has requested that the appeal be withdrawn.

NOAA granted this request and the appeal has been dismissed. This is a final agency action for purposes of judicial review.

FOR FURTHER INFORMATION CONTACT: Karl Gleaves, Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, 1305 East-West Highway, Room 6111, Silver Spring, MD 20910, (301) 713–2967.

(Federal Domestic Assistance Catalog No. 11.419 Coastal Zone Management Program Assistance)

Dated: February 12, 2002.

AGENCY: Department of Defense.

ACTION: Notice.

SUMMARY: Under the provisions of Public Law 92–463, the "Federal Advisory Committee Act," notice is hereby given that the following 19 advisory committees have been determined to be in the public interest and were renewed on February 28, 2002:

A. Board of Visitors National Defense University
B. Strategic Advisory Group for the U.S. Strategic Command
C. Advisory Group on Electron Devices
D. Defense Science Board
E. Defense Advisory Committee on Military Personnel Testing
F. DoD Wage Committee
G. National Security Agency Advisory Board
H. Armed Forces Epidemiological Board
I. Army Science Board
J. Army Education Advisory Committee
K. Chief of Engineers Environmental Advisory Board
L. Scientific Advisory Board of the Armed Forces Institute of Pathology
M. Board of Advisors to the President, Naval War College
N. Board of Advisors to the Superintendent, Naval Postgraduate School
O. Chief of Naval Operations Executive Panel Advisory Committee
P. Naval Research Advisory Committee
Q. Air University Board of Visitors
R. Community College of the Air Force Board of Visitors
S. U.S. Air Force Scientific Advisory Board.

These committees provide necessary and valuable advice to the Secretary of Defense and other senior officials in the DoD in their respective areas of expertise. They make important contributions to DoD efforts in research and development, education, and training, and various technical program areas. Some of them are authorized by statute.

It is a continuing DoD policy to make every effort to achieve a balanced membership on all DoD advisory committees. Each committee is evaluated in terms of the functional disciplines, levels of experience, professional diversity, public and private association, and similar characteristics required to ensure a high degree of balance is obtained.

FOR FURTHER INFORMATION CONTACT: Contact Jennifer Spaeth, DoD Committee Management Officer, 703–695–4281.

Dated: March 15, 2002.

BILLING CODE 5001–08–M

DEPARTMENT OF DEFENSE

Office of the Secretary; Renewal of the Department of Defense Historical Advisory Committee

AGENCY: Department of Defense.

ACTION: Notice.

SUMMARY: The Department of Defense Historical Advisory Committee was renewed, effective January 23, 2002, in consonance with the public interest, and in accordance with the provisions of the "Federal Advisory Committee Act."

The DoD Historical Advisory Committee consists of three subcommittees (Historical Records Declassification Advisory Panel, the Department of The Army's Historical Advisory Subcommittee, and the Secretary of the Navy's Subcommittee on Naval History) which advise the Office of the Secretary of Defense and the Secretaries of the Army and Navy regarding the professional standards, historical methodology, program priorities, liaison with professional groups, and adequacy of resources associated with Department of Defense historical programs.

The DoD Historical Advisory Committee will continue to be well balanced in terms of the interest groups represented and functions to be performed. The members include distinguished representatives from academia, current U.S. Government and private sector historians, authors and librarians, and retired general officers of general/flag rank.

FOR FURTHER INFORMATION CONTACT: Ms. Jennifer Spaeth, DoD Committee Management Officer, 703–695–4281.

Dated: March 15, 2002.

L.M. Bynum,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

BILLING CODE 5001–08–M

DEPARTMENT OF DEFENSE

Department of the Army

Armed Forces Epidemiological Board; Meeting

AGENCY: Department of the Army, DoD.

ACTION: Notice of closed meeting.

SUMMARY: In accordance with section 10(a)(2) of Public Law 92–463, The Federal Advisory Committee Act, this announces the forthcoming working group meeting:

Name of Committee: Armed Forces Epidemiological Board (AFEB).

Dates of Meeting: April 17–18, 2002.

Time: 7:30 a.m.–4:30 p.m. (April 17, 2002); 7:30 a.m.–1 p.m. (April 18, 2002).

The purpose of the meeting is to receive briefings on the health risk of low-level phased array radio frequency energy emissions, specifically risk associated with the PAVE PAWS radar site at Cape Cod Military Reservation.

As part of the deliberations, the working group of the AFEB has requested classified briefings from the Air Force. The meeting location will be at Brooks Air Force Base in San Antionio, Texas. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof and Title 5, U.S.C., appendix 1, subsection 10(d). Any interested person may file statements with the committee to be considered at the time and in the manner permitted by the committee.

FOR FURTHER INFORMATION CONTACT: Lt Col James R. Riddle, Executive Secretary, Armed Forces Epidemiological Board, Skyline Six, 5109 Leesburg Pike, Room 682, Falls Church, Virginia 22041–3258, (703) 681–8012/3.

SUPPLEMENTARY INFORMATION: None.

Luz D. Ortiz,

Army Federal Register Liaison Officer.

BILLING CODE 3710–08–M

DEPARTMENT OF DEFENSE

Department of the Army

Privacy Act of 1974; System of Records

AGENCY: Department of the Army, DoD.

ACTION: Notice to amend a system of records.

SUMMARY: The Department of the Army is amending a system of records notice in its existing inventory of records systems subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended.

The category of records entry is being amended to better define those individual pieces of data contained in the reports maintained in the system.

DATES: This proposed action will be effective without further notice on April 22, 2002, unless comments are received which result in a contrary determination.

ADDRESSES: Records Management Division, U.S. Army Records Management and Declassification Agency, ATTN: TAPC–PDD–RP, Stop 5603, 6000 6th Street, Ft. Belvoir, VA 22060–5603.

FOR FURTHER INFORMATION CONTACT: Ms. Janice Thornton at (703) 806–4390 or DSN 656–4390 or Ms. Christie King at (703) 806–3711 or DSN 656–3711.

SUPPLEMENTARY INFORMATION: The Department of the Army systems of records notices subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address above.

The specific changes to the records system being amended are set forth below followed by the notice, as amended, published in its entirety. The proposed amendments are not within the purview of subsection (r) of the Privacy Act of 1974, (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Dated: March 15, 2002.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

A0380–13 DAMO

SYSTEM NAME:

Local Criminal Intelligence Files (February 22, 1993, 58 FR 10002).

CHANGES:

SYSTEM IDENTIFIER:

Delete entry and replace with 'A0190–45a DAMO'.

* * * * *

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Delete entry and replace with 'Any individual suspected or involved in criminal activity directed against or involving the United States Army.'

CATEGORIES OF RECORDS IN THE SYSTEM:

Add to entry 'Information includes subject's name, aliases, addresses, phone number, date of birth, source of investigation, risk analysis, reports, threat assessments, retention control sheets, victims names, names of informants, names of law enforcement officers and investigators, and subject's group affiliations, if any.'

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Delete second paragraph. Any release of information from this system of records for law enforcement purposes is covered under the DoD "Blanket Routine Use" for law enforcement.

* * * * *

RETRIEVABILITY:

Delete entry and replace with 'By individual's name, Social Security Number, and/or date of birth.'

* * * * *

A0190–45a DAMO

SYSTEM NAME:

Local Criminal Intelligence Files.

SYSTEM LOCATION:

At all designated Army commands, installations and activities. Official mailing addresses are published as an appendix to the Army's compilation of systems of records notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any individual suspected or involved in criminal activity directed against or involving the United States Army.

CATEGORIES OF RECORDS IN THE SYSTEM:

Reports and supporting documents of criminal activity directed against or involving the U.S. Army. Information includes subject's name, aliases, addresses, phone number, date of birth, source of investigation, risk analysis, reports, threat assessments, retention control sheets, victims names, names of informants, names of law enforcement officers and investigators, and subject's group affiliations, if any.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 3013, Secretary of the Army; Army Regulation 380–13, Acquisition and Storage of Information Concerning Non-Affiliated Persons and Organizations; Army Regulation 190–45, Law Enforcement Reporting; Army Regulation 195–2, Criminal Investigation Activities; and E.O. 9397 (SSN).

PURPOSE(S):

To enable designated Army officials, commanders, or civil criminal justice agencies to meet their responsibilities maintaining law and order through investigation and possible judicial action. To identify individuals in an effort to anticipate, prevent or monitor possible criminal activity directed against or involving the U.S. Army.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

The DoD 'Blanket Routine Uses' set forth at the beginning of the Army's compilation of systems of records notices also apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders; magnetic tape/disc, and on electronic storage media.

RETRIEVABILITY:

By individual's name, Social Security Number, and/or date of birth.

SAFEGUARDS:

Only authorized personnel have access to files. Physical security measures include locked containers/storage areas, controlled personnel access, and continuous presence of authorized personnel.

RETENTION AND DISPOSAL:

Criminal intelligence reports and cross-index cards belonging to the Headquarters, Criminal Investigation Division, are destroyed when no longer needed, except for reports of current operational value. These reports are reviewed yearly for continued retention, not to exceed 20 years, and then destroy. The records maintained at the Regional Headquarters are destroyed after 5 years. Records maintained at District, field office and elements designated by region commanders are destroyed after 3 years or when no longer needed.

SYSTEM MANAGER(S) AND ADDRESS:

Deputy Chief of Staff for Operations and Plans, Military Operations, 400 Army Pentagon, Washington, DC 20310–0400.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Deputy Chief of Staff for Operations and Plans, Military Operations, 400 Army Pentagon, Washington, DC 20310–0400.

Individual should provide their full name, Social Security Number, date of birth, and address.

RECORD ACCESS PROCEDURES:

Individuals seeking access to information about themselves contained in this system should address written inquiries to the Deputy Chief of Staff for Operations and Plans, Military Operations, 400 Army Pentagon, Washington, DC 20310–0400.

Individual should provide their full name, Social Security Number, date of birth, and address.

CONTESTING RECORD PROCEDURES:

The Army's rules for accessing records, and for contesting contents and appealing initial agency determinations are contained in Army Regulation 340–21; 32 CFR part 505; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Subjects, witnesses, victims, Military Police and U.S. Army Criminal Investigation Command personnel and special agents, informants, various Department of Defense, federal, state and local investigative and law enforcement agencies, departments or agencies of foreign governments, and any other individuals or organizations which may supply pertinent information.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Parts of this system may be exempt pursuant to 5 U.S.C. 552a(j)(2) if the information is compiled and maintained by a component of the agency which performs as its principle function any activity pertaining to the enforcement of criminal laws.

An exemption rule for this system has been promulgated in accordance with requirements of 5 U.S.C. 553(b)(1), (2), and (3), (c) and (e) and published in 32 CFR part 505. For additional information contact the system manager.

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Leader, Regulatory Information Management, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: An emergency review has been requested in accordance with the Act (44 U.S.C. Chapter 3507(j)), since public harm is reasonably likely to result if normal clearance procedures are followed. Approval by the Office of Management and Budget (OMB) has been requested by April 1, 2002.

ADDRESSES: Written comments regarding the emergency review should be addressed to the Office of Information and Regulatory Affairs, Attention: Karen Lee, Desk Officer: Department of Education, Office of Management and Budget; 725 17th Street, NW., Room 10235, New Executive Office Building, Washington, DC 20503 or electronically mailed to internet address *Karen_F._Lee@omb.eop.gov* or faxed to (202) 395–6974.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Director of OMB provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The Office of Management and Budget (OMB) may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory

2002
UMI

obligations. The Leader, Regulatory Information Management, Office of the Chief Information Officer, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. ED invites public comment.

The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner, (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected, and (5) how might the Department minimize the burden of this collection on respondents, including through the use of information technology.

Dated: March 15, 2002.

John Tressler,

Leader, Regulatory Information Management, Office of the Chief Information Officer.

Office of English Language Acquisition

Type of Review: New.

Title: Application for Grants Under English Language Acquisition and Language Enhancement: Native American and Alaska Native Children in School.

Abstract: The Department of Education needs and uses this information to make grants. The respondents are eligible entities required to provide this information in applying for grants.

Additional Information: The purpose of the National Professional Development Program is to provide grants for professional development activities that will improve classroom instruction for limited English proficient (LEP) children and assist educational personnel working with such children to meet high professional standards, including standards for certification and licensure as teachers who work in language instruction educational programs or serve LEP students, Section 3131, Public Law 107–110.

Frequency: Annually.

Affected Public: Not-for-profit institutions.

Reporting and Recordkeeping Hour Burden:

Responses: 100.

Burden Hours: 8,200.

Requests for copies of the proposed information collection request should be directed to Vivian Reese, Department of Education, 400 Maryland Avenue, SW., Room 4050, Regional Office Building 3, Washington, DC 20202–4651, *vivian.reese@ed.gov*, or should be electronically mailed to the internet address *OCIO_RIMG@ed.gov*, or should be faxed to 202–708–9346.

Comments regarding burden and/or the collection activity requirements, contact Sheila Carey at (202) 708–6287 or via her internet address *Sheila.Carey@ed.gov*. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

DEPARTMENT OF EDUCATION

Submission for OMB Review; Comment Request

AGENCY: Department of Education.

SUMMARY: The Leader, Regulatory Information Management Group, Office of the Chief Information Officer invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before April 22, 2002.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Lauren Wittenberg, Desk Officer, Department of Education, Office of Management and Budget, 725 17th Street, NW., Room 10202, New Executive Office Building, Washington, DC 20503 or should be electronically mailed to the internet address *Lauren_Wittenberg@omb.eop.gov*.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Leader, Regulatory Information Management Group, Office of the Chief Information Officer, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g. new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

Dated: March 15, 2002

John Tressler,

Leader, Regulatory Information Management, Office of the Chief Information Officer.

Office of Special Education and Rehabilitative Services

Type of Review: Revision.

Title: Infants and Toddlers with Disabilities Program (Part C) of the Individuals with Disabilities Education Act (IDEA).

Frequency: Annually.

Affected Public: State, Local, or Tribal Gov't, SEAs or LEAs; Federal Government.

Reporting and Recordkeeping Hour Burden:

Responses: 56.

Burden Hours: 168.

Abstract: States are required to submit an application to receive funds. An approved application remains in effect until modifications are needed resulting from a change in policy, procedures, or assurances.

Requests for copies of the proposed information collection request may be accessed from *http://edicsweb.ed.gov*, or should be addressed to Vivian Reese, Department of Education, 400 Maryland Avenue, SW, Room 4050, Regional Office Building 3, Washington, DC 20202–4651 or to the e-mail address *vivian.reese@ed.gov*. Requests may also be electronically mailed to the internet address *OCIO_RIMG@ed.gov* or faxed to 202–708–9346. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be directed to Sheila Carey at (202) 708–6287 or via her internet address *Sheila.Carey@ed.gov*. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

National Advisory Committee on Institutional Quality and Integrity, (National Advisory Committee); Meeting

AGENCY: National Advisory Committee on Institutional Quality and Integrity, Department of Education.

What Is the Purpose of This Notice?

The purpose of this notice is to announce the public meeting of the National Advisory Committee and invite third-party oral presentations before the Committee. This notice also presents the proposed agenda and informs the public of its opportunity to attend this meeting. The notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

When and Where Will the Meeting Take Place?

We will hold the public meeting on June 3, 2002 from 9:30 a.m. until 6:00 p.m., on June 4, 2002 from 8:30 a.m. until 6:00 p.m., and on June 5, 2002 from 8:30 a.m. until 3:00 p.m. at the Wyndham City Center Hotel, 1143 New Hampshire Avenue, NW, Washington, DC 20037. You may call the hotel at (202) 775–0800 or 1–800–526–7495 to inquire about rooms.

What Assistance Will Be Provided to Individuals with Disabilities?

The meeting site is accessible to individuals with disabilities. If you will need an auxiliary aid or service to participate in the meeting (*e.g.*, interpreting service, assistive listening device, or materials in an alternate format), notify the contact person listed in this notice at least two weeks before the scheduled meeting date. Although we will attempt to meet a request received after that date, we may not be able to make available the requested auxiliary aid or service because of insufficient time to arrange it.

Who Is the Contact Person for the Meeting?

Please contact Ms. Bonnie LeBold, the Executive Director of the National Advisory Committee on Institutional Quality and Integrity, if you have questions about the meeting. You may contact her at the U.S. Department of Education, room 7007, MS 7592, 1990 K St., NW, Washington, DC 20006, telephone: (202) 219–7009, fax: (202) 219–7008, e-mail: *Bonnie.LeBold@ed.gov*.

Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service at 1–800–877–8339.

What Is the Authority for the National Advisory Committee?

The National Advisory Committee on Institutional Quality and Integrity is established under Section 114 of the Higher Education Act (HEA) as amended, 20 U.S.C. 1011c.

What Are the Functions of the National Advisory Committee?

The Committee advises the Secretary of Education about:

- The establishment and enforcement of the criteria for recognition of accrediting agencies or associations under subpart 2 of part H of Title IV, HEA.
- The recognition of specific accrediting agencies or associations.
- The preparation and publication of the list of nationally recognized accrediting agencies and associations.
- The eligibility and certification process for institutions of higher education under Title IV, HEA.
- The development of standards and criteria for specific categories of vocational training institutions and institutions of higher education for which there are no recognized accrediting agencies, associations, or State agencies in order to establish the interim eligibility of those institutions to participate in Federally funded programs.
- The relationship between: (1) accreditation of institutions of higher education and the certification and eligibility of such institutions, and (2) State licensing responsibilities with respect to such institutions.
- Any other advisory functions relating to accreditation and institutional eligibility that the Secretary may prescribe.

What Items Will be on the Agenda for Discussion at the Meeting?

Agenda topics will include the review of agencies that have submitted petitions for initial recognition or renewal of recognition, requested an expansion of scope, or submitted interim reports.

What Agencies Will the Advisory Committee Review at the Meeting?

The Advisory Committee will review the following agencies during its June 3–5, 2002 meeting.

Nationally Recognized Accrediting Agencies

Petition for Initial Recognition

1. Teacher Education Accreditation Council (Requested scope of recognition: the accreditation of professional education programs in institutions offering baccalaureate and graduate degrees for the preparation of teachers K–12)

Petitions for Renewal of Recognition

1. American Association of Nurse Anesthetists, Council on Accreditation of Nurse Anesthesia Educational Programs (Current scope of recognition: the accreditation of institutions and programs of nurse anesthesia at the certificate, master's, or doctoral degree levels)

2. Association of Advanced Rabbinical and Talmudic Schools, Accreditation Commission (Current scope of recognition: the accreditation and preaccreditation ("Correspondent" and "Candidate") of advanced rabbinical and Talmudic schools)

3. American Board of Funeral Service Education, Committee on Accreditation (Current scope of recognition: the accreditation of institutions and programs awarding diplomas, associate degrees and bachelor's degrees in funeral service or mortuary science)

4. Accrediting Commission on Education for Health Services Administration (Current scope of recognition: the accreditation throughout the United States of graduate programs in health services administration)

5. The American Dietetic Association, Commission on Accreditation for Dietetics Education (Current scope of recognition: the accreditation of Coordinated Programs in Dietetics at both the undergraduate and graduate level, postbaccalaureate Dietetic Internships, and Dietetic Technician Programs at the associate degree level) (Requested expansion of scope of recognition: the current scope of recognition to include the accreditation of Didactic Programs in Dietetics at both the undergraduate and graduate level, and its accreditation of programs offered via distance education.)

6. Council on Education for Public Health (Current scope of recognition: the accreditation and preaccreditation ("Preaccreditation Status") of graduate schools of public health, graduate programs in community health education outside schools of public health, and graduate programs in community health/preventive medicine outside schools of public health)

8. National Council for Accreditation of Teacher Education

9. North Central Association of Colleges and Schools, Executive Board of the Commission on Schools

State Agencies Recognized for the Approval of Public Postsecondary Vocational Education

Petition for Renewal of Recognition

1. New York State Board of Regents (Public Postsecondary Vocational Education)

Interim Report

1. Oklahoma State Regents for Higher Education

State Agencies Recognized for the Approval of Nurse Education

Petition for Initial Recognition

1. North Dakota Board of Nursing

Petition for Renewal of Recognition

1. New York State Board of Regents (Nursing Education)

Who Can Make Third-Party Oral Presentations at this Meeting?

We invite you to make a third-party oral presentation before the National Advisory Committee concerning the recognition of any agency published in this notice.

How Do I Request to Make an Oral Presentation?

You must submit a written request to make an oral presentation concerning an agency listed in this notice to the contact person so that the request is received no later than May 10, 2002. Your request (no more than 6 pages maximum) must include:

- The names, addresses, phone numbers, and fax numbers of all persons seeking an appearance,
- The organization they represent, and
- A brief summary of the principal points to be made during the oral presentation.

If you wish, you may attach documents illustrating the main points of your oral testimony. Please keep in mind, however, that *any attachments are included in the 6-page limit.* Please do not send materials directly to Committee members. Only materials submitted by the deadline to the contact person listed in this notice and in accordance with these instructions become part of the official record and are considered by the Committee in its deliberations. Documents received after the May 10, 2002 deadline will not be distributed to the Advisory Committee for their consideration. Individuals making oral presentations may not distribute written materials at the meeting.

If I Cannot Attend the Meeting, Can I Submit Written Comments Regarding an Accrediting Agency in Lieu of Making an Oral Presentation?

This notice requests third-party oral testimony, not written comment. A request for written comments on agencies that are being reviewed during this meeting was published in the **Federal Register** on February 1, 2002. The Advisory Committee will receive and consider only written comments submitted by the deadline specified in that **Federal Register** notice.

How Do I Request to Present Comments Regarding General Issues Rather Than Specific Accrediting Agencies?

At the conclusion of the meeting, the Committee, at its discretion, may invite attendees to address the Committee briefly on issues pertaining to the functions of the Committee, which are listed earlier in this notice. If you are interested in making such comments, you should inform Ms. LeBold before or during the meeting.

How May I Obtain Access to the Records of the Meeting?

We will record the meeting and make a transcript available for public inspection at the U.S. Department of Education, 1990 K St., NW., Washington, DC 20006 between the hours of 9 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. It is preferred that an appointment be made in advance of such inspection.

How May I Obtain Electronic Access to This Document?

You may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *http://www.ed.gov/legislation/FedRegister.*

To use PDF you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free, at 1–888–293–6498; or in the Washington, DC, area at (202) 512–1530.

Note: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: *http://www.access.gpo.gov/nara/index.html.*

Authority: 5 U.S.C. Appendix 2.

Dated: March 14, 2002.

Kenneth W. Tolo,

Acting Deputy Assistant Secretary for Policy, Planning, and Innovation, Office of Postsecondary Education.

BILLING CODE 4000–01–U

DEPARTMENT OF ENERGY

Notice of Wetlands Involvement for the Proposed Conveyance of Parcel G, Oak Ridge Reservation, Oak Ridge, Tennessee

AGENCY: Oak Ridge Operations, U.S. Department of Energy.

ACTION: Notice of wetlands involvement.

SUMMARY: The U.S. Department of Energy (DOE), Oak Ridge Operations (ORO) is proposing to convey Parcel G to the City of Oak Ridge. Parcel G and the adjacent DOE property south of Parcel G support a palustrine emergent/scrub-shrub wetland system totaling approximately 1.4 ha (3.4 acres). More detail on these wetlands is provided in the supplementary information. Parcel G is one of three parcels being considered for conveyance from DOE to the City of Oak Ridge. The other two parcels are the American Museum of Science and Energy and Parcel 279.01, neither of which contain wetlands. The purpose of the proposed DOE action is to provide a plan for the long-term financial stability of the AMSE in order to preserve the museum as an asset to the city of Oak Ridge and the surrounding region. The proposed conveyance of the three parcels is also intended to help offset the City of Oak Ridge's long-term cost of operating the museum. The purpose of the proposed action is also to transfer excess DOE–ORO real property for economic development in order to help offset potential economic losses resulting from DOE downsizing, facility closeouts, and work force restructuring.

In accordance with the National Environmental Policy Act (NEPA), the Council on Environmental Quality regulations (40 CFR 1500–1508) and the DOE NEPA Implementing Regulations (10 CFR 1021), DOE has prepared a draft Environmental Assessment (EA) to evaluate the proposed action. The EA was issued for public review and comment on January 18, 2002. As a part of the EA (DOE/EA–1415), DOE is including a wetlands assessment to assess the existing wetlands as well as the potential impact of the proposed conveyance. (The wetlands assessment is available by contacting the DOE–ORO representative named below.)

DATES: Comments on the wetlands assessment are due to the address below no later than April 5, 2002.

ADDRESSES: Comments should be addressed to Mr. David R. Allen, U.S. Department of Energy, P.O. Box 2001, MS–SE–30–1, Oak Ridge, TN 37831. Comments may also be faxed to (865) 576–0746.

FOR FURTHER INFORMATION CONTACT: David R. Allen, U.S. Department of Energy, P.O. Box 2001, MS–SE–30–1, Oak Ridge, TN 37831, (865) 576–0411.

For Further Information on General DOE Wetland Environmental Review Requirements, Contact: Carol M. Borgstrom, Director, Office of NEPA Policy and Compliance, EH–42, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 200585, (202) 586–4600 or (800) 472–2756.

SUPPLEMENTARY INFORMATION: The U.S. Department of Energy (DOE) has completed a draft EA (DOE/EA–1415) for the Proposed Conveyance of the American Museum of Science and Energy, Parcel G, and Parcel 279.01 to the City of Oak Ridge, Tennessee. The purpose of the proposed DOE action is to provide a plan for the long-term financial stability of the AMSE in order to preserve the museum as an asset to the city of Oak Ridge and the surrounding region. The proposed conveyance of the three parcels is also intended to help offset the City of Oak Ridge's long-term cost of operating the museum. The purpose of the proposed action is also to transfer excess DOE–ORO real property for economic development in order to help offset potential economic losses resulting from DOE downsizing, facility closeouts, and work force restructuring.

Since specific uses of Parcel G would not be known prior to the transfer, DOE has developed reasonably foreseeable scenarios and uses to bound the impact analysis. Scenarios identify potential tenants, utilities and infrastructure, areas to be excluded from development, and a range of emissions, effluents, and wastes that could result from commercial and industrial activities. It is anticipated that the City of Oak Ridge would develop portions of Parcel G for small-scale offices, light industrial use, or retail businesses.

Parcel G contains about 8.1 ha (20.0 acres) and is located southeast of the intersection of Bethel Valley and Scarboro roads. A portion of Parcel G is within the area of the Oak Ridge Institute of Science and Energy Scarboro Operations Site (formerly the South Campus Facility). The Scarboro Operations Site supported research on the biological effects of radionuclides on animals. The portion of Parcel G that is within the boundary of the Scarboro Operations Site was an area where only unexposed animals were housed or grazed. In addition to pasture, the area contained various barns and a three-tiered swine waste treatment pond system. Only one barn structure remains within Parcel G. Nearby land uses include the Y–12 Plant buffer area, Bethel Valley Industrial Park, Commerce Park, and the University of Tennessee Forest Experiment Station and Arboretum. Parcel G is currently zoned by the city of Oak Ridge as F.A.I.R. (Forestry, Agriculture, Industry and Research District).

Parcel G and the adjacent DOE property to the south support a palustrine emergent/scrub-shrub wetland system along Scarboro Creek totaling approximately 1.4 ha (3.4 acres). All wetlands identified at Parcel G exhibited positive field indicators of the wetland criteria: hydrophytic plants, hydric soils, and wetland hydrology. The majority of these wetlands are associated with the floodplain of Scarboro Creek, the Scarboro Creek embayment (part of Melton Hill Reservoir), and two beaver ponds in Scarboro Creek immediately south of Parcel G.

In addition to the Scarboro Creek wetlands, there are three ponds that were created to treat swine waste when Parcel G was actively associated with operation of the Scarboro Operations Site. Agricultural uses of the ponds ceased in the mid-1980's and all three ponds have remained at the site. Two of the ponds remain permanently inundated. The third pond holds water for relatively short periods and supports a wetland plant community. The actual area of wetlands to be transferred with Parcel G is about 0.4 ha (1.0 ac). DOE would retain control over the remaining 1 ha (2.4 acres) of wetlands along Scarboro Creek downstream from Parcel G.

The proposed conveyance of Parcel G would not inherently cause adverse impacts to the survival, quality, natural, and beneficial values of wetlands along Scarboro Creek, because the proposed transfer is an administrative action. Rather, the potential for and degree of adverse impacts would depend upon how the City of Oak Ridge proposes to develop the property. Adverse impacts would include any activity that eliminated or reduced the ability of wetlands to perform their normal biological, chemical, hydrological, and physical functions. Some or all of the wetlands associated with Scarboro Creek could potentially experience

VOL
67
ISS
55
MR
21
2002
UMI

direct impacts by development in the wetlands themselves or indirect impacts from other activities associated with development of adjacent upland areas at Parcel G. Wetlands downstream from Parcel G could also be affected by any construction activities on Parcel G.

A number of administrative controls, including deed restrictions or conservation easements are available for DOE to use in order to prevent adverse impacts to wetlands at Parcel G. Proposals for development of Parcel G that would affect wetlands and other special aquatic resources would also be subject to regulation by the U.S. Army Corps of Engineers (USACE), Tennessee Department of Environment and Conservation (TDEC), and possibly the Tennessee Valley Authority (TVA). Proposed projects would be required to follow normal sequencing during regulatory review to avoid and minimize adverse impacts to wetlands at Parcel G. Compensatory mitigation should be used as a last resort and would be subject to negotiation between the USACE, TDEC, and possibly DOE and TVA.

In accordance with DOE regulations for compliance with wetlands environmental review requirements (10 CFR part 1022), a wetland assessment will be included within the Environmental Assessment for the Proposed Conveyance of the American Museum of Science and Energy, Parcel G, and Parcel 279.01 to the City of Oak Ridge, Tennessee (DOE/EA–1415).

Issued in Oak Ridge, Tennessee, on March 12, 2002.

James L. Elmore,

Alternate NEPA Compliance Officer.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Agency information collection activities: Submission for OMB review; comment request.

SUMMARY: The EIA has submitted the energy information collection listed at the end of this notice to the Office of Management and Budget (OMB) for review and a three-year extension with revisions under section 3507(h)(1) of the Paperwork Reduction Act of 1995 (Pub. L. 104–13) (44 U.S.C. 3501 *et seq.*).

DATES: Comments must be filed by April 22, 2002. If you anticipate that you will be submitting comments but find it difficult to do so within that period, you should contact the OMB Desk Officer for DOE listed below as soon as possible.

ADDRESSES: Send comments to Bryon Allen, OMB Desk Officer for DOE, Office of Information and Regulatory Affairs, Office of Management and Budget. To ensure receipt of the comments by the due date, submission by FAX (202–395–7285) or e-mail (BAllen@omb.eop.gov) is recommended. The mailing address is 726 Jackson Place, NW., Washington, DC 20503. The OMB DOE Desk Officer may be telephoned at (202) 395–3087. (A copy of your comments should also be provided to EIA's Statistics and Methods Group at the address below.)

FOR FURTHER INFORMATION CONTACT: A copy of the materials submitted to OMB is available at *http://www.eia.doe.gov/cneaf/electricity/page/form_417/form_417.html.* Requests for additional information should be directed to Herbert Miller. To ensure timely receipt of any comments sent to EIA, submission by FAX (202–287–1705) or e-mail (herbert.miller@eia.doe.gov) is recommended. Mr. Miller's mailing address is Statistics and Methods Group (EI–70), Forrestal Building, U.S. Department of Energy, Washington, DC 20585–0670. Mr. Miller may be contacted by telephone at (202) 287–1711.

SUPPLEMENTARY INFORMATION: This section contains the following information about the energy information collection submitted to OMB for review: (1) The collection numbers and title; (2) the sponsor (i.e., the Department of Energy component); (3) the current OMB docket number (if applicable); (4) the type of request (i.e. new, revision, extension, or reinstatement); (5) response obligation (i.e., mandatory, voluntary, or required to obtain or retain benefits); (6) a description of the need for and proposed use of the information; (7) a categorical description of the likely respondents; and (8) an estimate of the total annual reporting burden (i.e., the estimated number of likely respondents times the proposed frequency of response per year times the average hours per response).

1. Form EIA–417, "Electric Emergency Incident and Disturbance Report".
2. Security Operations/Office of Emergency Management.
3. OMB Number 1901–0288.
4. Revision and three-year approval requested.
5. Mandatory.
6. Form EIA–417 collects information on electric emergency incidents and disturbances for DOE's use in fulfilling its overall national security and other energy management responsibilities. The information will also be used by DOE for analytical purposes. Control Area Operators or Security Coordinators, as appropriate, file Form EIA–417. In Alaska, Hawaii, Puerto Rico, the U.S. Virgin Islands, and the U.S. Trust Territories, local utilities file the form. The form's instructions explain the filing requirements when a foreign entity is involved.
7. Business or other for-profit; State, local or tribal government.
8. 650 hours (175 respondents × 1.7 responses per year × 2.17 hours per response).

Statutory Authority: Section 3507(h)(1) of the Paperwork Reduction Act of 1995 (Pub. L. No. 104–13)(44 U.S.C. 3501 *et seq.*).

Issued in Washington, DC, March 15, 2002.

Jay H. Casselberry,

Agency Clearance Officer, Statistics and Methods Group, Energy Information Administration.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL02–70–000]

The United Illuminating Company, Complainant, v. ISO New England Inc., Respondent; Notice of Complaint

March 15, 2002.

Take notice that on March 14, 2002, The United Illuminating Company (UI) filed a Complaint against ISO New England Inc. (ISO–NE) requesting, inter alia, that the Federal Energy Regulatory Commission immediately strike the January 25, 2002 action by ISO–NE and take further action to ensure that the costs of supporting the Hydro Quebec Interconnection are properly reflected in the NEPOOL Open Access Transmission Tariff or any future tariff for a Northeast Regional Transmission Organization.

Copies of the complaint were served via facsimile and courier to representatives of ISO–NE, electronically to NEPOOL Counsel for circulation to NEPOOL Participants, and by overnight delivery to the affected state regulatory agencies.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests must be filed on or before April 3, 2002. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Answers to the complaint shall also be due on or before April 3, 2002. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests, interventions and answers may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Linwood A. Watson, Jr.,

Deputy Secretary.

[FR Doc. 02–6842 Filed 3–20–02; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL02–69–000]

UtiliCorp United Inc.; Notice of Filing

March 14, 2002.

Take notice that on March 8, 2002, UtiliCorp United Inc. (UtiliCorp) filed a Petition for Declaratory Order under Section 201 of the Public Utility Regulatory Policies Act of 1978 (PURPA). UtiliCorp requests that the Commission issue a declaratory order finding that UtiliCorp is not primarily engaged in the generation or sale of electric power within the meaning of Section 201 of PURPA and Section 292.206(a) of the Commission's regulations, and is therefore permitted to acquire up to one hundred percent (100%) of the equity interests in qualifying facilities.

Any person desiring to intervene or to protest this filing should file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. All such motions or protests should be filed on or before the comment date, and, to the extent applicable, must be served on the applicant and on any other person designated on the official service list. This filing is available for review at the Commission or may be viewed on the Commission's web site at *http://www.ferc.gov* using the "RIMS" link, select "Docket #" and follow the instructions (call 202–208–2222 for assistance). Protests and interventions may be filed electronically via the Internet in lieu of paper; *see* 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Comment Date: April 8, 2002.

Linwood A. Watson, Jr.,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EG02–103.000, et al.]

Hermiston Power Partnership., et al.; Electric Rate and Corporate Regulation Filings

March 14, 2002.

Take notice that the following filings have been made with the Commission. Any comments should be submitted in accordance with Standard Paragraph E at the end of this notice.

1. Hermiston Power Partnership

[Docket No. EG02–103–000]

Take notice that on March 11, 2002, Hermiston Power Partnership (Hermiston) filed with the Federal Energy Regulatory Commission (Commission) an application for determination of exempt wholesale generator status pursuant to part 365 of the Commission's regulations.

Hermiston, an Oregon general partnership, proposes to own and operate a 546 MW natural gas-fired, combined cycle electric generating facility located in Umatilla County, Oregon. Hermiston will sell the output at wholesale to an affiliated power marketer.

Comment date: April 3, 2002.

2. EE South Glens Falls

[Docket No. ER99–1261–003]

Take notice that on March 11, 2002, Energy East South Glens Falls, LLC (EE South Glens Falls) tendered a letter concerning its triennial market power review pursuant to an order issued by the Commission in Docket No. ER99–1261–000 on March 11, 1999 granting EE South Glens Falls market-based rate authorization.

Comment date: April 1, 2002.

3. American Transmission Company LLC, Edison Sault Electric Company, Wisconsin Electric Power Company

[Docket No. ER01–702–003, Docket No. OA01–7–000, and Docket No. OA01–8–000 (Not Consolidated)]

Take notice that on March 7, 2002, American Transmission Company LLC (ATCLLC) tendered for filing a compliance filing with the Federal Energy Regulatory Commission (Commission) as required by the Commission's February 1, 2002 Order on Standards of Conduct in the above captioned proceedings.

Comment date: March 28, 2002.

4. Hardee Power Partners Limited

[Docket No. ER01–3064–002]

Take notice that on March 11, 2002, in compliance with the Federal Energy Regulatory Commission's (Commission) letter order issued January 8, 2002 in the above-referenced proceeding, Hardee Power Partners Limited tendered for filing with the Commission revisions to the tariff sheet designations of its Electric Rate Schedule FERC Nos. 1 and 2. These revisions are consistent with the requirements set forth in Order No. 614. Designation of Electric Rate Schedules, 90 FERC 61,352 (2000).

Comment date: April 1, 2002.

5. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–947–001]

Take notice that on March 11, 2002, the Midwest Independent Transmission System Operator, Inc. (the Midwest ISO) tendered for filing revisions to its Open Access Transmission Tariff (OATT), FERC Electric Tariff, Original Volume No. 1, which amend the Midwest ISO's February 1, 2002 filing pursuant to Section 205 of the Federal Power Act and Part 35 of the Commission's Regulations, 18 CFR 35 et seq. (2001).

The Midwest ISO has electronically served copies of its filing, with attachments, upon all Midwest ISO Members, Member representatives of Transmission Owners and Non-Transmission Owners, the Midwest ISO Advisory Committee participants,

VOL
67

UMI

Policy Subcommittee participants, as well as all state commissions within the region. In addition, the filing has been electronically posted on the Midwest ISO's website at *www.midwestiso.org* under the heading "Filings to FERC" for other interested parties in this matter.

Comment date: April 1, 2002.

6. Central Maine Power Company

[Docket No. ER02–1301–000]

Take notice that on March 11, 2002, Central Maine Power Company (CMP) tendered for filing a service agreement for Non-firm Local Point-to-Point Transmission Service entered into with Gardner Brook Hydro. Service will be provided pursuant to CMP's Open Access Transmission Tariff, designated rate schedule CMP—FERC Electric Tariff, Original Volume No. 3, Fifth Revision, Service Agreement No. 156.

Comment date: April 1, 2002.

7. Alliant Energy Corporate Services, Inc.

[Docket No. ER02–1291–000]

Take notice that on March 6, 2002, Alliant Energy Corporate Services, Inc. tendered for filing with the Federal Energy Regulatory Commission (Commission) an amendment to include one page that was omitted from its executed Service Agreement with EnXco, Inc. for Non-Firm Point-to-Point Transmission.

Alliant Energy Corporate Services, Inc. renews its request for an effective date of November 27, 2001, and accordingly, seeks waiver of the Commission's notice requirements. A copy of this filing has been served upon the Illinois Commerce Commission, the Minnesota Public Utilities Commission, the Iowa Department of Commerce, and the Public Service Commission of Wisconsin.

Comment date: March 27, 2002.

8. Xcel Energy Services, Inc.

[Docket No. ER02–1292–000]

Take notice that on March 11, 2002, Xcel Energy Services, Inc. (XES), on behalf of Public Service Company of Colorado (Public Service), submitted for filing a Master Power Purchase and Sale Agreement between Public Service and Williams Gas Processing Company. (Williams Gas), which is in accordance with Public Service's Rate Schedule for Market-Based Power Sales (Public Service FERC Electric Tariff, First Revised Volume No. 6).

XES requests that this agreement become effective on December 11, 2001.

Comment date: April 1, 2002.

9. Puget Sound Energy, Inc.

[Docket No. ER02–1297–000]

Take notice that on March 11, 2002, Puget Sound Energy, Inc., as Transmission Provider, tendered for filing a service agreement for Firm Point-To-Point Transmission Service and a service agreement for Non-Firm Point-To-Point Transmission Service with NorthPoint Energy Solutions Inc. (NorthPoint), as Transmission Customer. A copy of the filing was served upon NorthPoint.

Comment date: April 1, 2002.

10. Wolverine Power Supply Cooperative, Inc.

[Docket No. ER02–1298–000]

Take notice that on March 11, 2002, Wolverine Power Supply Cooperative, Inc. tendered for filing an executed Term Sheet between Wolverine Power Supply Cooperative, Inc., and Wolverine Power Marketing Cooperative, Inc., which term sheet expressly incorporated the terms and conditions of the Wholesale Power Sales Enabling Agreement between Wolverine Power Supply Cooperative, Inc. and Wolverine Power Marketing Cooperative, Inc. previously approved by this Commission. The Term Sheet concerns the sale of power from Wolverine Power to Wolverine Marketing with ultimate service to end-use retail customer CEMEX Wolverine requests an effective date of February 11, 2002 for this filing.

Wolverine states that a copy of this filing has been served upon Wolverine Power Marketing Cooperative, Inc. and the Michigan Public Service Commission.

Comment date: April 1, 2002.

11. Entergy Services, Inc.

[Docket No. ER02–1299–000]

Take notice that on March 11, 2002, Entergy Services, Inc., on behalf of Entergy Arkansas, Inc., Entergy Gulf States, Inc., Entergy Louisiana, Inc., Entergy Mississippi, Inc., and Entergy New Orleans, Inc., (collectively, the Entergy Operating Companies) tendered for filing a Long-Term Firm Point-To-Point Transmission Service Agreement between Entergy Services, Inc., as agent for the Entergy Operating Companies, and Coral Power, L.L.C.

Comment date: April 1, 2002.

12. Southwest Power Pool, Inc.

[Docket No. ER02–1300–000]

Take notice that on March 11, 2002, Southwest Power Pool, Inc. (SPP) submitted for filing an executed service agreement for Firm Point-to-Point Transmission Service with Higginsville Municipal Utilities (Transmission Customer). SPP seeks an effective date of March 1, 2002 for this service agreement.

The Transmission Customer was served with a copy of this filing.

Comment date: April 1, 2002.

Standard Paragraph

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Linwood A. Watson, Jr.,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 11870–000, New Hampshire]

Goodrich Falls Hydro Electric Company; Notice of Availability of Environmental Assessment

March 15, 2002.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for exemption from licensing of the Goodrich Falls Project, located on the Ellis River, in Carroll County, New Hampshire, and has prepared an Environmental Assessment (EA) for the project. There are no Federal lands, including Indian reservations, occupied by project works or located within the project boundary.

The EA contains the staff's analysis of the potential environmental impacts of the proposed exemption and concludes that issuance of an exemption from licensing for the Goodrich Falls Hydroelectric Project would not constitute a major Federal action that would significantly affect the quality of the human environment.

A copy of the EA is on file with the Commission and is available for public inspection. The EA may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link-select "Docket #" and follow the instructions (call 202–208–2222 for assistance).

For further information, contact John Ramer at (202) 219–2833.

Linwood A. Watson, Jr.,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP02–74–000]

Reef International, L.L.C.; Notice of Intent To Prepare an Environmental Assessment for the Proposed Eagle Pass International Pipeline Project and Request for Comments on Environmental Issues

March 15, 2002.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Eagle Pass International Pipeline Project involving the construction and operation of facilities by Reef International, L.L.C. (Reef) in Maverick County, Texas, and that cross the international border between the United States and Mexico.[1] The EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

If you are a landowner receiving this notice, you may be contacted by a pipeline company representative about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The pipeline company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice Reef provided to landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet website (*www.ferc.fed.us*).

Summary of the Proposed Project

Reef is proposing the Eagle Pass International Pipeline Project to provide firm transportation to Compania National de Gas, S.A. (Conagas). This project would allow Reef to deliver up to 15 million cubic feet per day. The purpose of the project is to provide the Piedras Negras region of Coahuila, Mexico, with needed, additional supplies of gas.

Reef proposes to construct, operate, and maintain about 4 miles of 12-inch-diameter pipeline and appurtenant facilities from an interconnection with Southern Transmission Company (Southern) in Maverick County, Texas, crossing under the Rio Grande, the midpoint of which is the International Boundary between the United States and Mexico, to a point just across the river in Coahuila, Mexico. Reef is seeking a Presidential Permit from the Commission for the 400-foot-long border crossing in Maverick County, Texas which is the U.S. portion of the directional drill across the Rio Grande. The entire directional drill would be 800 feet in length, half of which would be in Mexico. A meter station would be constructed in Maverick County about 2,035 feet downstream from the interconnection with Southern. About 1000 feet of pipeline and a meter station would be constructed in Mexico and would be owned and operated by Conagas. Also, a 6-inch-diameter propane/butane pipeline would also be constructed parallel to the natural gas pipeline for about 3 miles of the route within the U.S. and also cross into Mexico.

Land Requirements for Construction

Construction of Reef's proposed facilities would require about 25.3 acres of land, including construction right-of-way for the new pipeline and extra work areas needed for the directional drill. The pipeline would be constructed adjacent to existing sanitary sewer and utility easements for 72 percent of the route. For the construction of the pipeline, Reef would use a 50-foot-wide construction right-of-way. Reef indicates that it would maintain a 30-foot-wide permanent right-of-way totaling 14.55 acres. The meter station and access road would be located within a 5.53 acre location adjacent to an industrial area. About 5 acres would be needed for a pipe and contractor yard, although this location has not yet been determined.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us [2] to discover and address concerns the public may have about proposals. We call this "scoping." The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils
- Water resources and wetlands
- Vegetation and wildlife
- Threatened and endangered species
- Cultural resources
- Land use
- Reliability and safety

We will evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on

[1] Reef's application was filed with the Commission on January 22, 2002, under Section 3 of the Natural Gas Act.

[2] "We", "us", and "our", refer to the environmental staff of the Office of Energy Projects (OEP).

VOL

the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

To ensure your comments are considered, please carefully follow the instructions in the public participation section below.

Currently Identified Environmental Issues

We have already identified several issues that we think deserve attention based on a preliminary review of the proposed facilities and the environmental information provided by Reef. This preliminary list of issues may be changed based on your comments and our analysis.

—A directionally drilled crossing of the Rio Grande.

—Potential impact on the jaguarundi, ocelot, and mountain plover which are Federally listed threatened and endangered species.

—Loss of several acres of pecan orchard.

Public Participation

You can make a difference by providing us with your specific comments or concerns about the project. By becoming a commentor, your concerns will be addressed in the EA and considered by the Commission. You should focus on the potential environmental effects of the proposal, alternatives to the proposal (including alternative locations or routes), and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

- Send an original and two copies of your letter to: Magalie R. Salas, Secretary, Federal Energy Regulatory Commission 888 First St., NE., Room 1A, Washington, DC 20426;
- Label one copy of the comments for the attention of Gas 1, PJ–11.1;
- Reference Docket No. CP02–74–000; and
- Mail your comments so that they will be received in Washington, DC on or before April 15, 2002.

Comments, protests, and interventions may be filed electronically via the Internet in lieu of paper. *See* 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at *http://www.ferc.gov* under the "e-Filing" link and link to the User's Guide. Before you can file comments you will need to create an account which can be created by clicking on "Login to File" and then "New User Account".

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding known as an "intervenor." Intervenors play a more formal role in the process. Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide 14 copies of its filings to the Secretary of the Commission and must send a copy of its filings to all other parties on the Commission's service list for this proceeding. If you want to become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) (see appendix 1).[3] Only intervenors have the right to seek rehearing of the Commission's decision.

Affected landowners and parties with environmental concerns may be granted intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which would not be adequately represented by any other parties. You do not need intervenor status to have your environmental comments considered.

Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket #" and follow the instructions (call 202–208–2222 for assistance).

Similarly, the "CIPS" link on the FERC Internet website provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings. From the FERC Internet website, click on the "CIPS" link, select "Docket #" from the CIPS menu, and follow the instructions. For assistance with access to CIPS, the CIPS helpline can be reached at (202) 208–2474.

[3] The appendix referenced in this notice are not being printed in the **Federal Register**. Copies are available on the Commission's website at the "RIMS" link or from the Commission's Public Reference and Files Maintenance Branch, 888 First Street, NE, Room 2A, Washington, DC 20426, or call (202) 208–1371. For instructions on connecting to RIMS refer to the last page of this notice. Copies of the appendices were sent to all those receiving this notice in the mail.

Linwood A. Watson, Jr.,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM98–1–000]

Regulations Governing Off-the-Record Communications; Public Notice

March 15, 2002.

This constitutes notice, in accordance with 18 CFR 385.2201(h), of the receipt of exempt and prohibited off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive an exempt or a prohibited off-the-record communication relevant to the merits of a contested on-the-record proceeding, to deliver a copy of the communication, if written, or a summary of the substance of any oral communication, to the Secretary.

Prohibited communications will be included in a public, non-decisional file associated with, but not part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such requests only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication should serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications will be included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of exempt and prohibited off-the-record communications received in the Office of the Secretary within the preceding 14 days. Copies of this filing are on file with the Commission and are available for public inspection. The documents may be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance).

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7161–1]

Agency Information Collection Activities: Proposed Collection; Comment Request; Up for Renewal: EPA Worker Protection Standard for Hazardous Waste Operations and Emergency Response, EPA ICR #1426.06, OMB Control #2050–0105, Expiration 7/31/2002

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): EPA Worker Protection Standard for Hazardous Waste Operations and Emergency Response, EPA ICR #1426.06, OMB Control #2050–0105, Expiration 7/31/2002. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before May 15, 2002.

ADDRESSES: Office of Solid Waste and Emergency Response (5305G), U.S. Environmental Protection Agency, Ariel Rios Building, 1200 Pennsylvania Avenue NW, Washington, DC 20460.

Remit comments to Sella M. Burchette, US EPA/ERTC, 2890 Woodbridge Avenue, Building 18, MS101, Edison, NJ 08837–3679.

To obtain a copy at no charge, please contact Sella Burchette at (732) 321–6726/FAX: (732) 321–6724/or electronically at *burchette.sella@epa.gov.*

FOR FURTHER INFORMATION CONTACT: Sella M. Burchette, (732) 321–6726/FAX: (732) 321–6724/or electronically at *burchette.sella@epa.gov.*

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those State and local employees engaged in hazardous waste operations and emergency response in the 27 States that do not have Occupational Safety and Health Administration (OSHA) approved State plans.

Title: EPA Worker Protection Standard for Hazardous Waste Operation and Emergency Response, OMB Control #2050–0105, EPA ICR #1426.06, Expiration 7/31/02. This is a request for renewal of a currently approved collection.

Abstract: Section 126(f) of the Superfund Amendments and Reauthorization Act of 1986 (SARA) requires EPA to set worker protection standards for State and local employees engaged in hazardous waste operations and emergency response in the 27 States that do not have Occupational Safety and Health Administration approved State plans. The EPA coverage, required to identical to the OSHA standards, extends to three categories of employees: those engaged in clean-ups at uncontrolled hazardous waste sites, including corrective actions at Treatment, Storage and Disposal (TSD) facilities regulated under the Resource Conservation and recovery Act (RCRA); employees working at routine hazardous waste operations at RCRA TSD facilities, and employees involved in emergency response operations without regard to location. This ICR renews to existing mandatory record keeping collection of ongoing activities including monitoring of any potential employee exposure at uncontrolled hazardous waste site, maintaining records of employee training, refresher training, medical exams and reviewing emergency response plans. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The annual recordkeeping burden for this collection is estimated to average 10.46 hours per site or event. The estimated number of respondents is approximated at 100 RCRA TSD facilities or uncontrolled hazardous waste sites: 23,900 State and local police departments, fire departments or hazardous materials teams. The estimated total burden hours on respondents: 255,427. The frequency of collection: continuous maintenance of records. Burden means to total time, effort, and financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing

VOL 67 ISS 55 MR 21 2002 UMI

and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Remit comments regarding these matters, or any other aspect of the information collection, including suggestions for reducing the burden, to the address listed above.

Dated: March 5, 2002.

Elaine F. Davies,

Acting Office Director, Office of Emergency and Remedial Response.

ENVIRONMENTAL PROTECTION AGENCY

[OW–FRL–7161–5]

Beaches Environmental Assessment and Coastal Health Act

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of grants for development of coastal recreation water monitoring and public notification under the Beaches Environmental Assessment and Coastal Health Act.

SUMMARY: The Beaches Environmental Assessment and Coastal Health Act (BEACH Act) signed into law on October 10, 2000, amends the Clean Water Act (CWA) to reduce the risk of disease to users of the Nation's recreational waters. The BEACH Act authorizes the U.S. Environmental Protection Agency (EPA) to award program development and implementation grants to eligible States, Territories, Tribes, and local governments to support microbiological testing and monitoring of coastal recreation waters, including the Great Lakes, that are adjacent to beaches or similar points of access used by the public. BEACH Act grants also provide support for development and implementation of programs to notify the public of the potential exposure to disease-causing microorganisms in coastal recreation waters. EPA encourages coastal States and Territories to apply for BEACH Act Grants for Program Development (referred to as Development Grants) to develop effective and comprehensive coastal recreation water monitoring and public notification programs.

DATES: Submit your application on or before May 20, 2002.

ADDRESSES: You must send your application to the appropriate Regional Grant Coordinator listed in this document under **SUPPLEMENTARY INFORMATION,** section VII.

FOR FURTHER INFORMATION CONTACT: Charles Kovatch, 202–260–3754.

SUPPLEMENTARY INFORMATION:

I. Grant Program

What Is the Statutory Authority for the Development Grants?

The statutory authority for BEACH grants is section 406(b) of the CWA as amended by the BEACH Act, Public Law 106–284, 114 Stat. 970 (2000). It provides in part: "The Administrator may make grants to States and local governments to develop and implement programs for monitoring and notification for coastal recreation waters adjacent to beaches or similar points of access that are used by the public."

What Activities Are Eligible for Funding Under the Development Grants in Fiscal Yeor 2002?

In Fiscal Year 2002, EPA intends to award grants authorized under the BEACH Act to support the continued development of coastal recreation water monitoring and public notification programs to meet program elements under the BEACH Act. EPA encourages grantees to use these funds to test various approaches for meeting BEACH Act program requirements. As required by the BEACH Act, EPA expects to publish performance criteria for implementation of coastal recreation water monitoring and public notification programs by April 2002. In fiscal year 2003 and beyond, if funds are appropriated to support these programs, EPA expects to make grants to also support implementation of monitoring and notification programs that are consistent with the statutory requirements for implementation grants, which include consistency with EPA's performance criteria.

II. Funding and Eligibility

*Who Is Eligible To Apply for Development Grants Under this **Federal Register** Document?*

Coastal and Great Lake States are eligible for development grants in FY 2002 to develop monitoring and notification programs. The term "State" is defined in section 502 of the CWA to include the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands. However, the Trust Territory of the Pacific Islands no longer exists. The Marshall Islands, the Federated States of Micronesia, and Palau, which were previously entities within the Trust Territory of the Pacific Islands, have entered into Compacts of Free Association with the Government of the United States. As a result, each is now a sovereign, self-governing entity and, as such, is no longer eligible to receive grants as a Territory or possession of the United States.

Are Local Governments Eligible for Funding?

The BEACH Act authorizes EPA to make a grant to a local government for implementation of a monitoring and notification program only if, after the one-year period beginning on the date of publication of performance criteria, EPA determines that the State is not implementing a program that meets the requirements of section 406 of the Act. EPA expects to publish performance criteria in April 2002, and therefore expects April 2003 as the earliest date for local governments to be eligible for beach grants.

Are Tribal Governments Eligible for Funding?

Section 518(e) of the CWA authorizes EPA to treat eligible Indian Tribes in the same manner as States for the purpose of receiving CWA section 406 grant funding. In order to receive BEACH Act grant funds a Tribe must have coastal recreation waters for which water quality standards have been established under the CWA. There are currently no Tribes that have met this requirement. In addition, a Tribe must meet the "treatment in the same manner as a State" criteria under CWA section 518(e) to receive grant funds under section 406 of the CWA.

How Much Funding Is Available?

For Fiscal Year 2002, EPA expects to award approximately $10 million in Development Grants to eligible States and Territories.

How Will the Funding Be Allocated?

For this second year of the Development Grants, EPA expects to award grants to all eligible States and Territories who apply for funding based on an allocation formula. In developing this formula EPA consulted with various States, the Coastal States Organization, and Association of State and Interstate Water Pollution Control Administrators (ASIWPCA). This formula uses three factors that are readily available and verifiable: (1) Length of beach season, (2) miles of beach and (3) number of people that use the beaches.

(1) Beach Season Length

Beach season length was selected as a factor since it determines the part of the year that a government would conduct its monitoring program. The longer the beach season, the more resources that a government would need to conduct monitoring. EPA's information on the length of a beach season was obtained from the National Health Protection Survey of Beaches for the States or Territories that reported information. The beach season for American Samoa, Oregon, Puerto Rico, and Northern Mariana Islands was estimated based on season reported by nearby States and Territories. The beach season for Alaska was estimated based on air and water temperature, available information on recreation activities, and data from the 1993 National Water Based Recreation Survey. EPA grouped the States and U.S. Territories into four categories of beach season lengths:

For beaches in—	The beach season category is—
Alaska	< 3 months.
Connecticut, Delaware, Illinois, Indiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, Rhode Island, Virginia, Washington, Wisconsin.	3—4 months.
Alabama, Georgia, Louisiana, Mississippi, North Carolina, South Carolina	5—6 months.
American Samoa, California, Florida, Guam, Hawaii, Northern Mariana, Puerto Rico, Texas, U.S. Virgin Islands	9—12 months.

(2) Beach Miles

Miles of beach was selected as a factor because it determines the geographical extent over which a government would conduct monitoring. The longer the miles of beaches, the more resources a government would need to conduct monitoring. For this second year of Development Grants, EPA is using shoreline miles as a surrogate rather than beach miles because beach miles are not available for all beaches in the 35 eligible States and Territories. EPA discussed the drawbacks of using this surrogate factor with States on a conference call on December 11, 2001 BEACH Act grantees, however, must identify their beaches as a condition of their grants; therefore in future years, EPA will be able to measure and thus use beach miles rather than shoreline. Because the BEACH Act grants for 2001 were awarded only recently, States have yet to identify lists of coastal recreation waters in the State. Thus, as a practical matter, EPA could not use beach miles in the allocation formula for FY 2002 grants. Instead, for FY 2002 grants, EPA used the NOAA publication The Coastline of the United States to quantify the shoreline miles.

(3) Beach Use

Beach use was selected as a factor because it reflects the importance of beach-related tourism to the local economy. The greater use a beach receives, the more likely a government would need to conduct increased monitoring because of the larger number of people potentially exposed to pathogens. For this second year of Development Grants, EPA is using the coastal population of counties that are wholly or partially within the State's or Territory's legally defined coastal zone as a surrogate, rather than beach usage because information on beach visitors is not available for all beaches in the 35 eligible States and Territories. EPA also discussed the drawbacks of using this surrogate factor with States on a conference call on December 11, 2001. Participants on the call were doubtful that EPA could develop a consistent, verifiable approach for estimating beach use for all beaches, but could not suggest a better way to quantify this factor at present. EPA is committed to work with the States and Territories with BEACH Act grants to develop a better way to quantify this factor. EPA used the 1990 Census data to quantify coastal population because the 2000 data are not yet available for American Samoa, Guam, Northern Mariana Islands, and the U.S. Virgin Islands. EPA will update this factor when the 2000 census data are available for all eligible States and Territories.

The grants allocation formula consists of the sum of three parts. The first part provides a base amount for all States and Territories that varies with the length of the beach season. The second part distributes 50% of the total remaining funds ($10 million in FY 2002 less that used for the beach season length) based on the ratio of shoreline miles in a State or Territory to the total length of shoreline miles. For example, if a State has 4% of the total coastal and Great Lakes shoreline, that State would receive 2% (4% of 50%) of the total funds remaining after the funds for the beach season length are distributed. The third part distributes 50% of the total remaining funds ($10 million in FY 2002 less that used for the beach season length) based on the ratio of coastal population in a State or Territory to the total coastal population. For example, if a State has 2% of the total coastal and Great Lakes population, that State would receive 1% (2% of 50%) of the total funds remaining after the funds for the beach season length are distributed. The following table summarizes the allocation formula:

For the factor—	The part of the allocation is—
Beach season length	< 3 months: $150,000 (States and Territories with a season <3 months receive season-based funding only.) 3–4 months: $200,000 5–6 months: $250,000 >6 months: $300,000
Shoreline miles	50% of funds remaining after allocation of season-based funding.
Coastal population	50% of funds remaining after allocation of season-based funding.

VOL
67
ISS
55
MR
21
2002
UMI

Based on this allocation formula, the amount of the each State or Territory's development grant award in FY 2002 is expected to be from $150,000 to $530,893 if all 35 eligible States and Territories apply. EPA anticipates that all 35 eligible governments will apply. If fewer than 35 States and Territories apply for the allocated amount, then EPA will re-allocate these grant funds to those States and Territories that applied for the grants using the same formula. If all 35 eligible States and Territories apply, the distribution of the $10 million in funds for year 2002 will be:

For the State or Territory of—	The year 2002 allocation is—
Alabama	$263,142
Alaska	150,000
American Samoa	302,288
California	535,643
Connecticut	226,389
Delaware	211,339
Florida	530,893
Georgia	288,490
Guam	302,775
Hawaii	325,149
Illinois	248,615
Indiana	206,670
Louisiana	383,287
Maine	259,742

Virginia	282,355
Washington	274,034
Wisconsin	228,396

What is the Expected Duration of the Funding and Project Periods?

The expected funding and project period for Development Grants awarded in FY2002 is one year.

Are Matching Funds Required?

Recipients are not required to provide matching funds for Development Grants awarded under authority of the BEACH Act at this time.

What if a State Cannot Use All of Its Allocation?

If a State or Territory cannot use all of its allocation, the Regional Administrator may award the unused funds to any eligible coastal or Great Lake grant recipient(s) in the Region for the development of their coastal recreation water monitoring and notification program. If after this re-allocation, there are still unused funds within the Region, EPA-Headquarters will award these funds to any eligible coastal or Great Lake grant recipient(s).

III. Grant Condition

Section 406(c) of the BEACH Act requires that as a condition of receipt of any BEACH Act grant, recipients identify the program elements listed below. Therefore, EPA will require recipients to address each of the following elements in their grant application and include the status of their efforts on each element in an annual performance report, as required under 40 CFR 31.40:

(1) Lists of coastal recreation waters in the State, including coastal recreation waters adjacent to beaches or similar points of access that are used by the public;

(2) In the case of a State program for monitoring and notification, the process by which the State may delegate to local governments responsibility for implementing the monitoring and notification program;

(3) The frequency and location of monitoring and assessment of coastal recreation waters based on: (A) the periods of recreational use of the waters; (B) the nature and extent of use during certain periods; (C) the proximity of the waters to known point sources and nonpoint sources of pollution; and (D) any effect of storm events on the waters;

(4)(A) the methods to be used for detecting levels of pathogens and pathogen indicators that are harmful to human health; and (B) the assessment procedures for identifying short-term increases in pathogens and pathogen indicators that are harmful to human health in coastal recreation waters (including increases in relation to storm events);

(5) Measures for prompt communication of the occurrence, nature, location, pollutants involved, and extent of any exceeding of, or likelihood of exceeding, applicable water quality standards for pathogens and pathogen indicators to EPA and a designated official of the local government having jurisdiction over land adjoining the coastal recreation waters for which the failure to meet applicable standards is identified; EPA has determined that this information may be submitted to the Agency in any form so long as it includes the required information;

(6) Measures for the posting of signs at beaches or similar points of access, or functionally equivalent communication measures that are sufficient to give notice to the public that the coastal recreation waters are not meeting or are not expected to meet applicable water quality standards for pathogens and pathogen indicators; and

(7) Measures that inform the public of the potential risks associated with water contact activities in the coastal recreation waters that do not meet applicable water quality standards.

IV. Additional Eligible Activities

Recipients may use funds for activities in support of developing a beach monitoring and notification program, including:

(1) Activities to comply with the grant conditions specified in section III above;

(2) Quality assurance and quality control (QA/QC) procedures consistent with the requirements under 40 CFR 31.45; to develop and implement QA/QC practices for environmentally related measurements or data generation sufficient to produce data of quality adequate to meet project objectives and to minimize loss of data due to out-of-control conditions or malfunctions; and

(3) Data quality objectives (DQOs), quality assurance project plan (QAPP) and standard operating procedures (SOPs) that clarify study objectives, define the appropriate type of data, and specify tolerable levels of potential decision errors that will be used as the basis for establishing the quality and quantity of data needed to support decisions.

V. Selection Process

What Criteria Will Be Used to Evaluate Applications and Award Development Grants?

Development Grants will be awarded through a non-competitive process by the EPA Regional offices. EPA expects to award grants to all eligible State and Territory applicants that meet requirements of the BEACH Act as described in this document.

Who Has The Authority to Award Development Grants?

The Administrator has delegated the authority to award Development Grants to the Regional Administrators.

VI. Application Procedure

What Is the Catalog of Federal Domestic Assistance (CFDA) Number for the BEACH Program Development Grant?

The number assigned to the Development Grants is 66.472, Program Code CU.

Can BEACH Act Grant Funds Be Included in a Performance Partnership Grant?

For Fiscal Year 2002, Development Grants cannot be included in a Performance Partnership Grant.

What Are The Components of the Application Package?

The application package should contain completed EPA SF–424 Application for Federal Assistance and be submitted to the appropriate EPA Regional Office by May 20, 2002. Please contact the appropriate EPA Regional Office for a complete application package. See Section VII for a list of EPA Regional Grant Coordinators or visit the EPA Beach Watch Website at *www.epa.gov/ost/beaches* on the Internet.

Will Quality Assurance and Quality Control (QA/QC) and Other Procedures Be Required for Application?

No. A QA/QC plan is not required for the application, however under 40 CFR 31.45 a QA/QC plan is required for any environmentally related measurements or data generation (*e.g.* monitoring) performed under the grant. (*See* section IV of this document).

Will There Be Reporting Requirements?

Recipients must submit annual performance reports and financial reports as required in §§ 31.40 and 31.41.

What Regulations and OMB Cost Circular Will Apply to the Award and Administration of These Grants?

The regulations at 40 CFR part 31 will govern the award and administration of grants to States and Territories under section 406 of the BEACH Act. Allowable costs will be determined in accordance with the cost principles in OMB Cost Circular A–87.

VII. Grant Coordinators

Headquarters—Washington, DC

Charles Kovatch USEPA, 1200 Pennsylvania Ave. NW—4305, Washington DC 20460; T:202–260–3754; F: 202–260–9830; *kovatch.charles@epa.gov.*

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[OPP–34237B; FRL–6828–2]

Atrazine; Revised Pesticide Risk Assessment; Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA will hold a public meeting to present the revised risk assessment for atrazine to interested stakeholders. This public meeting, called a "technical briefing," will provide an opportunity for stakeholders to learn about the data, information, and methodologies that the Agency used in revising its risk assessment for atrazine.

DATES: The technical briefing will be held on, April 16, 2002, from 9 a.m. to 5 p.m.

ADDRESSES: The technical briefing will be held at the National Rural Electric Cooperative Association (NRECA), 4301 Wilson Blvd., Arlington, VA, telephone number (703) 907–5933. Metro accessibility—Ballston Metro Stop.

FOR FURTHER INFORMATION CONTACT: By mail: Kimberly Nesci Lowe, Special Review and Registration Division (7508C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 308–8059; e-mail address: lowe.kimberly@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action applies to the public in general. As such, the Agency has not attempted to specifically describe all the entities potentially affected by this action. The Agency believes that a wide range of stakeholders will be interested in the technical briefing on atrazine pesticides, including environmental, human health, and agricultural advocates, the chemical industry, pesticide users, and members of the public interested in the use of pesticides on food. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

VOL
67
ISS

MR
21
2002
UMI

To access information about organophosphate pesticides, you can also go directly to the Home Page for the Office of Pesticide Programs (OPP) at http://www.epa.gov/pesticides. In addition, a brief summary of the atrazine revised risk assessment is now available at http://www.epa.gov/pesticides, as well as in paper as part of the public version of the official record as described in Unit I.B.2.

2. *In person.* The Agency has established an official record under docket control number OPP–34237B. The official record consists of the documents specifically referenced in this action, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

II. What Action is the Agency Taking?

This document announces the Agency's intention to hold a technical briefing for atrazine. The Agency is presenting the revised risk assessment for atrazine to interested stakeholders. This technical briefing is designed to provide stakeholders with an opportunity to become even more informed about the risk assessment. EPA will describe in detail the revised risk assessment: Including the major points (e.g., contributors to risk estimates); how public comment on the preliminary risk assessment affected the revised risk assessment; and the pesticide use information/data that was used in developing the revised risk assessment. Stakeholders will have an opportunity to ask clarifying questions.

The technical briefing is part of the pilot public participation process that EPA and the United States Department of Agriculture (USDA) are now using for involving the public in the reassessment of pesticide tolerances under the Food Quality Protection Act (FQPA), and the reregistration of individual pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The pilot public participation process was developed as part of the EPA-USDA Tolerance Reassessment Advisory Committee (TRAC), which was established in April 1998, as a subcommittee under the auspices of EPA's National Advisory Council for Environmental Policy and Technology. A goal of the pilot public participation process is to find a more effective way for the public to participate at critical junctures in the Agency's development of pesticide risk assessment and risk management decisions. EPA and USDA began implementing this pilot process in August 1998, in response to Vice President Gore's directive to increase transparency and opportunities for stakeholder consultation.

On the day of the technical briefing, in addition to making copies available at the meeting site, the Agency will also release for public viewing the atrazine revised risk assessment and related documents to the Public Information and Records Integrity Branch and the OPP Internet web site that are described in Unit I.B.1. In addition, the Agency will issue a **Federal Register** notice to provide an opportunity for a 60-day public participation period during which the public may submit risk management and mitigation ideas and recommendations and proposals for transition.

List of Subjects

Environmental protection, Chemicals, Pesticides and pests.

Dated: March 13, 2002.

Betty Shackleford,

Acting Director, Special Review and Reregistration Division, Office of Pesticide Programs.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7161–3]

Clean Water Act Section 303(d): Final Agency Action on 27 Total Maximum Daily Loads (TMDLs) and Final Agency Action on 6 Determinations That TMDLs Are Not Needed

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: This notice announces final agency action on 27 TMDLs prepared by EPA Region 6 for waters listed in Louisiana's Mermentau and Vermilion/Teche river basins, under section 303(d) of the Clean Water Act (CWA). This notice also announces final agency action removing 6 waterbody/pollutant combinations from the Louisiana 303(d) list because TMDLs are not needed. EPA evaluated these waters and prepared the 27 TMDLs needed in response to a partial consent decree entered in the lawsuit *Sierra Club, et al.* v. *Clifford et al.*, No. 96–0527, (E.D. La.). Documents from the administrative record files for the 6 determinations that TMDLs are not needed and for 27 TMDLs, including TMDL calculations and responses to comments may be viewed at *www.epa.gov/region6/water/tmdl.htm*. The administrative record files may be obtained by calling or writing Ms. Caldwell at the above address. Please contact Ms. Caldwell to schedule an inspection.

FOR FURTHER INFORMATION CONTACT: Ellen Caldwell at (214) 665–7513.

SUPPLEMENTARY INFORMATION: In 1996, two Louisiana environmental groups, the Sierra Club and Louisiana Environmental Action Network (plaintiffs), filed a lawsuit in Federal Court against the United States Environmental Protection Agency (EPA), styled *Sierra Club, et al.* v. *Clifford et al.*, No. 96–0527, (E.D. La.). Among other claims, plaintiffs alleged that EPA failed to establish Louisiana TMDLs in a timely manner.

EPA Takes Final Agency Action on 27 TMDLs

By this notice EPA is taking final agency action on the following 27 TMDLs for waters located within the Mermentau and Vermilion/Teche basins:

Subsegment	Waterbody name	Pollutant
050101	Bayou Des Cannes—Headwaters to Mermentau River	Pesticides (carbofuran & fipronil).
050701	Grand Lake	Pesticides (carbofuran).
050702	Intracoastal Waterway	Pesticides (carbofuran).

Subsegment	Waterbody name	Pollutant
050901	Bays and Gulf Waters to State 3-mile Limit	Pesticides (carbofuran).
060205	Bayou Teche—Headwaters at Bayou Courtableau to I–10	Pesticides (carbofuran).
060207	Bayou des Glaises Diversion Canal	Pesticides (carbofuran).
060301	Bayou Teche—I–10 to Keystone Locks and Dam	Pesticides (carbofuran).
060401	Bayou Teche—Keystone Locks and Dam to Charenton Canal	Pesticides (carbofuran).
060701	Tete Bayou	Pesticides (carbofuran).
060801	Vermilion River—Headwaters at Bayou Fusilier-Bourbeaux Junction to New Flanders (Ambassador Caffery Bridge at Hwy 3073).	Pesticides (carbofuran).
060802	Vermilion River—From New Flanders (Ambassador Caffery Bridge) at Hwy 3073 to Intracoastal Waterway.	Pesticides (carbofuran).
060803	Vermilion River Cutoff	Pesticides (carbofuran).
060901	Bayou Petite Anse	Pesticides (carbofuran).
060902	Bayou Carlin (Delcambre Canal)—Lake Peigneur to Bayou Petite Anse (Estuarine).	Pesticides (carbofuran).
060903	Bayou Tigre	Pesticides (carbofuran).
060904	Vermilion River B890 Basin New Iberia Southern Drainage Canal	Pesticides (carbofuran).
060906	Intracoastal Waterway	Pesticides (carbofuran).
060907	Franklin Canal	Pesticides (carbofuran).
060910	Boston Canal and Associated Canals (Estuarine)	Pesticides (carbofuran).
060911	Vermilion-Teche River Basin	Pesticides (carbofuran).
061101	Bayou Petite Anse	Pesticides (carbofuran).
061102	Intracoastal Waterway	Pesticides (carbofuran).
050201	Bayou Plaquemine Brule—headwaters to Bayou Des Cannes	Pesticides (fipronil).
050401	Mermentau River—origin to Lake Arthur	Pesticides (fipronil).
050501	Bayou Queue de Tortue—headwaters to Mermentau River	Pesticides (fipronil).
050603	Bayou Chene—includes Bayou Grand Marais	Pesticides (fipronil).

EPA requested the public to provide EPA with any significant data or information that may impact the 27 TMDLs in 66 FR 47673 (September 13, 2001). The comments received and EPA's response to comments may be found at *www.epa.gov/region6/water/tmdl.htm*.

Final Agency Action Removing 6 Waterbody/Pollutant Combinations for waters located within the Mermentau and Vermilion/Teche basins from the Louisiana 303(d) List Because TMDLs are not Needed:

Subsegment	Waterbody name	Pollutant
050102	Bayou Joe Marcel	Ammonia, nutrients, and organic enrichment/low DO.
060906	Intracoastal Waterway	Nutrients.
061101	Bayou Petite Anse	Nutrients.
060204	Bayou Courtableau—origin to	Oil and grease.

EPA requested the public to provide to EPA any significant data or information that may impact the determinations that 6 TMDLs are not needed in 66 FR 52403 (October 15, 2001). No comments were received.

Dated: March 13, 2002

Sam Becker,

Acting Director, Water Quality Protection Division, Region 6.

Public Water System Supervision Program Revision for the State of Florida

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of tentative approval.

SUMMARY: Notice is hereby given that the State of Florida is revising its approved Public Water System Supervision Program. Florida has adopted drinking water regulations for Lead and Copper and the definition of a Public Water System. EPA has determined that these sets of revisions are no less stringent than the corresponding Federal regulations. Therefore, EPA intends on approving this State program revision.

All interested parties may request a public hearing. A request for a public hearing must be submitted by April 22, 2002 to the Regional Administrator at the address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made by April 22, 2002, a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become final and effective on April 22, 2002.

Any request for a public hearing shall include the following information: (1) The name, address, and telephone number of the individual organization, or other entity requesting a hearing; (2) A brief statement of the requesting person's interest in the Regional Administrator's determination and a brief statement of the information that the requesting person intends to submit at such hearing; (3) The signature of the individual making the request, or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

Florida Department of Environmental Protection, Twin Towers Office Building, 2600 Blair Stone Road,

1. Applicant Bank:_____ Contact:_____

   Address, include 9 digit Zip Code:_____

   E-Mail_____ Fax_____ Phone_____

   Tax ID #:_____ DUNS #:_____ Congressional District:_____

2. If you wish us to consider adding subsidiaries, branches or affiliates as Additional Named Insureds under your policy, provide full legal name and address below and answer questions 5. A. (2) or B. (2) for each Additional Named Insured.

Name	Address

3. Name of Brokerage (if any, if none insert *"none"*):_____

   Name of Contact:_____ Broker #:_____

   E-Mail_____ Fax_____ Phone_____

4. Please provide the following information unless you have submitted this information within the past 6 months for Policy No_____:

   A. (I)Rating:_____ Agency:_____ Date:_____, or

   (2) a. Annual report, including audited financial statements, on your bank for the past two fiscal years.
   b. The most recent available 10K and 10Q reports on your bank.
   c. Recent (within six months) credit agency report on your bank (otherwise, please attach a check for $35.00).

   B. If you are a foreign bank registered to do business in the U.S., in which state(s) are you licensed to conduct business? How are your operations in this country best described? Does your bank operate as a branch or subsidiary? To what extent are credit decisions made by your bank autonomous of headquarters?

   C. Has your bank or have the individual(s) who will be administering or placing business under this policy ever dealt with Ex-Im Bank before? ☐ Yes ☐ No If yes, describe the programs the bank or the individual(s) are familiar with, and the time period during which these contacts took place._____

   D. Is there any other information that will be of assistance in evaluating your request for a bank policy? ☐ Attached

5. A. **For Letter of Credit Policies** (add pages if necessary):

   (1) a. How are the international banking activities in your bank organized functionally? _____

   (2) a. Who are the key individuals involved? _____

   b. Have the individuals involved attended an Ex-Im Bank orientation seminar or an Ex-Im Bank training session? ☐ Yes ☐ No
   c. Please provide their resumes. (See resume form attached)
   You must provide notification within 10 days if the individual(s) responsible for administering the policy change.

   (3) a. How long have you been confirming international letters of credit?_____

   b. From what countries?_____

   (4) Does your bank have any special expertise in particular types of transactions, regions of the world or any other areas?
   _____

   (5) Maximum value of insured letters of credit expected to be outstanding during the policy period: $_____.

OMB#3048-0009
Expiry Date 5/31/02

B. **For Financial Institution Supplier Credit** or **Bank Deductible Policies** (add pages if necessary):

(1) Describe how you develop customers for domestic or export receivable financing or factoring.

_____

(2) a. Please identify the individual(s) and administrative area which will be responsible for administering your policy.

_____

b. Have the individuals involved attended an Ex-Im Bank orientation seminar or an Ex-Im Bank training session? ☐ Yes ☐ No

c. What experience do the individual(s) identified in 5.B.(2)a.. have with Ex-Im Bank insurance _____ or private sector export credit insurance? _____

d. Please provide their resumes. (See resume form attached)
You must provide notification within 10 days if the individual(s) responsible for administering the policy change.

(3) How many years, and to what dollar amount, have you financed or factored receivables?

	# of years	most recent calendar year amount
Domestic Receivables:	_____	$_____
Foreign Receivables:	_____	$_____

(4) Describe the credit procedures used in deciding to finance an exporter's receivables.

Exporter Analysis: _____

Buyer Analysis: _____

(5) a. Maximum value of financed receivables expected to be outstanding during the policy period: $_____

b. For **Financial Institution Suppler Credit Policies** Do you desire (check one) a Documentary Policy ☐
a Non-Documentary Policy ☐
or both ☐

c. After what number of days would you stop financing the exporter's receivables from an overdue buyer? _____

d. How often are financed export receivables monitored? _____

e. Please provide a specimen copy of your lending agreement with exporters for receivable financing or factoring. ☐ Attached

6. The Applicant (it) **CERTIFIES and ACKNOWLEDGES to the Ex-Im Bank** (the Bank) that:

A. 1) it is a financial institution doing business in the United States, or a jurisdiction thereunder, in accordance with applicable Federal or State banking laws and regulations **OR**
2) it has received a **written** statement of exception from the Bank and **attached** it to this certification, permitting participation in the transaction despite an inability to make this certification.

B. it undertakes to carry on its business with due care in financing exports hereunder, and in regard to the conditions of the contract and the trustworthiness of the exporter and buyer.

Expiry Date 5/31/02

C. (1) neither it nor its principals have been within the **past** 3 years:
(a) debarred, suspended or declared ineligible from participating in or voluntarily excluded from participation in a Covered Transaction or
(b) formally proposed for debarment, with a final determination still pending;
(c) indicted, convicted or had a civil judgement rendered against them for any of the offenses listed in the **Government Wide Nonprocurement Debarment and Suspension Regulations; Common Rule** which defines Covered Transaction.
(2) It certifies that it is **not delinquent** on any amounts due and owing to the U.S. Government, its agencies or instrumentalities as of the date of this application. **OR**
(3) It has received a **written** statement of exception from the Bank and **attached** it to this certification, permitting participation in the transaction despite an inability to make certifications (1) (a) through (c) and (2).
It further certifies that it has not and will not knowingly enter into any agreements in connection with the transaction with any individual or entity that has been subject to (1) (a), (b) or (c) above.

D. it will complete and submit **Form-LLL,** Disclosure Form to Report Lobbying if, to the best of its knowledge and belief, **any funds have been paid or will be paid** to any person in connection with this application for influencing or attempting to influence:
(1) an officer or employee of any U.S. Government agency, or
(2) a Member of Congress or a Member's employee, or
(3) an officer or employee of Congress. *This does not apply to commissions paid by the Bank to insurance brokers.*

E. it has not, and will not, engage in any activity in connection with this Policy that is a violation of the **Foreign Corrupt Practices Act of 1977** (15 USC Sec. 78dd-1, et seq.) which provides for civil and criminal penalties against individuals who directly or indirectly make or facilitate corrupt payments to foreign officials to obtain or keep business. To the best of its knowledge, the performance by the parties of their respective obligations covered or to be covered under this Policy does not and will not violate any applicable law.

F. (1) the information being requested is done so under authority of the **Export-Import Bank Act of 1945** (12 USC 635 et. seq.);
(2) providing the information is mandatory. **Failure to do so** may result in the Bank being unable to determine eligibility for the Policy. The information provided will be reviewed to determine the participants' ability to perform and pay under the Policy.
(3) the Bank may not require the information and applicants are not required to respond unless a currently valid OMB control number is displayed on this form (see upper right of each page);
(4) the information provided will be held confidential subject to the **Freedom of Information Act** (5 USC 552) and the **Privacy Act of 1974** (5 USC 552a), except as required to be disclosed under applicable laws;
(5) transfer of financial records included in this application to private parties or another U.S. Government authority will not be authorized except as permitted under the **Right of Financial Privacy Act of 1978** (12 USC 3401).
(6) the **public burden** reporting for this collection of information is estimated to average 1 hour per response, including reviewing instructions, searching data sources, gathering information, completing, and reviewing the application. Send **comments** regarding the burden estimate, including suggestions for reducing it, to Office of Management and Budget, Paperwork Reduction Project OMB# 3048-0009, Washington, D.C. 20503.

G. the representations made and the facts stated by it in these certifications and its attachments **are true, to the best of its knowledge and belief, and it has not misrepresented or omitted any material facts.** It further understands that these certifications are subject to the penalties for fraud against the U.S. Government (18 USC 1001).

EXPORT-IMPORT BANK OF THE UNITED STATES
BENEFICIARY CERTIFICATE AND AGREEMENT
For Use With
Bank Letter of Credit Export Credit Insurance Policy or
Financial Institution Buyer Credit Export Credit Insurance Policy or
Medium Term Export Credit Insurance Policy

NOTE: This form is to be used only if the beneficiary of the letter of credit, the recipient of a funding under a direct buyer credit loan or the recipient of payment under a reimbursement loan or a payment under a supplier credit is not also the U.S. Exporter. In that situation the exporter must complete those parts of the Exporter Certificate EIB94-07 required in its instructions and the beneficiary must complete this entire certificate.

Name and Address of Policyholder: Name and Address of Beneficiary:

_____ _____

_____ _____

Policy No._____ _____

(to be completed by the policyholder, also see No.4.e) Beneficiary's Dun & Bradstreet Number _____

Taxpayer ID No.:_____ Congressional District:_____

Indicate (not required)if owned by a☐ woman, or an☐ ethnic minority, describe____

The information provided will be held confidential subject to the **Freedom of Information Act** (5 USC 552) and the **Privacy Act of 1974** (5 USC 552a), except as required to be disclosed under applicable laws; transfer of financial records included in this application to private parties or another U.S. Government authority will not be authorized except as permitted under the **Right of Financial Privacy Act of 1978** (12 USC 3401).

Upon representation that the Export-Import Bank of the United States ("Ex-Im Bank") has issued to the policyholder identified above an export credit insurance policy, and in consideration of either (check one):

☐ a) the payment, acceptance or negotiation of an irrevocable letter of credit in our favor; or,

☐ b) the financing of an export,

We, the Beneficiary, hereby certify to the policyholder and to Ex-Im Bank as follows:

1. The policyholder has either (check one):

☐ a) informed us of an irrevocable letter of credit with Identification No._____ and we have presented, or shall present, documents which are in compliance with the terms and conditions of such irrevocable letter of credit; or,

☐ b) to our belief, established an obligation of the foreign buyer named below to make repayment of funds on a specified term in support of an export, for which we have received payment.

2. The above referenced irrevocable letter of credit or the buyer's obligation to pay the policyholder is in support of an export transaction described as follows:

a) Name and address of buyer_____

b) Description and quantity of product(s)/service(s)_____

c) The product(s) are: ☐ New, ☐ Used. If used, attach Used Equipment Questionnaire form EBD-M-25.

d) Place of Shipment_____ e) Date of Shipment_____

f) Contract Price to Buyer:

(i) Products/Service	$_____
ii) Less discounts or similar allowances	$_____
iii) Plus total insurance, freight or other delivery charges included in the transaction	$_____
Subtotal:	$_____
iv) Less cash payment (minimum 15% required for MT)	$_____
(v) Total final net delivered financed portion	$_____

3. To the best of our knowledge and belief, the products described above were **shipped from the United States**, in accordance with paragraph 2 above.

4. With respect to products
a) which could be used for **military** purposes,
b) which could be components of a product or equipment which could be used for military purposes,
c) which could be used to manufacture products or equipment which could be used for military purposes,
d) listed on the United States **Munitions List** (part 121 of Title 22 of the Code of Federal Regulations), or
e) purchased by or for use by security, military or defense organizations, ☐ we ____ have or ☐ the policyholder ____
Initial Initial
has received the written approval of the Ex-Im Bank for such sale prior to shipment of the products **and attached** it to this certificate. Submit a Defense Product Questionnaire EIB92-61 in order to obtain such approval.

5. The products do not consist of technology, fuel, equipment, materials or goods and services to be used in the construction, alteration, operation or maintenance of **nuclear** power, enrichment, reprocessing, research or heavy water production facilities.

6. To the best of our knowledge and belief the products are **for use only in countries** in accordance with Ex-Im Bank's Country Limitation Schedule in effect on the date of shipment. See Ex-Im Bank's Internet Website <www.exim.gov> Country and Fee Information.

7. a) neither we nor our principals have been within the past 3 years:
(1) **debarred**, suspended or declared ineligible from participating in or voluntarily excluded from participation in a Covered Transaction or
(2) formally proposed for debarment, with a final determination still pending;
(3) indicted, convicted or had a civil judgement rendered against them for any of the offenses listed in the **Government Wide Nonprocurement Debarment and Suspension Regulations; Common Rule** which defines Covered Transaction.
b) We certify that we are **not delinquent** on any amounts due and owing to the U.S. Government, its agencies or instrumentalities as of the date of this application. **OR**
c) We has received a **written** statement of exception from Ex-Im Bank and **attached** it to this certification, permitting participation in the transaction despite an inability to make certifications (a) (1) through (3) and (b).
We further certify that we have not and will not knowingly enter into any agreements in connection with the transaction with any individual or entity that has been subject to (a) (1), (2) or (3) above.

8. We will complete and submit **Form-LLL**, Disclosure Form to Report Lobbying if, to the best of our knowledge and belief, **any funds have been paid or will be paid** to any person in connection with this application for influencing or attempting to influence:
a) an officer or employee of any U.S. Government **agency**, or
c) a Member of Congress or a Member's employee, or
d) an officer or employee of Congress. *This does not apply to commissions paid by the Bank to insurance brokers.*

9. we have not, and will not, engage in any activity in connection with this transaction that is a violation of the **Foreign Corrupt Practices Act of 1977** (15 USC Sec. 78dd-1, et seq.) which provides for civil and criminal penalties against individuals who directly or indirectly make or facilitate corrupt payments to foreign officials to obtain or keep business. To the best of our knowledge, the performance by the parties of their respective obligations covered or to be covered under this transaction does not and will not violate any applicable law.

10. The representations made and the facts stated by us in these certifications and its attachments **are true, to the best of our knowledge and belief, and we have not misrepresented or omitted any material facts.** We further understand that these certifications are subject to the penalties for fraud against the U.S. Government (18 USC 1001).

EXPORT-IMPORT BANK OF THE UNITED STATES
APPLICATION for a FINANCIAL INSTITUTION BUYER CREDIT POLICY

(Please Print or Type) APP. NO._____(Ex-Im Bank Use Only)
INSURANCE BROKER: If none, insert "*none*." Broker #:_____
Name of Brokerage:_____ Phone #:_____
Contact Person:_____ Fax #:_____ E-Mail:_____

I. APPLICANT: (Ex-Im use only: Insured #:_____)
Applicant Name:_____ Phone #:_____
Contact person:_____ Fax #:_____
Position Title:_____ E-Mail:_____
Street Address:_____
City:_____ State:_____ Zip Code:_____

Please attach the following information unless you submitted this information within the past 6 months for Policy No._____.

a. Taxpayer ID #:_____ Duns #:_____ Congressional District:_____ **AND**

b. Market Rating:_____ Rating Agency:_____ Date:_____, **OR**

c. (1) ☐ Your most recent published annual report, or audited financial statements.
(2) ☐ Your most recent available 10K and 10Q reports.
(3) ☐ A credit agency report dated within 6 months. If unavailable, attach check for $35.00 to cover Ex-Im Bank's cost in ordering report.
(4) How long have you been lending internationally?_____
(5) To what countries do you actively lend?_____.
(6) How is your foreign loan portfolio broken down between government _____% and private _____% sector buyers?
(7) How often do you visit your overseas buyers?_____
(8) ☐ Attach the names, titles, and the international lending backgrounds of the individuals responsible for administering Ex-Im policies.

2. TRANSACTION:
a. This insurance application is for, check one, a credit extended by you based on:
your relationship with the Buyer or Guarantor , a☐ Buyer Credit, **or**, your relationship with the exporter, a☐ Supplier Credit.
b. This application is for ☐ Comprehensive (Commercial and Political Cover) or☐ Political Only Cover.
c. This application is for a☐ Single Financing or a☐ Revolving Line.
d. Credit limit requested $_____
e. Payment terms requested_____.
f. Ex-Im Bank requires a written debt obligation, i.e., promissory note or draft. If none, check here ☐ and provide a full description of documentation which constitutes the buyer's debt obligation._____.
g. Indicate whether ☐ negotiating or ☐ financing mandate received.
h. For buyer credits, provide a brief description of the products (for supplier credits see 5.c,)_____.

3. BUYER: The "buyer" is the entity which agrees to repay the credit (loan). Refer to Ex-Im Bank's Short Term Credit Standards (EIB99-09) for Buyers to determine the likelihood of approval:

a. This buyer is ☐ Sovereign, ☐ Non-Sovereign Public Sector, or ☐ Private Sector. (Ex-Im use only: File #:_____)
Buyer Name:_____ Duns #:_____
Contact person:_____ Phone #:_____ Fax #:_____
Position Title:_____ E-Mail:_____
Street Address:_____ City:_____
State/Province:_____ Postal Code:_____ Country:_____

The following information on the buyer is necessary unless the credit is based on a guarantor, if so check here☐ and complete for the guarantor

b. For **all applications** provide in an attachment:
(1) ☐ A summary of credit facilities (insured and uninsured) extended by the☐ applicant or the ☐ exporter (for Supplier Credits) to this buyer/guarantor specifying the high credit, whether secured or unsecured, and tenor(s) with details on past dues (if applicable), or☐ None.

(2) For ☐ **non-sovereign public** or ☐ **private** buyers/guarantors on which comprehensive cover is requested, provide the following:
(a) Market Rating:_____ Rating Agency:_____ Date:_____, **OR**
(b) ☐ A bank reference not older than 6 months from date of application **and**
(i) ☐ 2 Ex-Im Bank Trade Reference forms (EIB99-14) dated within 6 months of the application **and**
(ii) ☐ For a credit limit up to $1 million, the last 2 fiscal year end audited or signed unaudited financial statements with notes.
☐ For a credit limit over $1 million, provide 3 fiscal year end audited statements with notes and the most recent interim statements with notes if the last fiscal year end is more than 9 months prior to application.
(3) ☐ The applicant's credit memorandum on the buyer/guarantor.
(4) Have you visited the buyer/guarantor? ☐ No ☐ Yes, if yes give date: _____ and attach a copy of your call report.

OMB # 3048-0009
Expiry Date 5/31/02

4. **GUARANTOR:** The "guarantor" is the entity which agrees to repay the credit if the borrower does not. Complete the information below and provide the information in 3.b. if the credit is based on the guarantor. (Ex-Im use only: File #: _____)

This guarantor is ☐ Sovereign, ☐ Non-Sovereign Public Sector, or ☐ Private Sector.

Guarantor Name: _____ Duns #: _____
Contact person: _____ Phone #: _____ Fax #: _____
Position Title: _____ E-Mail: _____
Street Address: _____ City: _____
State/Province: _____ Postal Code: _____ Country: _____

5. For **SUPPLIER CREDITS** only:

NOTE: You are not required to fill out this section for **Buyer Credits** but, if any information is known, please complete in a, b and c.

a. EXPORTER:

The "exporter" is the entity which contracts with the buyer for the sale of the U.S. items and services. (Ex-Im use only: File #: _____)

Exporter Name: _____ Phone #: _____
Contact person: _____ Fax #: _____
Position Title: _____ E-Mail: _____
Street Address: _____ City: _____
State: _____ Zip Code: _____
Taxpayer ID #: _____ Duns #: _____ Congressional District: _____
Fiscal year ended (mo. & yr.): _____ Gross sales revenue in last fiscal year: $ _____ # of employees: _____
Standard Industrial Code of business: _____ Indicate (Not Required) if owned by a ☐ Woman or ☐ Ethnic Minority, describe: _____

If "Documentary" cover is desired, check here ☐ and attach the following unless the exporter submitted it within the past 6 months for Policy No._____. Refer to Ex-Im Bank's Short Term Credit Standards (EIB99-09) Exporter Standards for an Enhanced Assignment to determine the likelihood of approval of documentary cover if the exporter, using the US Small Business Administration guidelines, is a small business.

(1) ☐ A bank reference on the exporter dated within 6 months of the application **and**
(2) ☐ 2 trade references on the exporter dated within 6 months of the application **and**
(3) The last 2 fiscal year financial statements of the exporter as follows:

Claim Payment Limit (Credit Limit x %of cover)	Minimum Requirement
☐ $500,000 or less	signed by an authorized officer of the exporter
☐ $500,001 - $999,999	reviewed by a CPA with notes attached
☐ $1,000,000 or more	audited by a CPA with opinion and notes attached

NOTE: The net worth, including subordinated shareholder debt, of the exporter must be at least 20% of the Claim Payment Limit.

b. SUPPLIER: The "supplier" is the U.S. entity which produces the items and/or performs the services to be exported.

Check if the supplier is also the ☐ exporter or complete the following: (Ex-Im use only: File #: _____)

Supplier Name: _____ Phone #: _____
Contact person: _____ Fax #: _____
Position Title: _____ E-Mail: _____
Street Address: _____ City: _____
State: _____ Zip Code: _____
Taxpayer ID #: _____ Duns #: _____ Congressional District: _____
Fiscal year ended (mo. & yr.): _____ Gross sales revenue in last fiscal year: $ _____ # of employees: _____
Standard Industrial Code of business: _____ Indicate (Not Required) if owned by a ☐ Woman or ☐ Ethnic Minority, describe: _____

c. PRODUCTS: All applicants should note that there are specific United States content requirements for all transactions and that exporters are required to complete an Exporter's Certificate form EIB-94-07 for "Documentary" cover.

(1) Products: ☐ New ☐ Used (If used, complete and attach Used Equipment Questionnaire, EIB-92-63)
(2) Description of products*: _____
(3) Are products listed on the United States Munitions List (part 121 of Title 22 of the Code of Federal Regulations)? ☐ Yes ☐ No
(4) Is each product produced or manufactured in the United States? ☐ Yes ☐ No
(5) Is at least one half of the value, exclusive of price mark-up, exclusively of US origin? ☐ Yes ☐ No
(6) Will any value be added to the products after export from the United States? ☐ Yes ☐ No
If yes please attach an explanation; the transaction may not be eligible for coverage.

* The Borrower, Guarantor, Buyer and End User must be foreign entities in countries for which Ex-Im is able to provide support, see Ex-Im's Country Limitation Schedule (CLS) at www.exim..gov . There may not be trade measures against them under Section 201 of the Trade Act of 1974, see http://dockets.usitc.gov/eol/public/ click on 201. There may not be trade sanctions in force against them. For a list of products and countries with Anti-Dumping or Countervailing Duty sanctions see http://205.197.120.60/oinv/sunset.nsf/AllDocID/96DAF5A6C0C52909852S6A0A004DEE7D.

OMB # 3048-0009
Expiry Date 5/31/02

6. **PARTICIPANTS:** Describe any direct or indirect ownership or family relationship between any of the participants in this transaction. If none, insert *"none"*._____.

☐ the applicant **and** for supplier credits: ☐ the exporter, or
for buyer credits: ☐ the buyer and ☐ the guarantor (if any).

7. **The Applicant** (it) **CERTIFIES and ACKNOWLEDGES to the Ex-Im Bank** (the Bank) that:

A. 1) it is a financial institution doing business in the United States, or a jurisdiction thereunder, in accordance with applicable Federal or State banking laws and regulations **OR**
2) it has received a **written** statement of exception from the Bank and **attached** it to this certification, permitting participation in the transaction despite an inability to make this certification.

B. it undertakes to carry on its business with due care in financing exports hereunder, and in regard to the conditions of the contract and the trustworthiness of the exporter and buyer.

C. (1) neither it nor its principals have been within the past 3 years:
(a) debarred, suspended or declared ineligible from participating in or voluntarily excluded from participation in a Covered Transaction or
(b) formally proposed for debarment, with a final determination still pending;
(c) indicted, convicted or had a civil judgement rendered against them for any of the offenses listed in the **Government Wide Nonprocurement Debarment and Suspension Regulations; Common Rule** which defines Covered Transaction.
(2) It certifies that it is **not delinquent** on any amounts due and owing to the U.S. Government, its agencies or instrumentalities as of the date of this application. **OR**
(3) It has received a **written** statement of exception from the Bank and **attached** it to this certification, permitting participation in the transaction despite an inability to make certifications (1) (a) through (c) and (2).
It further certifies that it has not and will not knowingly enter into any agreements in connection with the transaction with any individual or entity that has been subject to (1) (a), (b) or (c) above.

D. it will complete and submit **Form-LLL**, Disclosure Form to Report Lobbying if, to the best of its knowledge and belief, **any funds have been paid or will be paid** to any person in connection with this application for influencing or attempting to influence:
(1) an officer or employee of any U.S. Government agency, or
(2) a Member of Congress or a Member's employee, or
(3) an officer or employee of Congress. *This does not apply to commissions paid by the Bank to insurance brokers.*

E. it has not, and will not, engage in any activity in connection with this Policy that is a violation of the **Foreign Corrupt Practices Act of 1977** (15 USC Sec. 78dd-1, et seq.) which provides for civil and criminal penalties against individuals who directly or indirectly make or facilitate corrupt payments to foreign officials to obtain or keep business. To the best of its knowledge, the performance by the parties of their respective obligations covered or to be covered under this Policy does not and will not violate any applicable law.

F. (1) the information being requested is done so under authority of the **Export-Import Bank Act of 1945** (12 USC 635 et. seq.);
(2) providing the information is mandatory. **Failure to do so** may result in the Bank being unable to determine eligibility for the Policy. The information provided will be reviewed to determine the participants' ability to perform and pay under the Policy.
(3) the Bank may not require the information and applicants are not required to respond unless a currently valid OMB control number is displayed on this form (see upper right of each page);
(4) the information provided will be held confidential subject to the **Freedom of Information Act** (5 USC 552) and the **Privacy Act of 1974** (5 USC 552a), except as required to be disclosed under applicable laws;
(5) transfer of financial records included in this application to private parties or another U.S. Government authority will not be authorized except as permitted under the **Right of Financial Privacy Act of 1978** (12 USC 3401).
(6) the **public burden reporting** for this collection of information is estimated to average 1 hour per response, including reviewing instructions, searching data sources, gathering information, completing, and reviewing the application. Send comments regarding the burden estimate, including suggestions for reducing it, to Office of Management and Budget, Paperwork Reduction Project OMB# 3048-0009, Washington, D.C. 20503.

G. the representations made and the facts stated by it in these certifications and its attachments **are true, to the best of its knowledge and belief, and it has not misrepresented or omitted any material facts.** It further understands that these certifications are subject to the penalties for fraud against the U.S. Government (18 USC 1001).

APPLICATION FOR MEDIUM TERM EXPORT CREDIT INSURANCE QUOTATION INSTRUCTIONS

INTRODUCTION

The Export-Import Bank of the United States (Ex-Im) is an independent federal agency which provides financing support for the export of U.S. goods and services. Several programs are available, including Direct **Loans** to foreign buyers, Financial **Guarantees** of payment for lenders to foreign buyers, **Working Capital Loan Guarantees** of payment by a U.S. exporter to its lender, and **Export Credit Insurance**. Ex-Im issues **Letters of Interest** indicating the eligibility of transactions for these programs, see "Information" below to obtain an application.

These instructions are for an application for export credit insurance by either a lender or exporter on a transaction involving sales of capital goods and services with a medium repayment term to a single buyer. For leases see EIB92-20 Fact Sheet on Lease Policies and EIB92-45 Instructions and Application for Lease Policies.

INFORMATION about Ex-Im programs; the fact sheets and **forms mentioned in these instructions** and the application; information on Private Export Financing Corporation (PEFCO) export financing; names of: credit reporting and rating agencies, banks interested in export financing, insurance brokers and Ex-Im City/State Participants **may be obtained:**

- from Ex-Im's **website** <http://www.exim.gov> , see Programs, then Publications, then Export Credit Insurance or
- by calling an Ex-Im **Regional Office**: Northeast: New York (212) 916-0320,MidAtlantic: Washington, D.C. (202) 565-3902, Midwest: Chicago (312) 353-8081, Southeast: Miami (305) 526-7425, Southwest: Houston (281) 721-0465, West: Los Angeles (562) 980-4580, Orange County (949) 660-1688ext150,San Francisco (415) 705-2285, or
- by calling the Ex-Im Business Development Division **1-800-565-EXIM** (3946), or
- at 811 Vermont Avenue, NW, Washington, D.C. 20571.

REQUIREMENTS TO APPLY for a medium term export credit insurance policy:

There is **NO Application Fee.**
A **non binding insurance premium rate** can be determined using the Ex-Im website **Exposure Fee Calculator** or you may call Ex-Im, see above.

1. The **REASON** Ex-Im's support is requested must demonstrate that the transaction will not go forward without support. See the application form question no. 5.

2. Use of a registered Ex-Im insurance **BROKER** or an Ex-Im **CITY/STATE PROGRAM PARTICIPANT** is recommended but not required. Use of a broker or participant does not affect the Ex-Im premium rate. Regional Offices will provide guidance on applications as well as lists of brokers, city/state program participants, and lenders interested in providing export financing. All information provided in an application will be held **confidential**, subject to the Freedom of Information Act, 5 USC 552, the Privacy Act of 1974, 5 USC552a, and the Right of Financial Privacy Act of 1978, 12 USC 3401 except as required to be disclosed under applicable laws.

3. The **APPLICANT** must be either an exporter or a financial institution with an insurable interest in the transaction. A Taxpayer ID number is requested to report on claim payments. The Standard Industrial Code (SIC) or NAICS Code, gross sales and number of employees are requested to determine eligibility for small business benefits. Gender and ethnic minority ownership interest information are requested but not required. Also, see the **applicant certifications** on the **application** and Part 3 of the application, the **Credit Information Checklist**, which is required to demonstrate the ability of the applicant and exporter or supplier to perform the export.

4. The payment obligation must be in U.S. dollars, must be **unconditional** and must be evidenced by a **PROMISSORY NOTE** (single disbursement or grid forms EIB-92-58A or B, special notes for Mexico and Venezuela) or conforming to the requirements listed in the insurance policy which allow use of a note form other than Ex-Im's.

EIB form 92-48
Revised 10/01

Part 1 of 3, Page 2 of 4

OMB No. 3048-0009
Expires 3/31/02

5. The **EXPORT** must involve shipment of capital goods from the U.S. Services must normally be provided by U.S. based personnel and may be provided in the U.S. or at the foreign site. Used equipment may be supported, see Used Equipment Questionnaire EBD-M-25 for details. Breeding cattle or livestock may be supported, see Livestock Questionnaire EIB92-62.
Allowance is made for goods and services that are not 100% U.S. origin as follows:
- The Exporter's Supply Contract may include U.S. and "eligible" foreign content.
- Up to 15% of the Exporter's Supply Contract may be eligible foreign content.
- If more than 15% of the Exporter's Supply Contract is eligible foreign content, Ex-Im may provide support for the U.S. content only. There is no minimum U.S. content requirement.

"Eligible Foreign Content" includes goods imported from a foreign country and shipped from the U.S. with the export.
"Ineligible Foreign Content" includes goods shipped from any other country, or services provided in a foreign country, other than the buyer's.
"Goods assembled outside the U.S." by foreign personnel are **normally ineligible** for insurance cover.
"Local costs" are foreign goods and services originating in the country of the buyer and may only be included in the insured amount if approved by Ex-Im Bank.
See **Insurance Program Foreign Content Requirements** EIB99-21 and **Local Cost Policy** EBD-M-05 for details.
Military goods and services and sales to or for use by military/police/security force entities are **normally ineligible**, see Defense Product Questionnaire EIB-92-61. However, goods on the US Munitions List are not necessarily excluded.
Fees for bank, legal, or other technical services, may be financed, see Financing of Fees for **Ancillary Services** EBD-M-13
Ex-Im has cooperative agreements with some foreign export credit agencies like itself. Ex-Im may be able to provide full support for goods and services which do not meet the domestic content requirements **if** the foreign content is from one of those nations **and** there is no other U.S. competition. Ex-Im's Reinsurance Questionnaire Attachment H to EIB95-10 will be required. See Cooperative Insurance Agreements with Foreign Export Credit Agencies (ECAs) EIB99-11.
Capital equipment used to manufacture/produce **exportable goods**, including agricultural commodities, from the country of importation will require a detailed description including changes in the level of production.

6. The **PAYMENT TERMS** to be insured are a maximum of 5 years and will be determined by the details of the transaction or credit including price, buyer, borrower, guarantor, goods, services and use. Sales to dealers, distributors or others for **resale** are limited to 2 years. Some exceptions, such as, sales of certain aircraft or to match confirmed foreign government supported competition, may be eligible for up to 7 years. "Grace" periods and "balloon" payments are **not** allowed. Further details may be found in Ex-Im Bank Standard Repayment Terms EBD-M-26.

EXPORTER'S SUPPLY CONTRACT	MAXIMUM TERM
less than $80,000	2 years
$80,000 - less than $175,000	3 years
$175,000 - less than $350,000	4 years
$350,000 or more	**5 years**

The **NET CONTRACT PRICE** is the amount to be shown in the exporter's invoice related to the goods and services to be exported and services to be performed by U.S. based personnel. If there is more than one exporter or supplier under a transaction, the Net Contract Price is the sum of the Net Contract Price specified in each of the exporter's or supplier's Exporter's Certificates EBD-M-56. The Net Contract Price **includes** eligible foreign content but **excludes** local costs. Shipping and insurance charges may be included in the Net Contract Price but, if from a foreign source, are considered part of eligible foreign content. Ancillary service fees may be included in the Net Contract Price if approved by Ex-Im Bank. The term "Net Contract Price" as used in the Exporter's Certificate, has the same meaning as the term "contract price" as used in medium term policies.
The **FINANCED/INSURED PORTION** of the contract price is the amount left after a **required minimum 15% cash payment** due **prior** to delivery or, for bank policyholders, funding. The cash payment may be financed separately, but is not included in the financed/insured portion.
The **FINANCED/INSURED PORTION** may not be more than **the lesser of**:
- **$10 million**, excluding interest and the premium; or
- **85% of the Net Contract Price**; or
- the **U.S. content** of the Exporter's Supply Contract.

The premium may be included in the insured financed amount without paying "premium on premium." This will increase the premium rate (see the Ex-Im website Exposure Fee Calculator).

The **STARTING POINT** of the payment obligation and corresponding first installment are determined by the shipment date(s), installation period (if any), consolidation of notes, and frequency of payments. See Guidelines for Starting Points EIB99-16. For semi-annual payments after a single shipment without installation, the starting point is the shipment date and the first installment is due within 6 months.

Expires 3/31/02

7. The **BORROWER, GUARANTOR, BUYER** and **END-USER** must be foreign entities in **COUNTRIES** for which Ex-Im is able to provide support, see Ex-Im's **Country Limitation Schedule** (CLS) at www.exim..gov . There may not be trade sanctions in force against them. For a list of products and countries with Anti-Dumping or Countervailing Duty sanctions see http://205.197.120.60/oinv/sunset.nsf/AllDocID/96DAF5A6C0C5290985256A0A004DEE7D. There may not be trade measures against them under Section 201 of the Trade Act of 1974, see http://dockets.usitc.gov/eol/public/ click on 201. You may call Ex-Im Bank's Policy and Planning Division at 202-565-3770 for details. Also, see Part 3 of the application and EBD-M-39 for **credit information** required.

A **GUARANTOR** may be required when the borrower is not creditworthy or under certain other circumstances. See EBD-M-39. For example: guarantors **are required** for the **primary source of repayment** (PSR), which may be **either** the borrower **or** guarantor, under the following circumstances:

- if the PSR is a "start-up" company;
- if the ability of the PSR to pay the debt depends on cash flow from an expansion or new line of business (see EBD-M-39, Part II for exceptions to this requirement on transaction of $1 million or more);
- if more than 25% of PSR sales are **to** or **from** a related/commonly owned company, its guarantee is required;
- if the PSR is a private, non-financial institution with sales revenue of less than U.S. $50 million, the insurance requires the personal guarantee of:
  - an owner holding at least 50%, **or**
  - if no individual has a majority position, of any owner(s) holding 20% or more. This requirement is not applicable when no individual holds at least 20%, however a guarantor may still be required.

8. Ex-Im has published **MEDIUM TERM CREDIT STANDARDS,** EBD-M-39, in order to expedite service. Transactions meeting all of the standards have a high probability of being favorably considered, absent any unusual circumstances.
   PART I, transactions of up to and including $1 million - describes the standards and what can be done if they are not met.
   PART II, transactions of greater than $1 million, up to and including $5 million - describes the standards and what can be done if they are not met.
   PART III, transactions of greater than $5 million - describes the standards and under what circumstances **required supplemental financial information** in **Attachment C** of EBD-M-39 must be provided.

Applicants are **encouraged to review the standards.** Applicants should determine if transactions of up to and including $5 million conform to standards and submit calculations showing the standards are met or provide the additional information described therein when standards are not met. This will **significantly reduce the time** to process the application.

INSURANCE COVER offered:

1. Sales must be to a single or to "joint and several" borrower(s). There are **no medium term "multi-buyer"** policies, except those issued on bank-to-bank lines. Applicants may request cover for:
   Single sale, single shipment transactions with or without installation by the exporter;
   Single sale, multiple shipments transactions, with or without installation by the exporter;
   Repetitive sales under a line of credit extended by a financial institution or exporter to a buyer, or sales by multiple exporters to multiple buyers under a medium term line of credit from one bank to another.
   Applicants will receive a time sensitive binding Commitment from Ex-Im to issue single shipment insurance if approved. Multiple shipment and repetitive sales policies are automatically issued if approved and have a final shipment date.
   Applicants, their brokers or city/state participants are typically advised by a facsimile letter of decisions to approve, deny or require additional information on applications.
2. **COVERAGE**: Applicants may request:
   COMPREHENSIVE cover against all the commercial (including devaluation) and political (excluding devaluation, including transfer/inconvertibility) risks specified in the policy which may cause default, **or**
   POLITICAL risks cover only.
   Transactions with **sovereign** buyers or guarantors (those offering the full faith and credit of the country of importation) receive comprehensive cover. Applicants related to the borrower will receive political risks cover only.

EIB form 92-48
Revised 10/01

Part 1 of 3, Page 4 of 4

OMB No. 3048-0009
Expires 3/31/02

3. **PRE-SHIPMENT**: Applicants may also request pre-shipment cover against certain commercial and political events which may cause the transaction to fail prior to shipment. However, this does not include cover against contract cancellation. Pre-shipment insurance cover may not be combined with an Ex-Im Direct Loan. A minimum 5% cash payment is required at contract signing or before the effective date of pre-shipment cover. If the CLS requires that a letter of credit be used for the payment, the letter of credit must be issued in order for pre-shipment cover to be in effect. Applicants may also request cover for **progress payments** if such payments are for goods and services to be delivered, see Ex-Im Bank Fact Sheet EIB01-04.

4. **PERCENTAGE OF COVER**: The cover is on **100%** of the principal and interest of the insured loan. Post default interest is covered at 100% of the original rate of interest and only if it is specified in the note. Interest is covered until the date of claim payment or 270 days after default, whichever is earlier. There is a 180 day waiting period to file claims due to commercial risk defaults other than insolvency. There is no waiting period for claims resulting from insolvency or political risk defaults.

5. **CONDITIONALITY**: Insurance is a conditional risk protection product which requires the insured to provide evidence of conformance to the insurance contract (policy) by submission of documents at the time a claim is filed. Insureds are required to report borrowers who are 60 days past due. Single sale, single shipment policies require **PAYMENT OF PREMIUM** prior to shipment. Multiple shipment and repetitive sales policies require insured exporters to pay premium by the 15th day after the end of the month in which shipment takes place. Insured bank premiums are due by the 30th day after the end of the month in which financing takes place. Claims must be filed **within 240 days** after a default.

6. **ASSIGNMENTS**: The insurance policy may be assigned by an insured exporter to a financial institution. Financial institutions receive a "documentary" assignment which provides significant protection against both a foreign debtor's default and the risk of non-conformance to the policy by the insured exporter. Insured financial institutions will receive a documentary policy providing the same type of cover as the assignment. Financial institutions may sell insured promissory notes but may not assign the proceeds of the policy.

7. **EXCLUSIONS**: Applicants and potential assignees should read the policy text, declarations, endorsements and special conditions carefully. Exclusions for policies issued to exporters, in addition to those already mentioned, typically include: loss due to the fault of the insured; product disputes unless settled in favor of the exporter; and losses insurable under American Institute of Marine Underwriter's War Risks and Strikes, Riots and Civil Commotion Clauses insurance. The documentary assignment and policy eliminate such exclusions for a financial institution.

END.

APPLICATION FOR MEDIUM TERM EXPORT CREDIT INSURANCE QUOTATION APPLICATION FORM

Please type the requested information. Add pages if necessary. Processing of your application may be delayed or the application may be withdrawn if the requested information is not provided.

Also see "INSTRUCTIONS" Part 1

1. **Quotation TYPE requested.** Check applicable boxes in **both** "a" and "b."

   a) ☐ SINGLE SALE, single shipment ☐ SINGLE SALE, multiple shipments ☐ REPETITIVE SALES

   b) ☐ COMPREHENSIVE, i.e., commercial and political risks cover ☐ POLITICAL risk cover only

2. Have you applied for an Ex-Im Bank **Letter of Interest, Guarantee or Loan** for this transaction?

   ☐ No ☐ Yes, if yes, give: LI#_____ or PC#_____.

3. **STATUS of export contract.** ☐ Contract awarded to exporter ☐ Contract under negotiation ☐ Responding to bid

4. **PRE-SHIPMENT Coverage Requested.** (Complete **only** if requesting Pre-shipment Coverage)

   ☐ Yes, we want pre-shipment coverage.

   a) Reason pre-shipment coverage is requested:_____.

   b) Date contract executed or anticipated date of signing:_____.

   c) Estimated period between date of contract and final shipment date of items:_____.

   d) Attach a schedule of any progress payments made or to be made by the borrower during the pre-shipment period. ☐ Attached ☐ None

5. **REASON for seeking Ex-Im support.** You **must** check the box below which describe the rationale for support.

   ☐ Confirmed Foreign competition. The exporter is aware that foreign domiciled companies is (are) competing, or is (are) expected to compete for the sale. Provide company name, country and (if known/applicable) the supporting Export Credit Agency:

   _____.

   ☐ Presumed Foreign Competition. The exporter is aware that foreign domiciled companies manufacture comparable goods and services that are sold in the buyer's market with Export Credit Agency support available. Provide company name, country and (if known/applicable the supporting Export Credit Agency:_____.

   ☐ Private financing unavailable without Ex-Im Bank credit risk protection. There is limited availability of private financing (from either external or domestic sources). Indicate how financing is constrained by checking the appropriate box:

   ☐ No availability of economically viable interest rates on terms of over one to two years, or

   ☐ Financial institution lending capacity limits reached for either borrower and/or country, or see Other below.

   ☐ Other _____.

6. **PARTICIPANTS:**

   a) **Insurance BROKER.** If none, insert "*none.*" Broker #:
   Name of Brokerage: Phone #:
   Contact Person: Fax #: E-Mail:

   b) **APPLICANT.**
   Applicant Name: Phone #:
   Contact person: Fax #:
   Position Title: E-Mail:
   Street Address: City:
   State/Province: Zip/Postal Code: Country:
   Taxpayer ID #: Duns #: Congressional District:
   non-banks Fiscal year ended (mo. & yr.): Gross sales revenue in last fiscal year: $ # of employees:
   Standard Industrial Code of business: Indicate (Not Required) if owned by a ☐ Woman or ☐ Ethnic Minority, describe:

   ☐ Attach the **CREDIT INFORMATION Checklist, Part 3,** with required credit information on the applicant.

   Financial institution (bank) applicants check one: this application is a ☐ supplier credit or a ☐ buyer credit.

OMB No. 3048-0009
Expires 3/31/02

c) **LENDER.** The "lender" is the entity which extends the credit (loan) to the borrower or takes assignment of the policy proceeds.
Check if the lender is also the ☐ applicant or ☐ not yet known or complete the following:
Lender Name: Phone #:
Contact person: Fax #:
Position Title: E-Mail:
Street Address: City:
State/Province: Zip/Postal Code: Country:
Taxpayer ID #: Duns #: Congressional District:
☐ Check here if the lender wishes to be published by Ex-Im as a potential source of financing for exports.

NOTE: Assignees and lenders who are not the exporter **must** obtain an Exporter's Certificate form EBD-M-56 to submit with claims.

d) **EXPORTER.** The "exporter" is the entity which contracts with the buyer for the sale of the goods and services.
Check if the exporter is also the ☐ applicant or complete the following:
Exporter Name: Phone #:
Contact person: Fax #:
Position Title: E-Mail:
Street Address: City:
State: Zip Code:
Taxpayer ID #: Duns #: Congressional District:
Fiscal year ended (mo. & yr.): Gross sales revenue in last fiscal year: $ # of employees:
Standard Industrial Code of business: Indicate (Not Required) if owned by a ☐ Woman or ☐ Ethnic Minority, describe:
☐ Attach the **CREDIT INFORMATION Checklist, Attachment 1,** with required credit information on the exporter.

e) **SUPPLIER(S).** The "supplier(s)" is (are) the entity(ies) which produces the goods and/or performs the services to be exported.
Check if the supplier(s) is also the ☐ applicant or ☐ exporter or complete the following for each supplier:
Supplier Name: Phone #:
Contact person: Fax #:
Position Title: E-Mail:
Street Address: City:
State: Zip Code:
Taxpayer ID #: Duns #: Congressional District:
Fiscal year ended (mo. & yr.): Gross sales revenue in last fiscal year: $ # of employees:
Standard Industrial Code of business: Indicate (Not Required) if owned by a ☐ Woman or ☐ Ethnic Minority, describe:
☐ Attach the **CREDIT INFORMATION Checklist, Attachment 1,** with required credit information on the supplier.

f) **BORROWER.** The "borrower" is the entity which agrees to repay the credit (loan).
Borrower Name: Duns #:
Contact person: Phone #: Fax #:
Position Title: E-Mail:
Street Address: City:
State/Province: Postal Code: Country:
☐ Attach the **CREDIT INFORMATION Checklist, Attachment 1,** with required credit information on the borrower.

g) **GUARANTOR.** The "guarantor" is the entity which agrees to repay the credit if the borrower does not. Complete the information below if a guarantor is proposed or required.
Guarantor Name: Duns #:
Contact person: Phone #: Fax #:
Position Title: E-Mail:
Street Address: City:
State/Province: Postal Code: Country:
☐ Attach the **CREDIT INFORMATION Checklist, Attachment I,** with required credit information on the guarantor.

h) **BUYER.** The "buyer" is the entity which contracts with the exporter for the purchase of the U.S. goods and services.
Check if the buyer is also the ☐ borrower or ☐ guarantor or complete the following:
Buyer Name: Duns #:
Contact person: Phone #: Fax #:
Position Title: E-Mail:
Street Address: City:
State/Province: Postal Code: Country:

EIB form 92-48
Revised 10/01

Part 2 of 3, Page 3 of 5

OMB No. 3048-0009
Expires 3/31/02

i) **END-USER.** The "end-user" is the foreign entity which uses the U.S. goods and services.
Check if end-user is also the ☐ borrower or ☐ guarantor or ☐ buyer or complete the following, or insert "various" for resales and attach a description of the buyers and their location:

End-User Name: _____ Duns #: _____
Contact person: _____ Phone #: _____ Fax #: _____
Position Title: _____ E-Mail: _____
Street Address: _____ City: _____
State/Province: _____ Postal Code: _____ Country: _____

j) **RELATED PARTICIPANTS.** Attach a description of any direct or indirect ownership interest, management participation, or family relationship among any of the participants identified in a) Broker through i) End-User above, **if none insert "*none*"**: _____ , or ☐ attached.

k) **OTHER U.S., foreign or multilateral agencies.** ☐ Check if an application for support of this export transaction or related project, if any, has been filed with other U.S., foreign or multilateral agencies and explain: _____ .

7. **REQUESTED AMOUNTS AND FINANCING STRUCTURE:**

a) **AMOUNTS:**

(1)Exporter(s) Supply Contract(s)

US Content	$_____		
Eligible Foreign Content		$_____	
Shipping and Insurance	U.S. $_____	Foreign $_____	include as US or Eligible Foreign in (2) see EBD-M-13
Ancillary Services if any	U.S. $_____	Foreign $_____	include as US in (2) if approved see EBD-M-05
Local Costs if any		$_____	
U.S. and Foreign Subtotals	U.S. $_____	**Foreign** $_____	
Total Exporter(s) Supply Contract		$	

(2) Financed/Insured Amount Requested

(a) US Content	$_____	
(b) Eligible Foreign Content	$_____	
(c) **Net Contract Price** (a plus b):	$_____	* ☐ FOB ☐ FAS ☐ CIF
(d) Less Cash Payment minimum 15% of Net Contract Price	($_____)	
(e) Subtotal **Financed/Insured Amount** (c minus d)	$_____	**
(f) Local Costs if Ex-Im Bank permits them to be included	$_____	***
(g)Total Financed/Insured Amount Requested excluding Premium:	$	

* this must correspond to the **aggregate** of the Net Contract Price(s) of all Exporter's Certificate(s) Part A. 1. E. related to the transaction.
** Maximum: the **lesser of 85%** of Net Contract Price **or $10 million** or US Content. Also, if **greater than $ 5 million**, see Part 3 no. 6. For repetitive sales type policies this item is know as the **Credit Limit.**
*** not to exceed 15% of the Net Contract Price in 7. A. (2) (c) above.

b) **PREMIUM.** Check **only** one box.
Including the premium in the financing increases the rate. See the website Fee Calculator
☐ Premium to be included in the financing and to be paid as the shipments/disbursements occur.
☐ Premium to be included in the financing and will be paid up front.
☐ Premium not to be included in the financing; to be paid as the shipments/disbursements occur.
☐ Premium not to be included in the financing; to be paid up front.

c) **PAYMENT TERMS:** Unless otherwise requested, repayment of principal and interest is on a semiannual basis beginning 6 months after the starting point (maximum: 6 months for semi-annual, 3 months for quarterly, etc.).

(1) **Frequency.** At least ☐ semi-annually in _____ equal principal installments, plus interest on the declining balance.
If requesting more frequent installments, specify and explain why necessary: _____ .

(2) **Starting point.** The starting point is generally the event that marks the fulfillment of the Exporter's contractual responsibility.
☐ Shipment (single shipment) ☐ Installation ☐ Other (multiple shipments) refer to Guidelines for Starting Points EIB99-16.
Specify: _____ .
(e.g., a weighted mean shipment date, last shipment date)

(3) **Shipment Period or Date.** Estimated **date of shipment**, or dates for multiple shipments, or start and end dates for repetitive sales, or completion of installation and training ***excluding*** any acceptance, retention, or warranty period: _____ .

(4) **Interest rate** to be charged: _____ .

EIB form 92-48
Revised 10/01

Part 2 of 3, Page 4 of 5

OMB No. 3048-0009
Expires 3/31/02

8. **PURPOSE OF THE TRANSACTION.**

☐ **Production.** Check if the goods and services will be used to create or expand production capacity for an **exportable product**, including agricultural commodities, and describe the product, the market for it, the current and anticipated sales level: _____ .

☐ **Other** (Replacement, Production for Domestic Market, etc.) _____ .

9. **TRANSACTION DESCRIPTION:**

a) **Description of export** goods and services, including for each export good the name, make, model, manufacturer/supplier, SIC or NAICS Code (if known), number of units, unit price and use: _____ , or

☐ Check if providing the **Content Report** EBD-M-58. Ex-Im Bank endeavors to obtain the report at the time of application on medium term transactions for information and reporting purposes. Processing of, and the decision on, the application will not be delayed or affected by the submission or absence of the report. A **Cause Report** EBD-M-55 is requested at the end of each calendar year to describe the nature and reason for the inclusion of any goods and services with 50% or more foreign content in the good or service.
NOTE: Ex-Im Bank may not provide support for products, countries or buyers with trade sanctions imposed against them. For a list of products and countries with Anti-Dumping or Countervailing Duty sanctions see http://205.197.120.60/oinv/sunset.nsf/AllDocID/96DAF5A6C0C52909852 56A0A004DEE7D. There may not be trade measures against them under Section 201 of the Trade Act of 1974, see http://dockets.usitc.gov/eol/public/ click on 201.

b) **Origin.** ☐ Check if the goods and services are **not** being shipped from the U.S. and explain _____ .
☐ Check if the services are **not** being provided by U.S. personnel and explain _____ .
☐ Check if assembly is **not** being provided by U.S. personnel and explain _____ .
Identify the source and briefly describe any Eligible Foreign Content (see EIB99-21) including shipping and insurance if **not** providing the Content Report: _____ or

c) ☐ check if requesting foreign co- or re-insurance, see EIB99-11. Complete **and attach** the Reinsurance Questionnaire "Attachment H".

d) **Military/Security/Police.** Check, complete and attach Ex-Im's Defense Product Questionnaire EIB92-61 if :
☐ the borrower, guarantor, buyer or end-user ***is a*** military, security or police force, or
☐ the borrower, guarantor, buyer or end-user ***is associated in any*** way with a military, security or police force, or
☐ if ***any*** goods and services are to be ***used by*** a military, security or police force, or
☐ if ***any*** goods and services are ***intended for use by*** a military, security or police force, or
☐ if ***any*** goods and services ***are*** military, security or police articles, or
☐ if ***any*** goods and services have a military, security or police ***application***, or
☐ if ***any*** goods and services ***are listed on*** the U.S. Munitions List, Title 22, Code of Federal Regulations, Part 121.

e) ☐ **Nuclear.** Check if ***any*** goods and services are to be used in the construction, alteration, operation, or maintenance of nuclear power, enrichment, reprocessing, research, or heavy water production facilities.

f) ☐ **Used equipment.** Check if ***any*** goods are used. If so, complete and attach Ex-Im's Used Equipment Questionnaire EBD-M-25

g) ☐ **Livestock.** Check if the export is breeding livestock. If so, complete and attach Ex-Im's Livestock Questionnaire EIB92-62.

h) **Environmental** (see EBD-E-01). Check if the goods and services are:
☐ environmentally beneficial or,
☐ used in abatement, control or prevention of pollution, or
☐ used in handling toxic substances; or
☐ used in power generation, or
☐ related to a renewable energy source (check one): ☐ wind ☐ hydro ☐ geothermal ☐ solar ☐ biomass, or
☐ if they in other ways affect the environment. Explain: _____ .

10. APPLICANT CERTIFICATIONS The Applicant (it) CERTIFIES and ACKNOWLEDGES to the Ex-Im Bank (the Bank) that:

a) it is **(check one)**:
- (1) ☐ a corporation organized and **existing under the laws of the United States**, or a jurisdiction thereunder, or
- (2) ☐ an individual or partnership **resident in** the United States; **or**
- (3) ☐ a foreign corporation, partnership or individual **registered to do business in** the United States, **OR**
- (4) ☐ it has received a **written** statement of exception from the Bank and **attached** it to this certification, permitting participation in the transaction despite an inability to make certifications 1, 2 or 3.

b) it undertakes to carry on its business with due care in financing exports hereunder, and in regard to the conditions of the contract and the trustworthiness of the exporter and buyer.

c) (1) neither it nor its principals have been within the past 3 years:
- (a) debarred, suspended or declared ineligible from participating in or voluntarily excluded from participation in a Covered Transaction or
- (b) formally proposed for debarment, with a final determination still pending;
- (c) indicted, convicted or had a civil judgement rendered against them for any of the offenses listed in the **Government Wide Nonprocurement Debarmeat and Suspension Regulations; Common Rule** which defines Covered Transaction.

(2) It certifies that it is **not delinquent** on any amounts due and owing to the U.S. Government, its agencies or instrumentalities as of the date of this application. **OR**

(3) It has received a **written** statement of exception from the Bank and **attached** it to this certification, permitting participation in the transaction despite an inability to make certifications (1) (a) through (c) and (2).

It further certifies that it has not and will not knowingly enter into any agreements in connection with the transaction with any individual or entity that has been subject to (1) (a), (b) or (c) above.

d) it will complete and submit **Form-LLL**, Disclosure Form to Report Lobbying if, to the best of its knowledge and belief, **any funds have been paid or will be paid** to any person in connection with this application for influencing or attempting to influence:
- (1) an officer or employee of any U.S. Government agency, or
- (2) a Member of Congress or a Member's employee, or
- (3) an officer or employee of Congress. *This does not apply to commissions paid by the Bank to insurance brokers.*

e) it has not, and will not, engage in any activity in connection with this Policy that is a violation of the **Foreign Corrupt Practices Act of 1977** (15 USC Sec. 78dd-1, et seq.) which provides for civil and criminal penalties against individuals who directly or indirectly make or facilitate corrupt payments to foreign officials to obtain or keep business. To the best of its knowledge, the performance by the parties of their respective obligations covered or to be covered under this Policy does not and will not violate any applicable law.

f) (1) the information being requested is done so under authority of the **Export-Import Bank Act of 1945** (12 USC 635 et. seq.);
- (2) providing the information is mandatory. **Failure to do so may result in the Bank being unable to determine eligibility for the Policy.** The information provided will be reviewed to determine the participants' ability to perform and pay under the Policy.
- (3) the Bank may not require the information and applicants are not required to respond unless a currently valid OMB control number is displayed on this form (see upper right of each page);
- (4) the information provided will be held confidential subject to the **Freedom of Information Act** (5 USC 552) and the **Privacy Act of 1974** (5 USC 552a), except as required to be disclosed under applicable laws;
- (5) transfer of financial records included in this application to private parties or another U.S. Government authority will not be authorized except as permitted under the **Right of Financial Privacy Act of 1978** (12 USC 3401).
- (6) the **public burden** reporting for this collection of information is estimated to average 1 hour per response, including reviewing instructions, searching data sources, gathering information, completing, and reviewing the application. Send comments regarding the burden estimate, including suggestions for reducing it, to Office of Management and Budget, Paperwork Reduction Project OMB# 3048-0009, Washington, D.C. 20503.

g) the representations made and the facts stated by it in these certifications and its attachments **are true, to the best of its knowledge and belief, and it has not misrepresented or omitted any material facts**. It further understands that these certifications are subject to the penalties for fraud against the U.S. Government (18 USC 1001).

EX-IM BANK JOBS THROUGH EXPORTS

APPLICATION FOR MEDIUM TERM EXPORT CREDIT INSURANCE QUOTATION
ATTACHMENT 1. CREDIT INFORMATION CHECKLIST

Information must be complete and current
ALL appropriate blocks must be checked.

1. **APPLICANT:**

☐ Check if not applicable because the applicant is a financial institution (bank), or
☐ Current information as described below, is on file at Ex-Im under Guarantee or Policy #_____ , or provide at a minimum a & b below:
- a) ☐ Credit agency report, not older than **6 months** from date of application, **or**
  ☐ a check made out to "Ex-Im Bank" for $35 to acquire a report;
- b) ☐ **If** Financial Statements are **not** included in the Credit Report **or**
  ☐ **if** the contract price is 35% or more of applicant's (exporter's, supplier's) last fiscal year total sales, attach financial statements that are not older than **1 year** from date of application;

2. **EXPORTER,** if different from the applicant:

☐ Not applicable, or
☐ Current information (described in 1. above) is on file at Ex-Im under Guarantee or Policy #_____ , or
a) ☐ , and/or b) ☐ as above.

3. **SUPPLIER**, if different from the applicant or exporter:

☐ Not applicable, or
☐ Current information (described in 1. above) is on file at Ex-Im under Guarantee or Policy #_____ , or
a) ☐ , and/or b) ☐ as above.

4. **BORROWER:**

If application is for ☐ **political only or sovereign risks** provide "4.a" only, or
If credit is based on ☐ **a guarantor** provide only "4.a" on the borrower and answer 5, or
☐ Current information as described below is on file at Ex-Im under Guarantee or Policy #_____ , or provide at a minimum a, b and c below:
- a) ☐ A credit agency report not older than **6 months** from date of application, **or**
  ☐ Check if a credit agency report is not applicable because the borrower is a financial institution (bank) or a foreign government agency.
- b) ☐ Bank reports or references from borrower's (including banks and non-sovereign government agencies) principal commercial banks, not older than **6 months** from date of application, **including** bank names, addresses, personal contacts, length of relationships, experience, amount and terms of secured and unsecured credit.
- c) Financial statements as follows in 1 **or** 2:

1) ☐ For **financed amounts of up to and including $1 million:** Financial statements with notes (preferably audited with opinions and in English; financial institution, i.e., bank, statements **must** be audited) for the previous **3 fiscal year ends** plus interim statements if the latest fiscal year end statements are dated more than **9 months** from date of application. If financial statements are unaudited, they **must** be accompanied by a summary of significant accounting policies used in their preparation.

2) ☐ For **financed amounts of greater than $1 million**: Audited financial statements with notes and opinions in English for the previous **3 fiscal year ends** plus interim statements if the latest fiscal year end statements are dated more then **9 months** from date of application.

d) ☐ Market indications, if available (not required), as follows: ☐ not available

Name of rating agency:_____ Rating:_____ Date:_____

e) ☐ Spread of financial statements including ratios and cash flow (not required for transactions under $1 million).

f) Ex-Im's Medium Term Credit Standards, computed according to EBD-M-39, Attachment A, Parts I and II, transactions up to and including U.S. $5 million (not required but recommended):
- 1) ☐ not computed
- 2) ☐ **are met** and ☐ computations are attached.
- 3) ☐ **are not met**, but ☐ supplemental information described in EBD-M-39 is attached.
- 4) ☐ are not met, but ☐ a **guarantor** is provided.

EIB form 92-48
Revised 10/01

Part 3 of 3, Page 2 of 2

OMB No. 3048-0009
Expires 3/31/02

5. **GUARANTOR(S):**

☐ Not applicable [e.g., political only, sovereign, guarantor is not the primary source of repayment (PSR)], or
☐ Current information as described below is on file at Ex-Im under Guarantee or Policy #:_____, or provide at a minimum a, b and c below.

a) ☐ A credit agency report the same as in 4.a above, **or**
☐ Check if credit agency report is not applicable because the guarantor is a financial institution (bank) or a foreign government agency.

b) ☐ Bank reports or references the same as in 4.b above

c) Financial statements as follows in a **or** b:
1) ☐ For **financed amounts of up to and including $1 million** the same as in 4.c.1 above.
2) ☐ For **financed amounts of greater than $1 million** the same as in 4.c.2 above.

d) ☐ Market indications, if available (not required), as follows: ☐ not available

Name of rating agency:_____ Rating:_____ Date:_____

e) ☐ Spread of financial statements including ratios and cash flow (not required for transactions under $1 million).

f) Ex-Im's Medium Term Credit Standards, computed according to EBD-M-39, Attachment A, Parts I and II, transactions up to and including U.S. $5 million (not required but recommended):
1) ☐ not computed
2) ☐ are **met** and ☐ computations are attached.
3) ☐ are **not met**, but ☐ supplemental information as described in EBD-M-39 is attached.

6. ☐ **EBD-M-39 ATTACHMENT C** is required for transactions (i.e., financed amount excluding interest and Ex-Im premium) of greater than U.S. $5 million with non-financial institution buyers who **do not have** market indications.
☐ Not applicable. It is **not required** for transactions: of U.S.$5million or less, with financial institutions, with buyers or guarantors who have market indications, with sovereign buyers or guarantors, for political risk cover only, or with buyers or guarantors pre-approved by Ex-Im.

7. **MISCELLANEOUS items** which may be attached by the applicant (if any):

☐ Calculation of Ex-Im Medium Term Credit Standards (see 4f & 5f above)
☐ Description of end-users and countries after resale (see application 6i)
☐ Defense Product Questionnaire EIB92-61 (see application 9d)
☐ Livestock Questionnaire EIB92-62(see application 9h)
☐ Form LLL (see application 10d)
☐ Pro-forma invoice ☐ Letter of Credit
☐ Buyer/Guarantor/Government - Request for Bid, Mandate, or Contract
☐ Description of manufacture/production (see application 8)
☐ EBD-M-39 Attachment C (see 6 above)
☐ Description of related participants (see application 6j)
☐ Used Equipment QuestionnaireEBD-M-25(see application 9g)
☐ Content Report Form EBD-M-58 (see application 9a,c)
☐ Cause Report EBD-M-55
☐ Exporter or supplier product brochure
☐ Reinsurance Questionnaire "Attachment H"
☐ Other (specify):_____.

☐ **Services (Please attach a copy of your sample services contract)** Services must be: performed by U.S. based personnel or those temporarily domiciled overseas, and billed (invoiced) separately from any product sales.

☐ **Enhanced Assignment** of small business insurance policy proceeds. This is exporter performance risk protection that may be offered to lenders willing to finance Ex-Im Bank insured receivables. **Applicant Please Attach:**
- Written bank reference describing your relationship to date and size of existing credit line.
- 2 written trade references from principal commercial suppliers.
- For applications with policy limits over $500,000, financial statements must be audited or CPA reviewed with notes.

☐ **Other** (please specify):_____

OMB No. 3048-0009
Expires 05/31/02

The Applicant (it) CERTIFIES and ACKNOWLEDGES to the Export-Import Bank of the United States (the Bank) that:

a) it is either organized, or registered to do **business, in the United States**.

b) it and each additional named insured applicant **has not entered into any contract of insurance** or indemnity in respect of any case of loss covered by the Export Credit Insurance Policy or Loss chargeable to a deductible under such Policy, and the applicant will not enter into any such contract of insurance or indemnity without the Bank's consent in writing.

c) neither it nor any of its principals is currently, nor has been within the preceding three years:
- debarred, suspended or declared ineligible from participating in any Covered Transaction or
- formally proposed for debarment, with a final determination still pending;
- voluntarily excluded from participation in a Covered Transaction; or
- indicted, convicted or had a civil judgment rendered against it

for any of the offenses listed in the Regulations governing Debarment and Suspension as defined in the Government Wide Nonprocurement Debarment and Suspension Regulations; Common Rule 53 Fed. Reg. 19204 (1988). It further certifies that it has not nor will it knowingly enter into any agreement in connection with this Policy with any individual or entity that has been subject to any of the above.

d) it is not delinquent on any amount due and owing to the U.S. Government, its agencies, or instrumentalities as of the date of this application.

e) it shall complete and submit standard form-LLL, "Disclosure Form to Report Lobbying" to the Bank (31 USC 1352), if any funds have been paid or will be paid to any person for influencing or attempting to influence i) an officer or employee of any agency, ii) a Member of Congress or a Member's employee, or iii) an officer or employee of Congress in connection with this Policy. This does not apply to insurance broker commissions paid by the Bank.

f) it has not, and will not, engage in any activity in connection with this Policy that is a violation of the **Foreign Corrupt Practices Act of 1977** (15 USC Sec. 78dd-1, et seq.) which provides for civil and criminal penalties against individuals who directly or indirectly make or facilitate corrupt payments to foreign officials to obtain or keep business. To the best of its knowledge, the performance by the parties of their respective obligations covered or to be covered under this Policy does not and will not violate any applicable law.

g) transfer of financial records included in this application to private parties or another U.S. Government authority will not be authorized except as permitted under the **Right of Financial Privacy Act of 1978** (12 USC 3401).

h) the information is being requested under the authority of the **Export-Import Bank Act of 1945** (12 USC 635 et. seq.); disclosure of this information is mandatory **and failure to provide the requested information may** result in the Bank being unable to determine eligibility for the Policy. The information collected will be analyzed to determine the ability of the participants to perform and pay under the Policy. The Bank may not require the information, and applicants are not required to respond, unless a currently valid OMB control number is displayed on this form. The information collected will be held confidential subject to the **Freedom of Information Act** (5 USC 552) and the **Privacy Act of 1974** (5 USC 552a), except as required to be disclosed pursuant to applicable law. The **public burden** reporting for this collection of information is estimated to average 1 hour per response, including time for reviewing instructions, searching existing data sources, gathering the data needed, and completing and reviewing the collection of information. Send **comments** regarding the burden estimate or any other aspect of the collection of information, including suggestions for reducing this burden, to Office of Management and Budget, Paperwork Reduction Project OMB# 3048-0009, Washington, D.C. 20503.

i) the representations made and the facts stated in the application for said Policy are true, to the best of it's knowledge and belief, and it has not misrepresented or omitted any material facts relevant to said representations. It agrees that this application shall form a part of the Policy, if issued, and the truth of the representations and facts, and performance of every undertaking in this application shall be a condition precedent to any coverage under such Policy. It further understands that this certification is subject to the penalties for fraud against The U.S. Government (18 USC 1001).

(Signature) (Print Name and Title) (Date)

SMALL BUSINESS POLICIES APPLICANT CERTIFICATION

"We are an entity which **together with our affiliates** had **average annual export credit sales** during our preceding two fiscal years not exceeding **$5,000,000**, excluding sales made on terms of confirmed irrevocable letters of credit (CILC) or cash in advance (CIA)."

(Signature)

Send, or ask your insurance broker or city/state participant to review and send this application to the Ex-Im Bank Regional Office nearest you. Please refer to Ex-Im Bank's website at http://www.exim.gov for Regional Office addresses.

Ex-Im Bank reserves the right to request additional information upon review of the application. Please refer to Ex-Im Bank's Short Term Credit Standards (EIB 99-09) to determine the likelihood of approval of a policy.

Highest Amount Outstanding During Period	$_____	$_____	$_____
Payment Terms	_____	_____	_____

b) Describe buyer's payment history (check one)
☐ No prior experience ☐ Prompt/Discount ☐ 1-30days slow ☐ 31-60days slow ☐ More than 60 days slow
c) Amount now owing $_____ as of_____ (Date).
d) Amount now past due (indicate maturity dates and explanation).
e) If past dues are due to foreign exchange problems, does applicant have evidence of local currency deposits on all payments due? ☐ Yes ☐ No ☐ Not applicable.
19. Describe any direct or indirect ownership interest or family relationship which exists between the applicant

OMB #3048-0009
Expiry Date 5/31/02

and the buyer or guarantor. If none, state "None."_____.

21. **PART IV The Applicant (it) CERTIFIES and ACKNOWLEDGES to the Ex-Im Bank** (the Bank) that:

a) it is (**check one**): (1) ☐ a corporation organized and **existing under the laws of the United States**, or a jurisdiction thereunder, or
(2) ☐ an individual or partnership **resident in** the United States; **or**
(3) ☐ a foreign corporation, partnership or individual **registered to do business in** the United States, **OR**
(4) ☐ it has received a **written** statement of exception from the Bank and **attached** it to this certification, permitting participation in the transaction despite an inability to make certifications 1, 2 or 3.

b) to the best of its knowledge and belief, the products and services to be exported in the transaction described in this application are principally **for use as indicated below**. When a sale is made to entities such as distributors primarily for resale, the principal user is considered to be the original purchaser (the distributor), and item (1) should be checked. If, however, it has knowledge or reason to believe that the products will be re-exported from the original buyer's country, please complete item (2): (1) ☐ By the buyer in the country specified above. (2) ☐ If not, name the country (ies) **where** products will be principally used: _____ **by whom**: _____.

c) it undertakes to carry on its business with due care in financing exports hereunder, and in regard to the conditions of the contract and the trustworthiness of the exporter and buyer.

d) (1) neither it nor its principals has been within the past 3 years:
(a) debarred, suspended or declared ineligible from participating in or voluntarily excluded from participation in a Covered Transaction or
(b) formally proposed for debarment, with a final determination still pending;
(c) indicted, convicted or had a civil judgement rendered against them for any of the offenses listed in the **Government Wide Nonprocurement Debarment and Suspension Regulations; Common Rule** which defines Covered Transaction.
(d) It certifies that it is **not delinquent** on any amounts due and owing to the U.S. Government, its agencies or instrumentalities as of the date of this application. **OR**
(2) It has received a **written** statement of exception from the Bank and **attached** it to this certification, permitting participation in the transaction despite an inability to make certifications a through d..
It further certifies that it has not and will not knowingly enter into any agreements in connection with the transaction with any individual or entity that has been subject to a, b or c above.

e) it will complete and submit **Form-LLL**, Disclosure Form to Report Lobbying if, to the best of its knowledge and belief, **any funds have been paid or will be paid** to any person in connection with this application for influencing or attempting to influence:
(1) an officer or employee of any U.S. Government agency, or
(2) a Member of Congress or a Member's employee, or
(3) an officer or employee of Congress. *This does not apply to commissions paid by the Bank to insurance brokers.*

f) it has not, and will not, engage in any activity in connection with this Policy that is a violation of the **Foreign Corrupt Practices Act of 1977** (15 USC Sec. 78dd-1, et seq.) which provides for civil and criminal penalties against individuals who directly or indirectly make or facilitate corrupt payments to foreign officials to obtain or keep business. To the best of its knowledge, the performance by the parties of their respective obligations covered or to be covered under this Policy does not and will not violate any applicable law.

g) (1) the information being requested is done so under authority of the **Export-Import Bank Act of 1945** (12 USC 635 et. seq.);
(2) providing the information is mandatory. **Failure to do so** may result in the Bank being unable to determine eligibility for the Policy. The information provided will be reviewed to determine if the participants' ability to perform and pay under the Policy.
(3) the Bank may not require the information and applicants are not required to respond unless a currently valid OMB control number is displayed on this form (see upper right of each page);
(4) the information provided will be held confidential subject to the **Freedom of Information Act** (5 USC 552) and the **Privacy Act of 1974** (5 USC 552a), except as required to be disclosed under applicable laws;
(5) transfer of financial records included in this application to private parties or another U.S. Government authority will not be authorized except as permitted under the **Right of Financial Privacy Act of 1978** (12 USC 3401).
(6) the **public burden** reporting for this collection of information is estimated to average 1 hour per response, including reviewing instructions, searching data sources, gathering information, completing, and reviewing the application. Send **comments** regarding the burden estimate, including suggestions for reducing it, to Office of Management and Budget, Paperwork Reduction Project OMB# 3048-0009, Washington, D.C. 20503.

h) the representations made and the facts stated by it in these certifications and its attachments **are true, to the best of its knowledge and belief, and it has not misrepresented or omitted any material facts**. The applicant agrees that such representations and facts shall form the basis of and be incorporated in the Policy, if issued, and that the truth of such representations and facts and the due performance of each and every undertaking contained herein above shall be condition precedent to any liability of Ex-Im Bank thereunder. It further understands that these certifications are subject to the penalties for fraud against the U.S. Government (18 USC 1001).

   f. Any completed Insured Exporter Applications for companies mentioned in question number 9.

12. AGREEMENTS OF THE ADMINISTRATOR

The Applicant (it) **CERTIFIES and ACKNOWLEDGES to the Ex-Im Bank** (the Bank) that:

a. it is (**check one**):
   1) ☐ a corporation organized and **existing under the laws of the United States**, or a jurisdiction thereunder, or
   2) ☐ an individual or partnership **resident in** the United States; **or**
   3) ☐ a foreign corporation, partnership or individual **registered to do business in** the United States, **OR**
   4) ☐ it has received a **written** statement of exception from the Bank and **attached** it to this certification, permitting participation in the transaction despite an inability to make certifications 1, 2 or 3.

b. it will undertake to carry on its business with due care and in full compliance with the laws of the United States and with the state and local laws and regulations governing the area in which the applicant is resident;

c. It will conduct its business from the address listed in question number 1 of this application, and will provide notification within 10 days of any change of its business address;

d. It will provide notification within 10 days if the person responsible for administration of its Export Credit Insurance Trade Association policy and listed in question number 4a of this application change;

OMB#3048-0009
Expiry Date 5/31/02

e. It will obtain and maintain errors and omissions insurance covering the performance of its duties and responsibilities under its Export Credit Insurance Trade Association Policy.

f. 1) neither it nor its principals has been within the past 3 years:
   a) debarred, suspended or declared ineligible from participating in or voluntarily excluded from participation in a Covered Transaction or
   b) formally proposed for debarment, with a final determination still pending;
   c) indicted, convicted or had a civil judgement rendered against them for any of the offenses listed in the **Government Wide Nonprocurement Debarment and Suspension Regulations; Common Rule** which defines Covered Transaction.
   d) It certifies that it is **not delinquent** on any amounts due and owing to the U.S. Government, its agencies or instrumentalities as of the date of this application. **OR**
   2) It has received a **written** statement of exception from the Bank and **attached** it to this certification, permitting participation in the transaction despitean inability to make certifications a through d..

It further certifies that it has not and will not knowingly enter into any agreements in connection with the transaction with any individual or entity that has been subject to a, b or c above.

g. it will complete and submit **Form-LLL,** Disclosure Form to Report Lobbying if, to the best of its knowledge and belief, **any funds have been paid or will be paid** to any person in connection with this application for influencing or attempting to influence:
   1) an officer or employee of any U.S. Government agency, or
   2) a Member of Congress or a Member's employee, or
   3) an officer or employee of Congress. *This does not apply to commissions paid by the Bank to insurance brokers.*

h. it has not, and will not, engage in any activity in connection with this Policy that is a violation of the **Foreign Corrupt Practices Act of 1977** (15 USC Sec. 78dd-1, et seq.) which provides for civil and criminal penalties against individuals who directly or indirectly make or facilitate corrupt payments to foreign officials to obtain or keep business. To the best of its knowledge, the performance by the parties of their respective obligations covered or to be covered under this Policy does not and will not violate any applicable law.

i 1) the information being requested is done so under authority of the **Export-Import Bank Act of 1945** (12 USC 635 et. seq.);
   2) providing the information is mandatory. **Failure to do so** may result in the Bank being unable to determine eligibility for the Policy. The information provided will be reviewed to determine if the participants' ability to perform and pay under the Policy.
   3) the Bank may not require the information and applicants are not required to respond unless a currently **valid** OMB control number is displayed on this form (see upper right of each page);
   4) the information provided will be held confidential subject to the **Freedom of Information Act** (5 USC 552) and the **Privacy Act of 1974** (5 USC 552a), **except as** required to be disclosed under applicable laws;
   5) transfer of **financial** records included in this application to private parties or another U.S. Government authority will not be authorized except as permitted **under the Right of Financial Privacy Act of 1978** (12 USC 3401).
   6) the **public burden** reporting for this collection of information is estimated to average 1 hour per response, including reviewing instructions, searching data sources, gathering information, completing, and reviewing the application. Send **comments** regarding the burden estimate, including suggestions for reducing it, to Office of Management and Budget, Paperwork Reduction Project OMB# 3048-0009, Washington, D.C. 20503.

j. the representations made and the facts stated by it in these certifications and its attachments **are true, to the best of its knowledge and belief, and it has not misrepresented or omitted any material facts**. The applicant agrees that such representations and facts shall form the basis of and be incorporated in the Policy, if issued, and that the truth of such representations and facts and the due performance of each and every undertaking contained herein above shall be condition precedent to any liability of Ex-Im Bank thereunder. It further understands that these certifications are subject to the penalties for fraud against the U.S. Government (18 USC 1001).

This document will be a material basis for the approval of any entity or person as an Administrator of the Export Credit Insurance Umbrella Policy. Any misrepresentation herein is grounds for immediate disqualification of an approved Administrator. Other information, including, but not limited to, interviews and visits to your offices, may be requested.

As an Administrator you will be administering export credit insurance coverage for various insureds and dealing directly with Ex-Im Bank on the insureds' behalf. Many states regulate, through licensing or otherwise, the persons, firms, associations and corporations which handle insurance matters for others. You may wish to review your status as an Administrator under applicable state law(s) before submitting this application for an Export Credit Insurance Umbrella Policy. If your application is approved, it will be for a one-year period only. Renewals may require additional information.

INSURANCE BROKERS
STANDARDS OF SERVICE

1. To act in a professional, reasonable, prudent and forthright manner in all dealings with your client and Ex-Im Bank.

2. To stay knowledgeable about not only Ex-Im Bank export credit insurance but alternatives, including other Ex-Im Bank programs, other U.S. government programs, and private sector products as well, in order to provide the best options to your clients.

3. To educate your clients about Ex-Im Bank's Insurance Program and policies, its' benefits and proper usage.

4. To serve as your clients' primary contact for any questions concerning the policies and the servicing of a policy.

5. To review all applications and issuances of policies, actions under policies, renewals of policies and credit limits, and claims, for timeliness, completeness, accuracy and reasonableness.

6. To review correspondence from Ex-Im Bank with your clients, including quotes and credit limits, to assist them in understanding the coverage and their responsibilities.

7. To assist your clients to comply with the Agreements of the Insured including shipment reports, premium payment and reports of overdue accounts, and to advise Ex-Im Bank of any potential claims.

8. To report policy cancellations and submit a premium reconciliation to Ex-Im Bank.

9. To provide as much assistance to the policyholder as is possible in order to maximize the benefits of the policy.

I have read the above standards, agree that they are reasonable, and will comply with these standards.

I understand and agree that substantial failure by me to comply with these standards could result in withdrawal from the list of registered insurance brokers published by Ex-Im Bank and cancellation of eligibility for commission payments under Ex-Im Bank export credit insurance policies.

OMB #3048-0009 Expiry Date 5/31/02

EXPORT-IMPORT BANK OF THE UNITED STATES (EX-IM BANK)
BROKER COMMISSION SCHEDULE
FOR EXPORT CREDIT INSURANCE POLICIES

Effective: October 1, 1994

BROKER ELIGIBILITY

Insurance brokers and agents are eligible for commission payments under Ex-Im Bank export credit insurance policies if the broker or agent is **registered** with Ex-Im Bank and is **appointed** as broker-of-record by the policyholder. The policyholder reserves the right to appoint, delete or change the broker of record at any time. Brokers of record are entitled to any commissions due on premiums paid prior to a change in the broker of record.

COMMISSION RATES

Commission rates paid by Ex-Im Bank are based on the type of policyholder to which the policy is issued, as shown in the chart below:

Type of Policyholder	**Commission Rate (percentage of premium)**
Financial Institutions	**8%**
Exporters	
Small Business	**30%***
Multi-Buyer Policyholders	**12%**
Single-Buyer Policyholders	**10%**
Administrators	
Umbrella Policy	**30%***
Trade Association Policy	**10%**
Lessors	
(whether a financial institution or an exporter)	
Operating Lease Policy	**20%**
Financing Lease Policy	**10%**

*At Ex-Im Bank's discretion, this percentage will increase to 40% for those brokers who meet certain criteria regarding support of small business.

COMMISSION PAYMENTS

- The full amount of all premiums are due at the appropriate lockbox on or before the date specified in the policy. Insurance brokers should not remit premiums "net" of commission.
- Commission payments will be made monthly.
- No commission payments will be made on advance premium.

BROKER CHANGES ON EXISTING POLICIES

Ex-Im Bank policyholders may appoint or change their insurance broker at any time. Insurance brokers appointed after a policy is issued will be recognized on the first day of the next month after the receipt of the policyholder's written notice appointing an insurance broker of record.

Acknowledgment by Ex-Im Bank of a policyholder's appointed insurance broker is made by means of a policy endorsement. Insurance brokers acknowledged by Ex-Im Bank are eligible for commissions with respect to transactions occurring after the effective date of the endorsement.

FEDERAL COMMUNICATIONS COMMISSION

[CC Docket No. 96–45; DA 02–602]

Petition To Redefine the Service Area of Century Tel of the Southwest, Inc. in the State of New Mexico

AGENCY: Federal Communications Commission.

ACTION: Notice; solicitation of comments.

SUMMARY: In this document, the Common Carrier Bureau sought comment on Smith Bagley's petition requesting the Commission's consent to the New Mexico Public Regulation Commission's proposed "service area" definition for areas served by the Century Tel of the Southwest, Inc. (Century Tel) within New Mexico.

DATES: Comments are due on or before April 4, 2002. Reply comments are due on or before April 15, 2002.

ADDRESSES: See Supplementary Information section for where and how to file comments.

FOR FURTHER INFORMATION CONTACT: Richard D. Smith (202) 418–7400, TTY: (202) 418–0484.

SUPPLEMENTARY INFORMATION: On March 1, 2002, Smith Bagley filed with the Commission a petition, pursuant to section 54.207 of the Commission's rules, requesting the Commission's consent to the New Mexico Public Regulation Commission's (New Mexico Commission) proposed "service area" definition for areas served by Century Tel of the Southwest, Inc. (Century Tel) within New Mexico. The New Mexico Commission proposes to define Smith Bagley's service area as an area different from the study area of Century Tel for the purpose of determining federal universal service obligations and support mechanisms. Specifically, the New Mexico Commission proposes to modify Smith Bagley's service area to include the Zuni, Ramah, and Fence Lake wire centers and Smith Bagley's existing service contour within the Pine Hill, Vanderwagn, Gallup, and Grants wire centers. The New Mexico Commission recommended that Century Tel's noncontiguous Pecos exchange be delineated as its own service area and that the exchanges served by Smith Bagley be grouped together as a second separate service area.

If the Commission does not act on the petition within 90 days of the release of this Public Notice, the definition proposed by the New Mexico Commission will be deemed approved by the Commission and shall take effect in accordance with state procedures.

The Petition: On February 19, 2002, the New Mexico Commission issued an order designating Smith Bagley as an eligible telecommunications carrier (ETC), under section 214(e) of the Communications Act of 1934, as amended (the Act), to receive federal universal service support for service provided in areas of New Mexico. In so doing, the New Mexico Commission concluded that it was in the public interest to designate Smith Bagley as an ETC in the study area of Century Tel, a rural telephone company.

The New Mexico Commission conditioned Smith Bagley's ETC designation upon confirmation of its proposed service area designation by this Commission. In compliance with the request of the New Mexico Commission, Smith Bagley has filed a petition with the Commission seeking approval of the proposed modified service area definition.

Commission Rules: For areas served by a rural telephone company, section 214(e)(5) provides that the company's service area will be its study area "unless and until the Commission and the States, after taking into account the recommendations of a Federal-State Joint Board instituted under section 410(c), establish a different definition of service area for such company." Section 54.207 of the Commission's rules and the *Universal Service Order*, 62 FR 32962, June 17, 1997, set forth the procedures for consideration of petitions seeking to designate service areas for rural telephone companies that are different from such companies' study areas.

Section 54.207(c)(3) of the Commission's rules provides that the Commission may initiate a proceeding to consider a petition to redefine the service area of a rural telephone company within ninety days of the release date of a Public Notice. If the Commission initiates a proceeding to consider the petition, the proposed definition shall not take effect until both the state commission and the Commission agree upon the definition of a rural service area, in accordance with section 214(e)(5). If the Commission does not act on the petition within 90 days of the release date of the Public Notice, the definition proposed by the state commission will be deemed approved by the Commission and shall take effect in accordance with state procedures. Under § 54.207(e) of the Commission's rules, the Commission delegates its authority under § 54.207(c) to the Chief of the Common Carrier Bureau.

An original and four copies of all comments must be filed with William F. Caton, Acting Secretary, Office of the Secretary, Federal Communications Commission, 445 12th Street, SW., TW–B204, Washington DC 20554. In addition, four copies of each comment must be delivered to Sheryl Todd, Common Carrier Bureau, 445 12th Street, SW., Room 5–A520, Washington, DC 20554, and one copy to Qualex International, Portals II, 445 12th Street, SW., Room CY–B402, Washington DC, 20554. In accordance with the Commission's earlier Public Notice announcing that hand-delivered or messenger-delivered filings are no longer accepted at the Commission's headquarters, hand-delivered or messenger-delivered filings must be delivered to 236 Massachusetts Avenue, NE, Suite 110, Washington, DC 20002. The filing hours at this location will be 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be disposed of before entering the building.

Other messenger-delivered documents, including documents sent by overnight mail (other than United States Postal Service (USPS) Express Mail and Priority Mail), must be addressed to 9300 East Hampton Drive, Capitol Heights, MD 20743. This location will be open 8:00 a.m. to 5:30 p.m. The USPS first-class mail, Express Mail, and Priority Mail should continue to be addressed to the Commission's headquarters at 445 12th Street, SW, Washington, DC 20554. The USPS mail addressed to the Commission's headquarters actually goes to our Capitol Heights facility for screening prior to delivery at the Commission.

If you are sending this type of document or using this delivery method—	It should be addressed for delivery to—
Hand-delivered or messenger-delivered paper filings for the Commission's Secretary.	236 Massachusetts Avenue, NE, Suite 110, Washington, DC 20002 (8 a.m. to 7 p.m.).
Other messenger-delivered documents, including documents sent by overnight mail (other than United States Postal Service Express Mail and Priority Mail).	9300 East Hampton Drive, Capitol Heights, MD 20743 (8 a.m. to 5:30 p.m.).
United States Postal Service first-class mail, Express Mail, and Priority Mail .	445 12th Street, SW., Washington, DC 20554.

In addition to filing paper comments, parties are encouraged also to file comments electronically using the Commission's Electronic Comment Filing System (ECFS). *See Electronic Filing of Document in Rulemaking Proceedings*, 63 FR 24121, May 1, 1998. Comments filed through the ECFS can be sent as an electronic file via the Internet to *http://www.fcc.gov/e.-file/ecfs.html*. Generally, only one copy of an electronic submission must be filed. In completing the transmittal screen, commenters should include their full name, postal mailing address, and the applicable docket or rulemaking number. Parties may also submit an electronic comment by the Internet e-mail. To receive instructions, send an email to *ecfs@fcc.gov* and include the following words in the body of the message, "get form <your e-mail address>." A sample form and directions will be sent in reply.

Pursuant to § 1.1206 of the Commission's rules, 47 CFR. 1.1206, this proceeding will be conducted as a permit-but-disclose proceeding in which *ex parte* communications are permitted subject to disclosure.

Federal Communications Commission.

Anita Cheng,

Assistant Chief, Accounting Policy Division.

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 2540]

Petitions for Reconsideration of Action in Rulemaking Proceeding

March 15, 2002.

Petitions for Reconsideration have been filed in the Commission's rulemaking proceeding listed in this Public Notice and published pursuant to 47 CFR 1.429(e). The full text of this document is available for viewing and copying in Room CY–A257, 445 12th Street, SW., Washington, DC or may be purchased from the Commission's copy contractor, Qualex International (202) 863–2893. Oppositions to these petitions must be filed by April 5, 2002. See § 1.4(b)(1) of the Commission's rules (47 CFR 1.4(b)(1)). Replies to an opposition must be filed within 10 days after the time for filing oppositions has expired.

Subject: In the Matter of 2000 Biennial Regulatory Review; Spectrum Aggregation Limits for Commercial Mobile Radio Services (WT Docket No. 01–14).

Number of Petitions Filed: 2.

William F. Caton,

Acting Secretary.

BILLING CODE 6712–01–M

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisition of Shares of Bank or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than April 4, 2002.

A. Federal Reserve Bank of Kansas City (Susan Zubradt, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198–0001:

1. Marilyn Myers Bouziden, Alva, Oklahoma; to acquire up to 43.47 percent of the voting shares of Myers Bancshares, Inc., Alva, Oklahoma, and thereby indirectly acquire voting shares of The Central National Bank of Alva, Alva, Oklahoma.

Board of Governors of the Federal Reserve System, March 15, 2002.

Robert deV. Frierson,

Deputy Secretary of the Board.

[FR Doc. 02–6782 Filed 3–20–02; 8:45 am]

BILLING CODE 6210–01–S

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 15, 2002.

A. Federal Reserve Bank of Kansas City (Susan Zubradt, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198–0001:

1. Country Square Bancshares, Inc., Meriden, Kansas; to become a bank holding company by acquiring 100 percent of the voting shares of The State Bank of Meriden, Meriden, Kansas.

Board of Governors of the Federal Reserve System, March 15, 2002.

Robert deV. Frierson,

Deputy Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration on Aging

Agency Information Collection Activities; Submission for OMB Review; Comment Request; National Outcome Measures Surveys of Older Americans Act (OAA) Clients

AGENCY: Administration on Aging, HHS.

ACTION: Notice.

VOL
67
ISS
55
MR
21
2002
UMI

SUMMARY: The Administration on Aging (AoA) is announcing that the proposed collection of information listed below has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit written comments on the collection of information by April 22, 2002.

ADDRESSES: Submit written comments on the collection of information to the Office of Information and Regulatory Affairs, OMB, New Executive Office Bldg., 725 17th St. NW., rm. 10235, Washington, DC 20503, Attn: Allison Herron Eydt, Desk Officer for AoA.

FOR FURTHER INFORMATION CONTACT: David Bunoski, Office of Evaluation, Administration on Aging, Room 344G, Hubert Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, (202) 260–0669.

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, AoA has submitted the following proposed collection of information to OMB for review and clearance.

Title of Information Collection: National Outcome Measures Surveys of Older Americans Act (OAA) Clients.

Type of Request: New information collection.

Use: Consumer assessment data will be collected in this initial set of surveys to initiate national program outcome assessment consistent with the requirements of the Government Performance and Results Act and the Older Americans Act.

Frequency: One-time.

Respondents: Elderly individuals who have received selected services under Title 3 of the Older Americans Act.

The Administration on Aging is submitting to the Office of Management and Budget for approval the National Outcome Measures Surveys of Older Americans Act (OAA) Clients, pursuant to requirements set forth by congressional statute. Through a contract with WESTAT, Inc., AoA will draw samples of individuals served through Area Agencies on Aging across the country for the purpose of obtaining OAA program service assessments from these individuals. The surveys will utilize information collection instruments and methods developed and tested by experts in the field of gerontology and by State and local entities that administer OAA programs. The surveys will include assessments from among the following service categories: nutrition, transportation, caregiver support, home-care, and information and assistance.

AoA estimates the burden of this collection of information as follows:

Estimated Number of Responses: 3,500.

Total Estimated Burden Hours: 2,000.

In the **Federal Register** of December 3, 2001, Volume 66, Number 3232, Page 60214, the agency requested comments on the proposed collection of information. Two comments from one commenter were received.

In a letter dated January 22, 2002, Patricia P. Pine, Ph.D., Director of the New York State Office for the Aging, made the following recommendations:

Comment: "We strongly recommend that the Performance Outcomes Measures project demonstrations funded by the AoA be extended for at least one more year. This would allow the participating state and area agencies on aging to collect more information and to address validity and reliability issues that have emerged or could emerge during the current demonstrations."

Response: The Administration on Aging has not yet made a decision regarding additional funding for the current fiscal year, but is reviewing options that will include such funding.

Comment: "The proposed national survey instruments should retain only those measures that are relevant to each service category. This would minimize the burden on frail elderly clients. For example, the social functioning measure should be applied to clients who are in the relevant service populations, although this measure does not appear to be relevant to home-care clients."

Response: As part of the normal review of performance measures each year, the nutrition workgroup has begun to address the issue of the pertinence of particular measures of social functioning to the population being surveyed. For example, we are revising the social functioning questionnaire for use with clients who receive home-delivered meals. While we will still ask several questions about individuals' frequency of social contacts, we will no longer ask other questions of home-bound individuals concerning their activities outside the house. When this task is completed, a modified social functioning questionnaire, appropriate for home-care clients, will be available.

Dated: March 13, 2002.

Josefina G. Carbonell,

Assistant Secretary for Aging.

[FR Doc. 02–6785 Filed 3–20–02; 8:45 am]

BILLING CODE 4154–01–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of a Draft Environmental Assessment and Receipt of an Application for an Incidental Take Permit for the Strawberry Tierra, Inc., Property, Douglas County, CO

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and receipt of application.

SUMMARY: This notice advises the public that Strawberry Tierra, Inc. (Applicant) has applied to the Fish and Wildlife Service (Service) for an incidental take permit pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973 as amended. The Service proposes to issue a 3-year permit to the Applicant that would authorize the incidental take of the Preble's meadow jumping mouse (Preble's) (*Zapus hudsonius preblei*), federally listed as threatened, and loss and modification of its habitat associated with the construction of retail development in Parker, Douglas County, Colorado. Construction of the project will result in the permanent loss of up to 0.10 acres of willow copse that provides potential foraging and hibernation habitat for the mouse, and temporary loss of 5.37 acres of ruderal grassland that provides potential foraging and hibernation habitat for the mouse. The permit application includes a combined Environmental Assessment/Habitat Conservation Plan (EA/HCP), which is available for public review and comment. The HCP fully describes the proposed project and the measures the Applicant would undertake to minimize and mitigate project impacts to the Preble's.

The Service requests comments on the EA/HCP for the proposed issuance of the incidental take permit. We provide this notice pursuant to section 10(a) of the Endangered Species Act and National Environmental Policy Act regulations (40 CFR 1506.6). All comments on the EA and permit application will become part of the administrative record and will be available to the public.

DATES: Written comments on the permit application and EA/HCP should be received on or before May 20, 2002.

ADDRESSES: Persons wishing to review the permit application or the EA/HCP, may obtain a copy by writing to LeRoy Carlson, Field Supervisor, Fish and Wildlife Service, Colorado Field Office, 755 Parfet Street, Suite 361, Lakewood, Colorado 80215, or by calling (303) 275–2370 to request a copy. Documents also will be available for inspection, by appointment, during normal business hours at the address above. Written data or comments should be submitted to the above address. Comments also may be sent by facsimile to (303) 275–2371. Please reference permit number TE–053241 in any comments submitted.

FOR FURTHER INFORMATION CONTACT: Ms. Kathleen Linder, Fish and Wildlife Biologist, Colorado Field Office, telephone (303) 275–2370.

SUPPLEMENTARY INFORMATION:

Background

Section 9 of the Endangered Species Act and Federal regulations prohibit the "take" of a species listed as endangered or threatened (take is defined under the Endangered Species Act as to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct). However, the Service may issue permits to authorize "incidental take" (defined by the Endangered Species Act as take that is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity) of listed species under limited circumstances. Regulations governing permits for threatened species are promulgated in 50 CFR 17.32. Regulations governing permits for endangered species are promulgated in 50 CFR 17.22.

The proposed action is the issuance of a permit under section 10(a)(1)(B) of the Endangered Species Act to allow the incidental take of Preble's during the construction of a proposed retail development. The proposed project will permanently affect 0.10 acres and temporarily affect 5.37 acres of potential habitat for Preble's. An HCP has been developed as part of the preferred alternative. The proposed HCP will allow for the incidental take of the Preble's by permitting construction of a retail development in an area that may be periodically used as foraging or hibernation habitat. Proposed construction will result in about 0.10 acres of permanent habitat loss and another 5.37 acres of temporary effects to the habitat associated with this localized disturbance.

Alternatives considered in addition to the proposed action were—building at an alternate location, and no action. The draft EA analyzes the onsite, offsite, and cumulative impacts of the proposed project and all associated development and construction activities and mitigation activities on the Preble's, other threatened or endangered species, vegetation, wildlife, wetlands, geology/soils, land use, water resources, air and water quality, or cultural resources. None of the proposed impacts occur within the riparian corridor. The majority of impacts are in upland areas outside the 100-year floodplain. The Applicant, using the Service's definition of Preble's habitat, has determined that the proposed project would impact approximately 5.47 acres of potential Preble's habitat. The mitigation for the identified impacts will provide a net increase of 2.06 acres to the Preble's and other wildlife by improving potential mouse habitat through revegetation with native grasses, forbs, shrubs, and trees.

The Preble's is the only known Federally listed species that occurs on site and has the potential to be directly affected by the proposed project. The Applicant has agreed to implement the following measures to minimize and mitigate impacts that may result from incidental take of Preble's; in order to compensate for the loss of Preble's habitat, a total of 7.53 acres adjacent to the 100-year floodplain of Cherry Creek will be preserved and enhanced at a ratio of greater than 1.5:1 through seeding and planting native species.

Dated: March 4, 2002.

John Blankenship,

Deputy Regional Director.

[FR Doc. 02–6809 Filed 3–20–02; 8:45 am]

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of an Application for an Incidental Take Permit for the Lenox Village Development Site, Nashville, Davidson County, Tennessee

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

Regent Development (Applicant) seeks an incidental take permit (ITP) from the Fish and Wildlife Service (Service) pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973 (Act), as amended. The ITP would authorize incidental take of the endangered Nashville crayfish (*Orconectes shoupi*) from a 5-acre lake, incidental to lake draining for residential development in Nashville, Davidson County, Tennessee. The Applicant's Habitat Conservation Plan (HCP) describes the mitigation and minimization measures proposed to address the effects of the Project to the Nashville crayfish. These measures are outlined in the **SUPPLEMENTARY INFORMATION** section below. The Service has determined that the Applicant's proposal, including the proposed mitigation and minimization measures, will individually and cumulatively have a minor or negligible effect on the species covered in the HCP. Therefore, the ITP is a "low-effect" project and would qualify as a categorical exclusion under the National Environmental Policy Act (NEPA), as provided by the Department of Interior Manual (516 DM2, Appendix 1 and 516 DM 6, Appendix 1).

The Service announces the availability of the HCP for the incidental take application. Copies of the HCP may be obtained by making a request to the Regional Office (see **ADDRESSES**). Requests must be in writing to be processed. This notice is provided pursuant to Section 10 of the Endangered Species Act and NEPA regulations (40 CFR 1506.6).

The Service specifically requests information, views, and opinions from the public via this Notice on the federal action. Further, the Service specifically solicits information regarding the adequacy of the HCP as measured against the Service's ITP issuance criteria found in 50 CFR Parts 13 and 17.

If you wish to comment, you may submit comments by any one of several methods. Please reference permit number TE049322–0 in such comments. You may mail comments to the Service's Regional Office (see **ADDRESSES**). You may also comment via the internet to "*david_dell@fws.gov*". Please submit comments over the internet as an ASCII file avoiding the use of special characters and any form of encryption. Please also include your name and return address in your internet message. If you do not receive a confirmation from the Service that we have received your internet message, contact us directly at either telephone number listed below (see **FURTHER INFORMATION**).

Due to Court order, the Department of Interior has temporarily lost access to the internet and may not regain it by the time this notice is published. Commentors are encouraged to submit comments by mail or express courier, or to call (see **FURTHER INFORMATION**) to confirm whether our internet capability has been restored.

Finally, you may hand deliver comments to either Service office listed below (see **ADDRESSES**). Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address from the administrative record. We will honor

VOL
67
ISS
55
MR
21
2002
UMI

such requests to the extent allowable by law. There may also be other circumstances in which we would withhold from the administrative record a respondent's identity, as allowable by law. If you wish us to withhold your name and address, you must state this prominently at the beginning of your comments. We will not, however, consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

DATES: Written comments on the ITP application and HCP should be sent to the Service's Regional Office (see **ADDRESSES**) and should be received on or before April 22, 2002.

ADDRESSES: Persons wishing to review the application, supporting documentation, and HCP may obtain a copy by writing the Service's Southeast Regional Office, Atlanta, Georgia. Documents will also be available for public inspection by appointment during normal business hours at the Regional Office, 1875 Century Boulevard, Suite 200, Atlanta, Georgia 30345 (Attn: Endangered Species Permit Coordinator), or Field Supervisor, U.S. Fish and Wildlife Service, 446 Neal Street, Cookeville, Tennessee 38501. Written data or comments concerning the application or HCP should be submitted to the Regional Office. Requests for the documentation must be in writing to be processed. Please reference permit number TE049322–0 in such comments, or in requests of the documents discussed herein.

FOR FURTHER INFORMATION CONTACT: Mr. David Dell, Regional Permit Coordinator, (see **ADDRESSES** above), telephone: 404/679–7313; or Ms. Tyler Sykes, Fish and Wildlife Biologist, Cookeville Field Office, (see **ADDRESSES**), telephone 931/528–6481.

SUPPLEMENTARY INFORMATION: Nashville crayfish are limited to the Mill Creek watershed in Davidson and Williamson counties, Tennessee, near metropolitan Nashville. This species has been collected in both pool (adults only) and riffle areas (adults and juveniles). The crayfish take cover under flattened limestone slabs and rocks of varying sizes on the predominately gravel and limestone bedrock substrate found in Mill Creek and its tributaries. Habitat degradation from road and bridge construction, stream channel modifications, and point and non-point source runoff threatens the continued survival of the Nashville crayfish in this restricted range.

The Applicant, Regent Development, requests a permit for incidental take of Nashville crayfish which would occur from the draining of a 5-acre lake at Lenox Village, a proposed development site in Davidson County, Tennessee. The lake is being drained to provide suitable substrate for construction of houses. If the Applicant decided not to build in this area, the lake would still be drained to either remove or repair the dam that is currently holding back the water. The dam has been deemed unsafe by the Tennessee Department of Environment and Conservation and the Applicant has been instructed to either remove the dam or repair it.

Under section 9 of the Act and its implementing regulations, "taking" of endangered and threatened wildlife is prohibited. However, the Service, under limited circumstances, may issue permits to take such wildlife if the taking is incidental to and not the purpose of otherwise lawful activities. The Applicant has developed an HCP as required for their incidental take permit application.

The HCP describes measures the Applicant will take to minimize and mitigate taking at the Project site. To minimize impacts to the Nashville crayfish from the draining of Resha Lake, the Applicant will:

1. Install proper erosion control measures prior to draining of the lake to insure minimal loss of sediment to the downstream channel during the draining process.

2. Conduct a sweep of the lake prior to initiation of the lake draining process to remove Nashville crayfish. These crayfish will be relocated to area(s) designated by the Service.

3. Conduct periodic sweeps throughout the entire lake draining process to ensure removal of all Nashville crayfish.

To mitigate for any Nashville crayfish that may be taken, the applicant will provide the following:

1. Reconstruction of the stream channel:

a. The channel will be placed in the lake bed and will mirror the up- and down-stream portions of the existing stream channel.

b. Slabrocks will be placed in the reconstructed channel to provide habitat for Nashville crayfish recolonizing the channel.

c. Native vegetation will be planted in buffer zones along the stream bank.

d. The reconstructed stream channel will be designated as greenspace in perpetuity.

2. Installation of wet cells:

Retention basins (wet cells) will be strategically located throughout the property to collect runoff to allow materials harmful to aquatic species to settle out before that water is released to the stream.

3. Education:

a. Informational signs discussing the Nashville crayfish and its habitat will be installed along the reconstructed stream channel.

b. Informational flyers will be distributed through the Homeowners Association to all residents of Lenox Village discussing the Nashville crayfish and ways that residents can protect the species' habitat.

As stated above, we have determined that the HCP is a low-effect plan that is categorically excluded from further NEPA analysis, and does not require the preparation of an EA or EIS. This preliminary information may be revised due to public comment received in response to this notice. Low-effect HCPs are those involving: (1) Minor or negligible effects on federally listed or candidate species and their habitats, and (2) minor or negligible effects on other environmental values or resources. The Applicant's HCP qualifies for the following reasons:

1. Approval of the HCP would result in minor or negligible effects on the Nashville crayfish and its habitat. We do not anticipate significant direct or cumulative effects on this species as a result of this project, but rather expect the species to benefit.

2. Approval of the HCP would not have adverse effects on known geographic, historic, or cultural sites, or involve unique or unknown environmental risks.

3. Approval of the HCP would not result in any significant adverse effects on public health or safety.

4. The project does not require compliance with Executive Order 11988 (Floodplain Management), Executive Order 11990 (Protection of Wetlands), or the Fish and Wildlife Coordination Act, nor does it threaten to violate a federal, state, local, or tribal law or requirement imposed for protection of the environment.

5. Approval of the HCP would not establish a precedent for future action or represent a decision in principle about future actions with potentially significant environmental effects.

The Service will evaluate the HCP and comments submitted thereon to determine whether the application meets the requirements of section 10(a) of the Act. If it is determined that those requirements are met, the ITP will be issued for the incidental take of Nashville crayfish on the Applicant's project site. The Service will also evaluate whether issuance of the section 10(a)(1)(B) ITP complies with section 7 of the Act by conducting an intra-Service section 7 consultation. The results of this consultation, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ITP.

Dated: March 7, 2002.

David P. Flemming,

Acting Regional Director.

[FR Doc. 02–6811 Filed 3–20–02; 8:45 am]

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of Application for an Incidental Take Permit for Residential Development in Collier County, Florida

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: Vestcor Fund XV, Limited (Applicant) requests an incidental take permit (ITP) pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973 (U.S.C. 1531 *et seq.*), as amended (Act). The Applicant anticipates taking red-cockaded woodpeckers (*Picoides borealis*) (RCWs) associated with the clearing of 18.3 acres of foraging habitat incidental to the construction of a multi-family housing development in Collier County, Florida.

The Applicants' Habitat Conservation Plan (HCP) describes the mitigation measures proposed to address the effects of the Project to the protected species. These measures are outlined in the **SUPPLEMENTARY INFORMATION** section below. The Service has determined that the Applicant's proposal, including the proposed mitigation measures, will individually and cumulatively have a minor or negligible effect on these species covered in the HCP. Therefore, the ITP is a "low-effect" project and would qualify as a categorical exclusion under the National Environmental Policy Act (NEPA), as provided by the Department of Interior Manual (516 DM2, Appendix 1 and 516 DM 6, Appendix 1).

The Service announces the availability of the HCP for the incidental take application. Copies of the HCP may be obtained by making a request to the Regional Office (see **ADDRESSES**). Requests must be in writing to be processed. This notice is provided pursuant to Section 10 of the Endangered Species Act and NEPA regulations (40 CFR 1506.6).

The Service specifically requests information, views, and opinions from the public via this Notice on the federal action. Further, the Service specifically solicits information regarding the adequacy of the HCP as measured against the Service's ITP issuance criteria found in 50 CFR parts 13 and 17.

If you wish to comment, you may submit comments by any one of several methods. Please reference permit number TE042708–0 in such comments. You may mail comments to the Service's Regional Office (see **ADDRESSES**). You may also comment via the internet to "*david_dell@fws.gov*". Please submit comments over the internet as an ASCII file avoiding the use of special characters and any form of encryption. Please also include your name and return address in your internet message. If you do not receive a confirmation from the Service that we have received your internet message, contact us directly at either telephone number listed below (see **FURTHER INFORMATION**).

Due to Court order, the Department of Interior has temporarily lost access to the internet and may not regain it by the time this notice is published. Commentors are encouraged to submit comments by mail or express courier, or to call (see **FURTHER INFORMATION**) to confirm whether our internet capability has been restored.

Finally, you may hand deliver comments to either Service office listed below (see **ADDRESSES**). Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address from the administrative record. We will honor such requests to the extent allowable by law. There may also be other circumstances in which we would withhold from the administrative record a respondent's identity, as allowable by law. If you wish us to withhold your name and address, you must state this prominently at the beginning of your comments. We will not, however, consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

DATES: Written comments on the permit application, Determination of Low Effect and HCP should be sent to the Service's Regional Office (see **ADDRESSES**) and should be received on or before April 22, 2002.

ADDRESSES: Persons wishing to review the application, HCP, and supporting documentation may obtain a copy by writing the Service's Southeast Regional Office, Atlanta, Georgia. Documents will also be available for public inspection by appointment during normal business hours at the Regional Office, 1875 Century Boulevard, Suite 200, Atlanta, Georgia 30345 (Attn: Endangered Species Permits), or Field Supervisor, U.S. Fish and Wildlife Service, 1339 20th Street, Vero Beach, Florida 32960–3559. Written data or comments concerning the application, HCP, or supporting documents should be submitted to the Regional Office. Requests for the documentation must be in writing to be processed. Please reference permit number TE042708–0 in such comments, or in requests of the documents discussed herein.

FOR FURTHER INFORMATION CONTACT: Mr. David Dell, Regional Permit Coordinator, (see **ADDRESSES** above), telephone: 404/679–7313, facsimile: 404/679–7081; or Mr. Michael Jennings, Fish and Wildlife Biologist, South Florida Ecological Services Field Office (see **ADDRESSES** above), telephone: 561/562–3909 extension 225.

SUPPLEMENTARY INFORMATION: The RCW is a territorial, non-migratory cooperative breeding bird species. RCWs live in social units called groups which generally consist of a breeding pair, the current year's offspring, and one or more helpers (normally adult male offspring of the breeding pair from previous years). Groups maintain year-round territories near their roost and nest trees. The RCW is unique among the North American woodpeckers in that it is the only woodpecker that excavates its roost and nest cavities in living pine trees. Each group member has its own cavity, although there may be multiple cavities in a single pine tree. The aggregate of cavity trees is called a cluster. RCWs forage almost exclusively on pine trees and they generally prefer pines greater than 10 inches diameter at breast height. Foraging habitat is contiguous with the cluster. The number of acres required to supply adequate foraging habitat depends on the quantity and quality of the pine stems available. The RCW is endemic to the pine forests of the southeastern United States and was once widely distributed across 16 states. The species evolved in a mature fire-maintained ecosystem. The RCW has declined primarily due to the conversion of mature pine forests to young pine plantations, agricultural fields, and

VOL
67
ISS
55
MR
21
2002
UMI

residential and commercial developments, and to hardwood and exotic species encroachment in existing pine forests due to fire suppression and hydrological alteration. The species is still widely distributed (presently occurs in 13 southeastern States), but remaining populations are highly fragmented and isolated. Presently, the largest known populations occur on federally owned lands such as military installations and national forests.

In southwest Florida, there are an estimated 85 active RCW clusters; 51 percent are on Federal lands, 35 percent are on State lands, and 14 percent are on private lands. The known RCW populations on public lands are periodically monitored and the status of birds on these lands range from increasing to decreasing. Effective land management actions are currently ongoing in the Florida Fish and Wildlife Conservation Commission's Cecil Webb Wildlife Management Area where 27 known active RCW clusters occur. This population is about 40 miles north of the project area and the RCW population is considered stable. Big Cypress National Preserve is about 25 miles southeast of the project area and contains 43 clusters that are actively managed and this population is increasing. In relation to the project site, the closest public land (within two miles) that supports RCWs is the Picayune Strand State Forest where three active clusters exist. This population has been in decline for several decades, but much of the decline resulted from lack of habitat management prior to acquisition by the State of Florida. Recent implementation of aggressive land management actions within the State forest is likely to stabilize this population in the near future and result in long-term increases in the number of active clusters.

The Applicant's project lies within the urban boundary of Naples. Areas surrounding the project site are represented by a mosaic of urban uses and undeveloped property. The location of RCWs on private lands in the Naples area has never been well documented because of a lack of access for survey purposes. Based largely on anecdotal information, observations from roadsides, and limited information gathered from onsite observations in the 1980s and early 1990s, about 12 active clusters are thought to exist on private lands west of the Picayune Strand State Forest and dense urban areas further to the west.

Of the 12 RCW clusters on private lands, two historic localities are known from private lands near the project site. Application of a one-half mile radius circle around these cluster sites indicates that the project site may be within the home range of one, and possibly both of these clusters. However, due to construction time constraints, and lack of access to neighboring properties, adequate RCW foraging habitat surveys could not be conducted on the project site to determine definitively whether RCWs forage in the area. Preliminary habitat assessments looked for, but did not find, active or inactive nest trees. Much of the project area consists of hydric pine flat woods that are relatively undisturbed. Lacking sufficient time to conduct foraging surveys, and the apparent suitability of the project site as foraging habitat and the proximity of RCW clusters, the Applicant opted to consider the entire project area to be RCW foraging habitat.

The Service worked with the Applicant in the design of the mitigation measures. To mitigate for loss of RCW foraging habitat, the Applicant will purchase a minimum of 18.3 acres of suitable RCW foraging habitat within (e.g., inholdings) or adjacent to the Belle Meade tract of the Picayune Strand State Forest. The Applicant will, in cooperation with the Florida Division of Forestry, develop a habitat management plan for the mitigation parcel(s), conduct any initial management actions required to restore acquired mitigation parcels, and contribute sufficient funds into a management endowment to ensure future management of the mitigation parcels. Except for avoidance of RCWs observed during construction, no project minimization measures were proposed by the Applicant because the property was acquired prior to the realization that RCWs may forage on the site. Accordingly, the smallest acreage necessary to construct the proposed multi-family units was acquired. Thus, the existing 18.3 acres will accommodate the proposed development, but does not provide sufficient area to create buffers or to otherwise minimize impacts to foraging habitat. The Applicant has indicated that downsizing the proposed development will not be economically viable. From a biological perspective, onsite preservation is not likely to result in conservation benefits to RCWs in this increasingly urban landscape. On-site preserves established for RCWs during previous section 7 consultations in this area have proven ineffective because they have become surrounded by urban development. The concept of on-site preserves for RCWs may be appropriate for large-scale developments that provide ample open space and sufficient residual habitat, particularly when the preserves are adjacent to actively managed public lands. However, habitat preserves set aside within relatively small development projects of southwest Florida tend to result in small, fragmented parcels of habitat that become increasingly hostile to RCWs as urban development encroaches. In such cases, RCWs often abandoned these small, isolated preserves because sufficient habitat is not available.

As stated above, we have determined that the HCP is a low-effect plan that is categorically excluded from further NEPA analysis, which does not require the preparation of an EA or EIS. Low-effect HCPs are those involving: (1) Minor or negligible effects on federally listed or candidate species and their habitats, and (2) minor or negligible effects on other environmental values or resources. The Applicant's HCP qualifies for the following reasons:

1. Approval of the HCP would result in minor or negligible effects on the red-cockaded woodpecker and its habitat. We do not anticipate significant direct or cumulative effects on this species as a result of this project.

2. Approval of the HCP would not have adverse effects on known geographic, historic, or cultural sites, or involve unique or unknown environmental risks.

3. Approval of the HCP would not result in any significant adverse effects on public health or safety.

4. The project does not require compliance with Executive Order 11988 (Floodplain Management), Executive Order 11990 (Protection of Wetlands), or the Fish and Wildlife Coordination Act, nor does it threaten to violate a federal, state, local, or tribal law or requirement imposed for protection of the environment.

5. Approval of the HCP would not establish a precedent for future action or represent a decision in principle about future actions with potentially significant environmental effects.

The Service will evaluate the HCP and comments submitted thereon to determine whether the application meets the requirements of section 10(a) of the Act. If it is determined that those requirements are met, the ITP will be issued for the incidental take of RCWs on the Applicant's project site. The Service will also evaluate whether the issuance of a section 10(a)(1)(B) permit complies with section 7 of the Act by conducting an intra-Service section 7 consultation. The results of the Biological Opinion, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ITP.

Dated: February 27, 2002.

Kemper M. McMaster,

Acting Regional Director.

[FR Doc. 02–6812 Filed 3–20–02; 8:45 am]

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Southern Idaho Ground Squirrel Candidate Conservation Agreement With Assurances

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: Soulen Livestock, Inc. (Soulen Livestock) has applied to the Fish and Wildlife Service (Service) for an enhancement of survival permit pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended. The permit application includes a proposed Southern Idaho Ground Squirrel Candidate Conservation Agreement with Assurances (Agreement) between Soulen Livestock, the Service, the Idaho Department of Fish and Game, and the Idaho Governor's Office of Species Conservation.

Under the proposed Agreement, the parties would implement conservation measures for southern Idaho ground squirrels (*Spermophilus brunneus endemicus*) over approximately 43,145 acres of Soulen Livestock's land in Washington and Payette Counties, western Idaho. The intent of the Agreement is to conserve southern Idaho ground squirrels by protecting and enhancing ground squirrel habitat and populations, and reintroducing ground squirrels into currently unoccupied suitable habitat, in a manner that is consistent with Soulen Livestock's farming and ranching operations. The proposed term of the Agreement and the permit is 20 years. The Service has prepared an Environmental Assessment for approval of the Agreement and issuance of the permit.

We request comments from the public on the permit application, Agreement, and the Environmental Assessment. All comments we receive, including names and addresses, will become part of the administrative record and may be released to the public.

DATES: Written comments should be received on or before April 22, 2002.

ADDRESSES: Comments should be addressed to Dennis Mackey, Project Biologist, Fish and Wildlife Service, 1387 S. Vinnell Way, Room 368, Boise, Idaho 83709, (facsimile: 208/378–5262).

FOR FURTHER INFORMATION CONTACT: Dennis Mackey at the above address or telephone 208/378–5267.

SUPPLEMENTARY INFORMATION:

Document Availability

You may obtain copies of the documents for review by contacting the individual named above. You also may make an appointment to view the documents at the above address during normal business hours.

Background

Under a Candidate Conservation Agreement with Assurances, participating landowners voluntarily implement conservation activities on their property to benefit unlisted species that are proposed or candidates for listing under the Endangered Species Act, or other sensitive species. Candidate Conservation Agreements with Assurances encourage private and other non-Federal property owners to implement conservation efforts, and reduce threats to unlisted species by assuring landowners that they will not be subjected to increased property use restrictions, beyond those identified in the agreement, if the species is listed in the future under the Endangered Species Act. Application requirements and issuance criteria for enhancement of survival permits through Candidate Conservation Agreements with Assurances are found in 50 CFR 17.22(d) and 17.32(d).

On October 30, 2001, the Service formally identified the southern Idaho ground squirrel as a candidate for listing under the Endangered Species Act (66 FR 54807). Southern Idaho ground squirrels are currently found within an approximately 518,000-acre area comprised of lower elevation shrub/steppe habitat in the Weiser River Basin, in southwest, Idaho. The species appears to have undergone a substantial population decline throughout its range since 1985. Southern Idaho ground squirrels are largely dependent on private lands: 85 percent of the occupied ground squirrel sites are located on private lands, mostly ranches and farms; 12 percent are under federal management by the Bureau of Land Management; and 3 percent of the sites are on lands managed by the Idaho Department of Lands. Conservation measures implemented on private lands are important for the long-term survival of the species.

Landowners may be willing to implement measures that enhance populations of sensitive species on their property, but reluctant to do so because of potential land-use restrictions that could occur should the species eventually be listed under the Endangered Species Act. As a result of this potential regulatory concern, Soulen Livestock developed the Southern Idaho Ground Squirrel Candidate Conservation Agreement with Assurances, in cooperation with the agencies, and is applying to the Service for a permit under section 10(a) of the Endangered Species Act, authorizing incidental take of southern Idaho ground squirrels.

Under the proposed Agreement and permit, Soulen Livestock and the agencies would implement various conservation measures over the 43,145 acres of Soulen Livestock's property depending on present and future occupancy of sites by southern Idaho ground squirrels and the location of ground squirrel reintroduction/translocation sites. The proposed conservation measures can be described in three categories: (1) Measures to be applied on all 43,145 acres; (2) measures that would occur on currently occupied ground squirrel sites (30 acres); and (3) measures on 43,115 acres where ground squirrel occupancy and habitat suitability is currently unknown. On all 43,145 acres of enrolled lands, Soulen Livestock would not authorize the shooting, trapping, or poisoning of southern Idaho ground squirrels and would allow agency personnel access to these lands to conduct ground squirrel surveys. Currently, three sites, covering 30 acres have been identified in the site-specific plan as occupied by southern Idaho ground squirrels and specific conservation measures have been identified at these sites to protect ground squirrels from activities that may have adverse affects to individual ground squirrels or their habitat. The ground squirrel conservation measures on the 30 acres include: (1) Continue reintroduction efforts, (2) monitor ground squirrel populations and habitat characteristics to identify habitat enhancement/rehabilitation measures; (3) implement habitat enhancement measures such as seeding native or non-native vegetation species, fertilizing vegetation, prescribed burning, and providing escape cover; (4) minimize direct mortality from ground disturbing activities; (5) provide supplemental feeding, if necessary; (6) prohibit shooting, trapping, or poisoning of ground squirrels; and (7) control Columbian ground squirrels and badgers. Columbian ground squirrels compete with southern Idaho ground squirrels for food and burrow sites. Badgers can cause severe impacts on prey species, especially if they are at critically low numbers. The remaining

VOL
67
ISS

MR
21
2002
UMI

43,115 acres have not been surveyed for ground squirrel occupancy, and no site-specific conservation measures have been identified on these lands. On these unsurveyed lands, both individual ground squirrels and their habitat will be protected from land use activities that may have adverse effects at any sites identified in the future as occupied by southern Idaho ground squirrels, or sites identified by the agencies as reintroduction/translocation sites. The permit would authorize incidental take of southern Idaho ground squirrels as a result of Soulen Livestock's land use activities: crop cultivation and harvesting, livestock grazing and production, farm equipment operation, and recreational activities.

We provide this notice pursuant to section 10(c) of the Endangered Species Act and implementing regulations for the National Environmental Policy Act (40 CFR 1506.6). We will evaluate the permit application, associated documents, and comments submitted thereon to determine whether the permit application meets the requirements of section 10(a) of the Endangered Species Act and National Environmental Policy Act regulations. If we determine that the requirements are met, we will sign the Agreement and issue an enhancement of survival permit under section 10(a)(1)(A) of the Endangered Species Act to Soulen Livestock for take of southern Idaho ground squirrels incidental to otherwise lawful activities in accordance with the terms of the Agreement. We will not make our final decision until after the end of the 30-day comment period and will fully consider all comments received during the comment period.

Dated: March 1, 2002.

Rowan W. Gould,

Deputy Regional Director, Fish and Wildlife Service, Portland, Oregon.

[FR Doc. 02–6810 Filed 3–20–02; 8:45 am]

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AZ–020–034–1010–02]

Closure of Public Lands to Camping and Off-Highway Vehicle Use

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of closure of public lands to camping and off-highway vehicle use.

SUMMARY: Notice is hereby given that the following described lands are temporarily closed until further notice to camping and off-highway vehicle use for the protection of public health and safety under the provisions of 43 CFR 8364.1 and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701). Persons with authorization to utilize the area by BLM regulations, contracts, leases or permits, may use the area described in accordance with those authorizations. Nothing in this closure effects the exercise of valid existing rights created by a contract, right-of-way, lease, permit or mining claim that is carried out in accordance with the regulations under which the rights were established. The closure will remain in effect until rescinded or modified by the Phoenix Field Manager.

Gila and Salt River Meridian, Arizona

T. 1 N., R. 7 E.,
Sec. 18, Lots 6, 13, 15–19, 21, N½SE¼, SE¼ SE¼.
T. 2 N., R. 1 W.,
Sec. 13, SW¼SE¼;
Sec. 24, NW¼NE¼.

EFFECTIVE DATE: This order is effective upon the signature of the authorized officer.

SUPPLEMENTARY INFORMATION: The public lands involved (approximately 301 acres), located at University Drive/Sossman Road and Camelback Road/Agua Fria River, are adjacent to areas of expanding urban development. Unregulated and extended overnight camping and off-highway vehicle use is not consistent with the orderly growth of the communities and presents health, safety and law enforcement problems.

Fugitive dust resulting from operation of off-highway vehicles in air quality non-attainment areas is a growing and continuing problem. Landowner compliance with Maricopa County and State of Arizona dust abatement and management regulations is becoming critical in the urban areas of Maricopa County. BLM is subject to these rules, especially Maricopa County Rules 301, 302, and 310.01. Air quality issues include considerable PM10 dust from the operation of off-highway vehicles, extensive PM10 accumulations from OHV activities during late afternoons and on weekends, and significant numbers of complaints from concerned citizens.

Increasing levels of local law enforcement time have been allocated to answering disturbance calls from residents and property owners adjacent to these public lands. Law enforcement service calls included OHV-related dust, noise, trespass, random gunfire, drug and alcohol violation arrests, fireworks use, suspicious circumstance calls, illegal dumping of dirt, debris and trash and other illicit activities.

This closure will be monitored and enforced by BLM, the Maricopa County Sheriff's Department and other law enforcement agencies. The following persons, operating within the scope of their official duties, are exempt from the provisions of these closures: BLM employees, state or federal law enforcement and fire protection personnel.

Because of prior existing rights, the following parties (and their representatives) will be allowed access to the above described lands:

(1) USDI, Bureau of Reclamation—(AZA–453, AZA–18823, AZA–19991, AZPHX–086506, AZPHX–86777and Secretarial Orders dated July 2, 1902 and August 21, 1909)
U.S. West—(AZA–10994, AZAR–035574)
City of Mesa—(AZA–17277, AZA–31058)
Maricopa County DOT—(AZAR–035348)
(2) Salt River Project—(AZA–166)
Tucson Electric Power Co.—(AZA–7274, AZA–7872)
Arizona Public Service Co.—(AZA–18635)
Maricopa County DOT—(AZA–19098)
Maricopa County FCD—(AZA–23639)

Order: Notice is hereby given that effective the date of a signature by the authorized officer of this notice, the above described lands are closed to camping and off-highway vehicle use until further notice. Any person who fails to comply with a closure or restriction order issued under 43 CFR 8364 is subject to the penalties provided in 43 CFR Subpart 8360.0–7.

FOR FURTHER INFORMATION CONTACT: Michael A. Taylor, Field Manager, Phoenix Field Office, 21605 North 7th Avenue, Phoenix, Arizona 85027, (623) 580–5500.

Dated: December 19, 2001.

Michael A. Taylor,

Field Manager.

BILLING CODE 4310–31–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV–033–02–1230–EA]

Temporary Closure of Public Lands—Recreation Special Events: Nevada, Carson City Field Office

AGENCY: Bureau of Land Management, Interior Department.

ACTION: Temporary closure of affected public lands in Lyon, Storey, Churchill, Carson, Douglas, Mineral and Washoe Counties on and adjacent to permitted special events such as: Motorized Off Highway Vehicle, Mountain Bike, Horse Endurance competitive event sites and routes.

Competitive events (races) are conducted along dirt roads, trails, washes and areas approved for such use through the Special Recreation Use Permit application process. Events occur from April through November, 2002. Closure period is from 6 a.m. race day until race finish or until the event has cleared between affected Check Point locations; approximately 2 to 24 hour periods. The general public will be advised of each event and Closure specifics via local newspapers and mailed public letters within seven (7) to thirty (30) days prior to the running of an event. Event maps and information will be posted at the Carson City Field Office.

Locations most commonly used for permitted events include, but are not limited to:

1. Lemmon Valley MX Area—Washoe Co., T21N R19E S8.
2. Hungry Valley Off Highway Vehicle Area—Washoe Co., T21–23N R20E.
3. Pine Nut Mountains—Carson, Douglas & Lyon Counties: T11–16N R20–24E.
4. Virginia City/Jumbo Areas—Washoe & Storey Counties: T16–17N R20–21E.
5. Yerington/Weeks Areas—Lyon Co.: T12–16N R23–27E.
6. Fallon Area (Including Sand Mtn.)—Churchill Co.: T14–18N R27–32E.
7. Hawthorne Area—Mineral County: T5–14N R31½–36E.

SUMMARY: The Assistant Manager, Non-Renewable Resources announces the temporary closure of selected public lands under his administration. Persons with authorization to utilize the area by BLM regulations, contracts, leases or permits, may use the area described in accordance with those authorizations. Nothing in this closure affects the exercise of valid existing rights created by a contract, right of way, lease, permit of mining claim that is carried out in accordance with the regulations under which the rights were established. This action is taken to provide for public and participant safety and to protect adjacent natural and cultural resources during the conduct of permitted special recreation events.

EFFECTIVE DATES: April through November, 2002. Events may be canceled or rescheduled at short notice.

FOR FURTHER INFORMATION CONTACT: Fran Hull, Outdoor Recreation Planner, Carson City Field Office, Bureau of Land Management, 5665 Morgan Mill Road, Carson City, Nevada 89701, Telephone: (775) 885–6161.

SUPPLEMENTARY INFORMATION: Bureau lands to be temporarily closed to public use include the width and length of those roads and trails identified as the race route by colorful flagging, chalk arrows in the dirt and directional arrows attached to wooden stakes. The authorized applicants or their representatives are required to post warning signs, control access to, and clearly mark the event routes during closure periods.

Public uses generally affected by a Temporary Closure include: road and trail uses, camping, shooting of any kind of weapon including paint ball, and public land exploration.

Spectator and support vehicles may be driven on open roads only. Spectators may observe the races from specified locations as directed by event and agency officials.

A map and schedule of each closure area may be obtained at the contact address.

Exemptions: Closure restrictions do not apply to race officials, medical/rescue, law enforcement and agency personnel monitoring the event.

Authority: 43 CFR part 8364 and 43 CFR part 8372.

Penalty: Any person failing to comply with the closure orders may be subject to imprisonment for not more than 12 months, or a fine in accordance with the applicable provisions of 18 USC 3571, or both.

Dated: February 11, 2002.

Charles P. Pope,

Acting Assistant Manager, Non-renewable Resources.

[CA–160–1220–PG]

Meeting of the Central California Resource Advisory Council

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Meeting of the Central California Resource Advisory Council.

SUMMARY: Pursuant to the authorities in the Federal Advisory Committee Act (Pub. L. 92–463) and the Federal Land Policy and Management Act of 1976 (sec. 309), the Bureau of Land Management Resource Advisory Council for Central California will meet in Bakersfield.

DATES: Friday and Saturday, April 12–13, 2002.

ADDRESSES: Red Lion Hotel, 2400 Camino Del Rio Court, Bakersfield, California.

SUPPLEMENTARY INFORMATION: The 12 member Central California Resource Advisory Council is appointed by the Secretary of the Interior to advise the Bureau of Land Management on public land issues. On Friday and Saturday beginning at 8 a.m., the Council will meet to discuss public land issues. The meetings are open to the public. Agenda items include a briefing on current issues and future planning by the four Field Managers of the central California region of the BLM, and an information session on healthy rangelands. There will be a Friday afternoon field trip to the Carrizo Plain National Monument. The public is welcome on the field trip, but must supply their own transportation. There will be public comment periods at 11:30 a.m. on Friday, April 12, and 1 p.m. on Saturday, April 13, at which time the Council will hear comments on any public land issue. Written comments will also be accepted, either at the meeting or at the address below.

FOR FURTHER INFORMATION CONTACT: Larry Mercer, Public Affairs Officer, Bureau of Land Management, 3801 Pegasus Drive, Bakersfield, CA 93308, telephone 661-391–6010.

Dated: February 22, 2002.

Notice of Resource Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the authorities in the Federal Advisory Committees Act (Pub. L. 92–463) and the Federal Land Policy and Management Act (Pub. L. 94–579), the U. S. Bureau of Land Management's Northwest California Resource Advisory Council will meet Wednesday and Thursday, April 24 and 25, 2002, in Arcata, CA, for a field tour and business meeting. The tour and meeting are open to the public, but anyone participating in the tour must provide their own transportation and lunch.

SUPPLEMENTARY INFORMATION: The meeting begins at 10 a.m. Wednesday, April 24, at the BLM Arcata Field Office, 1695 Heindon Rd., Arcata. Members will convene, then depart immediately for field tour of sites managed by the Arcata Field Office. On Thursday, April 25, the council will convene a business meeting at 8 a.m. in the Conference Room of the BLM Arcata Field Office. Agenda topics will include discussion of a community forest proposal in Trinity County, a status report on planning for the Headwaters Forest Reserve, and a status report on a proposed amendment to the BLM Redding Field Office Resource Management Plan. Council members will also hear status reports from the managers of the BLM's Arcata, Redding and Ukiah field offices.

Time will be set aside for public comments. Depending on the number of persons wishing to speak, a time limit may be established.

Notice of Proposed Withdrawal Modification and Transfer of Jurisdiction; Florida

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The United States Department of Veterans Affairs has filed an application to transfer jurisdiction of 49.83 acres of public land withdrawn for the Department of the Navy, Pensacola Naval Air Station. The land is needed for expansion of the Barrancas National Cemetery. The land has been and would remain closed to surface entry and mining, but not from leasing under the mineral leasing laws.

DATES: Comments must be received by June 19, 2002.

ADDRESSES: Comments should be sent to the Field Manager, BLM, 411 Briarwood Drive, Suite 404, Jackson, Mississippi 39206.

FOR FURTHER INFORMATION CONTACT: Duane Winters, Jackson Field Office, 601–977–5403.

SUPPLEMENTARY INFORMATION: The Department of Veterans Affairs has filed an application to transfer jurisdiction of the following described public lands, which were withdrawn from all forms of appropriation under the general land laws, including the mining laws, subject to valid existing rights for the Department of Navy, Pensacola Naval Air Station:

Tallahassee Meridian

T. 3 S., R. 30W.,
Tract 6.

The area described contains 49.83 acres in Escambia County.

The Department of Navy has determined that this land is no longer needed for the Pensacola Naval Air Station and has agreed to a transfer of the land to the Department of Veterans Affairs for expansion of the Barrancas National Cemetery.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments,

suggestions, or objections in connection with the proposed transfer of jurisdiction may present their views in writing to the Jackson Field Office of the Bureau of Land Management at the above address.

The application will be processed in accordance with the regulations set forth in 43 CFR 2300.

Bruce Dawson,

Field Manager.

Workshop on Transferring Responsibility for Inspection and Enforcement of U.S. Coast Guard Regulations for Fixed Facilities on the Outer Continental Shelf to the Minerals Management Service

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of workshop.

SUMMARY: The MMS and the U.S. Coast Guard (USCG) will jointly hold a workshop to discuss the transfer of responsibility to MMS for inspection and enforcement of USCG regulations for fixed facilities on the Outer Continental Shelf.

DATES: The workshop will be held on Friday, April 12, 2002, from 8:30 a.m. to 12 noon. Written questions you wish to discuss at the workshop must reach MMS by close of business on March 22, 2002.

ADDRESSES: The workshop will be held at the Sheraton North Houston Hotel's Amphitheater at George Bush International Airport, 15700 John F. Kennedy Boulevard, Houston, Texas; telephone (281) 442–5100. Please submit your written questions by mail or fax to the following:

(1) By mail to Staci Atkins, Minerals Management Service, 381 Elden Street, MS 4023, Herndon, Virginia 20170; or,

(2) By Fax to Staci Atkins at (703) 787–1575.

FOR FURTHER INFORMATION CONTACT: Staci Atkins, telephone (703) 787–1620.

SUPPLEMENTARY INFORMATION: On February 7, 2002, the USCG published a final rule in the **Federal Register** (67 FR 5912) authorizing MMS to perform fixed facility inspections on behalf of the USCG. Based on comments we received on the proposed rulemaking, we are aware that industry has questions on how the agreement between the two agencies will be implemented. This workshop will inform industry and the public of the implementation of the MMS inspection program.

The agenda for the meeting on April 12, 2002, is as follows:

- General welcome and overview;
- Presentation of the rulemaking history;
- Overviews of the current MMS and USCG inspection programs;
- Presentation of the integrated inspection program; and
- Question and answer session.

The MMS and USCG encourage you to submit questions and attend the workshop. We will consider your questions submitted in advance in preparing our presentations so that the workshop can focus on key topics. You may also pose questions during the question and answer session at the workshop.

To obtain information on facilities or services for individuals with disabilities or to request that we provide special assistance at the meeting, please contact Staci Atkins as soon as possible.

Dated: February 20, 2002.

E.P. Danenberger,

Chief, Engineering and Operations Division.

BILLING CODE 4310–MR–P

DEPARTMENT OF THE INTERIOR

National Park Service

General Management Plan, Final Environmental Impact Statement, Devils Tower National Monument, Crook County, Wyoming

AGENCY: National Park Service, Department of the Interior.

ACTION: Availability of Final Environmental Impact Statement and General Management Plan for Devils Tower National Monument.

SUMMARY: Pursuant to section 102 (2) (c) of the National Environmental Policy Act of 1969, the National Park Service announces the availability of a final Environmental Impact Statement and General Management Plan (FEIS/GMP) for Devils Tower National Monument, Wyoming.

DATES: The Draft EIS/GMP was on public review from July 2, through September 30, 2001. Responses to public comment are addressed in the FEIS/GMP. A 30-day no-action period will follow the Environmental Protection Agency's Notice of Availability of the FEIS/GMP.

ADDRESSES: Copies of the FEIS/GMP are available from the Superintendent, Devils Tower National Monument, P.O. Box 10, Devils Tower, WY 82714. Public reading copies of the FEIS/GMP will be available for review at the following locations:

Office of the Superintendent, Devils Tower National Monument, P.O. Box 10, Devils Tower, WY 82714, Telephone: (307) 467–5283 x 14.

Planning and Environmental Quality, Intermountain Support Office—Denver, National Park Service, P.O. Box 25287, Denver, CO 80225–0287, Telephone: (303) 969–2851 or (303)969–2377.

Office of Public Affairs, National Park Service, Department of the Interior, 18th and C Streets NW, Washington, DC 20240, Telephone: (202) 208–6843.

FOR FURTHER INFORMATION CONTACT: Superintendent, Devils Tower National Monument, (307) 467–5282 x 14.

SUPPLEMENTARY INFORMATION: The FEIS/GMP analyzes five alternatives to manage natural and cultural resources, visitor use and access, general development and park operations. The alternatives address issues including the following. The national monument is subject to visitor congestion, including vehicular circulation and parking, and crowded visitor facilities. None of the four buildings where park staff works has adequate space for office requirements, storage, meetings, or breaks. The space available for the cooperating association's offices and bookstore is inadequate. Congestion and inadequate facilities limit the staff's ability to offer orientation and interpretation that would ensure visitor understanding of the monument's significance and allow visitors to make the best use of their time. Flood control structures on the Belle Fourche River inside and outside the monument have severely damaged the riparian woodland system. Modern recreational use, developments, and climbing on the Tower are sometimes in conflict with American Indian traditional cultural values. High levels of development, visitor use, and crowding at the base of the Tower are not consistent with the spiritual nature of the area. Alternative 1, the no action alternative represents the continuation of existing conditions and management at the monument. Alternative 2 would reduce overall development to improve the monument's natural setting, institute a reservation system during periods of peak visitation, and convert the parking area at the base of the Tower to a pedestrian plaza. Alternative 3, the NPS preferred alternative, would institute a shuttle system for use during peak

VOL
67
ISS
55
MR
21
2002
UMI

visitation periods, construct a shuttle staging area and visitor orientation facilities within the monument, and convert the parking area at the base of the Tower to a pedestrian plaza. Alternative 4 would also institute a shuttle system, but would construct/relocate staging and visitor orientation facilities, along with headquarters and maintenance facilities, outside the monument boundaries. Alternative 5 would continue to offer visitor experiences similar to those presently available, but would expand, pave, and upgrade parking areas and roads, and/or add facilities to reduce visitor congestion.

The FEIS/GMP in particular evaluates the environmental consequences of the proposed action and the other alternatives on the prairie dog (a candidate for listing as threatened by the Fish and Wildlife Service), wetlands, floodplains, ethnographic and historic resources, visitors' experience of monument resources, visitor access and freedom to go at one's own pace, access to orientation and interpretation, visitor safety, businesses and neighbors, and local and regional economy.

Dated: December 7, 2001.

R. Everhart,

Acting Director, Intermountain Region, National Park Service.

BILLING CODE 4310–70–P

DEPARTMENT OF THE INTERIOR

National Park Service

Valley Forge National Historical Park General Management Plan, Environmental Impact Statement

AGENCY: National Park Service, Department of the Interior

ACTION: Notice of Intent to prepare an Environmental Impact Statement for the Valley Forge National Historical Park General Management Plan.

SUMMARY: Under the provisions of the National Environmental Policy Act, the National Park Service is preparing an Environmental Impact Statement for the Valley Forge National Historical Park General Management Plan. This Environmental Impact Statement will be approved by the Northeast Regional Director.

Valley Forge National Historical Park was authorized by Congress, Public Law 94–337, on July 4, 1976. As required, a General Management Plan was prepared and released in September 1982. NPS policy requires that such plans be prepared every 15–20 years. The 1982 plan has numerous deficiencies and left the park without appropriate management tools for resources and recreational use.

The park lies at the center of the wealthiest and most urbanized region of Pennsylvania, just beyond Philadelphia. Its visitation is mostly regional, and it is treasured more as an outstanding recreational and open space resource than as a cultural resource. Its 3400 acres lie in two counties and five municipalities; each jurisdiction has a distinct governance, planning, and zoning structure. The GMP process will begin in FY 02. It will address the following:

- The public's lack of understanding and appreciation for the cultural resources and values of the park, and of the park's mission;
- The need for consensus on defining and managing recreational use in the park;
- A strategic approach to management of the park's cultural resources, including landscapes, earthworks and structures;
- Mitigation of pressures on the park resources resulting from rapid residential and commercial development of areas surrounding the park; and
- Strategies for appropriate partnership opportunities that can enhance the park's visitor services.

A scoping meeting will be scheduled, and notice will be made of the meeting through a broad public mailing and publication of meeting notices in local newspapers. A newsletter introducing the project to the public will be done. Copies of the newsletter will be available by request to the Superintendent, Valley Forge National Historical Park at the phone number below or by email to *VAFO_Superintendent@nps.gov.*

FOR FURTHER INFORMATION, CONTACT: Contact Superintendent, Valley Forge National Historical Park, 610–783–1000 or at *VAFO_Superintendent@nps.gov.*

Dated: January 11, 2002.

Marie Rust,

Regional Director, Northeast Region.

[FR Doc. 02–6609 Filed 3–20–02; 8:45 am]

BILLING CODE 4310–70–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Clean Air Act

Under 28 CFR 50.7, notice is hereby given that on March 13, 2002, a proposed Consent Decree in *United States* v. *Boise Cascade Corporation,* (Civil No. CV 02–311ST), was lodged with the United States District Court for the District of Oregon. The Consent Decree resolves claims on behalf of the United States Environmental Protection Agency ("EPA") and the State of Louisiana against the Boise Cascade Corporation ("Boise Cascade"). The Complaint, which was filed simultaneously with the lodging of the Decree, alleged violations of the Prevention of Significant Deterioration ("PSD") requirements of Part C of the Clean Air Act (the "CAA"), 42 U.S.C. 7470–7492, and the regulations promulgated thereunder at 40 CFR 52.21 (the "PSD Rules") at eight plywood and particle board plants operated by Boise Cascade.

Under the Consent Decree, Boise Cascade is required to install state-of-the-art air pollution control equipment over the next three years at its Medford and Elgin, Oregon operations, and the Florien and Oakdale plants in Louisiana. In addition, the company must select one of three pollution control options to reduce volatile organic compound emissions (VOCs) from its particle board facility in Island City, Oregon. The company will spend an estimated $15 million to implement these compliance measures. The company will also pay $4.35 million in civil penalties and, under the settlement, Boise Cascade will be installing another $2.9 million in supplemental controls to reduce emissions at the Yakima and Kettle Falls, Washington plants, and to control certain units at the Medford, Oregon plywood facility. The state of Louisiana joined in the settlement and will receive a $250,000 share in the penalties.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, P.O. Box 7611, U.S. Department of Justice, Washington, D.C. 20044–7611, and refer on its face to *United States* v. *Boise Cascade Corporation,* D.J. Ref. 90–5–2–1–06414.

The Consent Decree may be examined at the Office of the United States Attorney, District of Oregon, 1000 SW. Third Ave., Suite 600, Portland, OR 97204–2902, and at EPA Region 10, Office of Air Quality, 1200 Sixth Avenue OAQ–107, Seattle, Washington. A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, D.C. 20044–7611 or by faxing a request to Tonia Fleetwood, fax no. (202) 514–0097, phone confirmation number (202) 514–1547. In requesting a copy, please enclose a check in the amount of $9.50 (25 cents per page reproduction cost) payable to the U.S. Treasury. The check should refer to *United States and the State of Louisiana* v. *Boise Cascade Corporation,* D.J. Ref. 90–5–2–1–06414.

Robert Maher,

Assistant Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF LABOR

Employment Standards Administration

Proposed Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Employment Standards Administration, Office of Workers' Compensation Programs (OWCP) is soliciting comments concerning the following proposed collections: (1) FECA Medical Report Forms and Claim for Compensation (CA–16b, CA–17b, CA–20, CA–1090, CA–1303, CA–1305, CA–1306, CA–1314, CA–1316, CA–1331, CA–1332, CA–1336, OWCP–5a, OWCP–5b, OWCP–5c, and CA–7); and (2) Rehabilitation Action Report (OWCP–44). A copy of the proposed information collection requests can be obtained by contacting the office listed below in the addressee section of this Notice.

DATES: Written comments must be submitted to the office listed in the addressee section below on or before May 20, 2002.

ADDRESSES: Ms. Patricia A. Forkel, U.S. Department of Labor, 200 Constitution Ave., N.W., Room S–3201, Washington, D.C. 20210, telephone (202) 693–0339, fax (202) 693–1451, EMail pforkel@feix2.dol-esa.gov. Please use only one method of transmission for comments (mail, fax, or e-mail).

SUPPLEMENTARY INFORMATION:

FECA Medical Report Forms (CA–16b, CA–17b, CA–20, CA–1090, CA–1303, CA–1305, CA–1331, CA–1332, QCM letters, OWCP–5a, OWCP–5b, OWCP–5c), and Claim for Compensation (CA–7)

I. Background

The Federal Employees' Compensation Act (FECA) provides for the payment of benefits for wage loss and/or for permanent impairment to a scheduled member, arising out of a work related injury or disease. Before compensation may be paid, the case file must contain medical evidence showing that the claimant's disability is causally related to the claimant's federal employment. As a particular claim ages, there is continuing need for updated information to support continuing benefits. The FECA Medical Report Forms collect medical information from physicians which is necessary to determine entitlement to benefits under the Act. Form CA–7, Claim for Compensation, requests information from the injured worker regarding pay rate, dependents, earnings, dual benefits, and third-party information. This information collection is approved by the Office of Management and Budget for use through August 2002.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

The Department of Labor seeks approval of this information collection request in order to carry out its statutory responsibility to compensate injured employees under the provisions of the Act. The OWCP has carefully reviewed usage of these forms and has determined that three forms formerly included as part of this OMB clearance number, (CA–1306, CA–1314, and CA–1316,) have not been used in the past year and are obsolete. These forms have been eliminated. The CA–1336 formerly approved as part of this information collection request has been replaced by the QCM Letters. In addition, the CM–1090, the OWCP 5a, 5b, and 5c have been revised.

Type of Review: Revision.

Agency: Employment Standards Administration.

Title(s): Claim for Compensation, FECA Medical Reports.

OMB Number: 1215–0103.

Agency Number(s): CA–16b, CA–17b, CA–20, CA–1090, CA–1303, CA–1305, CA–1331, CA–1087, QCM letters, OWCP–5a, OWCP–5b, OWCP–5c), and Claim for Compensation (CA–7).

Affected Public: Individuals or households; businesses or other for-profit; Federal government.

Frequency: As needed.

Form	No. of respondents	Average minutes per response	Burden hours
CA–7	400	13	87
CA–16b	130,000	5	10,833
CA–17b	60,000	5	5,000
CA–20	65,000	5	5,417
CA–1090	200	10	34
CA–1303	2,000	20	667
CA–1305	10	20	3
CA–1331	200	5	17

VOL 67 ISS 55 MR 21 2002 UMI

Form	No. of respondents	Average minutes per response	Burden hours
CA–1332	200	30	100
QCM letters	1,000	5	83
OWCP–5a	7,000	15	1,750
OWCP–5b	5,000	15	1,250
OWCP–5c	15,000	15	3,750

Total Responses: 286,010.

Estimated Total Burden Hours: 28,991.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintenance): $105,824.

Rehabilitation Action Report (OWCP 44)

I. Background

The Office of Workers' Compensation Programs (OWCP) administers the Federal Employees' Compensation Act. Section 8104(a) of the Act provides that eligible injured workers are furnished vocational rehabilitation services. The costs of these services are paid from the Employees' Compensation Fund. The Rehabilitation Action Report (OWCP–44) is submitted by a rehabilitation counselor to report transition periods in the vocational rehabilitation process and to request prompt adjudicatory action. The form gives prompt notification of key events requiring action in the vocational rehabilitation process. The form is currently approved by the Office of Management and Budget OMB for use through August 2002.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

The Department of Labor seeks an extension of approval to collect this information in order to gather information to enable OWCP to make timely, informed decisions about rehabilitation services for an injured worker. There is no change to the form since the last approval.

Type of Review: Extension.

Agency: Employment Standards Administration.

Title: Rehabilitation Action Report.

OMB Number: 1215–0182.

Agency Number: OWCP–44.

Affected Public: Businesses or other for-profit; individuals or households.

Frequency: On occasion.

Total Respondents: 7,000.

Time per Response: 30 minutes.

Estimated Total Burden Hours: 3,500.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operation/maintenance): $0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: March 15, 2002.

Gary D. Thayer,

Director, Division of Financial Management, Office of Management, Administration and Planning, Employment Standards Administration.

[FR Doc. 02–6866 Filed 3–20–02; 8:45 am]

BILLING CODE 4510–CH–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of existing safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Solid Rock Construction, Inc.

[Docket No. M–2002–007–C]

Stamper Technical Service, Inc., 45 Stamper Lane, Pikeville, Kentucky 41501 has filed a petition for Solid Rock Construction, Inc., No. 1 Mine (I.D. No. 15–16643) located in Pike County, Kentucky, to modify the application of 30 CFR 75.503 (Permissible electric face equipment; maintenance) and 30 CFR 18.41(f) (Plug and receptacle-type connectors). The petitioner proposes to use permanently installed, spring-loaded locking devices to secure battery plugs on mobile battery-powered machines to prevent unintentional loosening of the battery plugs from battery receptacles, and to eliminate the potential hazards associated with difficult removal of padlocks during emergency situations. The petitioner asserts that using padlocks to secure battery plugs would result in diminution of safety to the miners.

2. Aaron Coal Company, L.L.C.

[Docket No. M–2002–008–C]

Stamper Technical Service, Inc., 45 Stamper Lane, Pikeville, Kentucky 41501 has filed a petition for the Aaron Coal Company, L.L.C., No. 2 Mine (I.D. No. 15–17813) located in Pike County, Kentucky, to modify the application of 30 CFR 75.503 (Permissible electric face equipment; maintenance) and 30 CFR 18.41(f) (Plug and receptacle-type connectors). The petitioner proposes to use permanently installed, spring-loaded locking devices to secure battery plugs on mobile battery-powered machines to prevent unintentional loosening of the battery plugs from battery receptacles, and to eliminate the potential hazards associated with difficult removal of padlocks during emergency situations. The petitioner asserts that using padlocks to secure battery plugs would result in diminution of safety to the miners.

3. M & H Coal Company

[Docket No. M–2002–009–C]

M & H Coal Company, P.O. Box 559, Hegins, Pennsylvania 17938 has filed a petition to modify the application of 30 CFR 75.1100–2(a) (Quantity and location of firefighting equipment) to its Mercury Slope Mine (I.D. No. 36–01920) located in Schuylkill County, Pennsylvania. The petitioner requests a modification of the standard to permit use of only portable fire extinguishers to replace existing requirements where rock dust, water cars, and other water storage equipped with three (3) ten quart pails is not practical. The petitioner proposes to use two (2) fire extinguishers near the slope bottom and an additional portable fire extinguisher within 500 feet of the working face for equivalent fire protection for the Mercury Slope Mine. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

4. White County Coal, LLC

[Docket No. M–2002–010–C]

White County Coal, LLC, 1525 County Road 1300 N, P.O. Box 457, Carmi, Illinois 62821 has filed a petition to modify the application of 30 CFR 75.701 (Grounding metallic frames, casings, and other enclosures of electric equipment) to its Pattiki II Mine (I.D. No. 11–03058) located in White County, Illinois. The petitioner proposes to use a 200KW, 480-volt, diesel powered generator set with an approved diesel drive engine to move equipment in, out, and around the mine and to perform work in areas outby section loading points where equipment is not required to be maintained permissible. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

5. Hobet Mining, Inc.

[Docket No. M–2002–011–C]

Hobet Mining, Inc., P.O. Box 305, Madison, West Virginia 25130 has filed a petition to modify the application of 30 CFR 77.206(c) (Ladders; construction; installation and maintenance) to its Beth Station No. 79 Preparation Plant (I.D. No. 46–05398) located in Boone County, West Virginia. The petitioner proposes to use a SAF–T–CLIMB fall prevention system on its counterweight tower structure for the overland system at the Beth Station No. 9 Preparation Plant in lieu of using a vertical ladder. The petitioner states that the counterweights are located inside the framework of a structure that is approximately 30 feet high, that the use of the SAF–T–CLIMB system would ensure the safety of individuals working around the counterweights, and that the SAF–T–CLIMB system would be installed so that it would be in compliance with OSHA regulations 29 CFR 1910.27. The petitioner asserts that application of the existing standard would result in a diminution of safety to the miners.

6. Energy West Mining Company

[Docket No. M–2002–012–C]

Energy West Mining Company, P.O. Box 310, Huntington, Utah 84528 has filed a petition to modify the application of 30 CFR 75.350 (Air courses and belt haulage entries) to its Deer Creek Mine (I.D. No. 42–00121) located in Emery County, Utah. The petitioner requests that Item IV(d)(3) & (4) of the proposed decision and order for its previously granted petition for modification, docket number M–1999–044–C be amended to allow the use of a non-approved diesel grader in the two-entry section with miners inby for maintenance purposes only. The petitioner asserts that the specific terms and conditions listed in this petition would be met before implementing its proposed amendments and that the proposed alternative method would provide at least the same measure of protection as the existing standard.

7. Snyder Coal Company

[Docket No. M–2002–013–C]

Snyder Coal Company, 66 Snyder Lane, Hegins, Pennsylvania 17938 has filed a petition to modify the application of 30 CFR 75.1100–2(a) (Quantity and location of firefighting equipment) to its N & L Slope Mine (I.D. No. 36–02203) located in Northumberland County, Pennsylvania. The petitioner requests a modification of the standard to permit use of only portable fire extinguishers to replace existing requirements where rock dust, water cars, and other water storage equipped with three (3) ten quart pails is not practical. The petitioner proposes to use two (2) fire extinguishers near the slope bottom and an additional portable fire extinguisher within 500 feet of the working face for equivalent fire protection for the N & L Slope Mine. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

Request for Comments

Persons interested in these petitions are encouraged to submit comments via e-mail to *comments@msha.gov*, or on a computer disk along with an original hard copy to the Office of Standards, Regulations, and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Room 627, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 22, 2002. Copies of these petitions are available for inspection at that address.

Dated at Arlington, Virginia this 15th day of March 2002.

Marvin W. Nichols, Jr.,

Director, Office of Standards, Regulations, and Variances.

[FR Doc. 02–6796 Filed 3–20–02; 8:45 am]

BILLING CODE 4510–43–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–029]

Yankee Atomic Electric Company, Yankee Nuclear Power Station (ROWE); Exemption

1.0 Background

The Yankee Atomic Electric Company (YAEC or the licensee) is the holder of Possession Only License No. DPR–3, which authorizes possession and maintenance of the Yankee Nuclear Power Station (YNPS or plant). The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (NRC or the Commission) now or hereafter in effect. The facility is a permanently shutdown pressurized-water reactor (PWR) currently in the process of decommissioning and is located on the licensee's site in Franklin County, Massachusetts.

On February 27, 1992, the licensee submitted written certifications to the Commission that it had decided to permanently cease operations at YNPS and that all fuel had been permanently removed from the reactor. The NRC in a license amendment dated August 5, 1992, modified License No. DPR–3 to a Possession Only License (POL). The license is conditioned so that YAEC is not authorized to operate the reactor and fuel may not be placed in the reactor vessel, thus formalizing the YAEC commitment to permanently cease power operations. The YNPS spent nuclear fuel is currently being stored in the spent fuel pool, which is protected by a physical protection system meeting the requirements of 10 CFR 73.55, "Requirements for physical protection of licensed activities in nuclear power reactors against radiological sabotage," with exemptions as previously issued by the NRC. To complete the plant site decommissioning process, the spent fuel will be removed from the spent fuel pool and transferred to an onsite independent spent fuel storage installation (ISFSI) for interim storage.

Pursuant to 10 CFR part 72, "Licensing Requirements for the Independent Storage of Spent Nuclear
